Achievement

Only a few years ago a successful crossing of the Atlantic was in itself an achievement. To day giants of the air take the Atlantic in their stride as an everyday routine. In other spheres 1ao science is continually contributing to modern progress.

The impartant role photography is playing to day in Industry and in Science owes much to the many valuable discoveries made in the research laboratories of Ilford Limited

The recent introduction of Kryptascreen the X ray paper incorparating its own intensifying screen will gafar to simplify Industrial X ray technique Multigrade the variable contrast paper marks an epoch making advance in better and more ecanomical print praduction

Far mare than sixty years sensitised photographic materials manufactured by liford Limited have been renawned the warld aver for their cansistent high quality

`What price Sympathy?

His building was destroyed by fire the flames devoured his goods and furniture it was too big a loss. All his friends expressions of sympathy were of no avail. But The Advance Insurance Company made good the total loss by sending him a cheque. What a relief! Be wise in time. Take out a Fire Insurance Policy with the ADVANCE it settles all claims promptly and gives every facility to policy holders.

A PROFITABLE INVESTMENT

Money is easy and cheap it requires investment investment is so varied and markets so fluctuating that one can hardly be confident about a definite return insurance Policy is the best medium of investment its value always increases and it guarantees a definite return. Not only that it also provides against odds and old age. It offers absolute security coupled with safety and soundness of gift edged investment. The Commercial insurance Company offers policies which suit all purses and pockets and afford good investment—medium. It entails no obligation to get advice from the Company for all your insurance needs.

MYSORE STONEWARE

Salt glazed stone ware whether in the form of pipe or otherwise is the only material that needs no water proofing or protection and

can be used to protect sewers from the corrosive action of acids and gases in the sullage

This is borne out by facts drawn from ancient times. Ac Nippur one of Babylonia's ancient cities a few clay drain pipes and T fittings removed after 6400 years are as good as

new In Chalde the kingdom Nimrod the clay Pip removed after a peri of 5700 years are as perfect when they were laid

This is the material we supply! preservation of health and sain tion of modern cities and towns. They imposed a keen test on our productive. We claim that we were equal to sever of the demands. But God be praised at conclusive victory we can confiden hope for a lasting and firm world pea. We shall soon go all outto meet; needs of cities towns and the public

From War into Peace

It isn't always easy to improve what most men already consider unimprovable. But war is a wonderful forcing-ground for technical achievement. And in six years' exacting precision work for the British Government, in the making and machining of accurate and highly-stressed parts and mechanisms to finer limits than we ever used before, we have added a new chapter to our volume of experience.

We are proud to have played a part in the war-effort, and we can honestly admit we are grateful for what we learnt

It is that experience which we are now embodying in the post-war Gillette products we shall be announcing at some future date. Moreover, our designers and engineers have not let the grass grow under their feet in exploring the new materials and processes which the war has discovered. It will be worth your while to KEEP YOUR EYE ON GILLETTE.

The Famous Cine Laboratory and Studios a gigantic Rs I 00 00 000 enterprise is the largest of its kind in the East and are expected to have a yearly output of 15 36 00 000 feet of film

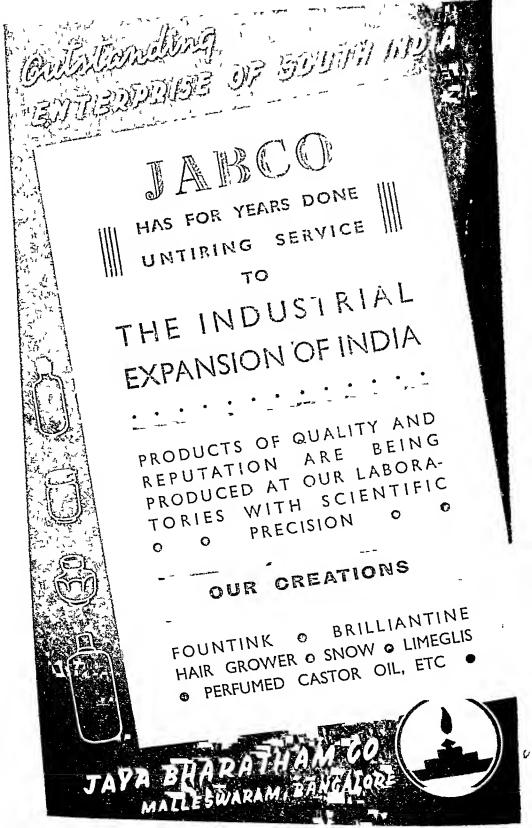

The famous Cine Laboratory remedies the present lack of a fully equipped automatic film processing laboratory in India and will be a boon to India s Film Industry

Seth Shirazali Hakim Proprietor of Famous Cine Laboratory and Studios who conceived the idea of building and equipping the largest Cine Laboratory and Studios in the East

The Laboratory is the first amongst post war industrial developments in India and is expected to go a long way to improve film finishing technique in India Indeed it will bring the Hollywood film processing technique to India 5 film industry and should put an end to technical imperfections in Indian cinema films

The house of Famous Cine will also have an Air Conditioned Studio complete with make up and rest rooms and for the first time in India there will be a fully air conditioned Studio floor to bring Holly wood standard of comfort to film stars and technician

THE HOUSE OF MOTWANE

CROUI of flourishing companies with a wide reputation for reliability and service to the public i the proud achievement nf the Moturnes in the short n riod of 35 years

The business was founded hy the late G C Motwant who started as a telegraph North signaller on the Western Railway on R a month and soon rose to the position of Inspection Tele which a job on the Rulway offered young Notwane was soon to prove insufficient for

Late Mr G C M tashe

such an enterprising spirit. He gave it up in 1000 and started on a business career and The Lastern Flectric & Teachin Co Sind was the result. Motwane's natural aptitude for business and his shrewdness soon developed the business and he moved the Headquarters of his offices to the more important centre of Karachi in 1912 closing the Sukkir office in 1013. The continued and rapid growth of the concern necessitated uponing branches in Labore and Amnisar and ultimately found him opening up in Bomba, in 1919 where he established another company also in 1919 under the name and style of The Chicago Telephone Supply Company. The was guite a landmark in Mr. Motwane's career as from then on the Bombay business absorbed all his time and energy and in order to concentrate on it. he closed all his mothers branches.

19 6 saw Mr. Motwane entering the general engineering liusiness and the name of the parent company started at Sukkur was changed to The Eastern Flectric & I ngineering Co which began to run parallel to The Chicago Telephone Supply Co the latter being changed to The Chicago Telephone & Radio Co I td in 1936 with brunches at Calcutta Lucknow Lahire New Delhi and a City Brunch at 4°

Lamington Road Bombay

The Khairpur Mir's Flectric Supply Co was purchased by Mr Motware in 1934 and a new money lending and banking concern was started in 1940 under the name of Granchanil Chandiimal

The House of Motwanes was however to lose the driving force of Mr Motwane in 1943 as he died in that year full of years and nehieve ment. Hi mantle has fallen on his two sons V. G. Motwane and N. G. Motwane who are now carrying on the family business. They have recently floated The Motwane Radio Manufacturing Co Ltd with a capital of Rs 50 lakhs for the manufacture of radios and allied goods in India which promises to develop into a unique establishment and an important contribution to India's industrial advancement

ZINDADAD -Longlive

ZULM ZULUM ZALUM - Tyranny oppression

Wanners and Customs.

Next to the complexion of the reopie, which varies from fair to black the tourists attention in India is drawn by their diess and personal decoration. In its simplest form a Hindu s dress consists of a piece of cloth round the loins. Many an neete, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the polico al lowed him to The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the walst and reaching to the arkles Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to day within the precincts of eivilisation and will not meet the tourist s eye Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes or the rich The child Krishua, with all the jewels on his person, is nude in his pictures and images

Dress -The next stage in the evolution of the Hindu dress brings the lolueloth nearly down to the feet On the Malabar coast, as in Burina the ends are left loose in front the greater part of India, they are tucked up belund—a fashion which is supposed to bent the warrior, or one end is gathered up in folds before and the other tucked up belind. The simplest dress for the trunk is a searf thrown over the left shoulder, or round both the shoulders like a Roman toga Under this garment is often worn a cort or a shirt When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the crives the sleeves may be wide, or long and sometimes puckered from the write to the albow. Before Europeans introduced butters Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsoicte. The Mahomedan prefers to button his coat to the left, the Hindu to the right A shawl is theu round the waist over the long cost, and serves as a belt, in which oue may earry money or a weapon if allowed. The greatest variety is shown in the head-dress More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other virieties prevail Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles folded brims, projecting brims long strips of cloth wound round the head or the cap in all possible ways, ingeniuty culminating perhaps in the parrots beak' of the Maratha turban-all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head covering whether the wear is a Hindu, Mahomedan or Parsi, and whether he halls from Poona or Dharwar, Alunedabad or Bhavnagar

Pashion Variations - Fashions often vary with elimite and occupation the Bombay henerman hay wear a short coat and a cap, and may carry a watch in his pocket yet as he must work for long hours in water, he does

of the cold north west wears loose baggs trousers, a tail head dress befitting his stoture and covers his cars with its folds as if to keep off cold The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respect-Many well to do Indians wear Luropean dress at the present day, or a compromise between the Indian and Luropean costumes. notably the Indian Christians and Parsia dress, and many have not borrowed the 1 uropean collar and euffy. The majority of the people do not use shoes those who ean aford their wear sandals, slippers and shoes, and r iew cover their feet with stockings and boots after the European fashlon in public

Women's Costumes —The usual dress of a woman consists of a long piece of cloth tied round the raist, with folds in front, and one end brought over the shoulder or the head The folds are sometimes drawn in and tueled up behind In the greater part of Indla women wear a bediee on the Mainhar coast many do not, but merely throw a piece of cloth over the breast In some communities petitieats or drawers, or both are worn Many Musselman ladles wear gowns and scarfs over them The vast majority of Mahomedan women are gosha and their dress and persons are hidden by a veil when they appear in public a few converts arom Hinduism have not borrowed the custom In Northern India Hindu women have generally adopted the Mussalman practice of seelusion In the Dekhan and in Southern India 'they have not

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a eliignon, by most women Among high caste Hindu widows sometimes shave their heads in imitation of certain asceties, or monks and nuns Hindu men do not, as a rule, completely shave their heads. Mahomedans in most cases do The former generally remove the hair from a part of the head in front over the temples, and near the neek, and grow it in the centre, the quantity grown depending upon the finey of the individual Nowadays many keep the hair cropped in the European fashlon, which is also followed by Parsis and Indian Christians Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere, where the Mahomedan influence was paramount in the past Parsis and Christians follow their individual inclinations Hindu ascetics, known as Sadhus or Balragia as dis tinguished from Sanyasis, do not clip their halr, and generally coul the uncombed hair of the head into a crest, in imitation of the god Shiva

Hindu women wear more ornaments than others of the corresponding grade in society Ornaments bedeek the head, the cars, the nose, the neck, the arms wrists, flugers, the waist until motherhood is attained, and by some even later—and the toes Children wear Each community affects its peculiar aokicts not cover his legs, but suspends only a colonred ornaments, though multation is not uncommon hereinef from his wallt in front. The Pathan Serpents with several heads, and flowers, like the most popular object of representation la gold or silver

Caste Marks - Caste marka constitute a mode of personal decoration peculiar to Hindu especially of the higher castes The simplest mark is a round spot on the forehead It represents prosperity or joy and is omitted is mourning and on fast days. It may be red mourning and on fast days it may be red or y Howsha ha when it is made with ground sandaiwood paste. The worshippers of 18thnu draw a verticel line across the spot and as Lakshmi is the goddess of prosperity it is said to represent her. A more elaborate mark on the forehead has the shape of U or V generally with the central line sometimes without it and represents Vishnus foot. The worship pers of Shiva adopt horizontal lines made with andalwood paste or ashes Some Valshnavas amaginous paste of sames dome valendars at attempt that temples near the corners of the eyes with figures of Vlahnus couch and disc Other parts of the body are also similarly marked. The material used is a kind of yel lowish clay. To smear the arms and the clest with sandalwood paste is a favourite kind of tollet especially in the hot season Beade of Tulsi or secred Basil and berries of Pudraksha

1

the lotus the rose and the champaka are among respectively. The Lingayats a Shaiva sect su pend from their necks a metallic ca ket containing the Lings or phallus of their god Bairagis ascettes besid s wearing Rud aksha rosaries round their necks and matted har samear their bodies with a bes Religious mendicants suspend from their necks figures of the gods in whose name they beg of co tries may also be seen round ti cir neck Mustim dervishes sometimes carry percock s feathers

Hindn women mark their foreheads with a red anot or horizontal line High easte widows ara forbidden to exhibit this eign of happiness nor may they deck themselves with flowers or prnaments Flowers re worn in the chimon Hindu women smear their faces arms and feet aometimes with a paste of the the so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a aubstitute for the blood of the guimal laughtered for the purpose in former times In many other cases this colour has no such association. The Mu lim dervish affects green the blkh Akall is fond of blue the S nyasi adopts o ange for his robe and no reason can towerer a construct strung together are worn adopts o ange for his robe and no reason round their necks by Valshnavas and Shalvas be asslined with any degree of certal ty

Indian Names

The perconal name of most Hindra denotes a materia object colour or quality an animal restriction or a delty. The unreducated a state of the colours of the semption with monorine titles are a possible that In early society the bell f in the rebits of departed kinamen lent popularity to this practice hothing could be more natural than to call a man white, black of red gold of eliver gem diamond ruhy pearl, or nerely atone small or tall weak or attong a flor i snake a parrot or a dog and to name a soman after a flower or a creeper Thus to Aka a few namea? on the epits Pandn m na white, and so does Arjana Krish a blach Dhima terrible Nakula a mougoose Shun ha adog chuka a parrot Shringa a horn Among the names previous contings a norm Among the names previous at the pless that day Hiss is a diamond Ratina or Ratina a fewel So nor Chinna good Velli or Belli in the Dravidian anguages. mesns white metal or aliver ften called after the days of the week on is then called after the dars of the week on which they were born and hence they beat the names of the seven bearenly bodits or cheract. When they bedit and the names of the Hindu defittes they such name of the of childustons it. It doubtlet whether the Allmidts ever venture of assume the names of the dreaded spirits word, i.e. by them. To pronounce the name

The personal name of most Hindus denotes; of a devil is to invite him to do harm. If the splits sometims bear the n nies or human belgs the reason scena to he tlat they were or mally hum a

High caste practices -The high easte often the name of a deity is on h s lips the more merit he carns Therefore he delibe rately names his children after his gods and goddesser as that he may have the oppor tunity of pronouncing the holy names as fre quently as possible. These are also sonorous and picturesque Shiva is happy thinn is a pervader Govinda is the cowherd Krishna. a pervader tovinus is vie would a like the Keshava has fine half. R mals a delighter Lakshmana is lucky hura ana produced the first living belg on the primeral waters first living bel g on the primeval waters Ganesha is the Lord of Shiva's ho ts Dinakara Ganesha is the Lord on Barra and day Sub ah is the inminary that mases the day Sub ah is the inminary that mases the day Sita is a monya is a broth r of Ga esha Sita is a furrow Savitri aray of tight True a star Radha prospe ty Knimi i is she of golden orname ts Bhama of th glowing heart Shiya and Vishuu has e th got at least n thou aand names and th y may be free y drawn npon and paraphrased in naming one a child en and the whole Hindu pantheon is as crowded as it is large Family names -When a person rises in

Family names when a person have a importa ca, he adds to his person I hame a family or east name. It was once the rule that the title Sharma might be added to n Brahmana name, Varma to a K hatriyn a Gnpta to a Val hyas, and Dasa to a shudra s This rule is fairly well observed in the case of the first two titles, but the meaning of the other two has changed Dasa means a state or servant, and the proudest Brahman cannot or servant, and the products braining cannot disdain to call himself the servant of some god. Thus, although Kalldas, the famous poet, was a Shudra, Ramadas, the famous guru of Shivail, was a Braining. The Vaishnivas have made this fashion of tailing oneself a servant of some god exceedingly popular, and in Western India high caste Hiedes of this sect very commonly add Das to their larmes. The Brahmans of Southern India add Alyer or Alyangar to their names. Shasti, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal into Mukern, are among the titles indicative of the Brahmanical profession of studying and teach-ing the sacred books. Among warlike classes, like the Rapputs and Sikhs, the title Singh (lion) has become more popular than the ancient Varma. The Sindhi Mai, as in Gldumal. Varma The Sindhi Mal, as in Gldumil, means brave and has the same force Raja changed into Rava, Rao and Rai was a polltical title, and is not confined to any caste The Benga'i family names, like Bose and Ghose, Dutt and Mitra, Sen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed Shet, chief of a guild or a town, becomes Chetty, a Vaishya title, in Southern India Mudaliyat and Nazudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers Nayar and Menon are the titles of important castes in Majabar Ram, Lai, Nand, Chand, are among the additions made to personal names in Northern India Suffixes like II, as in Rampi or Jamshedil, the Kanarese Appa, the Telagu Garu, the feminine Bai or Devl, are bonorific Prefixes like Babu, Baba, Lala, Sobhi, Pandit, Raja, and the Burmese Maung are also honorific

Professional names -I amily names sometimes denote a profession in some cases they might have been conferred by the old rulers Mehra, kulkarai, Deshpande, Chitnavis, Mahai navis are the names of offices held in tormer times One finily name may men a flour sefler, another a can eller, and a third a liquor seller. To insert the father's name between one e personal and the family name to s common prietice in Western India rue elsewher. When a family comes from a certain piece, the suffix hir or 'malleh' is added to the name of the place and it makes a family surnains in Western India Thus we may have Chiphrniars and Suratmailans, or without these air to ve may have Bhaynagris. Malabaris and Bilinorias, as among Parsis Thus Vasudey, Pandurang Chipiunkar would be a Hindu, whose personal name is lasudes, his father's name Pindurang, and family name derived from the village of Chiplun, is Chipiunkar In Southern India the village name precedes the personal name The evolution of Musalman names follows the same lines as Hindu names But Muslims have no god or goddesses, and their names are derived from their religious and secular listory. These names and titles are often as long and picturesque as Hindu appellations. The agnomens Baksh, Din, Ghulam, Khwaje Lakir Kazi, Munshi, Sheikh, Syed, Begum, Bibi and others, as well as honoring additions like Khan have meanings which throw light on Muslim customs and institutions. The Parsis also have no gods and goddesses, and their personal names are generally borrowed from their sicred and secular history. Their surnames frequently indicate a profession or a place, as in the cases of Hindus in Western Indi Batilwallah, Rendymoney, Contractor, Sakiatwallah Adonwallah and others lil o them are tell tale, names

Beginnings of Classic Art - lifter the fall [Through the dir front with the fall] beginnings of Classic Art - lifter the fall [Through the dir front with the fall] Beginnings of Classic Art—After the fall of the Marrya Limple the Sumas ruled in the state of the Marrya Limple the Sumas ruled in the North the Andhas in the South (2nd—1st century BC). The robust sculpture of cast restages is made pilithle by a penetratury flowly rivthm. The character is voluptured orms of Indean art through visited pull at the sape of life male their appearance in the sape of life male their appearance in the sape of life Bharma tupically a visited by the first of the master of the Bharma tupically a visited by the color of the sape of the Bharma tupically a visited by the volume of the color of the sape of the Bharma tupically a visited by the color of the same of the Bharma tupically a limit of the life of the same of famo is centres he I harhut Smelil Budh Gava, Mathura and Patahpotra (Panas Phaja In th Western thits and Van In South India Sent tree In 20 A D third 123 Sent pure and relations of the india probably pure surviving political version it to illustrate relations technic on the rads after and which was to be the domain In relations technic on the which had become the contres of worship and on the monastern in the intra of Buddhi to appear are distinct. Western Ghits and Venat In South India centres of worsing and in the monastructural tall chapets attached to them. In the relief depicting Buddha's life or that of his previous meannations (jatalas) I uddha is never presented in human form but his presence Is shown by symbols such as the tree of call liten ment his footprints the throne on which he sat or the platform on which he used to will This, fundamentally un Indian principle Indl cates the try in component of Indian art while the busy int pissionate figures of yalshis on the Sauchi gites are pre Budd hist in spirit and in the true Indian tradition The wealth of form and movement the inven tiveness of composition and the controlled dv namism of this early art ushers in the classic cra

Kushan and Andhra Art—The first and second centuries A D saw the power of the Kushan empire establishing itself in the North West and North of India while the Andhris while the South of the electrons of the India while the South of the electrons of the India while the South of the electrons of the India while the South of the electrons of the India while the South of the electrons of the India while the South of the electrons of the India while the South of the Electrons of the India while the South of the India while the South of the India while the India while the South of the India while while the India while while while while while while while while while wh ruled the South. The classic progress shows itself in increased plastic penetration of large size semblares and in greater visity. The centre of artistic creation is Withira (Mutti) Linda hism is still the predominant them. Mitimira continuation of the Miurvan tradition of large size stone flames, overcoming bulk and erude ness in spirited modeling. Frankly sensions but in a different way from the mides of the Greek schools are the temple figures of Mathura and other centres. Nost probably originating from aboriginal symbols of fertility, these graceful if voluminous nymplis fix for centuries to come, the round breasted narrow wilsted, full hipped ideal of female beauty for the Indian In the South the stupa of Amainvati ins yielded a wealth of magnificent sembture More fluid mellow and exuberant than the North it comes nearest to classic perfection

Early Fresco Paintings —Belonging to the flist century BC, the flesco paintings in cave 9 and 10 in Ajanta (Nizani's Dominions) are the callest well preserved Indian paintings though still earlier work survives in several 7th century other localities The luch level of competence In Ajanta proves a long but lost, lustory of this art. It in to reliefs in Builint and Sanelin, these carly paintings have already the greeful outlines of later work.

Classic Art of the Gupta Age

Sarnath Aparta Anomado I and off Purtule Hindus norms to the foreign luin this prior in I the me t po srul fruh manical ar vir produced all over let a e pectula la Dorrita Badarit and bot (Decen) Edurated (nor for hi) to there of many other place. Styll the difference of Western and lastern chools to be roce pronounced although the homolast of indian left not broken. The art of the Guerra period can be t be directored by the well spiritual. The fatent natural m of early periods a now overcome or have ad to the spiritual representations of superhuman certain tary or co much powers. The human floure to only the vehicle of trun cendental forces. The one the venere of trip cement if lottes. The artist misters ever mood from the lytel to the terrible. The Puddhy hungs of Mathers and Struth are in their clade simplification and perfection of modelling in their screwspirituality and alguity amonest the vorids supreme religious images. The boar lucarnation of Vishnu in Udivert is of impressive power which changes promities there to a days as which changes primitive terror to a deep experlence of divine force. The leonography of erentes the Indian Buddin mane in direct the Hinding pantheon is developed during this ige

> (2) Painting - During the sixth and seventh century the Gupta spirit survives in Indian art in spite of the decline and overthrow of the Gupta empire therefore in our classification of styles they are included in Gupta Art The art of fresco pulnting had their reached its zenlth Apanta Bigh (Buddhist) and Badimi (Brili mimeal) are the chief eentres of this art as it survives today, but the Tain paintings of Sittain vasal (Sonth India), the Brahmanical paintings of Immalaipurum and the Singhalese rock pictures of Siguraa (Cevlon) testify to an All India distribution

End of 5th century Siglriva, Cevion

Aganta Caves 16 and 17 6th century Bagh, Badami

Ajunta Cuves 1 and 2 Tirnner Sittanavasal lamuram

All these paintings are mostly narrative in character. The painters depict religious legends Graeco-Indian Art—I rom the first century

the North West of India, the Gandhara country

In easily understandable form making use of
the costume scenery and manners of their own
time. The colours made from minerals, are
bright green, red, brown, yellow, birch and

Is shansism fills Iadian sculpture with unheard of virility. Sweeping movement becomes an expression of force the swelling rounded forms of human or salmal bodies become siven of part up energies. The rock heura reculptures of the control of the art I carried to an extreme is the Kallasanatha temple which an enormous building was carved out of solid rock as a whole

Med val Art. From the 9th and 10th centn les onwards Hladu art conquered every corner of India With wider distribution local schools and styles developed in the course of time without however breaking the unity of Indian art Medieval sculpture was called upon to decorate with stone carvings the in numerable temples that were belag built and to provide ima es for worship in temples and pri vate chapels in stone brouge or wood,

While much of the graadeur of the classical ars surves in medieval sculpture its simplicity and force see gradually lost in an over elaboration of de orati a by work such as fewellery and that focus raphical attributes of delites. The ten day towards spiritualism is accentuated expectally under the inducence of tanine symbol in In the end that demands of longoral

him (Ajanta) The greatest artistic ment of these paintin s lies in their trythrideal flowing outline which indicates the plastic values of so long on which year the constant modelled with closur shading. Per pettive in the western sense was not prown but compositions achieve a surprising legren depth in lian freecoe paintings are not only many the compositions achieve a surprising legren depth in lian freecoe paintings are not only many than the control of the contro palaces of Rajputana all dating from a much panaces of napparana an dating from a macin later time. In Cochin and Travancere many examples of planorate Kerala painting can he found belonging to the 16th 16th century Jafa paintings in Conjectaram of the 17th and 16th century illustrate the close adhalty between medieval mural art and miniature book lilustrations

> Indian Miniature Paint nga -Tho lijumina ting and lijustratiag of religious scriptures was n widespread art in Iadia even if little of it escaped widespread art in Iadia even II little of it seesped destinction with the exception of a large number of Jain manuscripts from Guiperst. The earliest 13th centuries They have highly conven-tional control of the process of the conven-tional control of the process of the conven-grees. The bockground is first red later blue Manuscript illustrations of the Pala period (Bengal I the century) are also known

R is them and Pahari Painting -The middle of the sixteenth century sees the beging of an Indian School of miniature palating in Rajputana of great vitality charm and artistic merit. The early Rajasthani paintings are known as raymalas pictorial representations of musical moods (Rajas). These paintings have an intimate lyrical favour and are full of the loving totim. In the end tha demands of icosogra, likely consistent with the property of the property if they to the find a find order was created and the control of the control. The main control is the control of ready Akbar empto ed Indian artists who under the guidance of Persian mister were put to the tisl of illustrating manuscripts. Under Jehangir and Saaychan Moghal paratha reached its climax. Moghal art is a court art limited in its scope, and overshadow i by the demand for extreme technical perfection. It is individualistic with a clear development of personal styles of different a tiets will have known by name (athing rivel heard of in popular Indian irt) le le llinstritic, and main concerned with the representation of court simular rendering of flowers or infinite. That means it is concerned with appearances and not with moods or pectical feelings as the contemporary Indian worl. But Indian pain ters did not only introduce Indian is Hindu theme into Moghulart, but gradually flowers. theme into Modul art, but griduily flavoured favoured thorough training on Luco, an life it with an Indian spirit. In technical exect Under Mr. W. 1. Glidatone, Solonou a etc. lence, accurate and delleate drawing, observance and taste Mogliul art is unsurpressed. Plic wrong notion that the Mogliul court art was responsible for the revival of punting in India must be given up though a strong influence on Rajasthani and Pahari painting is obvious Under Mohamedan rulers offshoots of Moglaul

Modern Art in India - With the eclipse of medieval powers in India and the arrival of I u topean civilisation the indigenous arts experienced a rapid decline While folk art and crafts survived during the 19th century, the higher forms of indigenous art died out and were replace ed by imported western art, rarely of more thin mediocre quality Art schools were initiated in India on British models in the 19th century

Morbul Punting—Derived from the Tim urid School of miniaturo pointing in Personal Information of the Island pointing under ctrong Personal names of and its start in the first continuous developed into an Indian art if that term can be accepted with reservations. It is much be an elevated to the Island in Indian art if that term can be accepted with reservations. It is much be an elevated for the indian art is that the ment be an elevated for the indian art is that the ment be an elevated for the indian art is i Infortun fess en the received for the first lead to the first lead new tream but exhand the trailing from himself the trailing to the first the first trailing the first trailing of his whools Sant to French to the first trailing to the first trailing to the first trailing trailing to the first trailing tise for each street and the street and the took criminal action of the first and court a large and the street and the street and the street action and the street actions are street. Mr R \ Chilorant | the School treele modellin, and cert in certic

of mural painting was added in which we for The last was fused with Indian decorative princit The School teaches a variety of critis and industrial aris with as stone carving metal worl leather yorl textile design, etc. It has a large commercial art and photographic ection Under Mohamedan rulers offshoots of Moglad while two added by its present principal Wr C art des cloped in different parts of India such as Bijapur, Hyderabad, Almednagar, Lucknow, JP Under Mr Gerrard Interesting madern tendencles developed in printing which seem to indicate a union of contemporary. I property worl with sound Indian traditions

Many art schools liquidly in India in different centres such as Lahore, Dellil, I in I now Benares Shantanketan, Madras, Mysore, Travancore Patna, etc., under the patronase of proximilal governments, State governments or as private institutions. Indian urtists of today strive for new forms of expression which would be in tune with present day life without breaking and attached to the educational system In these the arts of drawing, painting and model ling and certain arts and crafts were taught on the lines of western academic tradition. At the beginning of this century a revival of tradit.

Indian Architecture.

Indian architecture, like Indian sculpture and which marks a definite advance in the treatment painting, is the visible expression of spiritual con ditions in successive phases While the regulre ments of various religious creeds decree and modify the forms of Indlan buildings, the historical development of the architectural art in India is indicated by a gradual progress of constructional types and by the successive usage of different building material such as wood, brick or stone, which is primarily independent of religious domination. The former division of Indian architecture into Buddhist, Jain and Hindu styles is for these reasons not satisfactory and should be replaced by a division based on stylistic evidence. The first comprehensive work, accessible to lay readers, to give a history Indian elements of styles in Indian architecture is Mr Percy | History of Styles—1 history of styles in Brown's Indian Architecture in two volumes Indian architecture must be based on historical

of the subject over Pergusson's Indian and Lastern Architecture which for many years was

considered to be the standard work.
The chief characteristics of Indian architecture, especially in its later stone place, are (a) its use of heavy masses, (b) construction based on vertical not lateral pressure, it without true arches or true domes (c) its plustic treatment and close relationship with sculpture (d) its un developed treatment of space and (?) its spiritual significance and symbolism These features dis tlingulsh Indi in building from most Western types of architecture and from Islamic architecture in India, though the latter naturally contains many

Perhaps the finest embro deep mention may be made only of the levellety works done in gold enamellure. Lahore and Jaipur giving the choicest places. Typical of India is the Increatration of gold and silver with general protocol of the protocol of th Assumir shaws: Carpet making is at home in Northern India Especially under Abbr in the 16th century gorgeous rigs and carpets were made evaquisite in colour and f bric let the finest work from Persia was never equalled

> It has been estimated that there are still million handlooms in India and the industry though depressed by the competition of the por er loom is surviving with part of its wealth of artistic sense and skill

R me he -Worth mentionin are the artistic designs made by the women of India with colour designs made by the women of the water course of their houses as festival decoration. Preserving the age old designs of religious symbolism they are known in all parts of the courtry in a great variety of patterns (and I in Gujerat alpona in Bengal kolam in South India etc)

Ti ere can be no doubt that the skill and artis tic sense of the Indian craftsman is still alive perhaps slumberin A Mr I red H Andrew sald deterioration is not the fault of the crafts man bit of his employer Well directed offici l and private pairon go can do much to save the cultural heritage of the arts and crafts in India Galerat in which the threads are variously dyed industrialisation

Archæology

Although, rading is one of the most ancient whileys of the Sabarmati Sarmada and the lands in the world and the cradle of an ancient Godavsri have yielded hundreds of implements civilization it has long remained in the back ground owing to the absence of written histories g lag back to the earliest period as in the case s one not no extract period as in the town of other ancient lands such as Egypt and decopotamia J st o er a hundred ye rs o te foundation of Indian Archy logy was laid by Prinsey who first declybe od the scient Braini script and thus opened the way to the knowledge of the edicts of the Emperor Aoux and other ancient documents which Atoka and offer ancient documents which till then were a sealed book to the natives of the user were a seaten book to the manyer of the bill. Since then a large number of schols as the bill inclaim and European have helped in building up the editice of Indian Archeology the though fairly comprehensive is still largement to the seatest seatest. tacompl te in several respects

The story of Indian Archaeology commences with the beginnings of human existence in the Yast sub-continent. The rough and chipped the country particularly in the eastern district of the Madras Presidency and the

which show the first ttempts m de by man to wo kins tools with which to master his surround ings T o of the paleof thic implements were found in association with the bones of extract animais one from Blint a in Narsin pir di trict CP on the banks of the \ rmada and the other from Munglon the upp r Godava l The age of the pal oilth determined mostly by geological considerations may be anywhere from 50 000 to 00 000 years and the great interval of time between the microlithic and the paleolithic periods is shown by nearly a hundred feet of alluvi i and wind blown iess deposits in the valley of the Sabarmati river

The whole fild of prehistory is gradually receiving mu h attention which is expected to systematise our knowledge of the earliest in habit ats of Indla and systematic work has been recently attempted at e eral sites in Madr May ubhanj Raipli la and Barody State Neolthlem n hou ed large v riety of poli h ed stone implement was more widely distributed throughout the country, particularly in the Peninsula and the Vindhaen regions and his skeletal remains have for the first time because unearthed in Gujerat To this period 1 mit al o be dated some of the earliest ma elithic tombs which occur in a great a ricts of forms in the central and southern parts of the Penlimina although a vast majority belong to the non age and some even persit to our age. The knowledge of metals supervened at a lete-stage but its development has been different in northern and southern India Thur in northern India the copper in plements of the Gaugetle Valley and the copper red brenz intlighting of the India with a intiguities of the Judus culture exclude any knowledge of Iron In the court, his ever, though certain recent finds in Raichur Di do not exclude the knowledge of copper +m Itlus In the Peninsula, the neolithic settlement, of the Bellary district seem to have been immediately follor ed by the knowledge of the snelling of tron, as evidenced by the large scale furnace which stand in the slape of cinder mounds notably those at Ludatini It is clear, how ever, that while copper and bronze ver known in the north in the fourth millenulum BC the south ray has been generally content with the use of stone implements right up to the first mellennium BC until stone was sup It is remarkable that in some o planted by iron the localities in the ancient Decean, comprisin the Bombay Karnatic the Ceded Districts c Madras south Hyderabad and North Mysore stone implements and painted pottery, ar followed by antiquities of the regular histori period. This gives the hope that a regula. sequence can be established and links forged be twicen the history and prehistory of the Decean

The most interesting and well developed phase of the prehistoric elvilization of India is, however, that represented by the recent exca vations at Harappa in the Punjab and Llohen jo daro in Sind These have completely revolu tionized ideas-on this subject and proved that as far back as the 3rd or 4th millennium and probably much earlier still, Indla was in possession of a highly developed civiliza tion with well planned and populous cities, well built houses, temples and public buildings of brick carefully constructed wells and a system of drains and many other amenities not always enjoyed at that period by the peoples of Mesopotamia and Egypt Both at Mohon jo daro and Harappa there are the remains of ruins of another

The structures that have so far been exposed at Mohen 10 daro belong to the three latest cities on the site which do not appear to be far removed from each other in date, style of architecture or other cultural elements Most of the strue

That they polessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved visits all executed animal devices and pictographic is ends in an unknown script. The method of disposal of the dead at Molien to daro is uncertain but at Herapha two types of burial have been met with, namely complete burials or fractional along, with functory potters, and pot burials Only 27 of the latter were found to contein elignimesa ora bua regod aranal baa elluda post exposure fractional burlals

The late Sir Anrel Stein a survey of the whole of Balnehlstan and his last journey in Bahan alpur and Las Bela States have added to our I now ledge a number of ancient sites of the prehistorie epoch Among the 20 or more sites in sind, discovered mostly by the efforts of the late some 5 or 6 cities super imposed one upon the Mr Majuindar, at least three are now recommed as representing distinct phases some earlier and some later than the main culture of Harappa an l Mohen jo daro

The Indus Valley enliure has now been traced in the North east as far as Rupar in the or other cultural elements Most of the structures are dwelling honses, but there are others which appear to have been temples and one—of particularly massive proportions—is a large both, surrounded by fenestrated gallerles and halfs. Another massive and extensive building found at Harappa appears to have been a public granary. All were built of well burnt brick and most of them were of two or more storeys with structures giving access to the upper rooms. In and around the runs have been found many minor antiquities including gold and silver jewellery, referred to above from the historic period of Ambala District, relatively close to the waterIn la little is yet known except som grant d in Rhopal State. Here the main stara of vili in potery but there is e cry hope it with is gap in the core productly belongs to the time of volume, knowled e man lo initial in but intire find was later, freed, vill stone and a ground tell is a From ti ti ne in the weiern U 1 and Punjat of the Maurya se 4th century BC the hi tory of architecture and the formutive arts of Inila ste cl r and can le traced will rel ti e preci sion The financial strin ency an I lifticult con il tions cruedly the world are nnot all the programme of excast in to be extended as my the wile flut florts are being contents. mid by carnest v orkers to extend the boun la of kno viel e

Indian Time.

time, which was not based on any common possess over the first alernative, it was scientific principle and was divorced from the former the difference become took and standards of all other countries it was with standard that can be exercically fire loar a view to remedying this confusion that the Government of India tool the matter up in 1904, and addressed the Provincial Governments and through them ill loe I bodica, a long letter which reviewed the situation and made suggestions for the future. The e sential points In this letter were —
"In India we have already a standard time

thich is very generally though by no means universally, recognised. It is the Madras local universally, recognised time, which is kept on all railway and tele, raph lines throughout India and vhich is 6h 21in in advance of Greenwich Rangoon local tune is used upon the rulways und telegraphs of Burma, and 18 611 21m 478 there of Greenwich But neither of these standards bears a simple and castly remembered

relation to Greenwich time

"The Government of India have severalthmen blen addressed by Scientific Societies, both in Indla and in England, and urged to full into line with the rest of the chillsed world And now the Royal Society has once more returned to the The Committee of that Society which attack advises the Government of India upon matters connected with its observatories writes - 'The Committee think that a change from Madrastime to that corresponding to a longitude exactly 51 hours cast of Greenwich would be an improve ment upon the existing arrangements but that for international scientific purposes the hourly rone system making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable

"Now if India were connected with Europe by a continuous series of civilised nations with their continuous rall way systems all of which had adopted the European hour zone system, it would be imperative upon India to conform and to adopt the second suggestion But as she is not, and as she is as much isolated by unclvilled States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonics and to adopt

the first suggestion

'It is believed that this will be the better Rolution There are obvious objections to n arbitrary line right across the drawing an arbitrary richest and most populous portions of India, and so as to bisect all the main lines of communi cation, and keeping times differing by an hour on opposite sides of that line. India has be come accustomed to a uniform standard in the Madrus time of the railways, and the substitu-tion for it of a double standard would appear to be a retrograde step, while it would, in all probability, be strongly opposed by the rallway authorities Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike, and it is certain that the double standard would puzzle the latter greatly, while by emphasismg in the establishments of some orthodo the fact that railway differed from local time, Elsewhore Standard Time is universal

for many years Indiantime via in a state of the most popular or two alterestics present chiefle contusion. What was called Madras of the acceptance of the foint instead of the Rillway time was kept on all the rallways and latter by people generally over clarge parter each greates are not population optified in an acceptance and in a while the property of the continuous parters and the continuous parters are continuous parters are continuous parters and the continuous parters are continuous parters and the continuous parters are continuous pa whereas and r the latter it vill e en exe ed an hour in the extreme en e of kar blird Qu in I'nt this inconvenience is hills sed to be smoker tion that of leoping to odd top at times on the Indi n system of rails against tel maple

It is proposed, therefor, to just on all the raiway and tele replaced in India 1, 21, 30. They would then represent retiral and hours faster than that of Green Ich, which would be known as Indian Standard Time. and the difference but sensuand and and fourt time of the places mentioned below vowed to approximately as follow—the flore or present ing minutes, and I and S meaning that the standard time is in alyane of or is find be t time respectivel.—Dibrucarly 51 5, Stiller 8 5, Calcutty 45, Alfaladad 2 i , Madra 9 1 , Lahore 53 I , Bombay 9 I Pe bawar 44 I , Lahore 33 I , Bombay 39 I karachl 62 F Quetta 62 I.

"This standard time would be as much as 54 and 55 minutes behind local time at Mondelay and Bangoon, respectively, and the enthe rule av system of Burma li not connected with the tof India, and already keeps a time of its own, namely, Rangoon local time, it is not subjected that Indian Standard Time should be adopted in Burma. It is proposed, however, that in stend of using Pauloon Standard Time as at present, which is 6h 24m 17s in nivance of Greenwich, a Burma Standard Thuc should be adopted on all the Burme's rulways and telegraphs which would be one hour in advance of Indian Standard Lime or 64 hours ahead of Greenwich time, and would correspond with 97° 30' I lougitude. The change would bring Burma time into simple relation both with Enropean and with Indian time, and would (among other things) simplify telegraphic com munication with other countries

' Standard time will time have been fixed for rallways and telegraphs for the whole of the Its general Indian Lmplre adoption for nii purposes, while eminently advisable, is a matter which must be left to the local community in each case

The Government scheme left local bodies to decide whether or not they would adopt it Calcutta decided to retain its own local time Bombay the first reception of the proposal was hostile, but on reconsideration the Chamber of Commerce decided in favour of it and so did the Mnnleipality Subsequently the opposing element in the Municipality brought in a side resolution, by which the Municipal clocks were put at Bombay time which was thirty nino minutes behind Standard Time On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time Bombay local time is retained only in the clocks which are muntained by the Munlelpailty and in the establishments of some orthodex Hindus

Tie Ben al Government decided irom October 1911 to move forward their clocks by 36 Bengal t me therefore became an hour shead of Indian Standard Time and 36 minutes shead of Calcutta local tim Tl is was followed b) tl e Indian Standard Time also bein advance 1 b one hour with effect frn a September 1 194 making it 64 hours ahead of Greenwich Mean

The measure wa introduced to ensure the continuance of suffice at daylight in the east ern provinces of Indl where it was essential to avold any electricity overload due to overlap of factory demands with those of dome tic office and street 1 htime and where extra dayl it is needed to mitigate the effect of obscuration of Il hts necessary as a var m asure

Comage, Weights and Measures

As the currency of India is ha ed upon the Ishani ar 51 in Goshangunge. The mount rupes sixtements with re and to maey are taskes throughout all india from the Bon at generity rupessed in rupess Duwa in about, or railway mound 18 7/10s. to the Factory 1873 the gold value at the rupes (containing 165) around a 10 in 11 drs the Bonday Risks of pure 1894er) was approximately equal to mixed 2 is he with a paper and the super sixted and the super sixt of the final cipher (Rs 000 = £100) But some anthor ties estimate at after 1873 owing in the depreciation of aliver t 4 ths and so o as compared with gold throu hout the world there came a s non_ and progressive tail in the carcinage u til at one time the gold value of the trapes dropped as low as is In order to provide a remedy for the heavy is a caused to the Government of india in respect of ite sold payments to be made in Eagland and also to telleve foreign trade and finance from the incoavent nce due to constant and ua foreseen fluctuatione in exchange it was re I hed in 1893 to close the mints to the free coinege of silver and thue force up the value of the rupe by restricting the circulation. The intent on wes to rule the ex h n e value of the rule of the rule. The intention wet to mile the ev hime value and trade have aritated about the question in the ripace to 1 da and then lattodines for the past century. In Indian relivarys is 14 tand the rate of 18 15 m 15 m of Government departments adopted a maintained with insignific nt fluctuations at the proposed rate of 18 40 m of the Committee appointed in the previous part of the the commendation of the Committee appointed in the previous part of the through the throu tions (See erticle on Currency System)

Committees of Inquiry -These a e met ly typical that nees which are multiplied indefi of the state of th Mun cipal and commercial causes are heavy bodies are continually r turning to the problem with a view to devising a practicel cheme of reform The Sapremo and I royingtal Gov of reiofm The Sapremo and rovincial dov-srimeats ha e made various attempts durin 40 years p t to salve the problem o univers I quaits of weights and measures and commer e and trade have agitated about the question for the past century Th Indian relivays and Government departments adopted

The Government and India con idered the whole que tinn in can ultate a with the pro Yuncia Governments an 1890 1894 and vari special steps have at different times been then it different to the different pts of lutta. The Government of Iombay at pointed a committee m tof lodis is sed a meman que a estude de la litté au prince for dia in which the true in 1011 at diffe 10 100 cents in t ad of 19 1 and 11 di 10 100 cents in t ad of 19 1 and 11 di 10 100 cents in t ad of 19 1 and 11 di 10 100 cents in t ad of 19 1 and 10 di 11 di 10 100 cents in t ad of 19 1 and 10 cents in the three districts and the section in 1011 to be more districts and the true in 1011 to be more districts and the true in 1011 to be more districts and the true in 1011 to be more districts and the true in 1011 to be more districts and the true in 1011 to be mand as a many mands as cley there are nearly as many mands are consider the mand as he was the consideration of the district and destrict the state of affairs to many development of the district and destrict the state of affairs to many development and social life we do not result to many development and social life we do not result to many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not result to the many development and social life we do not re iakhs and crores thousand (written out as 1,00,000), and a crore is one hundred lakhs or ten millions (written out as 1,00,00,000) Consequently, according to the exchange value of the rupee, a lakh or rupces (Rs 1 00,000) may be read as the c jul valent of £10,000 before 1873, and as the equi valent of (about) £6 667 after 1899, while 3 crore of rupces (Rs 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) ±666 667 With the rupce at 18 6d i hi h after 1899 is equivalent to £7,500 and a crore is equiva lent to £750,000

Comage - Finally, it should be mentioned that the rupee is divided into 16 annus, a fraction commonly used for many purposes by both Iudians and Europeans The anna was formerly reckoned as 11d it may now be considered as exactly corresponding to 1d The anna is again sub divided into 12 ples

Weights - The various systems of weights used in India combine uniformity of scales with immense variations in the weights of units The scales used generally throughout Northern India and less commonly in Madras and stan dardized in Bombay Presidence under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund = 40 seers, one seer=80 tolas The actual weight of seer varies greatly from district to district and even from village to village in India except in Bombar In the standard system the tol; Presidency is of 180 grains, and seer thus weighs 2 057 lbs This standard is and the maund 82 28 lbs also used in official reports

Retail -For calculating retail prices, the nniversal custom in India is to e-press them in terms of seers to the rupee Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quanti ty to be obtained for the same amount of money In other words prices in Indla are quantity prices not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perpleting to an English reader It may, however, be mentioned that quantity prices are not altogether unknown in England espe elally at small shops, where pennyworths of many groceries can be bought Eggs, likewise, are commonly sold at a varying number for the shilling If it be desired to convert quantity prices from Indian into English denominations without having reconrse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb, and that the value of the rupce remains constant at 1s 4d, 1 seer per rupec=(about) 3 lb for 2s, 2 seers per rupec=(about) 6 lb for 2s, and so on

The name of the unit for square measurement in India generally is the bigha, which varies greatly in different parts of the country But areas have been expressed in this work either in square miles or in acres

A lakh is one hundred that as 1,00,000), and a crore the Obstrict Officer, Mr. Suncox aradually during the course of three year, induced the people to adopt throughout the district uniform weights and measurer, the unit of sright In this case being a tola of 1°0 grain. But the committee ablifted from recommerding that the same reights and maisures should be adopted over the whole Presidency, pre-ferring that a new system started in any orea should be as nearly as possible similar to the bert wat m already prevaling there

Committee of 1915 - The whole problem wes again brought under special consideration by the Government of India in October 1913, when the following committee was appointed to inquire it to the entire subject and

C A Sliberrard (President) A Y G Campbell Rustomji I ardoonji

This Committee reported, in August 1915, in favour of a uniform system of weights to be adopted in India band on the 180 grain tola,

= 1 chawal 8 Lhaskhas 8 chanals = 1 ratti = 1 masha 8 rttl-= 1 tols 12 mashes or 4 lanl a = 1 chal il o tolas in chatile == 1 4CCF = 1 mund 40 secra

The tola is the tola of 180 grains, equal to the rupee weight. The view has recently been fixed a. 3 60 lbs or 140 tolas

Government Action —The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they ag in, for the present and subject to the restrictionimposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think aqvisable to standardise dry and liquid measures of expecity within their provinces Similarly, they announced their decision not to adopt all India standards of length or area

As regards weights they decided in favour of the standard mentioned under the heading "Weights', earlier in this article, this having been recommended by a majority of the Weights and Measures Committee having recelved and Local Governunanimous support of the ments At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that if subseiegislation quently, opinion developed strongly in favour of the Imperial standardisation of weights, the Government of India would be prepared to undertake such legislation, but for the time being they considered that any such step would be prepared. would be premature

By 1939 opinion in favour of legislation by the Proposed Reforms—Indian weights and measures have never been settled upon an trade characteristic of the modern age They vary from town to town and village to village the sessent of the Governor-General of India on will follow a good lead is apparent in the East the 28th March, 1939, and was published in Part IV of the Cazette of India of the 1st April 1939 The Act laid down the following standard

- () the standard tola being a weight of 180 standard grains
 - (b) the standard seer bein a weight of 80 standard tolas or 14 400 standard grains (c) the t ndard maund being a weight ot 40
 - standard seers (d) the standard pound bein a wel ht of
 - 7 000 standard grains (e) the standard ounce beln one-sixteenth
 - part of the weight ot a standard pound (f) the stanlard lundred wel lit below a weight of 11 standard pounds
 - (v) the standard ton beln a wel ht of _ 40 standard pounds

Under sub section () of section 4 of the Act the Central Go ernment undertook to supply ch Provincial Government a complete set of duly authenticated standard we ht Accordingly in October 1941 Overnment of India surplied to the Provinci I Government of india supplied to the Frontier I dovernments. Bihar a complete et of Reference Standard Weights which was placed under the charge of the benior M rketing Officer Lihar

The enforcement of standard weights throu hout the P ovince of Bil ar as I ld down in Act IX o 1939 of the Centr I Government was and 0 1999 of the Centr 1 government was any time a suppl me tary provincial tech. Attendable in the provincial cell. Attendable in the provincial consideration of the provincial continuation of the provincial continuation of the provincial control of have directed that th Standards of Weight Act have unrected that the Standards of Weight Act. 13 9 (IX of 1939) shall pply to the Chota 12 pur D vision and to the Santial Largam, but I a a special measu of In Din r t was felt that it may be convenient to start with the chorement of stand rd well his ato o in the first leaf week. first la tance and the mea ures of capacity may be left lone for some time to allow the but is and sellers to adjust the men ures on the bals of the tandard weights

Special causes contribute to the high mortality cen us show a further continuation of the steady on infants in India

Owing to the custom of early marriage continued to the continued of the co Owing to the custom of early marriage co and the like of child birth it is exposed to the dangers of death in the early months of life from diarrhea or dy ntery. According to the Lx cettre Health Officer of Bombay city by I r the greater number of infantile deaths are dean to large and the control of Lt ettre Health Omer of Tombus etty in the relative Health Omer of Tombus etty in the rester number of Indattle details are callon of declining repulation but this is not the state of the restrict in the restrict in the restrict in the restrict in the case of India a a wide. The oil India a callon of declining repulation which is not the case of India a wide in the state of the case of India a wide in the state of India a wide in the state of India and wide in the state of India and wide in the state of India and which there is actually an extending the state of India by series as recorded by the latest added in Dear be excluded

can in sanow a include continuation other season in it is in the proportion of tem lea to makes that has been going on since the beginning of this centrity. This abortage of females is characteristic of the population of India as compared children too early and too often A good deal of recent work on ecx ratios ha tended to the view that n increase in masculinity is an indi

SOCIAL AND ECONOMIC CONDITIONS.

Literacy —Literacy, by which was meant, the literacy figure is below that of other areas until the 1931 census, ability to read a letter and write a reply, was in the 1941 census expanded to provide for a record of partial literacy, re ability to read only (See chart 170 for women Even now, however, the on page 29) According to the latest percentage of literacy among women is only census, 120 out or every 1,000 of the population 2 Bombay leads the provinces, as it did in the control of the population and there are the provinces of every 1,000 of the population are seen and setting and all major provinces and is still only 8 per cent for the whole population but the decade increase is 80 per cent all over, 70 for men and literacy among women is only census, 120 out or every 1,000 of the population are seen and all major provinces and is still only 8 per cent for the whole population but the decade increase is 80 per cent all over, 70 for men and all major provinces and is still only 8 per cent for the whole population but the decade increase is 80 per cent all over, 70 for men and literacy among women is only census, 120 out or every 1,000 of the population are seen and all major provinces and is still only 8 per cent for the whole population but the decade increase is 80 per cent all over, 70 for men and literacy among women is only census, 120 out or every 1,000 of the population are seen and all major provinces and is still only 8 per cent for the whole population but the decade

the States 70, with the sex components more or left far behind by Travancore and Cochin, less the same The most remarkable figures which show a literacy figure over the whole are returned by the Punjab which professes a 140 per cent increase to a present literacy of 13 This figure covers 110 increase for maics and no less than 390 per cent for females In the UP British India

on page 29) According to the interest census, 120 out or every 1,000 of the population are now literate as against 95 ten years ago and less than 40 half a century ago. The increase in the case of India as a whole amounted to 70 per cent over 1931, of which the male increase of the female 150.

Bonday leads the provinces, as it und in the case of India as a whole amounted to 70 per cent over 1931, of which the male increase of the female 150.

Bonday leads the provinces, as it und in the case of India as a whole amounted to 70 per cent over 1931, of which the male increase of over 100 per cent of females. Bengal follows with 16 per cent all over, representing 25 for males and 7 for females. The percentages For the provinces the increase was 80 and for are on the total population. These figures are the States 70, with the sex components more or left far behind by Travancore and Cochin, These figures are

Indian Roads.

as follows

There exist four great trunk roads, stretching diagonally across the country, which form the framework with which most of the important subsidiary roads are linked These trunk roads subsidiary roads are linked have been in existence for an immense period use of motor transport and suggest ways and and are rich in historical association. The most means of financing it. The recommendations famous is the ancient marching route—known put forward by the Committee were carefully as the Grand Trunk Road—which stretches considered by the Government of India, right across the northern part of the country whose conclusions upon them were emfrom the Khyber to Calcutta, the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 85,000 miles of metalled road in India None of these roads however can be considered safe 'all weather' trunk roads according to modern standards The Madras Calcutta road in particular is far from being bridged throughout its entire length The other three roads also require a great deal of improvement, on the Grand Trunk Road from Calcutta to the North-West Frontier, for example, there is as yet no road bridge over the river Sone in Bihar, and on all of them there are places where floods are liable to cause serious

Subsidiary Roads—As regards the subsidiary roads, the best and most numerons are to be found in Southern India As one would expect, the worst served regions are Rajputana, Sind and parts of the Punjab on the one hand, and Orissa and Bengal on the other, the former owing to its ardity and sparse population, and the latter because of the numerous unbridged and mostly unbridgeable waterways which In addition there are numerous other parts of the country, such as the lower Him alayas, which suffer from a dearth of communica tions owing to the difficult terrain Besides

India's road system may be briefly described port, was altogether insufficient for her needs, follows and it is the increasing realisation of this fact that led to the appointment of the special Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing bodled in a resolution and provided that the increase from four to six annas per gallon in the import and exelse duties on motor spirit, which had been effected in March 1929, should be maintained for a period of five years in the first instance, and that the additional duty should be allotted as a block grant for expenditure on road development, and credited to a separate Road Development Account, whose nnexpended balances should not lapse at the end of the financial year

Road Development Account —The original resolution dealing with the disposal of the Road Development Account has since been amended twice, the resolution at present in force having been passed by the Legis lative Assembly in February, 1987 Its main features may be described as follows. The special tax on petrol introduced in 1929 shall continue to be levied for road development, the precede of which after rateining a reserve. the proceeds of which, after retaining a reserve of 15% for administration, research and special grants in aid, shall be allocated for expenditure in the different provinces, Indian States, etc, in the ratio of the petrol consumption in the various areas. These same may be spent on the construction, re construction or substantial im provement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance on surfaced roads, there is a very large mileage of for ordinary road upkeep or maintenance on hutcha" roads in India amounting to interest and amortization charges on road loans approximately 260,000 miles, some of which are good for motor traffic during the dry weather of Communications and establishment connected Road Development Committee—On the whole it is reasonable to say that India's road clause inserted in the present resolution lays system, even before the advent of motor trans down that "if in the opinion of the GovernorGeneral in Council the Government of any Governor a province has at any time -(a) falled to take such steps as the Gover

nor General in Council may recommend for the regulation and control of motor vehicles within the province or

(b) delayed without reasonable cause the pplication of any portion of the Road Fund allocated or re-allocated as th case be for expenditure within the province

The Governor General in Council may resume the whole or part of any same which he may at that time hold for expenditure in that province With the le y of a Surcharge on petrol the shere of the petrol duty available for the Road Fund wes increased from 2 annas to 1 annas per gallon with effect from October 1931 The sctual statement of the Account up to April

Read Administration—On the administrative ide roads are a provincial subject of may be divided into two main classes. Provincial Roads—Roa v les con iderably from pro in e to province of the extra municipal mileage is under the ch ree of District Board or District Councils in luding a cert in mil ge meinly in Madra and the Central Provinces which I termed Provincial but m intained und their agency Within Municipal areas all roads oth than towns Muni ipalities

The Ro d Fund —Up to the introduction of the Road Fund in 19 0 all Provincial roads were finance I exclusively from the General Revenues of the provinces and local roads from local revenue aupplemented by provincial grants Since 10 9 however tile Road Fund local revenue is being distributed to Provinces and is available for construction reconstruction or improvement of roads but not for ordinary road upkeep. The object of creating the Road Fund was to supple

ment and not to replace the normal expenditure on original road works from provincial and local revenues but unfortunately the years following the lutroduction of the Fund have been merked by acute financial stringency, with the result that provincial governments and local bodies have I ad to make drastic curtailments in the allotments made for roads from their revenue

The effect of these curtailments has been to starve the construction and development of feeder roads as the Road Fund was being used exclusively for roads of inter provincial and inter district importance The Government of India however have now laid down the tat least 25 of the provincial shares in the Road Fund should be used on feeder roads and that not

more than S per cent can be used on roods which compete with the Railways

Expenditur n Re ds — As explained above in spite of the inanguration of the Central Road Development Fund the total expenditure on roads h s been on the decrease The expenditure in 1938-39 which amounted to Rs 60 1 lakhs in the Governors Provinces was 358 CO

Rs 41 7 laking less than in 19.8 20

Revenu fr m Mot r Tr nsp rt.—The Revenue from Mot r Tr nap rt.—The revenue from motor transport on the other hand revenue from motor transport on the other hand steadily lnere ing In 1938-30 the has been steadily incre ing In 1938-39 the total revenue of the Cent I Government and Pro lucial Governments from this source was 960 lakh repre enting an increase of Rs 358 lokhs ove the total rood expenditure

R d Miless - The grand total of the mileage of extra municipal roads maintained by public authorities in India including Indian States was 347 13 on March 31 1938 of this the total indeage for Governors Provinces amounted to 8 50 for Central Arees 6 811 1 487 80 and for Indian % tes 51 819

The total inleage of roads with modern surface eith r bituminous or cement was 0 650 and the total mileage of weter bon d mseadam 614 making a total milesge of roads was roads which were eithe modern aurfaced (bltuminous or concrete) or water bound macadam of 85 79

The total mileage of lower typ s of roads was 61 340 The e roads are of three types firstly roads with artificially admixed granular msterial gravel moorum etc on natural soil having a total milesge of 9473 secondly roads of natural soil which are mote oble in fal weather lavi ga total mileage of 1 736 thirdly ro da of natural soil which are no

motorabl having a total mile go of 109 131 The total milesge of Ro ds that are motorable was the 38 001 out of whi h 115 265 miles we e motorable throughout the year and the termed remaining 1 36 miles moto eble in fair w ather

Ont of the 85 313 miles of roads in British tions of main roses passing through the India no le at n 44 840 mile of rada we can are controlled by the respective maintained by local bodies while the P W D and M E S m Intained 40 473 miles

The province with the greatest road mileage and for fostering the conomic advancement of was Bengal with 91,192, out of which, however, the country In December 1943 the Chief only 3,887 was modern surfaced or macadam, Ingineers of the various provinces and important while the province with the greatest mileage of Indian States met in conference at Nagpur and modern or surfaced roads was Madras with recommended that the country should be ready 21,441 miles out of a total provincial mileage of 35,717 Bombay had 11,134 miles of modern or surfaced roads out of a total provincial road the entire road system and designed to increase or surfaced roads out of a total provincial road the road mileage of 19,571 mlleage of 19,571

There are in addition, the roads maintained by municipalities the length of which is approx imitely 18,433 miles made up of 10,840 miles of metalled roads and 7,593 miles of immetalled roads

Post-War Prospects - Considerable Interest has been aroused during the past few mouths in the need for an extensive programme of road development in India after the war both for the

Cost of

to cost roughly Rs 300 erores according to pre war values Post-war values, the Chief Engineers estimate, will be roughly 50 per cent above former levels, in which case the cost of the programme would be Rs 450 crores This programme is to be split into two parts one a short term programme for the unmediate needs arising out of the war and the other a long term programme for economic advance ment. The provinces are engaged in preparing development in India after the war both for the product ment are engaged in preparing development in India after the war both for the purpose of assisting the transition from war of the peace—when it will be necessary to find employ-trunk roads or national likelihous as they are ment for thousands of ex soldiers, thousands of to be called—will in the post war period be motor vehicles and large quantities of road taken over by the Government of India from making machinery now in use by the Army—the Provinces Statement showing the allocations made from the Central Road Fund and expenditure incurred therefrom upto the end of 1942 43 Expendi

The Government of India.

of India represents the slow evolution from co 1ditions established to meet trading requirements On September 24, 1599, a few years before the deaths of Queen Lilzabeth and Akbar, the mer chants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of Incorporation The Government of this Company in England was vested in a Governor with a Genration eral Court of Proprietors and a Court of Directors The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St George), Bombay and Calentta (Fort William), by a President or Governor and a Council consisting of the senier servants of the Company The three "Presidencies" were independent of each other and suberdinate only te the Directors in England

Territorial Responsibility Assumed

The collapse of government ln India consequent on the decay of Moghul power and the intrigues of the French on the East Ceast ferced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors Step by step the Company became first the dominant, then the paramount power in India In these changed circumstances the system of government by mutually independent and na-wieldy councils of the merchants at the Presi-dency towns gave rise to grave abuses Par-liament intervened, and under the Regulating Act of 1773, a Governor General and four eounciliors were appeinted to administer the Presidency of Fort William (Bengal), and the snpremacy of that Presidency over Madras and Bombay was for the first time established The snbordinate Presidencies were forbidden to wage war or make treaties without the previous censent of the Governer-General of Bengal in Council, except in cases of imminent necessity Pitts Act of 1784, which established the Board of Control in England vested the administration of each of the three Presiden cles in a Gevernor and three councilers, includ-

The impulse which drove the British to India Crown The same Act vested the direction was not conquest but trade The Government of the entire civil and military administration and sole power of legislation in the Governor-General in Council, and defined mere clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown This Act made no Important change in the administration in India, but the Governor General, as representing the Crown, became known as the Vicero; The Governor General was the sole representative of the Crown in India, he was assisted by a Connell, composed of high officials, each of whom was responsible for a special department of the administration

Functions of Government

The functions of the Government in India are perhaps the mest extensive of any great administration in the world. It claims a share in the produce of the land and in some provinces it has restricted the aliention of land from agriculturists to non agriculturists It undertakes the management of landed estates where the proprietor is disqualified In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium It owns the bulk of the rallways of the country, and directly manages a eonsiderable portion directly manages a considerable portion of them, it has constructed and maintains most of the impertant irrigation works, it owns and manages the post and telegraph systems, it had until 1st April 1926 the monopoly of the Note issue, and it alone can set the mints in motion. It lends money the municipalities appears to municipalities. to municipalities, rnral boards, and agriculturists and occasionally to owners of to municipalities, riral boards, and agriculturists and occasionally to owners of historic, estates It controls the sale of liquor and intoxleating drngs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Ind'an States which collectively cover more than one-third of the whole area of India. the Indian States which cellectively cover more than one-third of the whole area of India and comprise more than one fifth of its population. The distribution of these great fure lng the Commander-in-Chief of the Presidency Army The control of the Governor-General in-Council was semewhat extended, as it was again by the Charter Act of 1793 Under the Cbarter Act of 1833 the Company was compelled to close its commercial business and it became a political and administrative body heiding its territories in trust for the break and comprise more than one fifth of its population. The distribution of these great fure tions between the Government of India and the provincial administrations has fluctuated. It was definitely regulated by the Reform Act of 1919, and the democratic principle then widely implanted is greatity developed in the constitutions for the Provinces and the centre enacted by the Imperial Parliament in 1935

THE REFORMS OF 1919 AND 1935

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in Jannary 1921, having received the Royal Assent on 23rd December 1919 (For detailed particulars see The Indian Year Boot, 1936 37 and preceding years) Still vaster changes in the direction of Indian Self Government and of Dominion of 1935, which includes 321 sections and 10

schedules and ia the largest and most complex of the Act the States should enter Federation legislative enactment of the kind ever negotiated by executing instruments of Accession. The federal programme has now been suppensed and

the administration at the centre is carried on in The new Constitutional provisions relating to the Frovincial Government's were brought into the Control of 1935 and 1

THE PROVINCES

The following are under the Act of 1935 the Governo s Provinces of British Indi (there being besid a these Provinces certain Chief Commissionera Provincea) —Madras Rombay Pengal the United Provinces the Punjab Bihar the Central Pro Inces and Bernt Assam the North West Frantier Province Oriesa the North West Frantier Province Orless and The Act recognices Derar as being under the sovereignty of H L. H the Niam of Hydrahad whose Heir Franmpitte is close where created Princo of Herar and the Act processing the Property of the Control of its constitution as a separate country under the Grown The Act gives powers for the crestion of other Governors Pro inces

The Constitution provides for the exercise of the executive authority of a Frovince (which extends to matters included in the Frovincial and Concurrent Lecticative Lists) on behalf of His Misety by the Governor It also provides for a "Council of Ministers to aid and advise the Governor It also provides." for a "Council of Ministers to aid and advise; its devenor in the secretion of his functions receil in so far as he is by or under this Act and the secretion of the secretion of the secretion in the forerent choose his Vial. ters who hold office duri g his pleasure and he is directed by his in trument of instructions to select such as are likely to have the accept those the Legislature and is enjohent to secret those the Legislature and is enjohent to accept their advice except in special cases for which other provision is made in the Act

The following special responsibilities are laid upon the Governor -

- (s) the prevention of any grave menaes to the peace or tranquillity of the Province or any p rt thereof
- (b) the safeguarding of the legitimate interest of minorities
- (s) the securing to and to the dependents of th ir legitimate interests
- (4) the securing in the sphere of extensive the Governor dark himself unable to assent to section of the purposes for which the flowermor of a Polince is given power to the constant of the purposes of the p

(e) the securing of the prace and good govern ment of areas which by or under the provisions of the Act are declared ta be partially excluded areas

(f) the protection of the rights of any Indian State and the rights and dignity of the Ruler thereof and

(o) the securing of the execution of orders or directions lawfully lesued to him under Part VI of the Act by the Governor General in his discretion (i.e. concerning agency functions in behalf of the Central Authority Inter provincial co operation in certain matters and so forth)

If and in so far as any pecial responsibility of the Governor is involved he shall in the exercise of his functions exercise his individual judgment as to the action to be taken. Where the Governor is required by the Act to act in his discretion or to exercise his individual judg ment he is placed under the control of the Governor General in the latter a discretion

The Pruvincial Legislatures — The Act provides that there shall for every Province be a Provinci i Legislatur consisting of His Majesty represented by the Governor and (a) in the Provinces of Madras Rombay Rengal the United Provinces Elbarand Ass in two Chambers and (b) in the other Provi ces ons Chamber the two Chambers helps called the Legislativ Council and the Legislative Assembly and wherethere is only one Chamber the Legislative A sembly Every Legislative Council is to be a permanent body not aubject to dissolution but an ear es may be one third of its members are to retire in every third year Every Legislative Council in the council of the tive Assembly in every Province unless aconer dis of edistocontinue for five years. An amend ing Act pas d in 1941 has extend d the life of the first Legislative A semblies under the Act till twelve months after the War but subject to earlier dis clution by the Governor

The Hinnses of Legislature are elected bodies Persons who are or have be members with apecial electoral p ovisions for communal of the public services of any rights and other particular interests and are based provided or preserved for them by nr on a considerably wider franchise than was und t the Act and the sai guarding nf provided by the Act of 1010

Persons subjected to preventive deten tion under Lederal authority

Inquiries and statistics for the purpose of any of the matters in this Part of this List

Tees in respect of any of the matters in this Part of this I ist, but not including fee taken in any Court

An amending 1ct was presed in 1940 [intro duced in Parliament in 1939 | to make certain readjustments found necessary in the operation of the 1935 Act To safeguard provinci-i ex chequers taxes on mechanical or other road relifeles or on the sale or consumption of electri city were added to the provincial list. By nu imendial presed in 1930 it was provided inter aha that in the event of a war emergency being proclaimed by the Governor General the Central Government may assume excentive in addition to legislative nuthority over any fleid and enn niso with the specific sanction of the Governor General empower Federal officers to perform functions ordinarily the concern of

THE CENTRAL GOVERNMENT

The structural enanges mindo by the Act of 1919 in the system of government outside the "Governors' provinces" were of comparatively minor scope, though considerable modifications were made in the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Causal on the other. The dat of of State In Council on the other The Act of 1935 provides for further extensive changes at the centre, but these will only come into force when the Indian States accede to Federation and meanwhile, at the Centre, the constitution established by the Act of 1919 prevails, subject to certain modifications required to bring it into harmony with the new conditions in the Provinces One of these changes is the vesting of certain responsibilities in the Governor General or certain responsibilities in the Governor General "in his discretion" which means that they are left in the charge of the Governor-General as distinct from that of the Governor General in Council The Act of 1935 has also taken the relations between the Crown and the States outside the purview of the Governor General

The structural changes mado by the Act of | relations with Indian States (Crown Representative for short) The offices of Governor-General and Crown Representative are held by the snine person The only concrete changes made in the constitution of the Central Government by the 1919 Constitution were the removal of the statutory bar to the appointment of more than six members of the Governor Generals Executive Council (which, however, had the far reaching consequence that a majority of the members of the Council are now Indians) and the reconstitution in a much more enlarged representative and independent form of the central legislature This became, Legislative Council in a Governor a province, a legislature with all the plenary powers genea legislature with hit the pictury powers generally given to such a body snvo such as are specifically withheld by the terms of the Act It consists of two Chambers The "Council of State' is a body of 58 mombers, iacluding 32 elected and 26 nominated, of whom not more than 20 might be officials The "Indian Legislative Assembly" consists of 141 members, of whom 102 are elected. Of the 30 nominated of whom 102 are elected Of the 39 nominated in Council and entrusted them to a new authority called His Majesty's Representative for the exercise of the functions of the Crown in its General's Executive Council have not bee

mads ex-offices members of either Chamber | buth in the Assembly and the Council of State but each of them has to be nominated a member of one or other Chamber and can vote only in the Chamber of which he is a member Any member of the Executive Council may however speak in either Chamber The President of the Upper Chamber is eppointed by the Governor open change is spondered by the overtice femeral So elso for the first four years efter the constitution of the Chamber was the President of the Legisletive Assembly But after that period the Lower Chamber elected its own President and it elected ite own Deputy President from the outset The normal lifetime President from the outset The normal invest-of each Council of State is five years and of each Legislative Assembly three years but either Chamber or both elmulteneously may be dissolved et eny time hy tl c Governor General who has also the power to extend the lifetime of either Chamber in special circumstances

Election—The method of election for both Chambers is direct and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted end for the most part indirect franchise established under the Act of 1909 for the unicomeral central legis laturs which then existed Generally speak ing the electoral scheme for the Lower Chamber is on the same model as that which the Act of 1919 prescribed for the Provincial Councils except that fir thy the property qualification for voters (end consequently for candidates) is higher in order to obtain manageanie constituencies and past service with the colours is not per as a qualification for the tranchise and see dy that the constituences necessarily cover a considerably lorger area than constituence for the Provincial Council The distribution of seats in both Chambers and the arrangement of constituencies ere on a provin cial basis that is a fixed number of the elective scats in each Chamber is essigned to represen tatives of each province and these represent stives are elected by constituencies covering an assigned area of the province

The following table shows the origical allot

	Legislative	Council

The Government of India Act 1935 by separating Burma from India climit ted the Burma members

Tin 1937 Berst was represented by nomination

have been increased by one and e signed to Berar

Since the area which returned perhaps 80 members to a Provincial Council is the same as the arex which returns perhaps 1. members to the Legisletive Assembly—namely the entire province in each case—it follows that on the direct election system this erea must be aplit into constituencies which are much jarger than the constituencies for the local Councils and just as it is generally correct to sey that the normal eres unit for those rural constituencies for the latter which are arreng d nn a territorial haeis was mede in the district it may be seld that the normal area unit in the case of the Legislative Assembly is the Division (the technical term for the administrative group if districts controlled by a Divisions) (ommissioner)

The Franchise -The general result of the first franchise arrangements under the Act was thre that there vae in each province a hody nf electors qualified to vote for and stand for elec tion to the Provincial Council and that a select ed number of the evoters were qualified to vote for and stend for election in these seats in the Indian Legislative Assembly which were as signed to the province The qualifications for candidature for the Indian Legislative Assembly were made the same to each province mutatis mutandis as for cendideture for the Provincial Council except then in the privinces on long as the condidate could show that he resides somewhers within the province no closer cannection within particular constituency was insisted noon

The frauchise for the Council of State differs in character from that for the Provincial Council and the Indiao Legislative Assembly The con cern of the framers of the Act and rules was to secure for the membership of this hody a character as closely as possible approximating to a Senate of Elder Statesmen and thus to constitute a body capable of performing the function of a true revising Chamber With this The following table shows the original allot mind of the elective east plus one since edded in the North West, Evoluce — Regulative Council of Bonday 10 6 Bonday 10 6 Bonday 10 6 Bonday 10 10 6 Bonday 10 6 Bond corporations) membership of the governing bodies of Universities and the holding of titles conferred in recognition of Indian classical learning and literature

Pnwers -The powers and duties of the indian Legislature under the 1919 Act differed Indian Esgisature under the 1919 Act othered but little in character within the central sphere f om those of the provincial Councils under the same Act within their provincial sphere and it ecquired thes me right of voting supplies if r the Central Gov rument B t as no direct attempt was made to introduce Authors Bers was represented by nomination dider the Commencement of the Government as no direct attempt was made to initiated a flada Act 1935 the number of elected scata responsible government of the centre the step έI

in that direction having been avowedly confined to the provinces, and as consequently the Executive Government of India remained legally responsible as a whole for the proper fulfillment of the clear the Secretary of State and ment of its charge to the Secretary of State and ment of its charge to the Secretary of State and Parliament, it followed that the powers conformed of India Act, 1935, affecting the Government on the Governor General to disregard a decision of India, wore described in an earlier part of this of the Indian Legislature were less restricted chapter

THE INDIA OFFICE.

The Act of 1919 made no structural posts, and payment of leave salary and pensione changes in the role of the India office in the administration of Indian affairs Slight this change, it became possible to defray from and tenure of office of the members of the Secretary of State and of the Parliamentary Under Secretary, and that portion of the cost of salaries of India relaxations were made in the statutory rigidity which formerly bound their procedure and that of the Office in general Bnt provisions were made which undoubtedly as time. The Act of 1935 provides for the appointment sions were made which undoubtedly as time went on had a material effect on the activities of the Office A High Commissioner for India which is of the nature of agency, as distinct from administrative supervision and control His functions relate mainly to the control of Indian Government Trade Commissioners in Europe and America, arrangements in connection with exhibitions and fairs outside India, sale and distribution of Central Government publications, representation of India on Inter-Empire Organisations and at Conferences,

The Act of 1935 provides for the appointment by the Secretary of State of not less than eight nor more than twelve person (between three and six after the establishment of Tederation) whose was appointed for the purpose of taking six after the establishment of Federation) whose over, as the direct agent of the Government duty it shall be to advise him on any matter over, as the direct agent of the functions relating to India on which he may desire their which is of the nature of agency, as distinct advice—It also prescribes that the salary of the Sceretary of State and the expenses of his De partmentshall be paid out of monles provided by Parliament (Under Pederation) The Governor-Generalis given in his sphere of responsibility reserve powers corresponding with those already montioned as being vested in the Governors of Provinces in theirs and in respect of them he is made responsible through the Secretary of State to Parliament Until the establishment Empire Organisations and at Conferences, is made responsible through the Secretary of relief and repatriation of destitute Indians, State to Parisament Until the establishment purchase of stores outside India provision of of Federation, the Secretary of State continues educational and study facilities for Indian to exercise control both over the Governor students and Government officials on leave or deputation, recruitment of persons for special respect of his personal power

PERSONNEL AND PROCEDURE.

The Governor General and the members of | and for the administration of certain statutes his Executive Council are, under the Govern Viceroy s Executive Council has been increased to These members hold charge of the portfolios of War, Defence including Civil Defence, Finance, Home, Supply, Commonwealth Relations Law, Commerce, Information, War Transport, Posts & Air (Civil Aviation), Education, Health and Lands, Labour Food, Industries and Civil Supplies, Planning and Development The Commerce Department deals generally with commerce, tariffs, company law, insurance and actural work and with blue water shipping The Department of Post and Air deals with post The Department of Post and Air deals with post and telegraphs civil aviation, meteorology and roads. The Dept of War Transport deals with Ports Inland navigation, Rallway properties, Petrol rationing, etc. Rallways form a separate department, but are under the same member of the Council as the War Transport Department. The Secretary for War Transport Department attends the meetings of the Rallway Board as an ex officio member. The Department of Labour deals with labour subjects. In addition, and has the final of the council as the work of the Rallway Board as an ex officio member. The Department of Labour deals with labour subjects. In addition it assumes "exponsibility for labour in docks" Any matter originating in one department.

affecting iabour on the railways. It deals also ment of India Act 1919 as continued by the of 1935, pending the establishment of Federation, appointed by the Crown No limit of time is specified for their tenure of office, but custom legislation and administration Ecclesiastical affairs are placed under the War Department of the first pending the specified it at five years As an emergency of the legislation and administration of the legislation and administ Department in 1941 has now been morged with the Defence Department

> The Viceroy is in charge of External Affairs The Viceroy is in charge of External Attairs. The Commander in Chief in practice always is a member of the Executive Council. He holds charge of the War Department. The Council may assemble at any place in India which the Governor General appoints. In practice, it meets only in Delhi and Simla except for a meeting or two in Calcutta after Christman, when the Viceroy is usually in residence in the Bengal Camital.

which also affects another must be referred meethers at which cases unler his cornisance to the latter, and in the event of the Depart are did not sed that he attends on the Viceroy ments and being able to agree the case is insually once a week and discuses with him all referred to the Viceroy The Members of meeters of importance ril ing in his D part Council meet more or less frequently as a ment that I has the ril the Oblination of the Oblination of the Council meeters of importance ril ing in his D part Viceroy delices to put before them or which as a ment that I has the ril the Oblination of the present though he does not speak at Council specialists recruited direct on contract

The States which have accepted the membership of the Council are Bahavalpur, Baroda, Bhopal, Bikaner, Cooch Behar, Cutch, Dholpur, Yaridkot, Gwallor, Hyderabad, Jaipur, Jodhpur, Kapurthala, Kotah, Mysore, Nawanagar, Palanpur, Patlala, Rampur, Tranancore and Udaipur Membership of the Council for any one session being restricted, the representation of the above states is by rotation. The states' representative have been classified in three/panels which attend successive sessions by turn. His Highners The Chancellor of the Chamber of Princes, and the representative from the Hyderabad State, however attendall the sessions

Office R A Gopalaswaml, 108, Secretary, Karam Chand, Superintendent, G S Bansal, Assistant

the map covers a total area of 67 334 eq miles Tribal territory eneloses States with an extent of 12 3 0 aq miles deduct-ing which the nett area of British territory is ing succe his nets area of Briefsh territory is \$5014 sq miles It is formed of the Assom or Brahmaputre valley the volley of the Surma to the south and portions of the hills which surround the e valleys on the North East and South or separate the valleys from one another To the West lie the plains of Bengal

Population —British territory—The total population of the Province (British territory) in 1941 was 10 204 33 of which nearly 44 millions were Hindus over 25 millions Monaged to Iribal religions 43 per cent of the population were recorded a speaking Ben cent Assumes other languages will per cent Assumes other languages will be cent Assumes other languages which in the province are Hindl Drips and the province are Hindl Drips and the province and the province are the second of the province and the province are the province are the province and the province are the province are the province and the province are th classifi d under the generol heading of the Tibeto-Burman languages

Agricultural Products -The river basins Agrenuthral Products—are river teams are usuarily fertile and present in the main few dimenties to the cultivator Rice is the atapie food crop nearly 5 637 575 acres in 1013 44 being devoted to this crop Rainfall heing high the problem in general is to dispose of the surplus water and to control the oction of floods rather than irrigation in the usual sense. Tea and jute are the most Important crops grown for export. The area under tea consists of 410 917 acres in 1943 41. About 43 500 ocres are devoted to sugarcase. A good deal of short staple cotton is grown in the bills.

Meteorological Conditions—Resignal is recyrchere abundant and ranged from 51 2 to 234 07 inches in 1938 leaving aside the highest recorded rainfall in this part of Indie which was the maximum reached at Cherapanji in the Khasi Hills (669 50) this is one of the wettest places in the world Temperatures are moderate Farthquakes of considerable severity have taken place by far the worst being that which occurred in 1897

Accounts of the petroleum occurrences in Assam have been published in the memoirs of the Geological Survey of India The petroleum localities of the Assam have been published in the petroleum localities of the petroleum localit leum localities to this province are confined to a curred belt of country along the basins of the Brahmaputra and the Surme This belt is traceable over a distance of some SOO miles from E Assam through Cachar and Chittagong to the Arakan coast where it has a S S E trend

Mines and Minerals -The only minerals in mines and Minerals —The only mapping as Assam wo ked on a commercial scale are coal limestone and petroleum oil. The most exten sive coal measures hitherto wo ked are in the Aggs Hills and the Lakhimpur districts wi ere about 6 496 tons were raised in 1914 Important deposits also exist in the Gare Hills Lime stons to market the Lakhimpur districts with the Lakhi stone is quarried in the Lhasi and Jaintia Hills Petroleum is worked only in Lakhimpur and Cachar and has only been refined in Lakhimpur

Monniactures and Trade -Silk is mann isctured in the Assam valley the weaving being dons by women. Cotton weaving is also lerg ly dons by women. Lotton weaving is also loss a practiced by the women and almost every hous la that valley u.ed to contain a loom the cloth is being gradually displaced by imported goods.

The Province of Assam which as shown on; of finer texture and colour but vigorous efforts at revival are helng made by Gov rnm nt Tea manufacture is the most important industry of the province Boat hull ling brass and metal and earthenwares and limestone burning are other industries but a riculture employs about 80 per cent of the population Assam carries on a considerable trode with the adjoining foreign tribes and countries

Communications -Mach of the trode of Assam is carried by river The extensive system of rivers makes the province less dependent ppon roads than other parts of India but there has been much advance in recent years in roa i communication A fleet of steamers maintained hy the India General Navigation Company and to Rivers Steam Navigation Company and the Rivers Steam Navigation Compeny piles on the rivers in bott Valleys. An altern to day service of pessenger boats runs between Goalundo and Dibrugarh Ti ere are two trunk roeds on either bank of the Bral maputro most of which are metalled or gravelled There are excellent metalled ro de from Shillong to Gauhati Shillong to Sylhet Shillong to Clerrapunii and niso be tween Dimapur on the Bengal & Assam Railway (A B zone) and Imphal the capital of the Moni pur State The Government of As. am hod in 10 8 carried out a considerable programme of rood improvement and another programmo which aimed at the improvement of neorly \$00 n ll a of road either hy metalling or gravelling and the construction of 1° big bridges is complete In September 1937 n further road improvement programme totalling Ps 105 25 000 was drawn up from which 22 sehemes omounting the Rs 41 11 0 4 were selected as a priority class. The Government of India have recently approved The Government of India have recently approved a programme running up to 31 0 45 under a programme running up to 31 0 45 under amounting to Its 3 00,000 will be financed from the Road Tund The work on some of these projects is olready completed. In addition to the above the Government of Assum propose spending about Rs 1 3 000 cut of the Propincial Jictor Taxation Road Junt on a 64 the Propincial Jictor Taxation Road Junt on a 64 the Propincial Jictor Taxation Road Junt on a 64 the Propincial Jictor Taxation Road Junt on a 64 the Propincial Jictor Taxation Road Junt on the Propincial Junt of the Propincial Jictor Taxation Road Junt of the Propincial Jictor Taxation Road Junt of the Propincial Junt of the Propincial

the improvement of secondary or feeder roods I'ut he roads are being maintained by means of mechanical plant which has proved successful in maintaining throughout the year a surf cefit for motory hicles Motor traffic has increased on all aides and the demands for better roads here be n aides and the demands for letter roams netwer a unisatent. The open miletge of r liway has he shown a steady improvement and several brench lines to the Beng I & Assam Railwey (A B 200e) system have been added in recent years. The mein Bengal & Assam Railwey (A B 200e) line runs from Chitagong Port. In Beng I The mein Bengal & Assam Railwey (B 200e) line runs from Chitagong Port. In Beng I will be the Discussified and the state of the state addition on the Discussified Bulley Bullings and connects the Surma and Brahmoputra. Vall ys A by neb of the line runs I om Baderror to A bruch of the line runs fom Baderpor to Silchar t the Eastern end of the Surme Valley and anothe runs west down the Assam Vall y and anothe runs west down the Assam Vaii y from Lundi g to P ndu where it effects a jonction with the Bengel & Assam Railway (B E zone) connects Assam with the Bengel system rut the Valley of the Br hampatra Isellhend is now at Ita g p a north of Dealth and the Bengel of the Br hampatra Bengel Br ham Bengel Br hampatra Br hampatra bengel Br hampatra Br Assam Rly

80 Assam.

Administration -The province of Assam | was originally formed in 1871 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was deelded to add to the small Province of Assam the castern portion of its unwield, neighbour and to consolidate those territories under a Jientenant Governor. The The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912, the lastern Bengal Districts vere united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor in Council, Bihar, Chota Nagpur and Orlssa were formed into a separate province, while the old Province of Assam was re constituted under a Chief Commissioner

Under the Indian Reforms Act of 1919 the Province was raised in status to that of adminia tration by a Governor in Council and was thereby ranked with the older major provinces

of India

The capital is Shillong, partly in British and partly in Khasi State territory, which has for a number of years been growing rapidly and is now in parts over crowded. The town has grown up on somewhat rust e lines in very beautiful country on the slopes of the Shillong Range which rises above it to a height of 6,450 feet above the sen It was destroyed in the earthquake of 1807 and has been rebuilt with methods of construction more fitted to withstand the shocks of earthquake

THE FINANCES OF BLNGAL.

After a sequence of deficit inadgets for several ven s. Be., allooke i forwal hopefully to an improvement in her linancial postion as a direct result of the special steps taken by the Central Government and by Parliament through the India Act to allow to the interpolate I a her Properlia Autonomy she was better oil to the excent of Ps. 70 laking a year than twions. In the year 1935-36, despite the grant from Central reseaucs of an amount equal to half the process of the jute export duty, the budget showed a deficit of Ps. 513 latts. The No meyer report however, as subsequently implemented gave a further same of Ps. 42 latts amountly from an increase I share in the jute export duty, and also an amount rejief of Rs. 33 latts in cancelling the Province s accumulated debt to the Centre. Thus Bengal was able to face the future with more confidence. The Budget for the very 1937-38 was a surplus linded. The very 18 % 29, however, mark if the Budget for the very 1937-38 was a surplus linded. The budget for 1941 to revenied a deficit est mated at more than a crore of ruples. Although the humanes of the I rolled a next deficit estimated at more than a crore of ruples. moted at more than a crore of rupees. Although the histories of the I rosline of reveiled in the moted at more than a crose of supers. Actions the animals of the Frontier and active of the preceding nears, show a continuous improvem at the expenditure of the Province appears to have received as the where it may be self the flovernment are living well beyond their means. In every 1013 then wished by a considerable at a inchange, but unfortunately flood and families not only served to hamper around development but resulted in heavily increased expenditure on relief and reconstruction measures. Another detects resulted, in he vits increased expenditure on relief and reconstruction measures. Another detects could but discussions were instituted for assistance from the Central Government, as the outlook services worse for 1944.45. The assistance received however, proved innicipants to stop the rot, which was aggravated by economic conditions. A further request for assistance from the Centre has twen mide, but mentione the Province continues to budget for a deficit in 1945 46

1

As in the case of Bombay Presidency, the province known hitherto as Biliar and Orissa has suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details there fore apportain to the new Biliar province after the separation of Orissa as from April 1, 1926

the soparation of Orisan as from April 1, 1926
Bihar lies between 20° 30 and 27°-30′ N
latitude and between 82°-31′ and 88°-26 ½
longitude and includes the provinces of Bihar
and Chota Nagpur, and is bounded on the
north by Nepal and the Darjeeling district
of Bengal, on the castby Bengal and the Bay of
Bengal, on the south by the new province of
Orisan, and on the west by the United Provinces
of Agra and Oudh and the Central Provinces
The area of the territories which constitute
the Governorship of Bibar is 69,348 square

The States in Chota Nagpur which were included in the Province have since the 1st April 1933 been transferred to the control of the Resident, Lastern States and no longer form part of the Province Chota Nagpur 14 a mountainous region which separates them from the Central Indian Pinteau Bihar comprises the valley of the Ganges from the spot where It lasmes from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajuahai South of Bihar lies Chota Ragpur Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Muzassappur (for Tirhut), Bhagaipur and Ranchi (for Chota Ragnur). The headquarters of Course The headquarters of Government Nagpur) The are at Patna The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Banklpore is known as "Patna," the old town being called "Patna City"

The Province has a population of 36,340,151 persons Even so with 521 persons per square mile, Bihar is more thickly populated than Germany There are only four towns, which can be classed as cities, namely, Patna, Gaya, Jamshedpur and Bhagalpur During the last ten years the population of Patna has been steadily increasing Hindus form an overwhelming majority of the population Though the Muhammadans form about one tenth of the total population they constitute more than one-fifth of urban population of the province Animists account for 5 7 per cent These are inhabitants of the Chota Nagpur plateau and the Santai Parganas, the latter district being a continuation of the plateau in a north-casterly direction

Industries

Although there is a great deal of mineral wealth in Chota Nagpur and important industries are developing in connection with it, still for the bulk of the population of the province agriculture continues to be the basic occupation. Over 80 per cent of the population depends wholly on Agriculture, while only 78 depends on industries

The soil throughout the whole of that portion of the Indo Gangetie plain lying within the provincial boundaries is extremely fertile, particularly in North Bihar, in parts of which the density of the population is more than 900 people to the square mile The province occupies a transitional position between Bengal with its

damp climate so suitable for the paddy crop and the provinces to the north and west where large irrication schemes have had to be provided to enable the roll to produce its bounty. As in Brugal, rice is by far the most important crop as it occupies normally an area of approximately 12 million acres or about 52 per cent of the net cropped area of the province. In 1942-43 the area under rice was 9,291,200 acres. As canal irrigation is available only in the Sone valley and to a moderate extent in Champaran District, the importance of the south west monsoon to the province of Biliar cannot be over estimated.

In addition to the rice crop, however, office grain crops are grown on a tolerably large scale. Of the monsoon cereals, malro is grown in a normal area of about 16 lakis of acres while in the cold weather wheat and barles are extensively grown and occupy approximately 13 lakis of acres. The cultivation of ollsceds like castor, mustard and linesed forms a large and important part of the agriculture of Biliar, the normal area under spring offseeds being estimated at more than 17 lakis of acres. The areas under malro, wheat, barley and spring offseeds in 1943 44 were 1,513,100 acres, 1,220,800 acres, 1,270,100 acres and 1,504,300 acres respectively.

After the United Provinces, Billar is the most important white sugar area in India, some 26 per cent of the total production of white sugar in the country being turned out in Billar factories. The importance of the agricultural aspect of the industry cannot be overestimated as nearly 4 crore of rupees have been paid to the grower. In the past season 1942 13 for cane purchased and crushed by the factories. Apart from this, numbers of young graduates and large labour force find employ ment at the factories from vear to year. The number of factories in the province has risen from 12 in 1931-32 to 31 at the present time.

Jute Is also an important crop and is confined almost cutirely to the Purnea district on the Bengal border where about 95 per cent of the total erop in the province is produced. The total area under the jute crop was 202 200 acres in 1943 44 but little of the produce is manufactured, within the province.

manufactured within the province
Tobacco is a crop of increasing importance in
the province and one which is likely to expand
in importance The area under the crop in
1943 44 was 110,000 acres There are two
factories at present in the province

Mnnufactures
Opinm was formerly, with Indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chinese Government the Patna Factory has been closed At Monghyr the Peninsular Jobacco Company have erected one of the largest eigarette fretories in the world and as a result tobacco is being grown much more extensively. The Jata Inon and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tipplate Company of India, Agricultural Implements, Ltd. Enfield Cable Company of India, Enamedical Ironware, Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approaching 100,000 and it consumes 1½ million.

tens of coal annually has also some of the richest and most extensive fron mines in the world and supplies the Iron and steel works in both Bengal and Bihar with raw materials but the raising of eoel is still the most important of the mineral industries in the Th coalfields in the Manbham province The coalfields in the Manhama District have undergone an extraordinary d velopment in the pa t twenty years while valuable new fields are being developed at Ramgarh Rokaro and Karanpura in Hezaribagh This anme district is the most important mica mining centre in the world both on eccount of the quality as well as the size of its output Manbbum Palaman Ranchi the Sautai Parganas and Gaya are also the chief c ntres for the production of iae and the manu lacture of shellae the f tter of which is exported from India to the value of ten crores annually Cement la the other important industry of the province which is produced from the lime stones available in Palaman and Shahabad

Administration

The Province on first constitution was ad ministered by a Lieutenant-Governor in Connell thus being unique in India as the only Lieu I nant Governorship with n Council Under the Reform Act of 1919 it was raised to the status of a Governorship with an Executive Council and Ministers The principles of the Provincial administration are fully explained elsewh re

Public Works

The Enblic Works Department in the Province of Biher consists of two separate branches rf —(1) the Biddings and Roads which includes Railways Flectrical and Public Health Engloeering Dranches and () Infection 1988 Fublic Health Engineering, Dranches and (1) irrigation. Then is only one Chief Engineer in Charge of both the branches who is also as temporary second Chief Engineer and Additional Section 20 in Engineer Officer and Additional Section 20 in Engineer Officer and Under Sectedary in the Buildings and Roads branch and Deputy Clief Engineer who also branch and Engineer Chief and Chief C by Govt I connection with the Grow M re Food Campaigr, in Billiar, and an Assistant, becretary in the Irrication branch moder him The Liectrical work of the Province is carried c t by an Lie tric Inspector and Electrical by an da staff of subordinates whose in a staff of subordinates whose in P bile Health Lagineering vorks are looked after by n Public Health P gine r who is in the go of the P H Togineerin Department and of subordinate

The post-war Road D velopment & Plannin is carried out by n Fn ineer as special officer

Justice

The administration of justice is controlled by the High Co rt of Judicaine.

I hat a I the administration of evil judicaine.

I hat a I the administration of evil judge as counts of Appeal the Subordinate Judge and the Brustis.

Brustis Th jurisdiction of a District Judg. or Subordinate Judge at the Subordinate Judge and the Brustis.

This part of the province | ho vever include the powere of a Small Cause Court unless the e be epecially conferred ordinary jurisdiction of a Munsil extends to all anits in which the amount or value of the subject matter in dispute does not exceed Rs 1000 thou h the limit may be extended to Ru 4 000 On the criminal side the Sessi ns Judge hears On the Crimma and the creek me was a man appeals from Maristrates exercising first class powers while the District Magistrate is the appellate authority for Magistrates excessing second and third class powers. The District Magistrate can al.o be though in point of fact he very rarely is n court of first instance. It is usual in most districts for a Joint Magistrate or a Dejoty Magistrate to receive complaints and police reports cases of difficulty or importance heling referred to the District Magist are who is responsible for the peace of the district In the Santal Parganas and in the Chota Nag pur Division the Deputy Commissioners and their subordinates hear rent suits In the Santal Parganas the Deputy Commissioner and his subordinates al o exercisa civil powers

Load Tenure

Almost the whole of the province of Blhar is covered by the permanent Settlement of 1793 A number of estates are held direct by Oovernment havin come into the direct management of Oovernment in various ways management of Goversment in window ways other sesters ere managed temporarily by the Boardol Revenue under the Court of Words are managed by Managers appointed under the Chota Nigorus are managed by Managers appointed under the Chota Nigorus Photumbered Estates Act. There are two Tenancy Acts in force in the Province. In Elber the Biber Tenancy Act is inforce This it to the Managers of the Managers of the Province of the Province of the Province of the Managers of the Manag consequent on recent amendments of the Act in Chota Narpur which is regard in India to the Chota Narpur Tennacy bortistal peoples the Chota Narpur Tennacy continued in the Chota Narpur Tennacy and the Chota Narpur Tenna tion III of 187 and 11 of 1888 and the record of ri his prepared in the settlement in a small part of South Bihar where there is a large aboriginal population a special chapter of the Bihar Tenan y Act designed to prevent allenation of fand by aborigines is in force

Throughout the province a system of periodi settlements I in vogue. In these settlements the maps and cadastral ledgers are revised and f ir rents settled in many districts the settlement records are now out of date and in one or two it is nearly 40 years since the last sattlement was undertaken

In the greater part of the Santal Parganas and in many parts of Chota Naggur the head men system prevails The usual practice that the headmen are re pon ble for the collection of the rents and their payment to collection of the rents and their payment in allords after deduction of a percentage as their ramuperation. Sp clai teps h we been taken in the retitements to record the rights Mentality appear the Suborninate Junger in the parken in the realisments to recover and space and the parket properties of the head of the head me and these lairfeiths exbordinate Junge extends to all original units and piritie c of critin piriting delasses of cognizable by the Chil Countil It does not benatitationnens the abordinate Police

The Departments of Police, Prisons and Iteals tration are each under the general direction of Universities (q.t.) Government, supervised and inspected by an Inspector General with a staff of aggletapts. The Commissioner of Excise and Saltigalso In protor General of Registration

Under the Inspector General of Police are three Deputy Inspectors General and 21 Super intendents There are also 21 Assistant Super Intendents of Police and 14 Deputy superintendents The force is divided into the District Police, the Ralling Police and the Military Police There is a college for the training of officers and two Schools for the training of recruit constables Police officers on their staff A Criminal Inves tigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in in vestigations of crimo of this class and other scrious action which its assistance may be invoked. There are 11 companies of Un mounted Military Police and one Squadron and two troops of Mounted Military Police which are maintained as reserves to deal with ecrious and organised disturbances and perform no ordinary civil duties

Education

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (q v) showing in great detail the edu cational status of the administration The mass literacy movement which has been in augurated in Bihar for the education of adults

There is a University at Patna, whose fune under the Indian tions nro described

Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service Under him there are 16 Civil Surgeons who are responsible for the medical work of the dis tricts at the headquarters of which they are 57 ho-pitals & Dispensaries are stationed. maintained by Government in addition to 632 Dispensaries maintained by Local 6.138,938 we Schools for the training of recruit Relieves, private persons, etc. 6,138,988

Both the institutions have selected patients including 1,17,757 in patients were treated in alithe dispensaries in 1943 The total dispensaries maintained by income of the Government and Local Bodles including that of the private aided institutions amounted to Ra 39,31,191/8

There is a large mental hospital for Europeans at Ranchi receiving patients from Assam, Bihar, Bengal, Baluchistan, the O.P., the NWFP, Orissa, the Punjab and the United Provinces and another similar institution for Indians for the treatment of mental patients from Blhar, Orlssa and Bengal A sanatorium has been established at Itkl in the district of Ranchi for treatment of tuberculosis There is a the Medical College at Patna with a large and well equipped hospital attached to it including an There is a institute for Radium treatment Medical School at Darbhanga which also has a largo liospital attached to it Centres for anti-rable treatment have been opened at Patna and other suitable places in the province

The province has a laboratory for the prepara is an interesting feature of the educational are supplied to other provincial Governments programme of the province also for use in the prevention of epidemics

The Bombay Province

Bombay minus Sind

The Bombay Province now stroiches along the west coast of India from Gujerat in the North to Kanara in the Bouth It has an area of 85010 There are no States in political relations with the Government of Born bay as they are all now under the Govern ment of India

there are the rich plains of Golant watered ment under a moderate assessment and as long the Nermoda and the Tappi whose fertility; as he pays this assessment to cannot be dis so marked that it has long been known as the Gorden of India Bouth of Londwy City the Gorden of India Bouth of Londwy City the New York of the Control of the Co

The People

The population varies as markedly as soil and elimate. Onjarat has remained true to Hindulam aithough long under the dominion of powerful Habomedan kings Here there is an amplitude of caste divisions and the people who although softened by prosperity are amongst the keenest trading races in the world. The Deccan peasant trading aces in the world. The Deccan peasant is above neasoned by adversity the saying coes to the Committee of the Committe l guages are spoken Gujarati and Kaunada with Urdu a rou Marathi and Kaunnda with Urdu a rough lingua franca where English has not penetrated. The main eastes and tribes number five hundred

Industrio

The principal industry is agriculture which supports sixty four per cent of the population. In Guiarat the solis are of two classes the black cotton soil which yields the famous Brosch cottons the finest in India and alluvial which under careful cultivation in Ahmedabad and Kaira m kes splendid garden tand The dominant soil characteristic of the Deccan is dominant soil characteristic of the Deccan is black i ill which produces cotton wheat grain and milet and in certain tracts rich crops of sumber of Looms in the Bombay Sugarana, The Konkan is a rice land grown roder the Careladding Bombay Talend and Abmedabath under the shundant rains of the submontane; Island and Ahmedabad)

Consequent on the separation of Sind from regions and in the south the Dharwar cotton the Bombay Province as from April 1 1935 vice with Broach as the cest in Indta There Bombay has suffered a diminution territorially are no great personnial rivers suitable for irri and otherwise. The following details relate to gation and the harvest is largely dependent npon the acasonal rainfall supplemented by welttretgation A chain nt irrigation works A chain of irrigation works consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Chats fa North to Kanara in the Bouth 11 ms masses, gradually being completed and any van men of 76 443 square miles and a population mately make the Drecan immune to serious 20 80 840 Geographically included in the Province but under the Goreroment of 100 density. Since than any other part oil India is the first class Indian State of Barods with the Province has been conrect by families that the Province has been conrect by families that the Province has been conrect by families that the Province has been control to the Province has been control to the province has been control to the province has been called the province more selffor tribulation has made the people more self reliant and the rise in the values of all produce, synchronising with a certain development of industry has induced a con literable rise in the standard of living. The land is held on what The Province embraces a wide diversity lakenome as the replaced income income of which the second soil climate and people to the Lyovince exchemilated holds his and direct from Covern there are the chick plain of Golpark watered much under a moderate assertment and as long

nese But the handlers tre widely distri-buted. The handloom weavers produce bright coloured satis and to a diminishing ext at the exquiite kincobs of Alimedahad and Surat Bombay allverware has a place of its um as well as the brass work of Poopa and hask But the tendency is to submerge the indigenous handlers its beneath industry organised on modern lines. Hombay is the great centra in india of the textile trade. This is chickly found In the treadquarter city Bombay and lo Ahme dabad

Administration

Withthe introduction of Provincial Autonomy on April 1, 1937, the administration of the proince has been largely altered at the top opting unusual circumstances, there is now a Governor and a council of seven Ministers to aid and advise him in all matters except in fo fir as he is required by the Government of India Act to exercise his function in his discretion. The executive power of the province extends to all matters in which it may legislate. The Ministers are appointed and dismissed by the Governor in his discretion, he fixes their galaries until determined by the legislature The Governor, as in other Provinces, has certain special responsibilities and these extend to (a) the prevention of menace to the peace or tranquillity of his province or any part thereof, (b) the safeguarding of the legitimate interests of minorities, (c) the safeguarding of the rights of civil servants past and present and their dependants, (d) the securing in the executive aphere of protection against discrimination, (e) sphere of protection against discrimination, (e) the securing of the peace and good government of areas declared to be partially excluded areas, (f) the safeguarding of the rights of states and the rights and dignity of any ruler, and (g) the securing of the execution of orders given to him under Part VI of the Act (dealing with administrative relations) by the Governor General in his discretion discretion

The Governor is assisted by a special secretariat staff presided over by a Secretary whose emoluments are fixed in his discretion

In the legislative sphere the Governor is assisted with two chambers, known as the Bombay Legislative Assembly and the Bombay Legislative Council The Council is a permanent Legislative Council The Council body One third of the members retire each three years and the Assembly, unless sooner discolved, lasts for five years The strength of dissolved, lasts for five years The strength of the Assembly is 175 members of whom 30 are Muslims, 3 Indian Christians, 2 Anglo-Indians, 3 Europeans, 2 landholders, 7 Commerce and Industry, 7 Labour, 1 University and the remaining 120 are Hindus including 15 Scheduled castes and 7 Marathas women

The Legislative Council will contain not less than 29 and not more than 30 members of whom not less than three and not more than four shall not less than three and not more than four shall be nominated by the Governor Twenty will be elected by the General Constituencies, 5 by Muslims and 1 by Europeans The senior of the Civilian Secretaries is entitled the Chief Secretary The Government is in Bombay from November to the end of May, and in Poons from June to November, but the Secretariatis always in Bombay Inbnt the Secretariatis always in Bombay der the Local Government the Province administered by three Commissioners, namely, administered by burge commissioners, namely, the Commissioner for the Northern Division, with headquarters at Ahmedabad, the Central Division at Poona, and the Southern Division at Belgaum, Each district is under a Collector, usually a Covenanted Civi lian, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy Assistant Collectors, and one of more on an electors A collectorate, contains on an electors A collectorate, contains on an electors a collectorate, contains on an elector at the collectors of Collectors

whose whole revenues belong to the State The villege officers are the patel, who is the head of the village both for revenue and police purpose; the tainti or kuikarni, elerk and purpose; the tainti or kuikarni, elerk and accountant, the messenger and the watchman. Over each taluka or group of villages is the mamiatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole Collector and Magistrate is over the whole District The Commissioners exercise general control over the Districts in their Divisions

Justice

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and more pulsac judges, either Civilians, Barristers, or Indian lawyers Of the lower civil courts, the court of the first instance is that a the Subordinate Judge. Instance is that of the Subordiaate Judge recrulted from the ranks of the local lawyers.
The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinto judge with special powers District and Assistant Judges are Indian Civilians, or members of the Provincial Service or the Bar Ia cases exceeding Rs 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge accision of the Superginate of Assistant Judge and from the decision of the District Judge is all original suits iles to the High Court District and Assistant Judges exercise eriminal jurisdiction throughout the Province but province original contents and to able of deposed of hypergraph contents and to able of deposed of hypergraph contents and to able of deposed of hypergraph contents and the able of deposed of hypergraph contents and the able of the contents and the contents and the able of the contents and nurisdiction throughout the Province but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates Capital sentences are subject to confirmation by the High Court in some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the well as Honorary Magistrates of the Peace) and functions of Eaglish Justices of the Peace and functions of Eaglish Courts

Local Government

Local control over certain branches of the administration is seenred by the constitution of local boards and municipalities, the former exercising anthority over a District or a Taluka, and the latter over a city or town These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the lunds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes. The tendency of recent years has been to become the classical taxes. been to increase the elective and reduce the nomi nated element, to allow these bodies to elect their own chairmen, whiist larger grants have been made from the general revenues for water supply and drainage

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Province The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Province The larger municipalities are now 27 styled as Municipal Boronghs which are now 27 number. The executives of these Borongh The elecutives of these Borough

The Central Provinces and Berar.

The Central Provinces and Berar compose a great triangle of country midway between Bom bay and Bengai Their area is 1,18,710 sq miles, of which 80,766 are British territory proper, 17,809 (tiz Berar) held on perpetual least from HEH the Nizam and the remainder held by Feudetorv Chiefs The population is 10,813,581 in CP British Districts and Berar Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were aumignamated after the Mutiny, in 1861, into the Chief Commissionership of the Central Provinces Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with HLH the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with HEH the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north west, the Vindhya plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the most important cotton tracts of India and the weal thicat part of the C. P. proper. The Eastern half of the plain lies in the valley of the Walnganga and is mainly a rice growing country. Its name of the "lake country" of Nagpur. Far ther east is the far reaching rice country of Ohhattisgarh, in the Mahanadi basin. The south east of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kanker lie in this region. Berar ites to the southwest of the C. P. and its chief characteristic is its rich black cotton soil plains.

The People.

The population of the province is a comparatively new community Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the south east. The main divisions of the newcomers are indicated by the language divisions of the province Hindi brought in by the Hindustani speaking peoples of the North, prevails in the North and East, Marathi in Berar and the West and centre of the Central Provincea Hindi is spoken by 56 per cent of the population and is the langua franca Marathi by 31 per cent and Gondi

7 per cent The effects of invasion are curiously litustrated in Berar, where numbers of Moslems have Hindu names, being descendants of former Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going on The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising

Industries

When Sir Richard Temple became first Chief Commissioner of the C P, the province was laud The only road was that leading in from Julibulpore to Nagpur The British adminis tration in made roads in all directions, the two trunk rails as het ween Bombay and Calcutta run across the province and in the last few years a great impetus has been given to the construc-tion of subsidiary lines. These developments have caused a steady growth of trade and have aroused vicorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co operative credit movement. The land tenure is chiefly on the malguzari, or landlord system, ranging with numerous variations, from the great keu datory chiefships, which are on this basis, to holdings of small dimensions A system of land legislation has gradually been built up to protect the individual cultivator Berar is settled on the Bombay ralyatwark system 16,084 square miles of the C P. Is Government Reserved forest, in Berar the forest area is about 3,335 square miles, the total forest area being one fifth of the whole Province The rugged nature of the great er part of the country makes forest conserva tion difficient and costly Excluding forest and waste, 67 per eent of the total land is occupied for cultivation, for the two most advanced districts in the Central Provinces, the proportion averages 81 per eent, while the average figure for the Berar Districts is 73 per cent The cultivated area has extended aimost continuously except for the temporary checks caused by bad seasons Rice is the most extensive single crop of the Central Provinces, covering nearly 33 per cent of the cropped area. Wheat comes next with over 13 per cent, area Wheat comes now with over 13 per cent, then pulses and other cereais used for food and oil seeds with nearly 49 per cent, and cotton nearly 5 per cent. In Berar cotton is 35 per cent and juar 39 per cent, respectively and then come pulses and other cereais and oil of the cropped area. In agriculture more the pulse they regularly required the secretary required to the terrain. half the working population is female

Commerce and Manufactures.

Industrial life is only in its earliest develoment except in one or two centres, where introduction of modern enterprise also on railway rontes has iaid the foundations for future developments of the natural wealth the province Nagpur is the chief centre of busy cotton spinning and weaving industry. The Empress Mills, managed by Messrs T Sons Ltd., were opened there in 1877 and

general prosperity of the cotton trade has led Commissioner Thedivisions are and divided into to than addition of many mills here and in other districts each of which is controlled by a Deputy yarn exported from the Province during tha years 1038 39 1939 40 and 1940 41 was 1 567 -50 446 and 296 40 manuals respectively

The largest numbers engaged in any of the modern industrial concerns are employed in mandanesa mining which in 1940 employed 9 80: persons and raised 65° 5 tons Then follow coal mining with an output of 1 806 313 tons and 15 518 persons employed the Jubbulpore marble quarters and allied works the limestone quarries and the mines for pottery clay soap stone etc.

The total number of factories of all kind legally so described was 1 °O and 1 08 in 1943 and 1914 respectively the latest period for which returns are available and the n mber of people employed in them 84 696 and 100 C O respec The same economic influences which are operative in every procressive country durin its trainition stage are at work in the C P and Berar gradually sapping the strength of ti e old will ge industries as communications improve and industries are fading at any a large develop ment of trade has taken plac. The last pre war reports showed an Increase In volume by one third in eight years

Administration

The administration of the Central Provinces and summistration of the Central Provinces and Bears its conducted by a Covernor and Bears its conducted by a Covernor and a conducted by the Covernor and a a situation which made it impossible to carry on the Government of the province in accordance with the provisions of the Government of India Act 1935 the normal working of the Constitution has been suspended with effect from the 11th November 1939 by a proclamation under section 93 of the Act and the administration is carried on by the Governor with the help of thee

This Province which has a unleameral Legisla tura consists of 112 members distributed as follows -

Class of constituency or constituencies-General Urban General Rural 10 | No seafs 74 | 84 Muhammadan Urban Mah mmadan Rural 12 Women Aoglo-Indian seat European Backward areas & Tribes Commerce 2 seats Landholders Labour University 1 seat

purposes into tabsils th average area of which is

The High Court of Judicature at Nagpar which was established in January 1936 is the highest court of appeal in civil cases and also tha highest court of rimi i appeal and ravision for the Cent I Pro loces and Berta incl diag proceedings ag last European British subjects and the state of the court of the and persons jointly charged with Europesn British subjects

Subordinate to the High Court are tha District and Sessions Judge (9 in number) each of whom exercises civil and criminal jurisdic tion in a Civil and Sessions district comprising Tha G P are divided for administrative below the District and Sessions Judge consists utter advised in and Berar consti

Local Self-Government.

Municipal Administration was first intro luced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1861 Several revising Acts extend its scope and the P Municipalities Act passed towards the end of the year 1922 has considerably mercased the powers of the Municipal Commistees. The C.P. Municipalities Act has also been Vlewed generally, municipal extended to Berar self government is considered to have taken root successfully. The larger towns have municipalities, there being 82 such bodies in the Province

Under the Central Provinces Total Self Government Act passed in 1920 as uncoded in 1931 there is a local board for each talish and a district council for each district excepting Hoshangahad Chlundwara and Sangor districts each of which has two district councils local pourd consists of elected representatives The constitution of the district of circle council is a centain proportion of elected representatives of local boards, and of members selected by those representatives. If the members elected on the local board or the district council do not include a Muslim, a Harijan and a woman the elected members of the local bound of the district council as the ease may be have to select a Mushim, a Harijan or a noman as may be required to be a incider, and of they fail to do so the Provincial Government can appoint a Muslim, a Harijan or a woman as mis be required

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Conneils. The new Central Provinces I real Self Government Act has also been applied to Berar. The office beaters of all the district councils, and with few exceptions of local boards, also me non officials

Rural education sanitation, inedical relief and rural communications are among the primary objects to which these bodies direct flicir attention, while expenditure on familie relief is also a legitimate charge upon the District

Council funds

The Central Provinces Village Panchavat Act was passed in the year 1920 So far 1 089 Panchavats have been established. As the result of a recommendation of a Commuted in 1925 to local to the commute appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on recount of financial stringency for more than two years. It has now been filled in with effect from the 24th May 1933. The post has again been kept in abeyance with effect from the date the village Panchavat Officer. made over energe until further orders

Public Works

Public Works
The Public Works Department, which comprises Buildings and Roads and Irrigation
Branches, is under the control of the Chief
Engineer There are two Superintending
Engineers who between them supervise the work
of both branches The Province is fairly well
served by a network of roads, but in a number
of cases they are not fully bridged and are
therefore impassable to traffic at times during of cases they are not traile at times during the rains

State Irrigation was introduced early in the present century mainly as a result of the re-commendations of the Irrigation Commission (1901-03) During the last forty four years a sum of Rs 7 25 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula-Mahanadl, Kharung and Maniarl canals'

Three works, tiz, the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sane tloned originally as productive works and the remainder were all sanctioned as unproductive works. The three works sanctioned as productive have all falled to justify their classification in that category and have now been transferred to the unproductive list The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine normal area of annual irrigation is at present about 7,22,000 acres, mainly rice and the income from these works more than covers the expenditure incurred on their maintenance and management

Police

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force strength is equal to one man per nine square miles of area. The superior officers comprise an innes of area and superior omeers comprise an inspector General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police Areletant and Deputy Superintendents Police, Assistant and Deputy Superintendents and subordinate officers On railways special Railway Police are employed under, the control of two Superintendents of Railway Police with headquarters at Raipur and Police with headquarters at Hospiangabad There is a Police College, under the control of a Superintendent of Police at Sauger and Constable's Schools under the control of Deputy Superintendents at Nagpur and Jubbulpore A special Armed Force of 924 men is distributed over the headquarters of claffic distribute for use in dealing with armed cight districts, for use in dealing with armed distirbers of the peace in whatever quarter they may appear There is a small force of Mounted Police consisting of 1 Head Constable and 7 Constables for the escort of His Excellency the Governor The Central Provinces has no rural police as the term is understood in other parts of India The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect

During the war there has been an expansion of the District Police and the special Armed Force and the formation of a battallon of special armed constabiliary

Education

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction assisted by (i) a Personal Assistant, (ii) two Deputy Directors of Public Instruction—one for Primary and Secondary education and the other for Technical Education, the former being assisted by two Techni al As Istant (ui) an Officer on Special Daty for Fost War Reconstruction Science (1) and Officer in-charge of Musilin I duction (1) and I during the Committee and Astidied Area Committees (1) four Divisional Septemberhoods and Astidiated (1) to the Divisional Septemberhoods of Schools as International Committees (1) and I during the Committee of the Comm of Schools

The Director of Public Instruction is no longer the Secretary to Government In the Education Department The Education Department has now an ICS Secretary Illic other, D partments of Government and an officer of the Education Department acts as Under Secretary

M die I Ti e Medical and Pul be Health services of the Province are respectively controlled by the In pector General of Civil Hospitals and Dir ctor of Publi Health The Medical Dipartment has made some propers since the year 1911. A striking and we has been a loin recent years with u ban an tation and the in recent years with u ban an tation and the propersy of the property of the Department has made some progrems since the ment Primary Education is mostly under the and can together accommodate = 0 in patients

In addition to these, hospitals for vomen exist in rural sanitation an audition to these, hospitals for women exist in ruru sanitation. The Ruble Health Departate Chhindwara, Gondia, Saugor Khandwa ment is mainly concerned with the uplift of the Amraoti, Murtizapur Shegaon and Khangaon masses and in raising the health conscience of the and at all district headquarters where no people in rural areas. The principle institute of noment of noment by women declarations. The Central Provinces Vaccine Institute The Mayo ment of women by women doctors Hospital at Nagpur was provincialised in 1923, the Irwin Hospital at Amrioti in 1925, the Victoria Hospital at Jubbulpore in 1926 and the Silver Jubilee Hospital at Raipur in 1928 In accordance with recent policy 167 out of 223 local fund dispensaries have been trans ferred to the administrative and eventive control of local bodies. With the object of bringing medical relicf within easy reach of the ruril population Government has sanctioned (*) sucoldising 22 medical practitioners (allo patule) one in each district council (7) theil (42) (2) establishment of 83 Avurvedic and Unam dispuns ries in each tablil (46) (The figures in brackets indicate the number It actual operation at present) The Province la actual operation at present) The Pilia ora Vental Hospital at Naupur tuberculosis clinics have been opened at Nigpur, Jubbulpore Rupur and Amrioti during verr 1937 and 40 beds have been reserved at the Pendra Road Samtonium for the treatment of pitients sent by Government. There is a grait deal of eve disease in the province and the problem is receiving special attention. The Central Provinces and Berar Billind Relief Association is doing propagands work and helping the blind So for 25 assistant medical officers have been given training in one work for the months at the Mayo Flospital, Nagpur These specially trained officer, are posted to eve centres in the Province. Antirobic treatment is now available at 12 centres in the province, itz, Nagpur, Jubb dpore, Raipur, Alola, Varidha Ho hang bad, Saugor Chanda, Culindwara, Khandwa, Leotmal and Amraotl

Public Health

The Public Health services of the province are controlled by the Director of Public Health In 1939, a separate cadro of Sub Assistant Health Officers was sanctioned by the Govern An appreciable advance has been made 38,985 villages respectively

The Public Health Depart-

- which was founded in the year 1915 Here, small pox vaccine lymph is manufactured for the whole province and the neighbouring fendatory states Vaccinators are also trained at the institute
- Public Health Institute established in the year 1928 undertakes the examination both chemical and breteriological, of samples of water and food stuffs under the Food Adulteration Act
- There is a Health School at Nagpur, where Health Visitors are trained
- The problem of leprosy is being trackled in the province and the dipritment has a leprosy specialist who if in charge of treatment, propagandr and survey work. There are 27 lepiosy Sub Assistant Health Officers vho are of these, rinning 56 leprosy centres 6 centres are run by the British Emplre Leprosy Relief Association (Provincial Branch)
- There are 82 Sub-Assistant Health Officers in charge of epidemie dispersaries (One ın each Tahsil)
- One mechanised travelling distensary in charge of a Sub-Assistant Health Officer with a trained compounder is working under the department This dispensity visits roadside villages and renders medical aid to the aboriginals
- A scheme for eradienting the discise of Yaws is in operation in Chand; and Bilaspur districts where the inchence of Yaws is high The results are satisfactory

Vaccination is compulsory in 105 towns and 16,843 villages out of a total of 119 towns and

Local Administration

administered under the following Aota

The Madma City Municipal Act, 1910, was amended by a comprehensive Amendment Act in 1936 and the main changes effected by the Amending Act which was brought into force on 21st April 1936, were as follows

- the redistribution of the existing thirty divisions into forty territorial ones .
 - (2) the provision for a Deputy Mayor.
 - (8) the provision for aldermen.
- (4) the increase in the maximum strongth of (4) the increase in the maximum strongen of the connell from 50 to 68 members consisting nistration of district boards, it was decided to of 60 elected councillors, five aldermen elected bifurcate them Up to the end of 1935, the by the council and not more than three special number of district boards bifurcated was four councillors appointed by Government for special Eight district boards were bifurcated in sublects. subjects.

- (6) the vilening of the franchise.
- (7) the about too of the system of representsflower silroilty to imputites by nonitration,
- (4) the prostely stor Letter control over chest and huttling projude.
- (D) the provided for the larger of a tax on a territer ite
- (10) the fair, of the minimum and tualmem tates of 1 by 61 the property tax at 15% and 20 per cent respectively of the armual value of builtings or thands, and
- (11) the equititation of a new Taxation App. Is the 4,5 Committee with a Chairman appointed by Government
- Of the five rists to fired for labour, one is to the chief by a ron votor latour electorate and the others, whom latour electorate.
- as Act of 1979 elmultereous triencial plants a to all the forty allefelies in the city te club whice !

The Intern District Muricipalities Act, 1020, ne amended by Madrie let X of 1900, and

In Madre Local Boards Act, 1920, as ame ided to the Meders Act XI of 1030

The amending let of 1900, which came into force on the 16th August 1950, provide, wher alla, for the aboltion of the system of nomina tions to local lodles, for the inclusion of village penels vots within the scope of the Madras Local Boards Act with a view to making the allinge the unit of local rell government, for direct elections to illatrict boards, for the crea tion of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the eggation of office of the President of a district board or Chairman of a Municipal Council on a motion of non confidence being presed against him by a prescribed majority. The acts have undergone subsequent amendments Local bodies in the Madras Presidency are Taluk Boards have been abolished with effect from the 1st April 1984

> In the interests of administration, commissioners have been appointed to all the Municipolitics in the presidency and these have replaced non official chairmen as executive authorities

> Under an Amending Act of 1934, the taluboards were abolished with effect from 1st April 1934. This step was undertaken as these bodies bocamo financially ombarrassed Their functions liave been entrusted to district boards, with a view to avoid extreme centralisation of administration of adm 1036

But, it was actually found later on that many of the bifurceted district boards were finencially unstable so much so that the Government had to have recourse to a reversal of the policy of bifurcation and to amalgamate all of the bifurcated district hoards

By an Act of 1935 the local boards in the presidency have been divided into three groups for the purpose of elections so that elections will be held to a third of the local boards every year. The object of this legislation was administrative convenience

By an Act of 1936 ordinary courts of law have been debarred from lesuing injunctions restrain Ing proceedings which ere being or about to be taken for the conduct of elections to local bodies and preparation of electors rolls in connection therewith

By an Act of 1938 the frenchise of the territorial constituencies of the Medras Le is stive Assembly were assimilated to that of the local bodies in the Province of Madras inclusivo of the Corporation of Madras with a view to widen the franchiss of local hodies and to effect economy in the cost of preparation of the electorel roll of local bodies

By an Act of 1939 Chairman or Vice-Chairman of Municipal Conneil and Presiderts and Vice Presidents of local hoard who have been removed were made inclinit le for election removed were made included to concern to either of the said offices for a period of six months from the date of removel or until the date on which notice of the next ordinary election is published

By Acts passed in 1940 and 1941 persons who are in arrears of any kind due to eny local body inclusive of the Corporation of Madras are disqualified from standing for election or holding office as a member thereof

By an Act of 1941 a new provision was made in the Madras Local Boards Act 19 9 embling the Government to supersede District Boards upto a period of three years

By an Act of 194 the term of office of Conn cillors and Aldermen of the Corporation of Madras of Councillors of Municipalities and of members of Di trict Boards which expired on 1st hor 194 was extended to 1st hovember 1943 and power was all o taken by the Provi chal Cov rament to advance or postpone the d te

By the same Act the Provincial Government have taken power to appoint when reconstitut ing all members of such Councils and District Boards as were und r supersessions or dissolution on the date on which the Act came into force or will be superseded or dissolved after such date to dete min the term of their office to reduce the stren th of the reconstituted dunicipal Council Distri t Board and to alter or abolish the reservation scats for any community or for

The assistant engineers of the District Boards the Positine known as the Madra Local Fund Assistant Boards as the Madra Local Fund Assistant Engineers Service The Manicipal Engineers in some of the Manicipal Rifes and the Engineers in some of the Manicipal Rifes and the

and Innchavets have also been constituted into separate services known as the Madras sfunicijal Indicering Service and the Madra Lo al Authorities Electrical In Inters Service re spectivel. The existing system of control and supervision of the Local Fund Engla erag Department was recrypted in 1940 and the Chief Engineer (Communications) vas made he head of the Di trict Board En interin S rvice and three posts of Siperintending Fn neers (Commani ations) were created. The e consti tut important steps in improving the status and conditions of som of the main servi es of local hoard employees

By the amendment Acts of 1943-

(a) The provisions of the City Municipal tet relating to the powers of the standing committee in respect of establishment were placed on a line with the M D M and M L.B Acts prohibition these commuttees from con-siderin any proposals for the amendment of the establi himent schedule except at the instance of the executive authority

(b) The MDM tet was amended in a comprehen its manner removin cortain administrative difficulties which were found necessary

() Power was vested in the Board of Revenue to remme an endo vment the management of which had been transfer ed to a tocal hoard and provi ion was also n ade for h ing the rent value of lands in proprietary estates for a triennium instead of for every year

(d) Power was taken for the appointment of executive officers to panch yets

By the amendment Acts of 1014-

(a) Power was taken for the Collector to appoint any member of a local board or municipal council as president or vice-tresident or chair man and vice chairman re pecti ely when presi dents vi e presidents or chairman or vice chair men are absent on account of their being detained in prison

(b) Power was taken for Govt to direct any municipal coun ii to levy property tax at su h rates and with e feet from uch dates as may be specified in the order if the finances of the council are not enough to discharge its obligations

Co operation

Th year 1943 44 was one of marked progress The number of soci ties increased from 15 07 In a number of soci lies increased from 10 of to 15540 their member hip from 145194 to 16 853 the o king capital from Ra 855 15 lakh to Ra 3063 321 kis the loans! sued from Rs 1515 1 lakhs to Rs 0 7 10 lakhs and the divisible profits from Rs 15 7 lakhs to Rs 60 38 lakhs The coll ctions by Ceutral Ranks were unsus Ane coll Cuons by Lectural Manks were very good and the percentage of overders was 13 88 as against 18 44 in 194 43 which its If was the lowest for the prec ding 17 years There was a chrinka c in the loan business of Land Mort ago Banks agricultural cred t Engineers Service The Municipal Services and selected and cale societies are easier when the Municipal Hiller and the Recuteal Engineers in some of the Municipal Hiller and the Coperative Stores The sate turnour of

both the primaries and the wholesales reached the peak figure of Rs 134 erores. There were 1,198 primary stores with 692 bianches or depots. Their purchases and sales amounted to Rs 806 96 likhs and Rs 832 36 lakhs as against Rs 315 75 likhs and Rs 298 49 lakhs, respectively, in the previous year. The trade of the wholesales also recorded a striking increase, the purchases and sales amounting to Rs 554 43 lakhs and Rs 518 93 lakhs against Rs 96 36 lakhs and Rs 80 05 lakhs, respectively, in 1942 43. Some of the important features of the working of the stores were their participation in schemes of statutory rationing and procurement, their sales to non members (60 per cent), formation of stores societies for the benefit of industrial labourers and extension of the consumers' movement in rural areas.

The total deposits and borrowings of the Madras Provincial Coop Bank fell from Rs 202 27 lakhs to Rs 272 27 laklis on account of the bank's cautious policy in accepting deposits. There was a marked increase in its loan business (from Rs 56 04 lakhs to Rs 161 33 lakhs). By virtue of its position as the apea consisting of bank, the 'Provil Bank continued to guide, supervise and control the financial policy of central banks. The working capital of central banks increased from Rs 673 16 lakhs to Rs 750 53 lakhs. Their total profits substantially increased from Rs 3 83 laklis to Rs 5 04 lakhs. On account of the conditions created by the War the loans issued by the Madras Coop Central Land Mortgage Bank Ltd, decreased from Rs 23 66 lakhs in 1942 43 to Rs 18 26 lakhs in 1943 44. The maximum amount for which Government have guaranteed the debentures of the Bank's Rs 350 lakhs.

both the primaries and the wholesales reached the peak figure of Rs 134 erores. There were 1,198 primary stores with 692 branches or depots. Their purchases and sales amounted to Rs 806. 96 lakhs and Rs 332. 36 lakhs as against Rs 315. 75 lakhs and Rs 298. 49 lakhs, respectively, in whenever required.

Law and Order

The Superior Court for Civil and Criminal Judicial work in the Presidency is the High Court at Madras, which consists of a Chief Justice and thirteen pulsne judges. The existing order pro-vides for a maximum of 15 pulsno Judges. For the administration of criminal justice there are 30 Sessions Judges in the Mufassai (including Additional agency tracts) for Assistant Sessions Judges being provided to assist Courts in which the work is heavy there are the District Magistrates, the Subordinate Magistrates and Honorary Magistrates The administration of civil justice is carried on by 26 District Judges, and 34 Subordinate Judges and 140 District Munsiffs In the Presidency Town there are a City Civil Court consisting of two Judges and a Small Cause Court consisting of a Chief Judge and two other Judges Madras is a litiglous province and the rocords show one suit for every 174 persons The Police department is under an ın 1943 Inspector General who has six deputies, four in charge of ranges of the Presidency, one in charge of the Railway Police and the Criminal Investiga tion Department and one in charge of the Madras City Police as Commissioner of Police A Superintendent is stationed at each district The sanctioned strength of the Permanent Police Force is 27,783 including the Malabar Special Police

North-West Frontier Province.

rontier of the Indian Empire It is in form have resulted in the establishment at Razmak, a no lrrogular strip of country lying north by position dominating the Malsind Waziri country, past and south by west and may generally be of a permanent garrison of 10,000 troops drawn described as the tract of country, north of Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan Bannu, through Razmak to Sararogha, Jandola Bannu, through Razmak to Sararogha, Jandola Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan To the north it extends to the mountains of the north it extends to the mountains of the Hindu Kush From this range a long broken line of mountains runs almost due south, dividing the province from Afghanistan, until the Sulaiman Range eventually closes the Sulaiman Range eventually closes the South of the Province from Baluchistan and its total area about 39,276 square index, a little more than hif of Bontbay, or more than three fifths of the size of England without Wales. The territory falls into three main geographical divisions the Cis Indus district of Hazara, the narrow strlp between the Indus and the Hills, rontaining the Districts of Peshawar, Mardan, Kohat, Banni and Dera Ismail Khan, and the ringed mountainous regions on the north and west between those districts and the border line of Afghanistan Hazara and the fixe districts miles. The mountain regions, north and west, are occupied by tribes subject only to the political charge of Dir, Swat and Chitral, the political control of H. H. the Governor General capacity as Agent to the Governor General. ore occupied by tribes subject only to the political control of HR the Governor in his capacity as Agent to the Governor General The area of this tract is roughly 24,986 square miles and in it are situated, from north to south, the political agencies severally known as the Mala kand, K'iy ber, Kurram, North Waziristan and South Waziristan Agencies Each of the Deputy Commissioners of the six administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier A few hundred miles of the transborder territory are internally administered by the Political Agents, but the bulk of the transborder population is free from any internal interference, so long in certain Indian political circles and as a result is offences are not committed and the tribes of the views expressed upon the matter in the oh erve the conditions on which allowances are paid to many of them

The key to the instory of the people of the N-W F P lies in the recognition of the fact that the valley of Peshawar was always more casely connected politically with Eastern Front hard.

The North-West Frontier Province, as its and the protracted punitive operations against name denotes, is situated on the north-west the Waziris and Mahsuds in 1919 1920. These

and Agent to the Governor General, with head quarters at Peshawar, in direct communieation with the Government of India in the Forcism and Political Department In April 1932 the Province was constituted a Governor's Province In political questions there is no intermediary between the Governor and officer, an both arrangement dethe local signed to secure both prompt disposal of references and the utilisation of the expert knowledge of frontler conditions for which the head of the administration is selected. The advisability of re uniting the Province with the Punjab was much discussed to the security lighter political chales and as a result of the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and non-officials to investigate it The Committee, presided over by Mr D de S Bray, MLA, Joint Foreign Sceretary, toured the Frontier Province and the Punjab and heard numerous retreases. Its members were Mesers Raza fact the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre-Maho medan times its population was mainly Indian by race Early history finds the Iranians doinlinating the whole Indias valley Then came the Groak invision under Alexandor Parker, IOS (Panjab) (members) The linguity the Great, in BC 327, then the invasions of the Salas, and of the White Hins and inter the two great waves of Mahomedan invision Last came the Salkis invasion beginning in 1818 The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government Frequent warfare occurred with the border tribes The most serious phases of these disturbances were the war provoked by the aggression of Afghanistanin 1919 that ins. The Hinfins arrued that a separate Pathan Province on the Frontier would cause the Pathan Province on the Frontier would cause Pashts and the population contains sucreal indigent and the population contains sucreal indigent the almost an extended in the pathan Path that i.ns The Hin ins argued that a separate mambers writing each a separate report is your able to the Hindu viewpoint already explained and the majority of the Committee comprised of all its other members, recommending advance on a Provincial basis. Their principal recom mendations were for-

Retention of the Settled Districts and Tril al Tracts as a separate unit in charge of a n inor administration under the Government of India

Larly crestion of a Legislative Connell for the Settled District and appointment of Mem

bors of the Service in the smaller Province should have the advantage of experience in the larger one

If (concluded the Majority) the Pathan nationality is allowed sell-determination and given scope for that self development within the Indian Empire under the Reforms Scheme after which it is now striving we are as nred that with a contented Frontler population India can lace with calm resolution the future that the Frontier has in store for her

is 5 415 666 made up as follows -

Trade and Occupations

This disproportion of the sexes cannot at peent be are defined in the N W F P any more than in stabled in the N W F P any more than in any other for Northern loss where it also appears. The of Northern loss where the sex of the peer than in any other Province of I and sex of the province of the sex of the peer than in any other Province of I and sex of the peer than in any other Province of I and sex of the peer than in any other Province of I and sex of the peer than in any other Province of I and sex of the province posses, as it owes to the penaltim of the province posses, as it owes to the proposition by the peer than the first peer than the province posses, as it owes to the penaltim of the province posses, as it owes to the penaltim of the province posses, as it owes to the penaltim of the province posses, as it owes to the penaltim of the province posses, as it owes to the province posses, as it owes to the penaltim of the penaltim of the province posses, as it owes to the penaltim of the penaltim of the

are already largely utilised by the Tribal inhabitants for motor traffic Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poor means of communication, have to some extent been means deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing On the other hand, high prices are a hardship to the non agricultural elasses effects of recent extensions of irrigation have been important Land tenures are generally the same in the British administered districts as in the Punjab The cultivated area of the land amounts to 25 per cent and uncultivated 75 per cent

The work of civilisation is now making steady Progress, both by the improvement of communi cations and otherwise Relations with the tribes have generally improved, trade has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments In the British administered districts the total Percentage of male scholars to the total male population is 50 and that of female scholars to the total female population is 16 the total female population İß 16 for the year 1942 43 25 per cent maies and 7 per cent females of the totai population The are returned as literates figures for males denote a very narrow diffusion of edu-cation even for India Those for females are cation even for India Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh women, of whom 13 3 per cent are returned as literate The mauguration of a system of light railways throughout the Province, apart from all considerations of strategy, must materially improve the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few years ago, will bring ease and prosperity to number of peasant homes

Administration.

The administration of the North-West Frontier Province is conducted by H E the Governor and Agent to the Governor General with the Council of four ministers as follows—

- Hon'ble Dr Illian Salub (Chief Minister)
- (2)Hon'ble D Bhanju Ram Gandin (Minister for Tinance)
- (3) Hon ble Q Ataulish Khan (Minister for Education)
- (1) Hon ble Mond Abbas Khan (Minister for Industries)
- (1) Officers of the Indian Political Service
- (2)Officers of the Indian Civil Service
- (3) Members of the Provincial Executive and Judicial Service
- (4) Members of the Subordinate Clvil Services
- (5) Superintendents and Assistant Superintendents of Police.

(6) Officers recruited for the service of requiring special departments knowledge—Miitin, Enginee Education, Medicine and Forestry Engineering,

The cadre posts reserved for officers coming under the 1st head above are -

Chief

Secretary, Pevenue and Divl Commr. Secretary, Development Departments Administration Home Secretary Dy Commissioners Political Agents Commissioners and Asst Political Agents The Hon'ble Judlelal

Commissioner Hon'ble the Judi-The Hon'ble Addl Indielal Commiscial Commissioner sioners' Court -Three District and & District Sessions Judges Judges Two Additional District and Sessions Judges

Commisdistricts under the Deputy sioners are divided into from two to three subcollectorates in charge of tabsildars, who are invested with eriminal and civil and revenue powers, and are assisted by naib-tahsidars, who exercise only criminal and revenue powers Some sub divisions are in charge of Assistant or Extra Assistant Commissioners The vii lage community characteristic of some of India is not indigenous among the Pathans Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancient ancestry, real or imaginary Modern municipal local government has been introduced in the towns. There are also district boards. The district is the uniform police, medical and educational adminis tration and the ordinary staff includes a Dis trict Superintendent of Police, a Civil Surgeon, the Superintendent of Jall and a District Inspector of Schools The Province forms a single concational circle and only possesses one forest division, that of Hazara P W D of the Province carries out of Hazara P W D of the Province carries out duties connected with both Irrigation and Buildings & Roads It is organised in two circles (in all seven Divisions) under a Chief Engineer, P W D who is also ex-officio Secretary to H E the Governor The administration of the civil police force of the districts is vested in an Inspector-General There is a special force of Frontier Constabulary Of the Agencies contra England (Policy Valley pay land force of Frontier Constabulary Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government The revenue administration of all six administered districts is controlled by the Revenne and For the administra Divisional Commissioner thon of civil and criminal instice there are three Civil and Sessions districts each presided over by a District and Sessions Judge The two Judicial Commissioners are the

highest criminal and appellate tribunals in this Province

FINANCES

In order to meet the exce a in expenditure over the income of the Provinces a subvention of Ps one crore per annum is given by the Government of India out of Central Revenues

Budget

A deficit of Rs 12 1000 is anticipated in the budget estimates of the Province for 1945 46. The tothire enue for 194 46 i expected to yield Ps 6 49 600 and ex penditure is e t mated at Rs 9 3 000

The estimates for expensiture include c plt 1 expenditure totalling 1 6 61 000 on account of Irilation Works (0 000) Liectrich; Scient (4 63 000) nnl Commutation of Pnin. (463 600) and Commutation of Pnin (467 600) which is being met from reme If these items of a pital are vinded there would be a defit of R. 63 600 on y

The total provincial bal nee at the end of - 1015 40 is e timated at Its 1 6 000

Orissa

Like Sind Ories was constituted a grantal province on April 1995 It film was asparate goverablent ethnological and linguistic unit inside the administrative boun stay-of loundst Presidency then a w province of Oriest State Presidency than a province of Oriest State of the State

The Oriyas are an intensely natriolite recopie who beargrand love for their culture and languar. They have slways opposed any more to dimender the Oriya speaking racts for political or administrati e consider tions. The Oriyas tree tief traditions are note to the days of Libboharata when there was the to the days of Libboharata when there was the to necessary and the contract of the contract of the contract of the contract of the contract of the original contract of the Oriyas are shown in the contract of the Moreila Contract was the contract was broken up and the people radially lost race conscious a Albough and the allowed the allowed the allowed the original contract was broken up and the people radially lost race conscious a Albough and the allowed the contract of the contrac

Tato consciousness, was revived with the spirit of education under the British regime and after the great I mine of 1868. Sir Stafford vorthooks sufgested the separation of Oriess from Boogal. The proposal was turned down but the particle (sev us underlying the new move p raisted and gave rise to a series of domands.

History of Separation

The agitation for the unification of Origin test sint obtained offield recognition in 1903 when the Government of India accepted the principle of bringings in the scatter described and the principle of the scatter described and the scatter described an

The firsteface of success was achieved in 191 when the area of modern Oriss was servanted four Alogaria and amalgamated with Bilbar it form what came to be k own as the province of Bilbar and Oriss Although the status of Bilbar and Oris was but better than before the advocates of Oriya unity that the status of the Committon of the press their claim for the Iornation of the press their claim for the Iornation of the press their claim for the Iornation and the press their claim and the status of the Oriyas along and generally lavou ed the redder button of provinces on a li guistic brail bor the successof tenomolake government. They leftit however tenomials produced the proposals after the field government sonormed to formulate phalons and make con set proposals after the success of the produce of the produc

The Bihar and Orissa Legislative Council and read the id a of malgamation but the Madras Council held an inconcisely debate The Madras Government was agail at the surrender of any of its territory while the C 1 Government had an open mind.

The Government of In Ha tien a polaried what is call 1 bl a thing-buff committee to make local logarities with a view to ascertaining it attitude of Oriya spaking people in the north of Madras Prendeney on the qui sit not their union with Orias. Meaves of L. Philip and A. C. Buff reported that there was a genula long standing and original control of the original long standing and original control of the Oriya special curve in the Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Oriya special curves with Original Control or original curves with the

The O is a demand derived adventitious support from the stren th of the Mu lim claim forth countitution of Sind as a sep rate province. Those who backed up the case of Sind could not oppose the Origon claim will be ther fore came to be recomised at it of Round Table Conference.

In september 1931 the Government of India appointed the U Donnell Committee to ex mine and report on the in notal and other consequence of the control of th

ola paration the Committee made r commendations generally on the linear the Sind Committee In J nuary 1936 an Orde in Council w s is a od by Ills Majest, a Government con thuting

ise od by His Majest; a Government con tituting Oriss as a separate province to be brought i to H e with other p vincial units on the f anguration of Provincial Autonomy on April 1 1937

Extent of Province

The following are the areas comprised in the new proxince of Orissa -

- That portion of the Province of Bihar and Orissa which was known as the Orissa Division thereof
- Areas transferred from the Presidency of Madras -
 - (2) The Ganjam Agency Tracts,
- (22) The following areas in the non-Agenev poition of the Ganjam district, viz, the taluks of Ghmmsur, Aska, Sunada, Kodala and Chatra-pur, so much of the tiluks of Ichapur and Berhan pur as nes to the north all west of the bound iry line,
- (11.) So much of the Parlahimed: Estate as lies to the north and cast of the said line, and
- The following areas in the Vizigapitam district, that is to say, the Jeypore (Impartible) Lst ite and so much of the Pott ingi taluk as is not included in that estate
- the Central Aleas transferred from Provinces -
- (1) The Kharnar Zamindan in the Raipur district, and
- (a) The Padampur Tract in the Bilaspur district, that is to say, the detaclied portion of that district consisting of 54 villages of Chandrapur Padampur estate and also of the following 7 villages, viz, Kuliakunda, Badimel, Panelipudgia (Soda), Barhampura (Maiguzari), Panelipuragia (Palsada), Jogni and Thakurpal (Jognl)

Agriculture

Agriculturally and industrially, Orlssa is a backward region. It has suffered as the result of being tacked to one or the other of many provinces for administrative purposes. This explains why there are no big tactories in Orissa, although there are a large number of mangenous eotinge industries bespeaking the people's artisanship Among the cottage industries may be mentioned hardloom industries brass, bell metal silver filigree, cuticity, wood and paper pulp and lorn afficies Sugare me and jute are ti o mi ottant commerci lerops in Orissa, and ners under both these tre already mereasing The Orr, a torests can supply a large quantity or valuable timber and fuel. Fisheries too are in import eit industry of Orissa The two valuable acurces of supply are the extensive Child like and Puri where on an average 9,000 mounds of eured fish and 50,000 maunds of uncured fish respectively are exported to Calcutta every year

The chief mineral resources of Orissa are iron, coal, limestone, manganese and mica Ironore is mostly found in Mayurbhan, Keonjhar, and Bona, all States The deposits in this area and Bonni, all States are remarkable for the enormous quantity of extremely rich oro they contain. More than 60 per cent of the ore extracted in In lie comes from these areas of Orusea for which Steel Works in Jamshedpur and Mesers Bird in principle and derogatory to the presti

Orissa cannot boast of such & Co of Calcutta extensive coal mines as those of Bengal and Bilhar, but coal has been found in Angula, Sambilpur and in the States of Gangpura, Taleher and Athmalik Taleher has the largest eorlfields and they are being progressively exploited. The Agricultural and the Industries Departments which remained under the control of the Revenue Commissioner till November 1936 was taken over by the Director of Develop ment A Deputy Director of Agriculture was appointed for Orissa By the amalgamation of the ox Madras and ex Central Provinces areas 15 additional factories were added to those already in Orissa Division and four fish euring yards with their staff were transferred from the Madras Presidency

Administration.

Sir John Austen Hubback, Kosi, was ap pointed to be the flist Governor of the Infant province of Orissa

Under paragraph 19 of the Order in Council, the Patna High Court is the High Court for the Province To enable the High Court to hear on Circuit, cases of the Ex-Madras and ex-Central Provinces areas, Clause 35 of the Letters Patent was amended by Regulation XII of 1936 A new Court of an Agency Sub-Judge at Jey pore, a Munsif s Court at Nawapara and three addition al Criminal Courts, consisting of a District Magistrate's Court and two sub divisional Magistrate's Courts, were established in 1936

The Cadre of the Indian Civil Service was provisionally fixed at 17 including 18 superior posts and 4 inferior posts As it was considered undesirable to form a separate Cadre for such small number the Cadre is joint with Bihar

Provincial Autonomy—The first general elections under the constitution which estab lished Orissa as a separate province resulted in a clear majority for the Congress Party Out of 56 elective seats in the Assembly (four are nominated, making a total of 60) the Congress counted 36 as its adherents. The Governor thereupon summoned the leader of the Congress Party to form a Ministry but the latter, in obedience to the directions of the party beadquarters declared unless he the party headquarters, dechned unless he were given certain assurances by the Governor (See chapter on Indian National Congress) After a prolonged controversy this point was a microbly settled, and the Congress Party leader of the Congress of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the Lorentz College of the College of the Lorentz College of the C formed a Cabinet I ate in 1937 the legislatur decided that Cuttack should be the capita of the province

The working of self government in the lufan province was threatened with interruptic twice in 1938—one early in the year an later in the summer The former did not relate directly to Orissa, but the latter did. In this chapter we are concerned only with th iatter Sir John Hubback wished, for reasons (health, to go home on leave In his place ti Revenue Commissioner, the semormost civilis in the province was appointed to set for in the province, was appointed to act for period of four months. The Premier oppose this appointment on the ground that it was be

Orissa 137

othodinistry to ask it to work under a Governor; We fink, that our duty to the country out who till the other day took his orders from the building the output of the country of the distribution of the substantive post. The Grisar reversion to his substantive post. The Grisar Premier's complaint was taken up by the Congres, and Mr. Gandhi. An all India crist was threatened on this issue but it was are through the goodness and self-ascriftee of Str oth Illustrative who postponed his leave. ohn Hubback who postponed his leave

Thus assured of a period of peaceful promes the province continued to be adminitered by the Congress Ministry for a number of roonths blighted by the political crisis which overcook ! I stakin it could at a 1 the 1 supporters all the Congress governed provinces T Oris.a lott fr m the Oppellion and from the Loupe of Ministry regigned alon with other C mark of a resultered its are the city of the Cablants and there below no prospect of the Cablants and there below no prospect of the Cablants and there below no prospect of the Cablants and there below no prospect of the Cablants and there has no prospect of the Cablants and there has no prospect of the Cablants and there has no prospect of the Cablants and there has no prospect of the Cablants and there has no prospect of the Cablants and there has no prospect of the Cablants and there has no prospect of the Cablants and the Cablants are cablants. any reasonable chance of stability the Governor

states in the Ambala Division, Kalsia, Pataud and the mount mous tracts of Murree and Dajana, which were supervised by the and Kahut, approximate closely in character-latics to the Himalayan tract. Leept in the with the formation of a new Political Agency at hills, the rainfell leaves little in right for protection against distress in unfavourable serious and irrigation is almost unknown. Skirting the base of the hills and including the low range of the Simplify runs the parent submontant. the base of the hills ind including the low range of the Siwahks, runs the narrow sub montane ract. This tract, secure in an imple rainfall, and traversed by streams from the hills, computed portions of the province. Its population of over four millions is almost arge town in Sirlkot. Of the plains of the Pinjab, the eastern portion covers an area of 50,000 square miles with a nopulation is excrivile realisting in the rainfall involves distress, if not actual amine. Within the eastern plains let the large town is comployed, any material reduction in the rainfall involves distress, if not actual and incompanion with the western Punjab is largely urban. The western Punjab is largely urban. The western plains cover and is largely urban. The western plains cover and is largely urban. The western Punjab is largely urban. The western Punjab is largely urban. The western Punjab is largely urban. The western Punjab is largely urban. The western Punjab is largely urban. The western Punjab is largely urban. The western plains cover and the population of a lattle over six milhous. The rainfall agricultural and pastoral tribe, chiefly found. ation of a little over six millions. The rain-speaks for itself. The Gujars are an important fail in this area, heaviest in the north and agricultural and pastoral tribe, chiefly found east and decreasing towards the west and south in the eastern half of the province and in the is everywhere so scanty that cultivation is only jextreme north-west possible with the aid of artificial Irrigation or closely resemble the Jats and are often absorbed upon the low-lying river-banks left moist by the retreating floods. In this very elecumistance, these tracts find their security against famine, for there cultivation is almost inde pendent of rain, a fulure of which means nothing worse than a searchty of rrise So little rain is sufficient, and absolute drought occurs so seldom that the crips may be said never to fail from this cause. The western plains embrace the great colony areas on the Chemb and Jhelum Canels which now chellenge the title of the eastern plains as the most fertile, wealthy and populous pertions of the province Multan and Lyalipur are the largest towns in the western area Owing to its geographical position, its scanty rainfell and cloudless skies, and perhaps to its wide expense of untilled plairs, the climate f the Punjab presents greater extremes of both hear and sold than any other portion of rada The summer, from April to Septemoer, is scorchingly hot, and in the winter, sing frests are common But the bright suu and invigorating air make the climate of the Punneh in the acid make

States.

of the Punjab in the cold weather almost ideal

The Indian States of the Punjab were formerly In the political charge of the Punjab Governmenty ment In 1921, however, the thirteen most important States, including Patlala, Bahawaipur, Jind and Nubia, wore formed into a separate of the Agent to the Governor-General, Punjah States Agency" under the control of the Agent to the Governor-General, Punjah States The only States remaining in the charge of the Punjab Government were the Simia the Punjab Government were the Simia province affording the main means of substates, for which the Deputy Commissioner is essentially a country of peasant proprietors

speaks for itself. The Gujars are an important agricultural and pastoral tribe, chicay found In organisation Into that tribe. There are many minor agricultural tribes, priestly and relicious castes (Brahmans, Sayads and Kureshis), most of whom are iandholders, the trading castes of the Hadas (Clastel Across and Baying) the tho Hindus (Khatris, Aroras and Banias), the trading costes of the Mahomedans (Khojas, Parachas and Khakhas), and the numerons artisan and menial castes. There are also vagrant and criminal tribes, and foreign elements in the population are represented by the Baluchis of Dera Ghazi Kinan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Minimali districts Pathans are also found scattered all over the province engaged in horse-dealing, labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages

The main language of the province is Pan The man language of the province is Pan publ, which is spoken by more than half the population Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns), Western Pahari, which is spoken in the hill tracts, and Rajastiani, the language of Rajputana Baluchl, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population

stav in winter in Lahore and summer (from the middle of May to the middle of October) in ment Trusi Simia Under the Governor, the province is tant towns administered by five Commissioners (for Am bala, Juliundur, Labore, Ravalpindi Mulian) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district

The principal heads of Department in the province are the three Financial Commissioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Apriculture and the Court of Wards) the five Chief Lineincers, the Inspector General of Police, the Director of Public Instruction, the Inspector General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Porests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co operative Credit Societier and Joint Stock Companies and the Legal Remembrancer

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original eriminal jurisdiction in cases where European British subjects are charged with serious offences and original civil juris diction in special cases. The Court sits at Lahore and is composed of a Chief Justice and ten Puisne Judges (either civilians or barristers), Subordinate to the High Court are the District and Sessions Judges (22 in number) each of whom overeises civil and eriminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Irontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment

Local Government

Local Government is secured in certain anches of the administration by the branches of the administration by the constitution of District Boards, each exer cising authority over a district of a Corporation at Lahore or of Municipal, Town, and Notified Area Committees each exercising authority over an urban area, and of Panchaya's, each exercising authority over a revenue estate or a compact group of revenue estates The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession and other takes and miscellaneous fees, and those of the Lahore Corporation and Muni-cipel, Town, and Notlied Area Committees from octrol or terminal tax and other forms of taxation, from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the traditional village community organisation, the elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abate

Sind.

Sind is one of the two provinces created in and the infant in respect of development loans 1936, the other being Orissa Unlike the incurred during the joint family period Lands, latter, which has been carved out on a linguistic forests, buildings, property, etc., will pass to the basis from three older provinces. Sind was a province where they are situated. Arrears of compact unit and was considered a province taxes will belong to the province where the taxed within a province even before its separation From the point of view of geography, ethnology took place Of the outstanding Bombay and language, Sind has greater affinity to the Irrigation Debt incurred before April 1, 1921, Punjab than to Bombay Nevertheless it has Its 2,74,96,384, including Rs 73,687 of the been attached to the Bombay Presidency debt on account of the Lloyd Barrage and Canals Bombry Presidency administratively ever since its conquest by Sir Charles Napier in 1843 \

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about a dozen years ago that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming mejority, should have separate administrative machinery under the next reformed constitution, so that it might be a counterblast to provinces where the Hindus are in a majority What was stacted as a bargaining point in inter communal negotiations has now become an accomplished

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930 The question was referred to a committee which accepted the principle of separation, suggested an expert scheme, Sir Otto Niemeyer, a financial expert, inquiry to ascertain the financial aspect of was asked to conduct an inquiry He the separation, and threw the burden of proving the feasibility of separation on those who asked report, according to which Sind gets a cash for it An expert inquiry was hold and it subvention of Rs 105 laihs for a period of ten for it An expert inquiry was hold and it drew a gloomy picture of the financial fature of Sind Its findings can best be sum marised by its remark, "There is thus obviously no question of Sind standing surety for the Barrage—the problem is whether the Barrage can stand surety for Sind." Barrage can stand surety for Sind"

Demand for Separation

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation Wide divergence of opinion prevailed at this confer (including Scheduled castes) number 1,229,926 ence, whose charman overtually submitted a land the Muslims 3,208,325. The rest of the report according to which the canual deficit population is made up of 20,209 Christians, of the new province for the first six years of its 31,011 Sikhs, 3,687 Jams, 3,838 Parsis, 1,082 life would be Rs 80 lakhs, the revenue from the Jews and 36,930 others. According to the Barrage being eaten up by luterest charges (Consus of 1041, 380,332 mains and 00 000 females) Barrage being eaten up by luterest charges Roughly from 1945 onwards, there would be a surplus from the Barrage to help the there would province Based on this assumption manguration of the new regime

With the stage set for the advent of the new province, an Order in Council was issued in January, 1936, announcing that the new province would start on its career on April, 1, 1936, and creating transitional machinery for the conduct of government till provincial autonomy is maugurated in accordance with the provisions

Bombry and settle the liabilities of the parent 10,000 males and 34 per 10,000 females

property is situated or the taxed transactions system, will be borne by Sind, and the rest by Bombay Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabid section (which is chargeable neither to Bombay nor to Sind) will be borne by Sind The out The out standing Bombay debt on account of the Bombay Development Scheme will be the debt of Bombay Other loan works will be chargeable to the province where the works are located

It is also understood that the Central Govern ment will have to come to the reseue of Sind by providing the funds to meet the deficit in the In order to make arrangements first few years for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy completed his investigations and submitted his years, after which the aid will be progressively decreased. While on the subject of help from the contre, it may be mentioned that, according to the Niemeyer recommendations, Sind will get after the first five years of provincial autono my 2 per cent of the distributable portion of the income tax revenue

Population.

Sind has an area of 48,136 sq miles and a population of 4,535,008 Of this, the Hindus Census of 1911, 389,333 maies and 90,020 females ould in the Province of Sind are literate, represent the ing 156% and 44% of the total male and the female population respectively 138,249 Mus authoraties set about perfecting the admini lim males and 16,416 Muslim temaics 201,000 strative machinery in preparation for the Hindu males and 64,498 Hindu females are literate The language of the Province, Sindil, though it bears many marks of Arabic and Persuan influence and is written in Perso Arabic script, is nearer the original Sanskrit than any other Indian language. The Hindus are far mere ndvanced than the Muslims and enjoy a virtual monopoly of the trade of the province As against 263 Hinduliterate males per 1,000, only of the Government of India Act, 1935

Of a permanent character are those provisions of the Order in-Council which sever Sind from Bombay and settle the liabilities of the parent 10 000 males and 24 route 200 females.

ed in a riculture and animal husbandry Ten per cent are engaged in manufacturing tudus tries most of which are however of the cottage type there being very few factories in Sind

The cultivable area of the province is mostly commanded by the recently constructed Sulknir Barrage and Sind canals which with other translations of the Categories of the Sind canals which with other translations of the Categories of the Sind Categorie province as a whole Already there has been a growth is the production of long staple cotton sil of which is easily absorbed by Indian textile mills

Lloyd Barrage

The Barrage owes its existence largely to the real of the I te Lord Lloyd the then Governor of Bombay whose name It hears Started in July 1923 it was completed in January 193 It was the completion of the dream of many an engineer sad an almo t incredible boon to the cultivator who f menty carried on his sericul tural operations in a hapitazard manner heing unable to depend on the proverbial vagaries of the Ladus What it means to the Sindhi the Sindhi alone knows for the Barrage has convert a smiling gerden flowing with milk and honey

The magnificence of the achievement that is The magnifeence of the achievement that is the logol marge can be imagined u hen its realised that it is a hage water regulator consisting of 60 spans each start feet-wise the openines held regulated by steel gates each wid hing fifty tons. The Startegis is about a will be shoot five times the length of the marget start of the street with the street water through through the street water through the street water through the street water through the street water through the street water through the street water through through through the street water through the street water through the st were excurated varying in width from 346 feet in the case of main can is to only two or three feet la the case of water courses. The total length of Government channels which were excavated was over 6 000 miles and that of water courses over 30 000 miles The total 1 ngth is thue some 36 000 miles which means sbont 1; times the circumference of the earth

The total quantity of earthwork invoived excluding that for the watercourses was 6.8 exteading to a height of over 115 miles

distribute it all the year round according to requirements of cultivators The distribution is made through seven great canals regulated through regulators on both banks of the riverfour on the left bank three on the right. The c at he left bank are Robri the Eastern Nara than Khaipur Feeder East and the Khaipur Feeder West. Those on the right bank are the Khaipur Feeder West. Those on the right bank are the North Western Canal the Rice Canal and the

and such opening being equipped with three under cotton and 598 811 acres under rice

Outofevery 100 workers in Sind 59 are engage electrically operated gates. The total discharge in a reculture and animel husbandry. Ten of water into all the canals is approximately recet are engaged in manufacturing todus. 45 763 cusers of \$100 gallons per second. The total length of all irrigation channels including old and new watercourses is 54 300 m le To accomplish this staggerin feat excavation of earthwork to the extent of 7 500 000 000 cubic feet was involved as much as would fill a dra n

following approximate quantities

Wheat 11 3 000 tons cotton 540 000 bal rice 447 000 tons jacear bijri etc 1 0 tons nad ollseeds 117 000 tons

Inter-communal Co-operation

Politically the province is backward the Hindn minotity is politically minded tho Muslims owning allegiance to personalities ratic rithan to principles. The Hindus are openly atraid of Muslim dominance and of heing outside from public life. On the other hand there is growing evidence of a desire on the part of the Muslim community to reassure the minority in regard to the continued enjoyment of its rights ed-or hopes to convert-a wateriess descri into Leaders of hoth communities are working for the creation of an understanding between the two which will bring about an area of inter communal which was tring about an erea of inter communa-co-operation and goodwill so necessary for the successful workin of the reformed constitution under unfavourable financial conditions

comparatively new town for coording to known facts it was as recently as 17 9 th ta few traders of the neighbouring State of Kalat migrated to the Kalachl the land of the sand dunes It was several years later that its potenti li ics as a harbour were realleed by the Briti.h-Sir Briti.h-Sir Charles Napler the Conqueror of Sind is said to here forecast that Karachi would some day become the Giory of the East Recent developments in Karachi hold out fresh hopes of this prediction being fulfilled for with the tolid c lumn measuring 100 feet by 100 feet growth of aviation harachi which is on the The function of the Barrage is to best the year of the tree of the parts of the tree of the Barrage is to best the tree of the Barrage is to best the tree of the Barrage is to best the tree of the Barrage is to best the tree of the tr Il that is expected of it Karachi may has to hadie in 1960 a very large portion of the pro-duce mentioned above of the Barrage produce as also the produce from 4 0 800 acres of Dubari cropped land That this is not itog the Utoplan is evident from the fact that within seven years of the comm neement of Ba rago The total number of openings in all the canal in a contract of 1991 in follow operations. In the 1892 in a contract of 1991 in follow operations. In the 1892 in a contract of 1991 in a contract of 1

Nepal, on the cast and south east by Bihar, on the south by two of the Choia Nagrur of the Saugor district of the Central Provinces, and on the west by the States of Guallor, Dholpur, Bharatpur, Shimoor, and Jubbil, and by the provinces of Delhi and the Punjab Its total area amounts to 106,247 punjab. Its total area amounts to 106,247 punjab and the three Indian States of Indian States of Delhi and the Province of Delhi and the Province of Delhi and the Punjab Its total area amounts to 106,247 punjab Its total area amounts to 106,247 punjab Its total area amounts to 106,247 punjab Its total area amounts to 106,247 punjab Its total area amounts to 106,247 punjab Its Indian States Indian Its India equare miles, to which may be added the area of the three Indian States of Rampur, Tchi-Garhwal and Benares with an area of 6,276 square miles, giving a total of 112,523 square miles. The total population according to the 1941 census 15 5 60,46 456

The Province, originally termed the North-Western Provinces and so unalgamated in 1877, vas named the United Provinces of Agri and Oudh in 1902 and received its present designation on April 1, 1937 It licludes four distinct tracts of country portions of the Himalayas, including the Kunnon of the Himalayas, including the Kunnon of the Himalayas, including the Kunnon of the Himalayas, including the Kunnon of the Himalayas, including the Kunnon of the Himalayas, including the Research of the Himalayas and the Himal of the Himalayas, including the Kumpon division which consists of three hill districts, two of which are entirely in the inits and one is half in the submontane belt, the sub-Rimisvan tract, the great Gangetic plain and portions of the hill systems of Central India including Bundelkh nd The Gangetic plain is' profected by an extensive canal system, which though somewhat hable to run short of weter in carremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two or these tracts are infertile and support a very sparse population and the Central Indian pateau is almost equil-ty infertile, though better populated Tic soil ly infertile, though better populated of the Gangetic plan, however, possesses an extreme ferfility and here the density of population varies from 542 persons wer square mile in the west to 575 in the centre and 753 in the east, which gives the Province as a whole a greater population pressure on the soil than any other Province in India save Delli and Bengal In the south there are lov tocky hills, broken spurs of the Vindhya mountains, covered with stunted trees and junche, and in the north the lower slopes of the Himalayas, clothed with dense forest, affordin. excellent blg and simili grime shooting, and rising beyond in a tangled mass or adges, ever higher and aigher, and its reaches the line of the eternal snows, but the greater part of the province consists of level plain, teeming with highly-cultivated fields and watered by three rivers the Ganges, Jumna and Gogra

Administration

The Province was until the close of 1920

The United Provinces lies in practically the centre of Upper India It is bounded on tormed, under the G I Act of 1935. This the north by Tibet, on the north east by Bihar, Notember 1 1939. But after the outbroak of the Nepal, on the east and south east by Bihar, Notember 1 1939. But after the outbroak of the Notember of the South by two of the Choir Nagrur administration were assumed by the Governor States of the Central Provinces in the Source district of the Central Provinces in the south of the Contral Provinces. Secretary), and 14 Deputy Secretaries including one Deputs Tegil Remembrancer who is ex-Offico Deputs Steretary in the Judicial Depart-ment There are also four Under Secretaries and 11 Assistant Secretaries The Chief Secre and 11 Assistant Secretaries The Unlef Secretary is in charge of Appointment, General administration, Secretariat Listablishment and Accounts, and Ecclesiastical Departments, the Funnee Secretary deals mainly with the Finance Department, the Revenue Secretary is in charge of the Revenue, and Searcht Departments, the Lduration Secretary is in charge of the Education Department, the L S G Secretary is in
tharge of the Local Self Government, Municipal,
Medical and Public Health Departments, the
Judicial Secretary and Legal Remembranect
is in charge of the Judicial, Civil and Legislative

at the previous census. The total of all other communities was 1 44% comprising of Indian Christians, other Christians, nt the previous census communities was 1 44% complising of Indian Christians, Anglo Indians, other Christians, Sikhis, Jains, Pursces, Buddhists, Jews, Iribes oilier than scheduled castes and of persons who declared themselves as belonging to no caste or religion. Among the Hindus are included scheduled castes, easter Hindus and large complisher.

Arya Samajists The three main physical types are Dravidian, Arvan and Mongoliold, the latter being confined to the Himalayan and sub Himalayan districts and the former to South Mir/apur and Bundel kliand, whilst the high caste Aryans frequent the western district of the Province Most of the people, however, show a mixed Arya Dravidian origin

The ordinary spol en language of the Province is Hindustrul, Viltten in Augri and Persian There are distinct literatures in Hindi and Urda languages respectively and a certain proportion of residents in urban areas, irrespective of their religion, speak and write in Urdu which has a close relationship with Persian and Arabie

Local Self-Government

The main units of local self government are the district and municipal boards, of the Most Chairmen have non official municipal boards having an annual income of Rs 50,000 or over have executive officers to whom certain administrative powers are reserved The administrative functions of the municipal ind district boards are performed by the Chair man and Executive Officer or the Sceretary, but the boards themselves are directly responsible for most of the administration. The district boards obtain 45 77 per cent of their income from Government grants. The other chief sources of income are the least rate levels from sources of income are the local rate levied from the land owners and the tax on circumstances and property imposed by some of the boards The United Provinces Motor Vehicles Taxation Act came into force with effect from January 1st, 1936 The tax realised under this Act is also utilized in the payment of grants to local authorities for purposes of expenditure on the construction, muntenance and improvement of The chief source of municipal meomi is the oetrol or terminal tax and toll which is a Local opinion octroi in modified form strongly in favour of indirect as opposed to direct taxation for municipal purposes

Justice

Justice is administered by the High Court of Judienture at Allainabad in the portion of the province known as Agra and by the Chief Coursition of the sitting of The Province in the sitting of the sitti sitting at Lucknow in the portion of They are the final ap province known as Oudii pellate authorities in both ernning and envil cases The former consists of a Chief Justice and ten perminents, and one Additional Judge six of whom the Indians and the latter consists of a Chief Judge and three permanent and one additional street consists of a Chief Judge and three permanents and one additional street and one additional street. and one addl judges two of whom are Indians. There are 30 posts of district and sessions judges of which nine are held by officers not belonging to the Indian Civil Service as they have been The People

The population is mainly Hindu. The 1941 listed to the provincial service and the bar insus has disclosed slight variations in the minural percentages. for the medical work of each district and in a few of the larger stations he has an assistant In two stations (Rankhet and Roorkee) Medical Officers in military employ hold collateral civil charge There are about 100 Provincial Medical Service officers in charge of important dis persone omeers in charge of important dispensives and on the reserve list and a large number of Provincial subordinate medical service officers Women's hospitals are incharge of PMS (W) or PSMS (W) Officers Government have also instituted Provincial and Subordinate Number Services to be controlled. Subordinate Nursing Services to be controlled by a Superintendent of Nursing Services, WP, whose appointment is under consideration

The best equipped hospitals for Indian pa tients are the Thomason Hospital at Agra, King George's Hospital and the Balrampur Hospital at Lucknow, the newly-constructed Hallett Hospital, Cawnpore, the Prince of Wales Dispensary and the Ursula Horsman Memorial Hospital Cawnpore, King Edward VII Hospital, Benires, and the Civil Hospital at Allahabad (for Europeans, Anglo Indians and Indians llving in European style) The Ramsay Hospital for Europeans at Naimi Til is a first-class institution and there are also the Dufferin and Women's and there are also the Dufferin and Wonten's Hosp tals at various places for rendering medical aid to women HE the Vicerov performed the opening ceremony of the Hallett Hospital, Cawnpore, on December 16, 1944 The King George's Medical College, Lucknow, and the Agra Medical College, Agra, are two of the best equipped colleges, in the country, with a staff of highly efficient professors and the hospitals attached to the Colleges are the best equipped hospitals in the Province The Cucen Mais self-order of the momen and children is also attached hospit is in the Province. The Culen May 8 Hospital for women and children is also attached to the King George's Medical College and provides chineal material for the instruction of attidents in midwifery and gynaceology. At Agra this is done at the Lidy Livall Hospital There are sanatoria for British soldiers in the hills. The King Edward VII Sanatorium at Bhowall in the district of Naini Tal is an unit of data and well equipmed institution for the up to date and well equipped institution for the treatment of European and Indian consump-There is also a Government T B clime at Allahabad

Arrangements have been made for about 175 Avurvedic and 50 Unani dispensaries to work in villages, under the charge of qualified Vaids and Hakims under the Rural Development pro grumme A compounder leas been engaged to assist Forty eight Fixed and sixteen Travelling allopathic dispensaries are also woiling under the Rural Development programme at suitable places in the country side. The duty of the medical officer appointed to the Rural Development Dispensaries is not only to provide medical aid in villages but also to inculcate habits of elevaliness and carry on propaganda to ensure personal hygiene and health

The alm which has been kept in view in opening rural indigenous and allopathic dispenetities is to make available medical aid in illinges situated in the interior or the districts

Givernment deprenation every year grants for the tractment or eye diseases at certain entres it rivil arcis [A good number of medical stores and equipment which was store and equipment which was store and other at hospitals in the Province for A R P purpose at lospitals in the Province for A R P purpose at lospitals and the stores have received treatment under the list also being acquired for use at hospitals and the stores are stored to the stores and equipment which was stored as a stored and equipment which was stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored and equipment which was stored as a stored as a stored as a stored and equipment which was stored as a stored as a stored as a stored as a stored as a stored as a stored as a stored as a stored as a stored as a stored r.h me

There were about eighty subsidized dispen saries and thirty subsidized medical practitioners working at the end of December 1944

Facilities for the training of Indian girls as nurses and midwives have been provided at almost all important hospitals in the Province A Government Nursing Service has been in augurated

The Government have established a Hospitals Fund to improve Medical facilities A sum of rupees eighty-two lass has so far been allotted to this fund Applications for grants out of this fund are considered and sanctioned by Government from time to time but it is in the main being conserved for post war developments, when articles of equipment and building materials will be much einesper

A systematic campugn has been undertaken and large funds allotted to bring the hospitals at District Headquarters and the Dufferin

Hospitals to a direct level

Adequate steps have been taken to ensure that the hospitals and dispensaries in the U P do not run short of medicines, drugs and equip ment during the war period A sum of Rs 41 lakhs was illotted to provide a reserve stock of medical Stores. To tide over the difficulty of getting imported drugs a new pharmaeopoer of mdigenous drugs has been introduced at hospitals and dispensaries and an Indigenous Drugs Factory has been started at Agra Arrangements have also been made with the Director General, Indian Medical Service to obtain supplies of medical stores from the Medical Stores Department A Scheme is being sanctioned to train 90 Compounders every year for hos-pitals and dispensaries in the Province and it is in operation now

An important event in the medical administration of the UP during 1943 44 was the decision to take over under the direct control of Government important hospitals in the Province Accordingly, 9 important hospitals were taken over under Government's direct control in 1944 45 and it is proposed to take over 15 more during the financial year 1945 46 has also been decided to provincialise women's hospitals at Dist headquarters in instalments

The Board of Indian Medicine, UP, esta blished by Government in 1926, advises Govern ment for giving grants in aid to Avurvedi and Unani Dispensaries These aggregate about Rs 50,000 every year It also conducts Avur vedie and Unani examinations of student studying at its affiliated Ayurvedic and Unan Colleges and awirds diplomas to successful candidates. It also maintains a register of candidates are a second control of the candidates of the candidates of the candidate of the candidates of the candidates of the candidates of the candidate qualified vaids and hakims Government als give aid to subsidised Ayurvedie and Unan dispensaries and practitioners in rural areas on of an allotment of Rs 42,500 Government object is to render medical aid through a syster in which villagers have confidence

A Blood Bank scheme has also been started

It is getting quite a good response
Particular care has been taken in recent year
to provide X rays and cold storage plants a
important hospitals at the expense of the Pre
vineral Government. The surplus stock of
medical stores and equipment which was store
at hospitals in the Province for A.R.P. purposes dispensaries in UP

AJMER MERWARA

Ajmer Merware is an Lolated British Prn Amer netware is an Loisted is fifth fra
vines in Haputana and is administered by a
Chief Commissioner Ti o Province is divided
into th Sub-divisions of Ajmer and Kerla and
Beswar with a total art a of 400 square miles
and a population of 583 693 At the close of he Pisdari war Da lat Rao Scindla by a treaty d ted Jnn 25 1818 ceded the district to tha British Sirty two per cent of the population are supported by a riculture the indu trial population being prin ipally employed in the cotton and other industries. The principal crops are make millet barley cotton off seeds and wheat

Chief Commis oner H R Shevdssani OBE

_ANDAMAN AND NICOBAR ISLANDS

This is a group of Islands lying in the Bay of Bengal Port Blair the chief town is 780 miles from tale it a 740 miles from Madras and 360 miles from Rangoon.

The Islands were administered by a Chief Commissioner until March 194 when they were occupied by the Japanese

COORG

Coorg is a small Pro ince in Southern India west of the Stat of My ore Area 1 593 square miles population 168 6 Coorg came under miles population 165 °C Coorg came under the direct protection of its 18ths flowerment during the war with Tippt in May 1834 °C The Pro Image and the protection of the property of the proper tion of coffe Court Dewan Bahadur R Cheng pp

BALUCHISTAN

Baluchistan is a obio g stretch of country pastoral focuspying the extreme we tern corner of the lightly india, namelyne. As a divided into three main fane tulin divisions (1) British Baluchistan with an area in rvest of yators (1) British Balbenistao with an are of 1476 square miles consisting of tracts as signed to the British Government by treaty in 1870 (1) Balbenistan Leased and Tribal areas with an area of 44.454 g are miles of tracts which has been of tracts which has been otherwise. composed of tracts which has a from time time bettine been acquired by leass or otherwife brought nuder co trol and placed direction nuder B titah officers and (3) the indice of the landing of the land Indian States of Kalat Las Bela and Kharan with an stea of 79546 square miles The Povince embraces an ares of 13400 aqu re miles and according to the census m 1941 to contains 857,835 inhabitants

The country which is almost wholly moun tain u lies on a great belt of ranges coun cting the Safed Kob with the bill system of Southern Iran Iran It the s forms a watershed the draft as of which enters the Indna on the east a d the Arabian Sea on the south while ou the quantities

north and west it makes its way to the inland lakes which form so large a leature of Central Asia Rugged barren sun burnt mountains tent by high chasma and gorges alternate with arid deserts and atony plains the pre valling colour of which is a monotonous sight But this is redeemed in places by lev I valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised

The political connection of the British Government with Bainchistan commenced from the ontbreak of the First Afghan War in 1839 It was traversed by the Army of the Indus and was afterwards occupied nutil 184, to protect the Britih lines of communication The districts of Kachhi Quetta and Mastung were handed over to the Amir of Afghanistan and Politic i Officera we appointed to ad minister the country. At the close of the First Afgian War the British withdrew and these fisticts were assigned to the kban of Kaiat The founder of the Baluchistan Pro face as It now exists was Sir Robert Sandeman who It now exists was our novert canaciman who broke down the clove border a stem and welded fae Baluch and Brahni Ci lefs into a clove con federacy in the Afghan War of 1879 Pishin Shorarid Sibl Z wara Valley and Thai Chotisil were handed over by Yakuh Khan to the British Government and retained at Sir Robert Sandeman & strennous lusistence

Industries

Bainchistan lies ontsids the monsoon area nd lis rainfall is exceedingly irregular and Scanty Shahrig which has the heaviest ainfall records no more than 14 72 inches in a year in the bighlands is w places receive more than 10 inches and in the plai the average radiali is about 6 inches deere sing in some e sea to 3 The majority of the i dig nous population are dependent for their livelihood on agriculture care of animals and provision of transport. The majority of the Aighen and the B inch as a rule culti ate their own I nds Tha Brahuis disliks agricultue and prefer a pastoraf fife Pre lou to the sdy t of tha British fifs and property were so in coure that the relievator was reference him respet his it rvest. The establishment of peace and accurately has been accompanied by a marked extension of agriculture which scot as for the lucrease in the numbers of the purely cultivating classes Tha Mekran Coast is famous on the quantity and quality of its fish and the industry is const ntly dev loping Fr t is axiensively grown in the highlands and tha export is increasing

DELHI.

The Capital of India

The transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911 It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was un attainable as long as the Government of India were located in one Province, and in the capitai of that Province—the seat of the Bengal Gov ernment-for several months in every year it was also desirable to free the Bengai Government from the close proximity of the Goven ment of India which had been to the constar To achiev disadvantage of that Province these two objects the removal of the capita from Calcutta was essential its disadvar tages had been recognised as long ago as 1861 when Sir Henry Maine advocated the change Various places had been discussed as possible Capitals, but Delhi was by common consenthe best of them all Its central position an situation as a railway junction, added to it historical associations, told in its favour and as Lord Crewe said in his despatch on th "to the races of India, for whor subject. the legends and records of the past are charge with so intense a meaning, this resumption by the Paramount Power of the seat of vene table Empire should at once enforce the con tinuity and promise the permanency of Bri sovereign rule over the length and breadth of the country"

The foundation stone of the new capits was laid by the King-Emperor on Decembe 15, 1911, the finally selected site being on th eastern slopes of the hills to the south of Delhi on the fringe of the tract occupied by the Delh of the past The land chosen is free from hability to flood, has a natural drainage, and is not manworn. It is not cumbered with monuments and tombs needing reverent treat ment, and the site is near the present centre of the town of Delhi A Committee consisting of Surgn -General Sir C P Lukis, Mr H T Keeling, CSI, AKICE, and Major J C Robertson, IMS, was appointed to consider the comparative bealthiness of the site and of al alternative one to the North of the existing city Their report, dated 4th March, 1913 stated that "the Committee, after giving ful consideration to the various points discussed in the above note, is bound to advise the Government of India that no doubt can crist as to the superior healthmess of the southern sife, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site"

The Town Plan and Architecture Town Planning Committee, appointed to advise Government, submitted its report in March, 1913, with a pian of the lay-out and work was begun in accordance with that Report The central point of interest in the iny out, which gives the motif of the whole, is Government House and two large blocks of Secretariats This Govern ment centre was given a position at Raisina Sir Edwin hill near the centre of the new city

Delhi

Lutvens is the architect for Covernment House [19 1 that the revised estimates then amounted and Sir Edward Baker for the Secretariats The so 1 30 lakh of rupees been utilised. The Screenlat personnel has largely increased in the past tew years and nn merous addition I rooms had to be provided to make room for Army Headquarters which moved into the new capital at the end of the Simla season 19 9 To the east of the forum and below it is a spacione lorecourt defined by an ornamental wall and linked un to the great main avenue or parkway which leads to Indrap ast Across this main axis runs an avenue to the shop ping centre Other ro ds run in different direc tions from the entrance to the forum The axis runnin north east towards the Jama Masjid lorms the principal appro ch tn the new Legisla tive Chambers They are nfficially described as the Conneil House and the road is named Parlia ment street The railway etation for the new city finds its place about hall way between the old and new cities off the rnad through Paharguni which iles to the west of Old Delhl in the direction of The Ridge The main roads or avenues range from 6 feet to 150 feet in width with the excep tion of the main avenue east of the Secretariat buildings where a parkway width of 1 175 feel has b an allowed has b an allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axts

dueed for trial in 1928 by keeping the Secretariat individual artists, were invited tirrough local in New Delhltill mid April and bringing it down tovernments, to send in by the beginning of from Simla again in mid-October The experi Narch 1928 small scale designs for approval ment was not very successful and was not by a Committee After approval by the Com repeated till 1932-33, when Retrenchment mittee both as regards the design and colour Committees had strongly recommended a longer the pictures were to be drawn out and vainted to stay in Delhi in order to extract rent for a longer full size on canvas, and, if finally approved by period from the seasonal official occupants of its the Committee, fixed according to the marou residential buildings, the rents in Deilil being linge process in situ Other techniques, such higher tian those for residences in Simia early descent from Simla was postponed in the or sche autumn of 1934 on account of a report by the Public Health Commissioner on the general unhealthiness of the Winter Capital in October Comm But various factors, including especially the increase in personnel in the Secretariat and consequential congestion of office and residential accommodation in Simia, are making tire extension of the Delhl season unavoidable. The provision of considerable further housing accommo dation both for offices and residences has become jeets would be given preference over rell imperative. The only question is whether this glous ones and English artists living in India should be undertaken both in Delhi and in Simia were barred from competition, the work being or in Delhi only Pressed by sharp financial strictly reserved to Indian artists. Numerous stringeney, arising partly out of the emergency artists submitted designs, especially those of created by the institution of the Constitutional Roforms, the Government of India appear results that the specially appointed Expert results that the specially appointed Expert results that the specially appointed experts the constitution of the constitutional results that the specially appointed experts the constitution of the constitution of the constitution of the constitution of the constitution of the constitution of the constitutional results that the specially appointed experts the constitution of the constit Roforms, the Government of India appear declarely moving in the direction of making Delhi an all the year round Capital Certain Departments are already now kept in Delhi throughout the year. The office personnel of throughout the year others are kept in Delhi throughout the year

There was in recent years an increase in malaria bearing mosquitoes and consequential fever in New Delhi This led to a special inquiry in 1936 The inquiry showed that both Old and New Delhi were ringed about with prolific mosquito breeding places, one of the worst being the area utilized for sewage outfall The water borue sewage of both Old and New citles is dealt with in a farm which, when the new eity was built, was placed immediately outside its southern boundary. The Government of India after the 1926 inquiry were forced to adopt new scheme for the removal of the farm to a more distant site and those miles further away from the city Anti-malaria operations on a large scale, scientifically directed, were simultaneously undertaken, the estimate of their cost being Rs 14 lakhs Improvements a more distant site and chose one some four in the water supply of the new Capital with a view to a larger population being retained in it during the summer has also been effected

When the residential buildings in New Delhi were, in the course of the original construction of the new city, about to be designed, the Government of India issued orders that they were to be for cold weather occupation only This rule was followed. The general principle embodied in the design of the houses was that of planning them to capture as much warmth from the sun as possible Secretariat, residen tial bungalows and staff quarters are largely inappropriate for hot weather occupation

Art Decorations —The Government of India 1927 approved a scheme for the encouragement or Indian artists by providing facilities for the decoration of certain buildings in New Deliii The outlines of the scheme are larger as tollows. A certain number of domes briefly as tollows A certain number of domes and cellings lu the New Secretarist Buildings

An is fresco or tempera, were optional Artists or schools of art, who sent in small scale draw lngs, had to bear the initial expense of preparing When these were approved by the tee, the out-of-pocket expenses Committee, the paid in addition to a suitable honorarium Government undertook to pay for the finished pletures donc from approved sketches but give no guarantee that the finished paintings will permanently be preserved Government intimated that historical or allegorical sub Government Committee approved of nearly all A great deal of painting has now been completed and the work was continually progressing until the world-wide dopression in recent years dried up funds

All India War Memorial -H R H the Duke of Connaught on 10th Fobruary, 1921, lald the foundation stone of an All India War Memorial at the southern end of the Central Vista The place chosen is a fine position in the centre of the circular Princes' Park and the eonstruction of the building was for economy's The memorial Lord Irwin in sake proceeded with slowly was formally inaugurated by Lord Irwin in February, 1931, in the presence of representatives of every unit of the army in Indla, of the Royal Air Force and of a large concourse of official and other spectators

George V Memorial —It was decided In 1936 to erect a memorial tatue to His Late Majesty, King-Emperor George V, in Princes' place, the large park-like area lying between the All-India War Memorial and the Purana Qila The origin of this proposal was a movement started among the Ruling Princes, some time prepusely to meet a white memorial some time previously to erect a white memorial statue to His Majesty in the new city and this scheme had made considerable progress when His Majesty dled The matter was then con His Majesty dled The matter was then con-oldered in a broader light and in consultation between Their Highnesses and His Excellency the Earl of Willingdon The Princes agreed to merge their scheme in a larger one for an All H E the India memorial to His Late Majesty Viceroy issued an appeal for subscriptions to the major scheme and he and Her Excellency the Countess of Willington opened the general subscription list with a donation of Rs 5,000

proposed was Public Institutions —It at Delhi suitable for decoration were selected during 1914 that a higher college for Chiefs The various schools of art in India, as well as should be established at Delhi and in this

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company The affairs of the company were originally managed by the Court of Directors and the General Court of Proprietors In 1784 Farliament established a Board of Control with full nower and out he a Board of Control, with full power and authority to control and direct all operations and eoneerns relating to the civil and military government and revenues of India By degrees the number of the Board was reduced and its powers were exercised by the President, the lineal precursor of the Secretary of State for India With modifications this system lasted until 1858 when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change Under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India

The Secretary of State

Until the Act of 1919 came into force, the Becretary of State and the Secretary of State in Council had and exercised the fullest powers of superintendence, direction and control over the government and revenues of India, subject, of course, to a large measure of delegation Secretary of State was the statutory heir of the East India Company and the Board of Control, and it was as such that the generality of his powers were exercised

The Act of 1919 transferred a substantial share of power and responsibility in relation to the Government of the Provinces to the Pro vincial Legislatures and Ministers while it greatly increased the elected element in, and the influence of, the Central Legislature at Delhi sphere so affected the power and responsibilities of Farhament and its representative, the Secretary of State, were correspondingly ourtailed, but outside the field of administration so transferred the responsibility of Parliament for the good government of India remained unimpaired No stitutory change in the rela tions between the Secretary of State and the Central Government was made, but there was a very marked alteration in the balance of authority corresponding with the enhanced status and influence of the Indian Legislature The Report of the Joint Select Committee on the Bill of 1919 recommended that a convention should be allowed to grow up that only in exceptional elecumstances should the Secretary of State be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India arc in agreement

The Council of India

The Act of 1858 established besides the Sceretary of State the body known as the Council of India which was associated with the

conduct of the business transacted in the United Kingdom in relation to the Government of India and the correspondence with India of 1919 established the number of members at a minimum of 8 and a maximum of 12, one half of whom were required to have served or resided in India for at least ten years Lord Morley opened the door of the Council to Indians, and from 1917 the usual number of Indian Members was three

The India Office.

The Secretary of State, like other Ministers of His Majesty's Government in the United Kingdom, is served by a body of officers and scryants known in this case as the India Office Its staff are recruited through the same source and serve on the same conditions as Civil Servants in corresponding positions in the other Gevernment Offices in London Until 1919, the whole cost was borne by Indian revenues, except that the Home Government made certain grants and remissions, in lieu of a direct contribution, amounting to £50,000 a year. The Act of 1919 transferred the salary of the Secretary of State to the Treasury, and, in accordance with its provisions, an arrangement was devised whereby a contribution from the Treasury of about £115,000 was made to the total cost The basis of the contribution was that Home esti mates should bear the outlay needed for the controlling and political functions of the India Office, Agency functions being still an Indian charge

The Government of India Act, 1935.

Substantial changes in the machinery de scribed above have resulted from the Government The Secretary of State is of India Act of 1935 no longer the final authority upon whose superintendence direction and control depend the Acts of the Government of India and all grants, payments and charges arising out of the revenues of India The powers of the Executive in India of India now run in the name of the Governor General and the Governor, to whom they flow direct frem the Crown, and there is no delegation of pewers through the Secretary of State In so far as the Executive Governments in India function on the advice of the Ministers responsible to the new Legislatures, the responsibility of the Secretary of State to Parliament, and consequently his centrol, is at an end Where, however, the Governer General or the Governors are empowered to act in their discretion or on their individual judgment, they are subject to direction by the Secretary of State who remains, in these matters, the channel of their responsibility to Parliament During the interim period between the 1st April, 1937 (the date on which Provincial Autonomy came into operation) and the establishment of the Federation, the Secretary of State has power to issue directions to the Governor-General in Council, and such directions, if they are with respect to the revenues of the Governor General in Council, require the concurrence of his Advisers The Council of India ceased to exist from the 1st April, 1937 Some of its functions, particularly in relation to Service matters, have passed however to a body of Advisers with the same numerical limits due to the integral partial. powers and in particular, held control of the reduced after Federation to a minimum of 3 and revenues of India and was charged with the

functions till performed by the Secretary of State for the Government of India

To some extent the working of the Home Government is offected by the separation of Burma lovolvio as it does the separate exercise in respect of Burma of the functions of the ecretary of State Tile Government of Burma Act provides al o for the appointm nt of not more than 3 Advisers to the Secretary of State io relatioo to Burma hose status and functions are analogous to those of the Advisers e tabilehed by the Government of India Act Provision has also been made for the payment from the revenues of Burona in respect of the expenses attributable to the performance on beh if of the Go ernmeot of Burma of such functions as the Secretary of State agrees that hi Department should perform

The Indian States

The area enclosed within the boundaries of them But broadly it may be said that as line area enclosed within the boundaries with a popula india is 1808 679 aqu re miles with a popula ti not 390 million of people—nearly one fifth of the hu n race But of this total a very large part is not u der B itisb Administration The area covered in the Indian States is 712 508 equar miles with population of 93 2 milli n the Indian States embrace the wid at variety of country and jurisdiction They vary in aire for petry states like Lawa in Rainman. Ralputana with an area of 12 square miles and the Simia Hill States which are little t ore than amall holdings, to States like Hyderabad as large as Italy with a population of over fourteen millions. Thy loed do the inhos plable region of We tern Ealpatans Barods, part of th Garden of lodis Myso e rich in a gleditaria wealth and Kashmir on of the most favoured spots of the f ce of the ginbe

Relations with the Paramonnt Pawer So diverse are the coodition under which the Indian States were established and came that Indiaso States were established and came that We Jesire no extension of our present Los point all relation with the Ooverament of ladia that it is impossible even to summarise print no aggression on oor dominions rour

the British bound ries exp oded the states came n der the loduence of the Covernment and the rul a were confirmed in their posses sions To this geo rai policy however there was for a brief period an important departure During tie regime of Lord Dalhousle the Government introduced what was call d next then through tapse. That is to say when the was no direct helr the Oovernm ut considered whether public loterests would be secured by grantlog the right of adoption Through the application of this policy the at t s of batars and of happur f ll lo to the ha t India Company and the kingdom of Ondh was annexed because of the gross misgovern ment of its rulers. The came the hinti y it was followed by the transfe uce of the dominions of the Last findla Company to the Crown and a lire ocable declaratio of policy toward the Indian States in the bistorie Proclamation of Queen Victoria it was set oot

rights to be attempted with impunity, we shall must act so that no just cause of offence is allow no eneroachments on those of others viven by its subordinate allie. All Indian We shall respect the rights, dignity and honour States alike are under an obligation to refer of the Native Princes as our own, and we desire that they, as well as our own subjects should enjoy that prosperity and that social a fixed proportion of Indian States Torces advancement which can only be secured by units for co operation with the Imperial Government in peace and good government. Since the leave of that provingently they have been internal security purposes. These units are the Issue of that proclamation there has been internal security purposes. These units are, no eneronehment on the area under Indian generally speaking, organised and armed on rule by the Government of India On the the lines of regular Indian Army units. In eontrary, the movement has been in the op-posite direction in 1881 the State of Mysore which had been so long under British admini stration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house. In 1911 the Maharajah of Benares, the great talugdar of Oudh, was granted ruling powers over his extensive pos sessions On many occasions the Govern-ment of India has had to inverse, to prevent gross misgovernment or to earry on the administration during a long minority always with the undeviating intention of re storing the territories as soon as the mecasity for intervention passed Almost all states possess the right of adoption in default of heirs

Rights of Indian States

the Indian The rights and obligations of States are thus described by the Imperial Gazetteer The Chiefs have, without everp tion, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States The in habitants of the Indian States are the subjectof their rulers, and except in case of personil jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India Criminals es caping to an Indian State must be handed over to it by its authorities, they cannot be arrested by the police of British India without the per mission of the ruler of the State The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their in ternal authority The suzerain also intervenes when the internal peace of their territories is seriously threatened Finally they particularly is seriously threatened clpate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the rali ways, the ports, and the markets of British India Except in rire cases, applied to mari time states, they have freedom of trade with British India although they ievy their own eustoms, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states, the authority of their rulers has no existence out side their territories Their subjects outside their dominions become for all intents and purposes British subjects Where foreign

the lines of regular Indian Army units addition, many states keep up irregular forces, maintained almost on a feudal basis These forees do not possess modern arms and equip ment Although old and unaltered treaties declare that the British Government will have no manner of concern with any of a Maharajahs' dependants or servants, with respect to whom the Maharajah is absolute, logic and public opinion have endorsed the principle which Lord Canning set forth in his minute of 1860, that the 'Government of India is not precluded from stepping in to set right such serious abuses in a Native Government as may threaten any part of the country with anarchy or disturbed area, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so" Of tills necessity the Representative is the sole judge inbject to the control of Parliament the law of British India coniers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it "The subjects of European Powers and the Umted states are on the same footing Where can states are on the same footing tonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power

Political Officers

The powers of the British Government are exercised through Political Officers who, a rule, reside in the states themselves. In the a rule, reside in the states themselves. In the larger states the Crown Representative is represented by a Resident and in groups of states by a Resident, assisted by local Political Agents. These Officers form the sole channel of communication between the Indian States and the Crown Representative with the officials of British India and with other Indian States. They are expected to advise and assist the Ruling Princes and Chiefs in any administrative or other matters on which In any administrative or other matters on which they may be consuited

Not only in preparation for the framing of an eventual constitution for the government of the whole of India, but also to ensure the enjoyment of modern amenities by the subjects of smaller States whose rulers do not all have the where withal to provide such amenities, the Crown Representative in April 1943 announced a selieme to attach the smaller States to some of the bigger ones pirely for administrative purposes The process of attachment, which was at first confined to the very small States, namely, the non jurisdictional and the semi jurisdictional ones, was in November extended to what are called the 3rd and 4th class States

Details of the attachment scheme, its repurcussions and sequei in Parliament are discussed interests are concerned, the Paramount Power Princes"

Production and Industry—The principal industry of the Stale is agriculture, which maintains 56.2 per cent of the population The common system of land tenurely ryo warls About 58 per cent of the total area is directly administered by the State. The rest consists of private estates of His I valled Highness the Nizam called Sarfe Klass and the estates of the Jaghran and Palguh nobles. The total I and Revenue is over 3 3 erores. The principal frond revenue is over 3 perous. The patterput food erops are rice wheat, inflicts and pulses the chief money crops are botton and Oil seeds Cotton is grown extensively on black cotton soil. The total area under Colton cultivation was about 2 million acres in 1014 15. Hyderabad is well known for its Gaorani Cotton It is one of the finest indigenous Cotton in India and is grown over an area of 555,000 acres

Hyderabid possesses the mot Southerly of the Indian Coulmins and the whole of the South India is dependent on them for such coal as is transported by rull. These mines produced 1,277,151 tons in 1912, but the output was reduced to 1,067,159 tons in 1913.

Textiles, Cement Paper and Sugar are the clust Industries of the State There are 6 large Cotton Spluning and Weaving mills and 385 ginning and pressing factories. About one half of the cloth consumed in the State is manufactured locally on hand looms. Besides the Shahabad Cement works which produced 172,632 tong of cornery to 1943, the question 1,72,628 tons of cement in 1943 the question of establishing another eement factory at Mancherval is under consideration. The Sirpur Paper Mills, whose further expansion is under consideration, is one of the most up to date paper mills in India. It not only supplied the requirements of the State in these days of war but also helped the Government of India and the British Indian Provinces to a considerable extent in meeting their requirements. The Nizam Sugar Factory has a cane crushing capacity of about 1500 tons. Attached to this is a distillery for manufacturing alcohol out of milasses. There are four elgaretto factories with a large export trade.

During the War several large scale industries

being started

As recards small scale industries it may be mentloard that luttons and dle pressing fac tories of which there are so at present have made a great progress and carned a good repu tation for and wide Bouldes a big bircult factor, with an appreciable export trade there are two power driver and twelve hand worked match factories

The number of factories realistered under the Hyderabad Factories Act is 668

Taxation—Apart from the Land Revenue the mila sources of taxatlon and Ixel a and Customs. The receipts from each are estimated for the preent year, at 424 lakhs and 210 lakhs respectively. After these come interest on Investments, 55 51 lakhs, Rallways 237 37 laths and Berar Rent 29 17 lakhs. The Customs Revenue is derived from an ad Velorems , Customs Revioue is derived from an ad Velorins duty of not more than 5 per cent, or all imports and exports. The Government have lately levied in Section 1988. Profits Tax by promulating an Ordinance called "Precs. Profits Tax Ordinance," which seeks to impose tax only on excess profits, but not on the normal profits or a business—the taxable level being profits in excess of Rs 24,000. It is expected to derive an additional revenue of roughly Rs 80 lables per year from this source and the proceeds of the tax are to be wholly utilised to ameliorate the condition of the poorer sections of the community and low paid Government servants his supplying foodstuffs and other necessities of life at reasonable rates. of life at reasonable rates

Communication -The State of Hyderabad ls in the proud and unique position of having willing its limits the largest system of rilling in any Indian State and of being the plomer in the field of road transport operated and controlled in a National State and of the state of the field of the state of the s controlled by an Indian Rallway Administration

State Railway —132 miles of broad guige line from Bombay to Madris traverse the State, also 30 miles of metre gauge of the Masulipriam to Mormugao line At Wadi, on the Bombay Madras line, the broad gauge system of H L H the Nizam's State Rulway takes off and running seat the said H damped system of H L H the Nlzam's State Railway takes off and running east through Hyderabad City and Warangal, reaches the Calcutta Madras line at Bezwada, a total length of 38s miles From Kazipet a link to Bulharshah strikes north, providing the shortest route between Madras and Delhi From Seeindera bad the metre gauge Godaverl Valley Railway runs north-west for 386 miles to Manmut on the main line of the Great Indian Pennsula Railway to Calcutta A metre gauge line runs sonth from Seeunderabad through Mahbubnagar have spring up in the State Noteworthy among them are a metal works, which has been supplying knives and eutlery on a lirgo scale to the Ordinance Department, a machine tool to the Ordinance Department, a machine tool tworks starch factory, a chemical and pharmaceu tieal works, a blochemical and synthetic products works, a factory for producing refined oils and manufacturing hydrogenerated ghee, a sopp factory and three glass factories, one of which will manufacture sheet glass as well. There are now 799 miles of broad gauge and are also two roller flour mills and an Enamel works and a Surgical dressing factory. A Barsl Light Rallway owns a short extension

of 6 miles from Kurduwadi on the Bombay Madras line to Latur In the Osmanbad District HEH the Mrams State Rallway was worked by a Company until April 1930 when it was purchased by HEH the Mram a Government

An innovation worthy of special mention was the intro luction by HE H the Nizama State Railway in 1940 of broad gange Diesel Rail Cars for Srd clas passengers The rail cars are the first of their kind provided on Indian Railwaya and the design is unique. In that they are self propelled and fitted with air conditioning equipment

H I H the Fizam a State Railway also intro duced a firther innovation by commencin 1 1938 the installation of fana in third class carrla es

۲t t State of Hyd rab d has given a definite lead I India as a result of the comprehensive schene for the o-ordination of Rail and Road ransport introduced by H L H the Alzam a Government

A small beginning was made in 193 by operating 7 vehicles over 80 tonte miles and at 11 present time HEH the Nizans State ladway road motor transport fleet totals 50 motor vehicles operated under the control of the State Railway Admini tration nam ly passenger bi es (operatin over 4 50 miles)

and 211 goods lorries and departmental vehicles The Rail and Road Transport co-ordination

in Hyderabad State has eliminated wasteful competition and provided of e per and better means of transport. The State Rallway Bus Services run to scheduled advertised times and the advantages of regular time table services and the advantages of regular time table services providin host con fort and realisability have been (ally grained and appreciated by the tillin public tillin public tillin public to the passenger bus services operated under the control of H. Th. the Manus. Size Inaliway Administration goods are took transport services have also here intro-

i duced by the State Railway in a number of districts in Hyderatad State Several out agencies located at Important owns and villages not served by the Rallway system have been established for the throu h bookin of goods and parcels the State Railway lorries operating between the o out a encies and the nearest railway station

Goods collection and delivery ervices have also been introduced at important centres Under these arran ements goods are conveyed to and from the railway station the State Railway Road Transport Departm at lorries undertaking the collection and dell ery wo h to and from merchants premises c rtage area having been defined at each place Ti is scheme Ti is scheme e ables door to door transport of goods to be effected

Ar T an po t Services -A further development in the co-ordination of all forms of transport in Hyderabad State was achieved by the for mation early in 1938 of an Air Department under the State Railwy Administration This department has been responsible for the training of personnel for air il e ope ation for the operation of charter services and for the loan of machine and technical staff to the State Aero Club

The St te Air Transport organisation t exampet is now providing ital facilities for the training of Indian Air Fore Priots on a Begampet is now providing ital facilities for the trainin of Indian Air Fore Pilots on a lar e scale and only the foresight in building up the ground organisation d technique for the pu po e of Air D velopment has made the pre ent Air Force traiting centre possible

Education—In October 1944 (1359F) the total number of Educational Institutions excludin University Function was f 880 with an enrolment of 4 7 69 pupils The was n faily large increase in the number of schools and scholars of the Primary stage to be brease in the quilquennium bets 5.2 and 25 90 tespectively

GWALIOR

The House of Scindia traces its decent to a limity of which one branch is described in the science of the scien

reached the renith of their glory under the dia-1 (Upper House) will have identical powers and eiplined training of the celebrated Trench adventurer Do Bolgne Mahadil was succeeded by his grand nephew Daulat Rao in whose sorvice Perron, a military commander of great renown played a leading part The strength of Schulla's army was, however, considerally westened by the reverses sustained at Ahmedans or, Arante, Daulat Rao Scindla dled Aslgarh and Inswari Till his death he remained in undisput able possession of almost all the territory which belonged to him in 1805

Daulat Rao was succeeded by Janloji Rao who passed away in the prime of life. On his demise in 1843 intrigues and party spirit were rampant and the army was in a state of muting, with the result that it came into collision with the British forces at Maharajpur and Panniller

Jankoji Rao was succeeded by Jayaji Rao Seindla whose adherence to the British cause in the dark days of the Muting, when his own troops deserted him, was unshalable In 1861 he was ereated a Knight Grand Commander of the Most Explied Order of the Star of India and in 1877 was made a Councillor of the I mpress Subsequently he received other titles He entered into treaties of mutual exchange of territories with the British Government. On his death on June 20, 1886, he was succeeded by his son Lieutenant General H. H. Maharaja Sir Madhay Rao Seindla, Alijah Bahadur, 6600 6651, 685, ADO to the King who assumed powers in 1804. In 1901 he went to China during the war He died in June 1925 and was succeeded by his son His Highneys Sir Jivoji Rao Seindia, Alijali Bahadur, 6 0 1 1 During His Highness s minority the administra tion of the State and been conducted by a Council of Regency His Highness ruling powers on November 2, 1936 His Highness assumed full

Gwallor has an area of 26,307 sq miles and the population is 4,006,150. Its average rainfall varies from 25 to 36 inches The estimated gross revenue for 1944 15 is Rs 274 39 lakks The Ruler enjoys a salute of 21 guns and the State is in direct relations with the Government

of India

In matters of administration His Highness is assisted by a Council of Ministers under his direct control The State Army consisting direct control The State Army consisting of Cavairy, Infantry and Artillery units is well organized and is considered to be the best among Indian State Forces The State maintains its own Postal system and a light Railway Eduen tionally the State is much advanced

There are two degree Colleges at Gwallor, the Capital, including one for women, one inter mediate College at Ujjain, and High Schools in praetically all the districts There are a few technical schools imparting education in arts and crafts and there is a Public School on the

were further supplemented by His Highness Proclamation of Sept , 1941 The strength of the Praja Sabha which was formerly 85 has now been raised to 90 and of this number 55 instead of 50 will be elected representatives, thus pro viding for still greater non official element in the The Praja Sabha and Raj Sabha total figure of Rs 79,20,169 11 0 only

the range of their functions will be co extensive The communities and interests to which special projection has been afforded are the Muslim Community, the Bhlls, the Bael ward classes and nomen. To each of these a minimum number of seats have been guaranteed in the To Mudlima and vomen cents Praja Sablin have been cuaranteed in the Raj Sabha also

Another special feature of the recent reforms is that the legislature will have the power of direnseing the constitution as well

Since the assumption of Ruling powers by the present Maharaja, commendable activity has been after sed in all branches of administration The construction of Harel Peservoir easting about Pa 11 crores, the gr nt of one crore of rupecs for rural reconstruction and the establishment of a Degree College for women as also the scheme for construction of an up to date Female Nospital are some of the important beneficent measures undertaken during the period. The network undertal en during the period. The network of roads has been utilized by motor bus services run by the Gwallor and Northern Indla Transport Company, and those places which were uncon nected are now being foined with important highways. His Highness also constructed at Madian Sagar a scapiane base which serves as a halting station for the boats flying on the Imperial Air I ine

Guallor maintains an up to-date aerodrome

On the declaration of the War His Highness was one of the first rulers in India to place the Army and the resources of his State at the disposal of His Majesty the King-Emperor

Immediately after the outbreak of present war Gwallor took steps to sponsor effective measures such as were taken in British India, by promulgating rules for the safety of the public, registration of European subjects, restriction of the movements of foreigners, control of the Press and Price Coutrol in order to present profiteering The plek of his splendid army was offered by Uls Highness to the British Among the arms units which Government icit the State for service ontside are -The 194 Gwallor Mountain Battery, the 2nd Gwallor Mountain Battery, Scindla's Tield Battery, the 3rd Gwallor Infantry, the 4th Gwallor Infantry, the 3rd Gwallor Lancers and Gwallor Pony Company, here 15th the 3rd Gwallor Roman Pony Company have left the State for vanous destinations

In December, 1943, His Highness visited the Eastern front and inspected British and Indian troops including Gwallor State Forces as well as American Airfields

The 1st Gwallor Infantry has also been entrusted with the duties connected with the war Thousands of recruits have been enlisted to provide reinforcements. These are trained at and erafts and there is a Public School on the Gwallor Fort which is run on the English Public School lines

The political reforms announced in June 1939 were further supplemented by His Highness Proclamation of Sept, 1941 The strength of Training School is training cadets preparatory to their joining the Indian Army Training School is training cadets. Training School for Officers

Besides these, handsome contributions have been made and large sums invested in the shape These have by now reached a of war bonds

piris, 59 Middle Schools and 156 Primary Schools Primary education for all children and education for kirls up to the Matriculation is entirely free, while education for boys is theap, the first being low and there being a considerable number of scholarships and 10 per cent of free-hips Harlian education is free even during the Coliege course.

Compulsory primary education has been started in Indore City and in the Nemawar District of the State

The State also maintains a Sanskrit College, an Arts and Music School, 9 special schools including one for the deaf and dumb.

A Medical School in Indore coaches students for the LMP and LCP &S courses and it is proposed to convert this into an up to date Medical College, the Holkar State sharing a very large part of the expenditure for providing facilities for clinical instruction

The Institute of Plant Industry which con ducts research work on cotton and other crops is another institution of which the State may be proud

Industries - Indore is one of the few leading industrial States of India Next to Bombay Alunedabad and Campore, Indoro is probably the most important textile centre in India With nine spinning and weaving mills, tho loomage of the textle mills in Indere is more for instance than that of the whole of Madras Province It is also the blggest distributing market for cloth and other commodities in Contral India and Rajputana Cloth produced m Indore Mills finds a ready market in the Pun-jab, North West Frontler Province, the United-Provinces and Bengal, and soits like "Mazri" are invariably associated with the name of Indore in several countries beyond the frontiers or India Sprees weren by the skilled limitloom weavers of Maheshwar have been famous throughout India for decades past. Ilio textllo and other industries of Indore have made a for reaching contribution to the war effort

Fretories to manufacture tentage and camouflage nets have spring up to issist the war effort maintained in addition to the established textlle nulls which were geared up for war production Indore workers Indore ied other industrial central also has foundries with a capacity to produce by giving an advance of Rs 17 per worker as a properties for involuntary unemployment annually about 2,200 tons of contings, mouldings,

Under orders of 111s 111s line & every "lile, et a flymol futory and felase Works at Rao, in the State is to have a Prochages and in a Search etars of the after, the Mills at Indoor pursuance of this order, thends followed and have a first large of the large of the order, then the conflowed powers and there are followed in the conflowed powers of the Indoor (its Municipality is automonous, practical mentions of their manufactures of their own limber and applied their own conflowed in the executive officers.

Education—I direction at all stack is a Prespective. Is being underfaken of Luranian directly financed by the State There are the state that it is easily in the instance of the state three instances in Industry, of which is anything fernion which extend in the last the most important—Hollar College —conclusion to attry, but was alreaded in the first and science. There are the courses for LLB and Science There are the courses for LLB and B Come A Pill for a superst Hollar University is under the consideration of G i orn industry may soon be established in the State industry may soon be established in the State industry may goon be established in the State. A base has born given for the working of There are 10 High Schools, including 2 for chinacias, the quality and quantity of which have been definitely establish if to be good enough for the manufacture of potenties in the State. A further survey of the Leonomic Geology of the State is contemplated

> The project for a first class and large unit to manufacture veg table filee and allied chemical products is only awaiting the import of machiners from abroad as also a strauboard fictors that would produce ten tons of finished product per day at Amargarh A factory to manufacture Hume Papes is expected to materialise in a few mouths

> In view of the fact that availability of cheap power is indispensable for industrial progress, the possibilities of a Hydro electric project based on the Chambal river are being examined A scheme for electrification of the district towns has made considerable progress Additional plant for the Indore 1 leetric Supply 14 expected shortly. The establishment of a plant for the manufacture of Power Alcohol is also considered to be feasible

> Cottage industries are receiving the sympathetle attention of the Industries Department The establishment of a Central Laru Depot, if necessary with the help of a properly selected private entrepreneur has made considerable progress, and the starting of an emporium to sell the fibries manufactured by the hindloom weavers and the products of other cottage industries has been sanctioned Harlians among others are taking advantage of the faellitles for training at the hand made Paper Factory and the Tanning Demonstrition Unit Multiplication of Tanning Demonstration Units in Leather Works and establishment of a large scale Leather Works and Tannery are being considered. A large plastics project is also under Investigation

Side by side the policy of assisting industries, Government are following a liberal labour Indore is one of the few places in Indla where standardisation of wages for textile lubour lines been established and successfully maintained Recently a bonus of 27 months wages was sanctioned by Government for textile workers Indore led other industrial centres compensation for involuntary unemployment etc., 124 ginning factories, 26 pressing factories due to coal shortage pending final decision of

The scheme for a new Central Hospital in the City with 500 beds conducted on up to date line which will also provide clinic I instruction to the students of the Medical College at a cost f about 5 lakhs has made considerable I cadway

A T B Clinic was opened in 1944 and n contined building for the clinic Matharranj Dispensary and Maternity and Child Welfare Centre is proposed to be constructed Imme diately at a cost of about Rs 5 lakks This will soon be followed by a T D Sanatorium with 50 beds on an ideal site near Indore

With the help of the Aurses Training Fund with a corpus of about a lakh of rapees nurses are trained every year at the Cent 1 Hospital The D is Trainin Fund was similarly started for traini g dai for the villages

The indigeneous syst ms of m dieine geta the fullest a pport from the State Tiere are 3 Ayurvedic nd U and disp n aries of them bet g travelling dispensaries with a Ce trai Ph rmacy to supply medicines of a standard quality

coming forward in ever increasing numbers the Technical Training Scheme, and alread to play their part in varied spheres in the service 772 trained recrults for war service have been of their country

Maharaja Holkar's Forces \mathbf{H} consist of 1 Creatry Unit of 18 S Squadron incur an additional expenditure amounting and a Training and Depot Wing, 3 Battallons annually to over Rs 29 laking as a result of the of Infantry, an Ammal Transport Company, an Army Medical Service A M T Unit in and Juli Departments, etc , and over Rs 11 process of expansion to the strength of a company, and a first class State Band

the above units one battallon—the MAHESH GUARDS (1st Indore Infantry)have been serving under the Crown for four The same applies to the bulk of the A T Company These nults are provided with reinforcements by the Infantry Training Centre and the A T Training Centre

In addition to the above the State has provided a complete Garrison Company for service under the Crown, viz No 50 (Indore) Garr Coy It has also furnished a complete Indore Platoon for No 58 (Central India) G P T Company

War efforts —On the outbreak of hostilities in Europe, H H the Muharaja Holkar placed the entire resources of the State, including the State Army and his personal services, at the disposal of the British Crown His Highness donated a sum of Rs 5,00,000 and placed it at the disposal of H E the Vicerov to be utilised towards war purposes in any manner His Excellency thought best Subsequently, His Highness and his Government, in keeping with the traditions of the illustrious House of Holkar and the close ties that bind it with the British Crown, intensified the State war effort and took various measures with a view to contributing to the ulmost degree towards the effective prosecution of the war

The Holkar Transport Corps was deputed to Jhansi for undergoing training early in 1940 In July 1940, under special orders of His Highness the whole of the 1st Battahon was placed at the disposal of the Crown and steps were taken to bring up all Units of the Holkar State Forces to full strength. The 1st Battalion of Malaraja food problem, Indere was the first in India Holkar's Army is serving with His Majesty s to lutroduce successful rationing by the coupon Torces overseas

Consequent upon the despatch of Holkar's Transport and 1st Battalion for service with H M's Forces, the Maharaui's Own Guards In a Cavalry Unit, was converted into a full Infantry Unit A recruiting campaign was launched and the following Units were organised—(1) a training centre for Holkars Transport, (2) a training Conjpany, 432 strong, for reinforcements to 1st Bittalion overseas, as also a reserve of 42 officers, the selected candidates being trained at the I S F and O T S Schools In addition the following units and personnel were supplied to the Govern ment of India —(1) a section of M I Draces His Highnes (2) a Garrison Company 165 strong (3) 10 for measures signallers, with 100 per cent reinforcements successful proper unum And a number of other facilities a unique constitution of the company were provided eg accommodation, etc., to the Malwa Garrison Company The Stute a view to bringing home to the headman

supplied from the State

His Highness's Government are committed to war on the Army, Police, Civil Defence, A R P laklis on account of dearness allowance granted to State servants getting upto Rs 100 pm in the Districts and Rs 120 pm in the City and war allowance to all Government servants getting upto Rs 700 p m

With a view to encouraging recruitment for nar services, His Highness has ordered that 50 per cent of the vacancles should be reserved for those who have rendered approved war service. And the fullest co operation is being offered to the Government of India in a number of other matters connected with the war

The scheme regarding the conferment of emergency commissions was given due publicity and a number of candidates have been recom-mended Similarly, applications for other kinds of War Services are being forwarded both from the State servants and the public Special steps have been taken to effect recruit-ment to the Medical Services for the War, Important concessions being announced in favour of those in the State Medical service or in private practice, who offer themselves for war services Candidates from the State were also recommended under the Bevin Training Scheme

A Holkar State War Front has been set up, its nork being carried out by the Holkar State War Front Council, and its propaganda and Publicity Sub Committee A fully equipped cine van has been made available for visual propaganda in the interior of the State An organisation has been set up to carry on an intensive drive in connection with the Small Savings Scheme within the State

Liberal concessions in land revenue have been made to give impetus to the "Grow More Food" campaign In order to deal with the system The arrangements earned probe from all quarters, including the Economic Advisers to the Central and United Provinces Governments, both of whom visited Indore to study the working of the scheme and expressed their complete satisfaction. The scheme featured in a B B C broadcast as well All the textile mills in the State continue to be engaged in executing very substantial orders of the War Supply Department The State had lutroduced their own system of supplying Standard Cloth to the poor population of the State, but eventually joined the All India Standard Cloth Scheme

His Highness with his characteristic zeal r measures calculated to further the successful pro-ecution of the war, convened a unique conference at Indore, of all n unique conference at Indore, of all the Patels (headmen) of the State with

Benares.—The kingdom of Benares under its Hindu rulers existed from time immemorial and finds mention in Hindu and Buddhist literature In the 12th century it was conquered by Shahab ud din Ghorl and formed a separate province of the Mahommadan Empire In the 18th century when the powers of Moghal Emperors declined after the death of Aurangzeb, Raja Mansa Ram, an enterprising zamindar of Gangapur (Benares district), founded the State of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738 of his son Raja Balwant Shigh in 1735 Ruja Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler During the next 30 years attempts were unsuccessfully made by Safdar Jang and after him by-Shuja-ud-daula of Oudh to destroy the independence of the Raja and the Fort of Ramnagar was built on the bank of the Ganges opposite the Benares City Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh Henares City Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh He was expelled by Warren Hastings and Balwant Singh s daughter's son Mahip Naram Singh was placed on the gad. The latter proved an imbecile and there was maladministration which led to an agreement in 1794 by which the lands, held by the Raja in his own right which had been granted to him by the British Government, were separated from the rest, of the Government, were separated from the rest of the province The direct control of the latter has assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the most within which the Raja had revenue powers similar to those of a Collector in a British district There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohi and Chakia (or Kera Mangraur) The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State The Maharaja s powers are those of a Ruling Chief, subject to certain condi-tions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary oriminal jurisdic-tion within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise

The present ruler is H H Maharaja Vibhuti Narain Singh Born on November 5, 1927, he was adopted by His late Highness as his son and

succeeded to the gads in 1939

r—Brigadier His Highness Tarzand i Rasikh ui-Itikad, Daulat-i-Inglishia agan Maharaja Sir Ranbir Singh Rajgan ira Bahadur, GOSI GOIR, etc ha Nabha, which became a separate n 1763, is one of the 3 Phulkian States ha, Patlala and Ilad—and though second nt of population and revenue of the 3 States, it claims seniority owing to its claiming descent from the eldest branch ists of two distinct parts, the main portion ising 12 separate places of territory ed among the other Punjab States and its, forms the City of Nablia and the ats of Plul and Amioli, the second portion the Nizamat of Bawal in the extreme east of the Punjab on the border of Raj-, this Nizamat of Bawal was subsequently to its territory as a reward from the British ment for the loyalty of the Rulers of The State now covers an area of about square niles and lass a population of 3,40,000 It maintains a Field Service consisting of a full Battalion of Infantry as the Nablia Akal Infantry under the States Forces Scheme 1930 and a State i States Forces Scheme, 1939, and a State e Unit of one full Company Strength otal strength of the state forces is 1,600 ie preservation of the peace there is also a force consisting of about 500 men
State is traversed by the main and 3
h lines of the N-W Rallway and
B & C I crosses the Nizamat of Bawal
Ortion of the State is irrigated by
Irlind Canal The crops of the State are pulses, bajra, Sugarcane, cotton, wheat arley, to facilitate trade the Durbar has d grain markets and Banks near the pal railway stations within the State bry The chief industries of the State at of the manufacture of silver and gold st of the manufacture of silver and gold dents, brass utensils, cotton, carpets, and gota, etc. There are some ginning ries and 5 cotton Steam Presses in the State 1 are working successfully Captain lighness Maharaja Pratap Singh Malvendra dur, who was born in 1919, was invested ruling powers on 5th March 1941. In the nistration of the State His Highness is ed by a cabinet of Ministers. The Cluef ster, S. S. Sant Singh is an officer of the te Civil Service.

the purithala—This State consists of three ched pleces of territory in the great plain to Juliundur Doab The ancestors of the of Kapurthala at one time held possessions in the Cis and Trans Sutley and also in the Doab In the latter lies the village of Ahlu nee the family springs, and from which it is the name of Ahluwalia When the Jul ur Doab came under the dominion of the isli Government in 1846, the estates north the Butle, were maintained in the independent ession of the Kapurthala Ruler, conditional ls paying a commutation in each for military lee engagements by which he had previously bound to Maharaja Ranjit Singh, of ore This annual tribute of Rs 1,31,000 a was remitted by the Government of India in the light of the splendid setuity in 1924 in recognition of the splendid

record and uniformly efficient administration he State The Bari Donb estates are held the head of the House as a jaghir in perpey, the civil and police jurisdiction remaining

e Civil Service

in the hands of the British authorities. Fo good services during the Mutiny, the presen Maharaja's grandfather was rewarded with grant of other estates in Ondh which yield large annual income equal to those of Kapurthal State The present Rules a titles are Brigadk H II I arrand-I-Dilband Rasikh ul-Itiqa Daulat-I-Inglishia Raja-I Rajgan Maharaj Jagatjit Singh Bahadur Maharaja of Kapurthal G C S I (1911), G C I L (1918) G B F (1927) wh was born on 24th November, 1872 and succeede his father, His Highness the late Raja I Rajga Kharak Singh of Kapurthala in 1877 He was granted the title of Maharaja as an hereditar distinction in 1911 His sainte was raised to 15 guns and he was made Honorary Colonel of the 15th Rattray Sikhs and promoted Brigadier in January, 1943 The Maharaja received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the Order of Carlo 3rd of Spain, Grand Cross of the Order of the Star of Romania, Grand Cross of the Order of the Order of Manalek of Abyssinia. Grand Cross of the Order of Menelck of Abyssinia, Grand Cross of the Order of the Nile of Eb, pt, Grand Cordon of the Order of Moroeco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chill, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba, represented Indian Princes and India on the League of Nations in 1926, 1927 and 1920, celebrated the Golden Jubilee of his reign in December 1927, and the Diamond Jubilee in 1937 in 1937

The rulers of Kapurthala are Rajput Sikhs and claim descent from Rana Kapur, a distinund ciaim descent from Rana Kapur, a distinguished member of the Rajput House of Jaisalmer Only a small proportion of the population, however, are Sikhs, the majority being Mallomedans The chief crops are wheat, gram, malze, cotton and sugarcane The town of Sultanpur in this State is famous for hand-printed cloths Plagwara is another important town in the State, has a large Sugar Factory town in the State, has a large Sugar Factory on modern lines, and is very prosperous also on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use The situation of this terms. of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief its importance still greater and this is the chief commercial town in the State The main line of the North Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it A branch railway from Juliundur City to Ferozepur passes through the capital Recently a second large sugar factory has started working and other industries are also being promoted. The Imperial Service and local troops of the State have been reorganized and are now designated as Kapurthala State Forces. These State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. The Maharaja's third son, Lt Colonel Maharaj Kumar Amarjit Singh, CIE, IA, served with the Indian Army in France. He also made two month's tour in MEF and Praforce visiting the Indian troops stationed there in summer of 1944, but a short time after his return to India he died of heart failing. Were work of all kind is being carried its importance still greater and this is the chief time after his return to India he died of heart War work of all kind is being carried failure

Attunds to Fed rt car—The question of accession to Federa ton was fully considered by a Committee of Stat a Ministere convened by the fata E. Hom hie St Athar Hydar! The Hydart Committee closely examined the data from the constant of the

These recommendations we a considered at a Construce of Princes and Mit isters beld in Bombay in June 1939. The Conference passed at colution stating that the Princes found the country of the Princes found the acceptable two of the main reasons he not that the form is which it is up it to protect their tray tribbs was held to be inadequate for the pumpo and a condity that the orbit of feder f authority and a condition of the pumpo and a condition in its ben extended beyond the pumporable of the constitution of the constitution of the constitution of the constitution.

Revised draft Instruments of Accession were then drawn up and circulated amon individual Rulers These ellicited diver e comments and sugge tions for further modification (A fuller account of the various stages in the discussions of the Fed ration will be found in part issues of this book) While the negot ations were in progr as the war broke out.

The efforts of the Victory to inencurate the federal part of the constitution embodied in the Government of India Act come to an abrupt end While affirming that fed ration remained the objective of His Majesty e Government His Txeeliency said in Sept mir 1930 that we have no endote but to had in sups nee the work to connection with preper tions for Taceration

It mal RI mm n Stt —The pace of administrative and constitutional reform in the States has rapidly increased in the last f w years owing to the introduction of provi cli antonomy in British India tie appar tapproach of Federation and pre sure—sometimes direct—from the Indian National Contra

A new factor in the acce sion of the States to the proposed fede ati rose early in 1938 The Co gress witch h d all thi while opposed the inauguration of the feder I part of the Government of Indl. At Intensified its opposi tion since July 1937 when its nominees b came Ministers in the maj ity of B itish Indi n province One of their p incipal objections was the anomaly of forcing an alliance between democrat British Indian provinc s province and autocratic Indian States In other words the Congress demanded as one of the conditions precedent to its acti en-ope ation with the federal schem The introduction in the States of self governing in tituti as and an undertaking by the States rulers th t in choosi g their epre ptatives t th federal legislature tley would adopt an el ctive element I eith r the British Government nor their rep ese tati es in India could countenance these demands which

emmed Many States could not escape the at their deliberations fluence of autonomous adjacent provinces

Numerous States announced their Rulers' in-ention to liberalise their constitutional machi-ery and to improve their administration. Many ctually introduced reforms A few Rulers eclared that responsible government was ne goal of policy and took steps towards it lany Rulers announced progressive schemcs f administrative reform in their respective tates

An extraordinary development took place ally in 1939 when Mr Gandhi decided on fast to ceath to compel the Thakore aheb of Rajkot to implement his promise oncerning the membership of a reforms ommittee The Viceroy intervened and Mr andhi agreed to the adjudication of the Chicf ustice of the Federal Court, which went in his evour But subsequently further difficulties ver the constitution of the committee arose wing to Mr Gandhi's promise to the minorities and Mr Gandhi eventually recanted and declard that his fast had been coerelve in character to therefore left the committee to be constituted y the State Later Mr Gandhi announced a new technique" for agitation by States ubjects, in which he counselled moderation n their demands and called off all civil isobedience movements in the States

His advice and direction was followed in lmost every Indian State where previously the ir had been thick with strife. In some cases he response was quick, while in others the ocal leaders were inclined to be resentful of this udden brake on their activities. Eventually, owever, quiet was restored on the "States ront," although stray "incidents" continued o engage the attention of the local public and f Mr Gandhi himself

As recently as October 1941 Mr Gandhi eclared "I am convinced that in the new icclared icclared "I am convinced that in the new world order which is bound to follow the insensate putchery, dlgnified by the name of war, the Princes will have place only if they become true servants of the people, deriving their power not from the sword, but from the love and consent of the people" Mr Gandhi advised the people of the States to cultivate patience and prepare themselves for the responsibilities that would devolve on them, by doing mute constructive work. That did not mean submission to active and acute tyrining of which so many active and acute tyranny of which so many accounts had reached him. That the victims roust resist in the best manuer they could

Princes' War Effort — From the beginning of the war, especially since the summer of 1940 when the hostilities took a turn for the worse,

ere contrary to the provisions of the Act prominently on the agenda, indeed, it is true to evertheless the tide of democracy could not be say that every other subject took a second place

> 1943 Meeting of the Chamber The annual meeting of the Princes' Chamber was Chamber —The held in October 1943 It was addressed by Lord Islnithgow for the last time, for His Ex cellency the Crown Representative left India almost immediately after The address was listened to by the largest number of Princes that had ever attended any session since the mangura tion of the Chamber His Excellency upheld the federal ideal as the best for Indian unity and for the constitutional future of India and declared that "that unity is wholly consistent with the survival and orderly development of Indian States" He emphasised that the Crown's obligations to protect carried with them cqually binding responsibilities to ensure, if need be, that what was protected continued to be worthy of protection

> The Viceroy, wanted Indian States to bring up their standards of administration to modern requirements and gladly acknowledged that in this respect some States were an example for other parts of India He made it clear that the "times are no longer propitious for Jagurdars and Thakurs who seek to assert or perpetuate a semi-independence wholly incompatible with their limited resources and so mevitably harmful to the interests of the inhabitants of the areas concerned. He was sorry that he had been denied the satisfaction of taking final decisions on questions such as civil lists, privy purses and the grouping of smaller States into a comperative administration. These problems operative administration. These problems would, he said, be tackled by his successor without delay

> The Viceroy's moving appeal to the Princely Order was to see "that the splendid opportunity lying before the Rulers is not missed and to ensure that advantage is taken of it with such vigour and foresight, with such judicious blending of the old and the new, with such subordination of narrow, personal and local interests to true patriotism that the future of India-of Indian States in close collaboration with British India—may be ensured and that the future generations may remember with gratitude the part played by the leaders of Princely India In securing the stability of that common and glorious inheritance. His Excellency spoke significantly when, addressing apparently se paratists, he stated that "it is very difficult for units, however large, whatever their form of units, however large, whatever their form of government, whatever their resources, to exist save in relation to, and as part of, a larger whole

The Vleeroy paid a warm tribute to the galiant of the war, especially since the summer of 1940 when the hostilities took a turn for the worse, the Princes of India have devoted their whole-incarted energies exclusively to activities connected with war effort. Every one of them concentrated his attention on how best he and his State could aid Britain in her struggle against the forces of tyrain. They rose to a man, ranged themselves behind the banner of His Majesty and vied with one another in the supply of men and moncy to assist in the prose-The Viceroy paid a warm tribute to the gallant

The Chamber of Princes.

ement "

Chamber of Princes, while emphasizing ortince of internal reforms in States ng, where necessary, from Rulers them nd their Governments, strongly recomthat unless dready done, the Govern of the States may carefully review their ne regard to local circumstances, the ant recommendations made by the Special ng Committee of Minsters of 1942 in aph 33 of their first report which have fully endorsed by the Princes' Standing ittee and the Committee of Minsters recommendations, which are already in in many States and are receiving active crition of many others, include utory provision guaranteeing the rule of ud the security and protection of person property with powers to the States' courts that these fundamental rights are scrapal enforced, (b) the administration of justice igh an impartial and competent judicity, pendent of the executive, with sulfible ision for the adjudication of disputes centile States and their subjects, (c) establishment of a council form of govern it providing for the advice and assistance of isters to the Rulers in the ordinary sphere administration, and the association of the ples with the governance of the States ough suitable representative institutions ir pace and from being metatribly conditioued local circumstances and with due regard the traditions and the structural balance of nety in individual States, (d) suitable cangoments to ensure continuity of policy in the security and integrity of public service, a clear demarcation between State expenditure t reasonable percentages of the ordinary evenues of the States, and (f) a fair and equitable incidence of taxation allocating a definite and substantial portion of the revenues for the senefit of the people, particularly in the bene-neent departments"

"This Chamber, while recording the fact that the States, individually as well as collectively, are giving active consideration to, and are working out, plans for post-war development, desire to emphasize in particular their suitable extension, unless already done, in the following directions with due regard to local conditions (a) the fullest possible collaboration with the Central Government in regard to such plus and policies for post-war development which

the fulfilment of the fundamental strisial and the States, collaboration with a rusing out of their freaties and these plans does not imply complete uniformity raises an integral part of this Majesus of all details or the administration of these plans in the States territories without their discovery this expression of their devotion adoption of effective measures for raising the perial Majesty the king I up roy, with set judards of living of their peoples, with particular attention to the improvement of the ciful submission that in this matter cular attention to the improvement of the cental import nice to the continuous of conditions of ex soldiers and their imilies, the attention with the Crown the Indian labour population, the arricultural classes and solicits. His Majesty's personal good the backward classes. The Chamber recome occurre an early and satisfactors mends to His Lycellenes the Crown Representathe that in order to enable the States to raise necessity funds for the aforesaid objects they may be given all possible facilities for the development of their own industries and resources as reque ted by the Chancellor and other representatives of the States'

A new development in the organisational of administrations with a view to netivities of the Princes took place about this enting, to the fullest extent possible and time. A body comewhat analogous to the net recommendations made by the Special of Committee of Ministers of 1942 in appli 53 of their first report, which have the states Conference on Education, Medical Rehefully endorsed by the Princes' Standing and Post ver Reconstruction. It is not Reconstruction It is not and Post war clear why this new organisation was created or whether it is Loing to be a permanent institu tion Presumably it is intended to bring in the bigger States who are at present outside the Chamber of Princes in respect of the subjects mentioned in the nomenclature of the conference Be that as it may, the Nawab of Bhopal man gurated the first session of this conference at Delhi shortly after the contretemps which overtook the Princes' Chamber in December 1944 His Highness made no direct references to the recent crists, but his remarks on the question of internal reforms in the States and on post war planuing contained some oblique observations

On the first issue, His Highness referred to the resolution on administrative reforms The recommendations approved by the Princes included statutory provision guaranteeing the rule of law with scennity and protection for person and property. Other provisions related to a clear department of the provisions related ad the civil lists of Rulers which may be fixed impartial and competent judiciary was also

> Regarding post-war planning, His Highness declared the intention of the States to co operate deciared the intention of the States to co operate to the fullest extent possible with these plans. He emphasised that the States, like British India, must look primarily to industrial development to provide the necessary revenues for progessive administration and social services. We believe," said His Highness, "that there is ample scope in India for the industrial development of British India as well as of the States". ment of British India as well as of the States

Deadlock resolved -In the next six seven months one heard very little of the public activities of the Indian Princes—in an organisa tional sense There was no development since the resignation of the Standing Committee except for expressions of regret by British and Indian neuronage and regret by British and Central Government ... and policies for post-war development without the resignation of the states and in the formulation and the resignation of the states and in the formulation and the resignation of the states and publicies. In the Indian newspapers and publicies In the Indian newspapers and publicies In the Indian newspapers. the deadlock I ad almost been resolved and most cordually with an loterim national Govern that an announcement until I be expected very most for Initikh India on matters of all India havan to I Bhopal would are I illa Excellency to the Crown Representative and that the position would be diffied during the loterite. At the the Government of a free India and is id time of writing a definite note of optima in India is our motheriand. We have a great change of a needy solution as bright Time learning of Triditional to come to maintain the contract of the c ment of India at which the tas I een full and frank discussions on subjects of mutual interest soch as industrial taxation and civil aviation

A meeting of Princes held in Bombay in a Juoe 194 discussed many subjects includin the lodustrial policy to be adopt d by them It appears they expres ed readiness to fall in line with the policy of the Government of Indla me with the policy of the Government of India with reg d to taxs to but they thought that it is should be bought about gradually. They also claimed protection for their nascent indust res and a proper share of the quots of capital goods and machinery to be imported from morad. They also expressed their willingness. in the future development of civil aviation but eisimed that a convention should be established wha eby the States representatives should have a voice in framing the policy to be

It was stated that the labours of the special committee of Pulers which was constituted afte the res gnation of the Executives of the Chamber of Princes in December 1044 had practically come to an end and that its innetions would be taken over by the Standing Comm thee of the Chamber when it was constituted

(to whom many of the small units in Western India and Gujerat are tributory) brought forward proposals to bring these tributaries into closer relations with the Baroda State

A fresh approach to the problem has since been made on the lines of these proposals and on a wider basis with a view to afford to other larger states an opportunity to assume similar responsibilities in respect of units which have similar geographical, economic and political amenities with them

In order that the scheme may be carried into effect with the least possible delay Lt-Col G B Williams of the Indian Political Service has been placed on special duty in the area concerned

The 'communique' points out that the scheme eontains due provision for the continued integrity of the attached units and of the existing powers and privileges of their taluqdars and shareholders in so far as may be compatible with modern requirements and subject to further review after a period of seven years as also for the allocation of a suitable proportion of the revenue for their personal requirements. of the revenue for their personal requirements

The States to which these small units are to be attached will also be required to admit the inhabitants of attached areas to the benefits of administrative amenities such as secondary and technical education and medical treatment, on the same terms as their own subjects and to provide new hospitals, schools, roads and other amenities where these though clearly required, are beyond the present capacity of local re

The Crown Representative is conscious that the action to which he is now committed may meet with criticism on the ground that it is standards of administration status of many ancient families, or alternatively that the Paramount Power should itself have assumed direct responsibility for such pressed the smaller States to pool their pressed the smaller States the smaller States the smaller States the smaller reforms as may be necessary He has examined resources in order that they may adequately the problem from both these points of view and with all due regard to pledges and obliga tions for the maintenance and support of Indian States, however small and weak As stated states, nowever small and weak As sauced above, provision has been made to implement such obligations in so far as they are compatible with the overriding principle that autocratic powers shall not be abused and that nothing which is not inherently capable of survival should be artificially perpetuated. The ultimate test of fitness for the survival of any State is, this capalon. Capacity to secure the melecone. in his opinion, capacity to secure the welfare of its subjects, and he regards the forthcoming qualified merger of these small States as a justifiable solution of any conflict in his obligation.

without some drastic simplification of existing intrangements any kind of co ordinated development of the countryside or any form of real time progress is impossible."

The 'communique' refers to the discussion of the problem in the period preceding the period preceding

The assumption of direct responsibility for the necessary reforms, by the Paramount Power is regarded by the Crown Representative as impracticable because geographical and other factors preclude the absorption of these area in British India and because the Political Department is not an administrative organization or equipped with the machinery and resources of finance and personnel which can only be afforded by the administrative control of large territories. Moreover the areas concerned are so scattered and fragmentated as to make it impossible to bring them under unified central control These difficulties and deficiencies can, in the Crown Representatives opinion, only be overcome by the course on which he has decided, which involves delegation of the responsibility to those who are in the best proposed to the course of the responsibility to those who are in the best proposed to the course of the responsibility to those who are in the best proposed to the course of t position to discharge it namely, the bigger States of Western India and Gujarat In framing the terms of that delegation he has been fully mindful of the interests of the inhabitants of these small States, of those to whom they one immediate allegiance and of the larger States with which a new relationship is to be established. To all these parties the Crown Representative admits a continuing responsibility which does not a little than the continuing responsibility. which does not exclude his future intervention, as erroumstances may demand, in furtherance of the essential object which he has in view, namely the firm establishment of conditions in which the areas concerned will seeure and enjoy full opportunity for progress and development. development

The idea of co ordination of smaller States for administrative purposes is not new Years ago Lord Irwin (now Lord Hallfax) in a confidential memorandum urged the Princes to put their houses in order and maintain certain minimum

discharge their obligations as a modern state

In 1939 the Political Department issued a circular asking all States with an annual revenue of less than Rs 20,00,000 to join regional confederations In reply to this the Princes submitted a memorandum in which they insisted that grouping of States should be voluntary and that no conditions and restrictions as to the manner in which the police forces should be maintained or the administration of justice should be provided for should be tion of justice should be provided for should be

formulated a scheme federal in cl racter and designed to take full account of the rights 1 terests and obligation of all the partle affected-ti e rulers the citizen and th States n behalf of the rulers by the Pre dent of the lederation assisted by a Cabinet of whim two-fifths will be members of the F deral the Uppe House designed to uphold the autiority of the rulers and the States and the Lower constituted though it will be by indirect election. The legislature will be bicameral that of their peoples On the Council each ruler will have a seat ba ed on the hereditary principle a d no other el ment will be repre sented to it The list of fe ler i subject is not very extensive so that the States Governments are left with a large measure of autonomy. The principle of the rule of 1 w is accepted as well s that contrary to the rul rs opin on reco ded by the Joint Parliam ntary Committee of the fundamental rights of the citizens There is ample safeguard for the maintenance of Treaty rights a matter of no small importance from the pol t of view of the Pa amount Power The scheme further accords full recognition to the principle of region lism that is of geogra plical cultural economic and other affinities as the Crown Representative a acheme is meant to do

Payments from Indian States.

Many of the States make payments, varying in amount according to the circumstances of case, to His Majesty These payments are frequently due to exchange of territory or settlem of claims between the Governments, but are chiefly in lieu of former obligations to supply or me tain troops. The annual receipts on account of these payments from Indian States are summarian the following table. The relations of the States to one another in respect of Cash Contribut are complicated, and it would serve no useful purpose to enter upon the question. It may, he ever, be mentioned that a large number of the States in the Western India and Gujarat Sta Agencies pay Cash Contribution of some kind to Baroda, and that Gwalior claims Cash Contribut from some of the smaller States of Central India States making payments directly to His Majesty

States paying Cash Contribution directly to His Majesty

	_		
Jaipur	Rs 4,00,000	Bengal Cooch Behar	Rs 67,7(
Kotah	4 34,720 (of this sum Rs 2,00,000 has been suspended)	United Provinces Benares Punjab	2,19,00

in foreign countries and Mozimbique (Portu The Christians of Daman guese East Africa) and Dau are subject, under a new Treaty signed In 1928 between Portugal and the Holy See, to the Archbishop of Goa There are numerous churches in Goa, mostly built by the Jesuits and Francisc us prior to the extinction of the religious orders in Portuguese territory Old Goa, which was the capital of Goa up to 1903 there are beautiful churches and convents noted for their art and architecture. In the convent of Bom Jesus hes the spered body of St Trancis Xavler Every ten years there is an exposition of the Saint's body and thousands of pligrims from all over India and abroad flock to Gos to kiss the secred body. The last exposition took place on May 6, 1942, and the Saint's body was kept open for three weeks. The chareless are in charge of secular priests Hindus and Maho medans enjoy perfect freedom in religious mat ters and have their own places of worship the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usiges were strictly forbidden and rigo lously suppressed

The policy of the Portuguese Republic established in 1910 was to suppress all religious Societies which, it claimed, were interfering with the political affairs of the State As a result of this policy Jesuits were driven away from the country. The New State under Dr. Oliveira Salazar, the Prime Minister of Portugal, a deeply religious statesman, has entirely reversed the religious polley of the country. All religious Orders are now freely allowed and several of them. have established Convents and Schools in the country, including the Jeants who have started a Secondary College at Nova Goa A number of nuns have also come to the country Seminary is being built at Saligno and a new rell-glous Order is started in Goa. The relations bet veen the Church and State are very cordual, though even under the anti-clerical republic the Law of separation of Church and State had never been enforced. At present the Church has obtained a legal existence in the country and Portugal even maintains in Goa and in British India a few missionaries, supported by the Lisbon treasure. The New supported by the Lisbon treasury The New State is based on corporative principles which have not yet been applied to Portuguese India But there is censorship of the press and only one political party, the Uniao Nacional, supporting the Government, is in oxistence. A new idministrative code has been promulgated and a system of excessive centralization is in force, both financial and administrative. The finances of Goa are controlled by the Minister for Colonies at Lisbon. The Governor-General of Portuguese. India has to obtain his sanction before any expenditure is incurred

Mormigae came recently in the limelight and was buzzing with diplomatic activity due to its having been selected as the neutral port for the exchange of Japanese and American civilian internees. The arrangements for the exchange of prisoners were well excented by the Portuguese authorities without any little.

The expeditionary force which was sent to

(China) and Timor (Oceania), with indistings a seland linking been previously occupied them. The troops were instructed to land und Did are subject, under a new Treaty signed in 1928 between Portugal and the Holy See, to

The Country—A little over one thin of the entire territory of Goals state to be under cultivation. The present police of the Government under Governor-Gener Col Jose Cabral is to bring as much lar under cultivation as possible For the purpose, technical and agricultural exper have been appointed to earry on propaganda at to demonstrate to the furmers modern metho of cultivation Statistics are being organis referring to agriculture, rice and ecconut pr duction, area under the plough, etc Ti fertility of the soil varies considerab according to quality, situation and wate supply The Vellas Conquists areas, a rule, are better and more intensively cultivated than the Novas Conquistas In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying The staple from half an aere to five or six aeres produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the popula tion for two thirds of the year. Due to lack of supplies of rice from British India, Goa is at pre sent passing through great hardships and the people are experiencing difficulty to obtain supplies of this necessity of life. With a view to scenring equitable distribution of rice among the various sections of the population, the Government have decided to take over the production of both the crops this year. A press note issued by the Government stated that this drastic step had to be taken on account of difficulties of importing tiee and the hoarding resorted to by producers during the previous harvest, without any regard for the common interest of the population Next to rice, the cultivation of coconut palms is deemed most important from the variety of uses to which
the products are applied Hilly places and infe
rior soils are set apart for the enling tion of
cereals and several kinds of fruits, the most not
able of which control of the soil of the able of which are the famous Alphonso and Mal eurada mangoes and vegetables are cultivated to a great extent. The condition of the agricultural n great extent The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in tho prices of all classes of agricultural produce and partly due to the current of emigration to British territory There is a great shortage of agricultural labour in the Velhas Conquistas In the summer months, bands of artisans and field labourers from the adjoining British territory make their way into Barder and Salsette where the demand for labour is always keen Stately forests are found in the Novas Conquistas They cover an area of 116 square miles and are under conservation and yield some profit to the administration Iron ores, scrap iron and pig iron are found in parts of the territory but have not been seriously worked Manganese also exists and some mines are being worked at present, the ore being exported to

paid only by those merchants who make large reserve fund with the exception of the yield of profits and by Government servants. The the rice tax which will constitute a separate everage income from other sources is not traced There is a special ten per cent tax on all incomes of rico cultivation. The duty on imported derived in the shape of interest on loans This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief of expital from Portuguese India The chief sources of revenue are the land tax, interest on loans, excise and the customs. There is a special tax on omigrants—all persons, Goan and non-Goan at the time of their leaving Goa,—whileh vields to the State a little over Rs 10,000. The country being economically backward, the taxes give very little indication of its productive expicity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics. It is proposed to revise the system of taxation, specially the land tax which represents 12 per cent of the nettyield. The State has established in Bombay an institution called Instituto Indoin Bombay an Institution called Instituto Indo-Portugues with an annual subsidy of forty thousand rupees from Government to be utilised for the promotion of social and economic welfare of Goins residing in British India and British The proceeds of the emigration tax have been enimarked for the subsidy to the Institute This Institute is conducting shortthand, typewriting, book keeping and other commercial subjects, an electricity class, a tailoring class for ladies, Portuguese and Konkani classes and an employment burein and is doing useful work for the moral and social uplift of the Goan Community in Bombay

The tariff seliedule is based on the three-fold principle, fiscil, protective and preferential There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent according to the nature of the commodities, but the duties in several cases are specific, not ad inforem eonsiderable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent on their bests prince. The tariffe were constructed. their basic price The thriffs were again revised last year, and the import duties on foreign goods were generally increased The preferential duties on Portuguese wines, spirits and provisions have been lowered so as to make preference Sugar imported from even more effective Mozymbique enjoys effective protection, though its import is done through British India But there are no exports from Gor to Mozimbique

For the last eight years the country has experienced recurring surpluses due to the increasing indirect taxes Public revenues between 1914 and 1941 have almost doubled and the indirect taxes yield to the State about 32 lakhs of rupees and direct taxes about 9 so far Government has not modified its orders, lakhs of rupees. The surplus from 1935 to although Government used to freely receive 1937 came to 17 lakhs which, together with English notes at pur before 1941. The currents other special funds, make up a reserve of about problem has considerably eased at present and 5 lakhs of rupees available for developmental expenditure, in which sum is included about notes for their goods, without charging any lakhs of rupees due by other colonies of commission. It is only for Portuguese notes for the commission is demanded. The Portuguese that commission is demanded.

about Rs 13 per capita. The Income tax is funds have been merged into one consolidated reserve car marked entirely for the development lee which was introduced towards the end of The tax on 1938 has now been withdrawn rice was levied with a view to give protection to the local production but when Government saw that the price of paddy was soaring high, it saw that no useful purpose was served by keeping the tax on rice Hence the repeal of this tax which has brought relief to the poor consumers. A notification in the Government Gizette says the price of paddy continues to remain at Rs 26/- per candy of 160 litres with the exception of Corgut variety. It is under stood that this price is applicable only to pines of production or at the godowns of producers. The price of unboiled rice locally produced is fixed at Rs 28 a larg of 88 litres. Rolled rice imported from Karachi is to sell at Rs 328 a larg. The public debt of Goa is made up of dues to Portugal and small loans floated in the country itself. Most of the debt due to Portugal has been vived out by lump payments. The has been wheel out by lump payments. The currency of the country is the monopoly of the Banco Ancional I itramarino which is the State Bank of issue for some of the Portuguese edonies Currency in recent times has expanded and the fidnesary issue has been increased from 10 The State holds millions to about 12 millions n percentage of share capital on which interest is payable by the Bank to the respective colomes The total fiduciary issue of the Rank at the end of last year was about 112 lakhs and its active note eirculation has recently increased eonsiderably, due to increased demand. The Bank does ordinary banking business with very few central banking operations. It preserves a limited loan policy but purchases, on a large scale, British Indian notes and coins and remits them to Bombay where it maintains a branch financed by transfer of capital from Gor through the purchase of British Indian currency There was, during 1940-1941 a considerable repatriation of funds from British India, which re Sulted In an expansion of the note circulation of Banco National Ultramarine to over 80 lacs of rupees There was also a large increase in the Savings Bank deposits. The heavy demand for Darking and the savings are the saving to the saving the Portuguese notes resulted in a discount being demanded for their conversion. But the Banco Nacional Ultramarino has withdrawn the facil ities for transfers and conversion of notes, at or present, which it had previously allowed to its eustomers. The Gor Government Treasury Offices also do not receive English notes for any pryments and the emigrants have to provide the English notes evel anged into Portuguese. These hard ships have been the subjects of representations. ships have been the subjects of representations by different Goan Institutions in Bombas and so far Government has not modified its orders,

Capital -Nova Goa the present The situated on capital of Portuguese India the banks of the Mandovi Panjim and Ribandar and is the seat of the Governor G neral Old Goa is some couples o narrow strip of land leading up to the C bo the cape dividing the Aguada hay from that of Hormusao and mainly stopes down to it is edge of the Aguada hay frame that of Hormusao and mainly stopes down to it is edge of the Aguada it was selected as more than the control of the Fort in the control of the Fort in the Aguada it was selected as the selected and the control of the Fort in the control of the Fort in the Aguada it was selected as the selected as the control of the Fort in the fort in the in 1843 it was roised to its present rank as the capital of Portugueso India The appearance of the city with its row of puhl c huildl gs and elegant private residences as seen from the water is very picturesquo and this impression is not belied by a closer inspection of its n at and belled by a closer inspection of its n at analy apacions roads bordered by decent tidy honses. iortu ne-The c-indishment of dictatorship in Portugal ling produced profound changes in the adminis trative invehiners of Gon. As a tem of centralisation, financial and edministrative, fire the c introduced with the result that all important financial and idministrative acts require the sanction of the Lisbon Government. The fovernor General has to submit periodical reports of his administration to the Lisbon Govern A pres law controls the freedom of the Press and Imposes heavy penalties on all erimes committed by newspapers. Old newspapers are exempted from deposits, but new ones have to keep with the State considerable sums of money before they are allowed to appear Lyery paper has to be previously consored by official censors and so also the publication of books, brochures and pamphiets. The powers of the Council of Government are also reduced, particularly their legislative functions They are for all intents and purposes a mere advisors body as officials and nominated members from A system of periodical conferences has been established, made up of all the colonial Governors now suspended due to war There is a common parliament and the whole Portuguese Empire is constituted into a single constituency electing about 90 members of the National Assembly Presidents of municipalities and charitable associations are appointed by the Governor-General The economic condition of the country has deteriorited considerably in recent times. Due to scircity of necessaries of life, thousands of Coans liave come to British India to earn their hing Prices have risen by leaps and bounds and people cannot afford to buy in the black markets which are founding before the creek the control of the which are flourishing before the eyes of the authorities who seem helpless to check profiteer So the result is merease of emigration to Pritish India

The population

the north bank of the river Arasalar, ah to the Governor at Pondleherry. The population has in recent years rightly decreased. In 1888 it was 93,055, in 1891, 75,526, in 1901, in rice with Ceylon, and to a less extent with 54,003, an 1923, 57,022, in 1921, 56,922; the strails Settlements. It has no commer in 1936, 60,447, and in 1941, 60,555, but the density is still very high, being 1,668 persons per square nile. Kumbakanam is the only steady provided with a light-house 142 fet taluk in Tanjore District which has a higher ligh, the light in which having a range of from density. Each of the six communes—namely, 8 to 10 miles. In 1899 Karikai was connected Karikal, La Grande Aldee, Nedungadu, Cotwith Peralem on the Tanjore District Boar Kery, Neravy and Tirneular—possesses a nunvor and council. The members are all elected by possession on the settlement after 1815.

The Frontiers.

By those who tale a long alew of politics in the wide sense of the term, it will be seen that so large in the discussion of Indian questions, has always borne a twofold character—the local issue and the international issue. I or nimost a century the international issue was the greater. of the two, and the most scrious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face But the tendency of later times until Germany's invasion of Russia was for the International aspect to recede and for the local aspect to grow m importance, until it inight be said, with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation

The Local Problem -The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Kashmir is a wild and troublous sea of some of the highest mountains in the world The thin valleys in these immense ranges are populated by hardy, brave, militant mountaineers. But sparse as the population is, it is in excess of the supporting power of the country. the country Like mountaineers in all parts of the world, these brace and fearless men have sought to supplement their exiguous agricul ture by raiding the rich plains of Hindustan We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought n perminent remedy by opening for the warlke Highlanders a military career in the famous Highland regiments, and in rendering military operations easler by the construction of Wades road The Highland problem has disappeared so long from English polities that its pregnant lessons are httle realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called what lessons it teaches those who are called

we are dealing was concerned, two policies were tried. In Buluchistan, the genius of Si Robert Sandeman devised the method of enter ing into military occupition of the principal points, and thence controlling the country at the same time close engagements were entered into with the principal chiefs, through when the tribe-inen were kept in order That polic was so successful that whilst the administration was expensive the Baluchistan frontler did no scriously embarrass the Government of Indi from the time when Sandeman set his mark of the land. Not that the country was entirely ralds or rising Occasional tribal uccessitated occasional military operations and the Gomil Pass was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanstai in 1919 But speaking broadly. Sandeman brought peace to Baluchistan, and to the large frontier area which is embraced in that general So far as this section of the frontier i concerned it may be said that no frontier pro blem exists, save the need for an economic and constructive policy

Towards Afghanistan —Far otherwise had it until lately been with the section of the fron tier which stretches from Buluchistan to the confines of Rasimir That was, for three quarter of a century, the scene of almost cerseless military operations which constituted a deposite of the constituted of the constitute devistating drain on the Indian exchequer years one sought for a definite polley guiding the One expla actions of the Government of India nation of their meonsisteners was found in the Once the existence of two schools of thought frontler with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupa tion of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country But those who looked at policy not only from the nilitary standpoint, were fearful of two considerations They felt that occupation up to the Afghan fron tier would only shift the frontier problem farther

is immense procedurations of the war It proke down under the strain of the wanton niversion of India by the Afghans in the hot yeather of 1919. On February 20th the Amir Labibullah Khan was assassingted in his sleep iear Jeialabad Although he does not figure so prominently in frontier history as his iron ather Abdurrahaman Khan, he nevertheless has ligh claims on the favourable verdict of history Yone anticipated that any successor to Abdur anaman Khan could hold in the least in a single State the fractious, fanatical tribes who make to the population of the Afghan kingdom his Habibullah did On occisions his attitude seemed to be equivocal as when armed gather ngs of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Tribui Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European tandards, the Amir had often to bow before he fanatical elements amongst his own people intil they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed un-riendly, but they must trust him. In truth, the position of the Amir when Turkey entered the war, and called Moslems every where to arms on the side of Germany, was extraordinarily difficult He received Turkish, German and Austrian missions in Kabui from which British represent atives were still excluded But he kept Afghani stan out of the war, and with the complete defeat of the Central Powers and their sateilites, his policy was justified up to the hit Indeed his success was the cause of his assassination The irreconciiabie elements in the Kingdom saw that the day of reckoning had come and strove to avert the settlement of their account by the murder When he was done to death, his brother, Nasruliah Khan, was proclaimed Amir by the assassins But the conscience of Afghanistan revoited against the idea of Nasrullah, the archfanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother Amilitary movement in Kabul itself brushed him aside and Installed the son of Habibullah, Amanuliah Khan, on the throne But Amanullah Khan soon found it was a thorny bed on which he lav, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical Crime, set his troops in motion on April 25, 1919, and preaching a *jehad* promised his soldiers the triditional loot of Hindustan The Indian Army was at once set in motion, and as has always was at the see in incider, and as its always been the case the regular Afghan Army was easily beaten Dakki, beyond the Khyber, was selzed, Jelaiabad and Kibul were bombed from the air, and there was nothing to prevent our occupition of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghangtan but, it is overset a government in Afghanistan, but it is quite another to set up a stable government in its stead The Government of India wisely held their hand, and the Afghans having sucd for peace, a treaty was signed on the 8th August, 1919

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze With one or two exceptions.

the regular troops, who in the emergent ought to have been hastened to the succour, could not stand the strain an appeal from their fellow tribesmen, and eith melted away or joined the rising Tills has ofte been described as the failure of the Curzo policy, which was based on the tribal militia But there is another aspect to this question The Militia numbered only some 3,000 mer They were distributed in a number of isolate ind semi-isolated posts. There was no possibility of their withstanding the onslaught of a Afghan invading force. They were not intende for such a purpose. If they had, when the invasion began, been supported by regula troops their loyalty might have remaine sound. But other counsels prevailed. It was the outcome of the country transfer. at the outset decided in high military quarter that in the face of the Afghan invasion it wa inadvisable to send regular troops to support th Waziristan militia posts as it was concluded that the Mahsud and Wazir tribes of Wazirista would join the enemy Orders were therefor issued that the posts should be abandoned, the British officers in them withdrawing with such menas remained loyal. The officer commanding the Bannu brigada immediately despreted. the Bannu brigade immediately despatched i movable column for the succour and reassu rance of the militla garrisons in his area bu superior orders followed directing the return of the column forthwith. The militia were there upon ordered to withdraw and their commence ment to do so, accompanied by the burning o such stores as they could not carry, quite natu rally produced the instant uprising of the tribes men, who began to attack and loot the retiring conveys and the abandoned posts To expec the militia to remain firm in retreat in such circumstances was to refuse reasonable consider ation of the facts of the situation

Russia and the Frontier—The Curzol policy was up to this inevitable collapse greating assisted by extraneous events. The greates external force in moulding Indian frontier policy was the long struggie with Russia. For nearly three-quarters of a century a veiled warfar for predominance in Asia was waged between Great Britain and Russia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corpor ation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her alone, Russia had to advance. True, the adventurous spirits in her armies and some of the great administrators in the Tsarist capital were not averse to paying off on the Indian Borderland the score against Great Britain for the Crimean War and for what the Russians thought was depriving them of the fruits of their eastly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerilla enterprise between the hardiest spirits on both sides, accompanied by periodle panies in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Merv. of the generic

ations of the Afghan War of 1838 with the ragie de truction of the retiring Indian furee etween Kabul and Jelalahad alightly relieved by the her lo defence of Jelalahad and the irmn so of Gen ral Pollock in refusing to with irow the punitive army until he had act his nark on kabul hy the razing of th famous Bain Risear fortress It involved us in the acconditions. ifghan War of 1878 which left the bailing problem of no stable government in Afghania-There was a gleam of light when Abdur ahmaa Ahan whom we set up at Kahui to chers us of our perplexities prov d himself nations But in the e-rly eight a the two states were on the verge of war neer a aquabile of the possession of Penfideh and then m u segan to think a little more clearly. There began a series of boundary delimitations and greenents which clarified the attuation without more of the series of the s lower r finally settling it The old controversy The old controversy roke on the north service of the norther form when intrigues with a Suriat nonk Dorjieff during Lord Curzona at crysticy gave rise to the grave suspicion that the access and only shifted to Tibet. An arrestition to Linear et the veil which had to long concealed the mysterions city and dispersed the missman of this intrigue. But it was not until the conclusion of the Angio-Russian agreement of 1907 that the two countries arrived a' a slage long sought by those who jooked byond th irno en The act al authors of the Agreemen were Lord Grey the Foreign Secre-laty and Lord Hardinge formerly Bitth h Ambasador in Fortugal but thad been desir ed by their Producers. Turkey and the Frontier—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the avant courier of Germany, when she passed under the tuterage of that Power, and for a inmited period during the war Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way For a brief period Midhat Pasha us way for a brief period Alidhat Pasha raised the status of Mesopotamla, and after the Revolution that fine soldier Name Pasha became a power in the land But speaking broadly Turkey lemained in Mesopotamia because it was no one sinterest, even that of the Arab, to turn her out When however Germany developed her "BBB" policy, Turkey was used as a stalking horse. She moved a small force to the Peninsula of Al-Katrin order. small force to the Pennsula of Al-Katr ln order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Shelkh of Koweit into a de facto suzerainty, exercised by military force These efforts faded before the vigorous action of the British Government which coneluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Katr was always very precarious On the outbreak of the war, however, the situation profoundly changed When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by coup de main, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character These were completely successful character These were completely successful with General Mande's occupation of Baghdad After the Russlan debâcle we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asla, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power. The aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks, if they were so disposed, to be troublesome through guerrilla warfare in the Mosul Zone, and by stirring up. warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor The conclusion of the Treaty of Lansanne in 1923 brought temporary relicf, but it dld not settle the main issue, the frontier between Turkey and Iraq Under the Treaty It was provided that if the two parties could not agree to a boundary line dehmitation should be left to the League of Nations Negotla tions were promptly opened at Constantinople but it was immediately found that there could be no mutual agreement, the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its innterland were necessary to the existence of Iraq issue therefore went to the League of Nations That body despatched a neutral commission to study the position on the spot this commission reported that the best settlement would be for the Mosul village to be incorporated in Iraq, if

prolong its mandate over that State for a period When the report of this of twenty-five years commission came before the League in 1900 Britain gave the necessary guarantee, and the Mosal vilvat to Iraq The Turkish delegates who at first recognised the declsive authority of the League, then declared that they would not be bound by its decisions So the matter rested at the end of the year, with Iraq in occupation of the disputed Territory up to the temporary frontier which was known as the Brusseis Line France and the Frontier —It is difficult find any sound policy behind the efforts of France to obtain a couling station at Muscat In the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite purpose in it than a general pin-pricking peller, a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention. These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente. Far otherwise The consolidation of French was it in the East The consolidation of French authority in French Indo-China was the preluding authority in French Indo-China was the preluding the control of the control to designs for the expansion of this authority at the expense of Siam and to find compensa tion there for the veiled British protectorals of Ebypt There had earlier been muttering. in Burma We were established in Lower Burma in the 'thirties and in the 'elghtles the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British However, if any hones were entertained of averaging the if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmess War and the firm establishment of British rule War and the firm establishment of British rule Far otherwise was it on the confines of Siam It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma then a regular Province of the Indian Empire and French Indo China This policy was definitely challenged by French encroschments on Sam Matters approached a crisis in 1894, and we were within measurable distance of a situation which might have ended in open war between the two States But as in the caso of Penjdeh, and later when Major Marchad marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing to fight about They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Saam With the collapse of France in the second world war, however, both Indo China and Saam wrethrown on the mercy of Japan, who joined the Axis powers against the Alies in December, 1941

The New Frontier Problem —The whole purpose of this blief sketch has been to show that for three generations—most assuredly since

he initian frontier problem has never been a and Pe havar on the other is fully consolled to earl groblem It has been dominated by extremining the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant position in the Last through the read as a strong or a male out for leaving a londinant position in the Last through the read of the third position of the constant of the constan is, conditions have become more like those the termin or one numerical and frontiers supwhere legood motor roads in the world in this present time of swift.

I.—THF PERSIAN GULF.

From what has been said before it will be seen; vigorous Viceroyalty of Lord Curzon, who visit hat the keynote of this discussion of Indian rontier policy is that the external menace has argely disappeared. No part of the frontier is more powerfully influenced by this consideration han the Persian Gulf Our first appearance n the Gulf was in connection with the long struggle for supremacy with the Portuguese, the I rench and the Dutch, who had established trading stations there With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the supersession of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian Government remained there primarily to preserve This work is quietly and efficiently the peace performed Piracy was stamped out, Truclai Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept yatch and ward, and our Political Agents regulated the external affairs of the Arab rulers on the Arab coast In return for these Great Britain claimed no selfish ad-The waters of the Gulf were kept free vantages to the navigation of the slups of all nations, and though Great Britain could have made any territorial acquisitions she picased she retained possession of only the tiny station of Bassidu Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs France sought to acquire a coaling station at Jissa, near Muscat, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontler with weapons of precision and quantities of ammunition. All eauses of difference were gradually removed by agreements following the Anglo French Entente Russia sent one of her finest cruisers to 'show the flag" in the Gulf, and established consular posts where there were no interests to preserve She was credited with the Intention of occupying a warm water port, and in particular with casting eovetous eyes on the most dreadful spot in the Gulf, Bunder Abbas This menace declined after the signing of the Anglo Russian Agreement and disappeared with the collapse of Russian power following the Revolution Then Turkey either acting for herself, or as the avant courier of Germany, under whose domination she had passed, began to stir She threatened the Sheikh of Bahreln by the armed occupation of the peninsula of Al Qatar, and moved troops to enforce her suzerainty over Kuwait, the best port in the Persian Gulf and a possible terminus of the Baghdad Railway terminus of the Eaghdad Kalivay Euriner to consolidate her interests, or to stake out a lealing. Germany sent the heavily subsidised ships of the Hamburg-America line to the Gulf, where they comported themselves as the instruments of Imperial pohev rather than as inoffensive merchantmen She also strove, through the agency of the firm of Wouldhaus to acquire a territorial footing at Sharjah. These events stirred the British Government to an unusual activity in the waters of the Gulf. Further unusual activity in the waters of the Gulf

the Gulf during his early travels and inc porated a masterly survey of its features in monumental work on Persia. He appointed t abiest men he could find to the head of affai established several new consulates, and was strumental in improving the sea communication with the Gulf ports The British Governing aiso took alarm They were fortified in the stand against foreign intrigue by the opini of a writer of unchallenged authority American Naval writer, the late Admiral Maha placed on record his view that "Concessi in the Persian Gulf, whether by formal arrang ment (with other Powers) or by neglect of t local commercial interests which now under political and military control, will impe Great Britain's naval position in the Farth East, her political position in Indla, her con mercial interests in both, and the Imperial to between herself and Australasia." The Imperi standpoint, endorsed by both Parties in t State, was set out by Lord Lansdowne words of great import—"We (1 e, His Majesty Government) should regard the establishment a naval base or of a fortified port in the Persh Gulf by any other Power as a very grave mena to British interests, which we should certain resist with all the means at our disposal" The negative measures following these declaration were followed by a constructive policy when the oll fields in the Bakhtian country, with a gre-trefinery, were developed by the Anglo Irani-Oil Company, in which the British Government has a large financial stake. Since that da-the Persian Gulf has become the "Air Su-Canal" of the Empire, the main Imper-lation of air communications running down line of air communications running down ! Arab httoral, and an important oli-field he been discovered and is being operated at the Island of Bahrein. The Company is a brane of the Californian Standard Oil Company are being American owned has introduced the USA into the political complex of the Gulf Another branch of the same Company and Struck oil in Hass—a portion of Ibn Saud's Arabian kingdom shelving on the Gulf—and Arabian kingdom shelving on the Guif-and a British company is prospecting with success in Kniwait. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf The fleet consisting of two sloops and four launches, all sultably armed, was built in Italy and duly arrived at its destination in 1932 The im was at the outset officered by Italians The im mediate reason for the new fleet was that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling The fleet was required to cheek it The British Government in 1935 announced their decision to truster their principal naval station in the Persian Gulf from Henjam, on Kishm island, off the Persian shore of the Gulf. Persian shore at the entrance of the Gul, which they held on lease from the Persian Gulf to Bahrein, on the Western, Arabian coast of the Gulf This move was calculated to remove causes of frietlon Pearls are found on the Arab coast of the Persian Gulf between Kuwait and Muscat

Iraq.

In a sense Iraq and Turkish Arabistan can eardly be said to come within the scope of the rontiers of India, yet they are so indissolubly secrated with the politics of the Gulf that bey must be considered in relation thereto Basrah is the present sea terminus of the Inglidad Rallway and is also an important air port on the Empire vir routel. It stands on the ight bank of the Shatt of Arab, 70 miles from ts mouth, favourably situated to receive the abole water-borne trade of the Tigris and Duplirates Rivers. The local traffic is valuable, or the richness of the date groves on either side of the Shatt el-Arab is indescribable, there is a considerable entrepot traffic. Whilst Basrah is the port of entry for Baghdad and for the trade with Persia which follows the carayan route tra Kermanshh and Hamadan Baghdad is the Capital town

Iraq is an independent Arab State set up in what formerly was Mesopotamia, under British Aegis under the sovereighty of King Feisal I He was, on his death in 1933, succeeded by his son, King Ghazi who died in a motor accident in Bughdad in April, 1939 His three year old son Amir Feisal was then proclaimed King, and Amir Abdulillah, unele of the new ruler, was

appointed Regent
When the 1914-18 War was over we found ourselves committed to immense, undefined and burdensome responsibilities in that land The sound concepts which dictated the original expedition were dislocated in the foolish advince to Baghdad, then the great military enterprises necessitated by the fall of Kut 1-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Transjordan Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious In these circumstances King Feis'il agreed to come from the Hedjaz and was installed on the throne under the regis of Great Britain

Still we were enmutted to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real-power unless King Feisal was to be a mere puppet, immense expenditure and inde finite military commitments In these circumstances there was an insistent demand for withdrawni from the land British policy moved slowly towards that end, but a definite step was taken in 1923 The Secretary of State for the Colonics announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on

May 3rd he said-

Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad the terms of which I propose to read out to Your Lordships

has their cordial assent It is being publish at Baghdad to-day.

The announcement is as follows —

"It will be remembered that in the autur of last year, after a lengthy exchange of view it was decided between the Governments His Britannic Majesty and His Majesty Ki Feisal that a Treaty of Allance should entered into between His Britannic Majes and His Majesty the King of Iraq This Treat which was signed on the 10th October, 199 and the term of which was to be twenty yes (subject to periodical revision at the desi of either party) provided for the establishme of an independent Constitutional Governme In Iraq, enjoying a certain measure of advi and assistance from Great Britain of the natu and extent indicated in the text of the Trea itself and of subsidiary Agreements which we

to be made thereunder "Since then the Iraq Government has man great strides along the path of independent and stable existence and has been able success fully to assume administrative responsibilit and both parties being equally anxious th the commitments and responsibilities of H Majesty's Government in respect of Iraq shou be terminated as soon as possible, it is conside ed that the period of the Treaty in its_preser form can conveniently be shortened to obviate the inconvenience of introduct amendments into the body of a Treaty alread signed, it has been decided to bring about ti necessary modifications by means of a protoc which, like the Treaty itself, will be subjeto ratification by the Constituent Assembly

"Accordingly a protocol has now been sign! by the parties in the following terms

It is understood between the High Contrac ing Parties that, notwithstanding the provision of Article 18, the present Treaty shall termina upon Iraq becoming a member of the Leagu of Nations and in any case not later than for years from the ratification of peace with Turke; Nothing in this protocol shall prevent a free agreement from being concluded with a vie to regulate the subsequent relations between the High Contracting Parties, and negotiatio for that object shall be entered into between them before the expiration of the above period

It will be noticed that under this protoc the Treaty in its present form was to termina on the entry of Iraq into the League of Natlo or in four years, whichever might be earlier

The position of Iraq as regards the Leag was that when the Treaty was ratified H Britannic Majesty was bound under Artic 6 to use his good offices to secure the admissi of Iraq to membership of the League of Natlo as soon as possible His Majesty's Governme would be in a position to take this step on the fi filment of the two following essential condition the delimitation of the frontiers namely, the delimitation of the fronties Traq, and the establishment of a stable gover ment in accordance with the Organic La

The Council of the League of Nations January, 1932, adopted the report of the Irs Commission recommending the termination the mandate subject to the admission of Ira This to membership of the League and Iraq enterli oted for the admission of Iraq to Leagun embership

Under the Treaty of Lausanne between urkey and the Powers which was signed in 9 3 it was agreed that the frontier between ling Feisal's State and Turkey the important contier because the inture of Mosul was in ispute should be settled by the League of lotions should Great Britain and Turkey be un ble to come to agreement by direct negotiation bese direct negatiations were opened at Cona entinople but no agreement was reached so he question was opened before the Council if the League in September 19 4 Whilst the natter was under discus ion complaint was nade by Great Britain that Turkey had violated he provisional frontier drawn in the Treaty M Lausanne and certain irregular hostilities were carried on in the disputed zone. This natter too was remitted to the Lesgue and a arther provisional boundary was drawn which

was accepted by both parties

Here the matter remained until the antumn of 19.5 In order to secure the material for s decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involed report but one which led by devious raths to a commonsense recommends devious ratins to a commonsons recommenda-tion It was that the first essential in the Mosal vil yet is stable government. The d tires of the people were for locorporation in the Slate of Ireq. If therefore the British in the Siste of Ireq. If therefore the Brusan Government was willing to extend its mundate over Iraq for a further period of twenty fire restaining an analysis of the sistendary of the sistend gave the necessary gnarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Tresty of Lausanne The issue was remit the Treaty of Lausanne The issue was remit ted to the Court of International Justice at The Hagne which deelded in f your of the competence of the Council Great Britain hav in si en ti e necess ry assurance th t he was prepared to extend he m ndate over ir q for a

by th Leag by the Leag Rel tio a between B itain and Iraq were Detelors further det ed by second treaty cardiaded in January 19 6 which pro ided th t Grat Briton should as soon as possible recompt i frag f r admi on to membership of the Les w of Vation Tits recommed thou was made saji accreted to these too made and accepted in O tober 193 wh cupon the M ndate was termi ated and Iraq became and the desired and the second at the procure of Le sue factions. The Treaty of 10°6 was a large fact of the sue factions. The Treaty of 10°6 was the cut Jule 1330 to come! for the succession of the succession iraq had been admitted as a member of the League of \stions. It provides ter alsa

I justice. This meant the termination of the 1 that each of the two Hi h Contracting parties and see when the next Assembly of the Lex ne i shall immediately come to the aid of the other in the event of war

It is important to remember that there is a considerable difference between the vilayet of Basra and the other portions of the Iraq State Basra has for long been in the closest commercial contact with India and is in many respects a commercial appanage of Bombay Its people have not much in common with those of the North They took no part in the Arab rising which followed the war and they ask nothing better than to remain in close touch with India and through India with the British Government

Irags alliance with Great Britain was emphasised by the Iragi Prime Minister General Nuri Said Pasha in April 1939 Broadcastin to the nation General N ri said that alliance with Britain and the neighbouring States coupl ed with elocere friendship with Turkey and Iran were two principles on which Iraq a foreign

policy was based

On the outbreak of war with Germany in September 1939 Iraq severed diplomatic reis tions with Germany in accordance with the terms of her treity with great Britai but for sever I years the German mini tor in Bashdad had been working a lanst British influence As Hitle ism went from strength to strength Oerman Influence in Iraq grow In volume and war b gan the expul intensity until when th sion of the Germ n minister by the Cabinet threw into sharp relief the pro German sympa thies of the army leaders and the young r ambitious men who fawned upon them Later the Cablost fell and was succeeded by ministries backed by Rashid All and the army When backed by Mashia Ali and the army When Italy ent red the war this cabhet took the first step in breach of the Anglo Iraq Treaty of Alliance by refusing to break off diflomatio relations with Italy with the realt that the Italian Legation in Bachdad became an active tentre of Axis proj anda und espionage in April 1941 a coup det put Rathia Ail into power. The administration that followed turned openly hostile to the Britt h demanded that he more British troops should be landed that he more British troops should be landed to protect lines of communication through Iraq and when this demand was refused began hosti ittes in the bope of Axis support Iraqi forces chelled Habbaniyah the British Ai Base and rounded up British residents in Baghdad Iragi forces and rounced up prison resources in Baganaa.
The rebellion was quickly quelled and the
rebel I aders finding thir position unten ble
field the country On May 30 1941 the Lord
Mayor of Baghdad accompanied by Iraqi Army
and police officers came to the British Com mander to ask for an armistice whi h was quickly arranged and leg i Government in Ireq

was restored with the return of the Regent With the restor tion of constitutional govern m ot u der the Premiership of burt al Said

in 5 & det sue Fremersing of Next at East On the 16th January 1943 Iraq declared war on the Axis Powers and a few days late she acceded to the United N tions Part signed at Washington on the 2nd January 194

In April 1945 the Iraql Government accepted the invitation of the United States Go ernm nt the invitation of the united States to ermm nt to participate in the San Franci.co Confer nee and a delegation was sent headed by Arshad at Umari the Minister for Foreign Aff irs This idelegation, in concert with delegations from other Arab States, inter signed the Charter of the inadequate and the site is mainrious United Nations

Iraq has also played a prominent part in the formation of the Arab League, a confederation Iran authority Arab States which was corvened in Cairo in for the trade of Shiraz, and competes for the April, 1015, to discuss Middle Lastern affairs and to promote the planning of practical Arab co operation

The Middle Lastern affairs and for the trade of Shiraz, and competes for the notorious like the nucleonage is wretched and dangerous, the road to Shiraz passoperation

The Iraqi Army has now been reformed and reorganised with the assistance of a British Multiry Mission, and is quickly becoming an efficient force which can be used, if necessare, to maintain internal security within the country

In October 1913, the Regent paid an official visit to the United Lingdom, where he had the honour of being entertained by Their Mijestics the King and Queen for two days at Buel inglism He returned later in the year, after having toured war time Britain, which enabled him to form a personal appreciation of the extent and scope of the British war effort He left Iraq again in May, 1945, on another official visit, this time to the United States, spent a short time in Canada, and then proceeded once more to the United Kingdom

Iraq has filled a place of considerable strategic importance in the war during the invasion of Russia by German, and the aggressions of Japan in the Last The Guif Ports and the roads, riliways and alrways of Iraq and Persia became a main route for the supply of the USS R upto 1944, particularly when the normal sea route was hazardous. Iraq has furnished a vital link in the long Ailled lines of communication to the Far Cast, and the export of oil to the Medi terranean through the pipeline from Kirkuk, and down the Shatt el Arnh by tanker from Abadan has continued without interruption

The Iran Shore

manent interest The Iranian Government the cable station of Jask, and the possible has developed Bandar Shahpur as the port port of Chamber An interesting developmen at the southern territory of the new Trans Iranian Railway The port facilities are institution of an Iran Navy

importance of Bushire is administrative rathe tinn commercial It is the headquarters (Iran authority It is also the main entrest Further sout the idea of rail connection lies lingah, reputed to be the prettlest por on the Iran coast, but its trade is belt diverted to Debal. In the narrow chann which forms the entrance to the Gulf from the Arabian Ser is Bunder Abbas Here we are: Bunder Abbas is of son the key of the Gulf Importance as the outlet for the trade of Kerms and Yerd It is of ctili more importance as possible naval base. To the west of the town To the west of the towl between the Island of Kishm and the mainland lio the Charence Straits which narrow until the are less than three miles in width, and yet con thin abundance of water Here, according t sound naval opinion, there is the possibility creating a mayal base which would command th Gulf The great obstacle is the climate, which one of the worst in the world On the opposi shore, under the shadow of Cape Musandin ties another sheltered deep-water anchorage Elphinstone's Inlet, where the elimate conditions are equally vile But between the two points there is the possibility of controlling the Gulf just as Gibraltar controls the Med terranean For many years Bunder Abba loomed large in public discussions as the pos sible warm water port for which Russia wa seeking There was established a Britisl Naval station at Henjam, a small island close to Kism where the station was constructed to Kism, where the station was constructed under agreement with the Persian anthornties Its evacuation by Great Britain in favour of British British British Government in 1935 On the Mekran coast thorain the August Mekran coast the resident of the Mekran coast the resident of the Mekran coast the resident of the Resident of

II —SEISTAN.

importance of Seistan years a serious preoccupation with the Govern-ment of India Seistan lies midway north and south between the point where the frontiers moved her armies against India of Russia, Persia and Afghanistan meet at Zuidkar and that where the frontiers of Persia and our Indian Empire meet on the open sea at Gwattur It marches on its eastern sea at Gwattur It marches on its eastern border with Afghanistan and with Baluehistan, it commands the valley of the Heimand and with it the road from Herat to Kandahar, and its immense resources as a wheat-producing region have been only partly developed under Persian misruie It offers to an aggressive rival, an admirable strategie base for future military operations it is also midway athwari the track of the shortest line which could be built to connect the Trans-Caspian Raliway dary between Persia and Afghanistan of with the Indian Ocean and if and when the special reference to the distribution finally line from Askabad to Meshed were built, the the waters of the Heimand Ther finally temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation in the service of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend it through Seistan would ceased with the conclusion of the Anglo Russian temptation to extend the seistance and the

The concentration of public attention on the to possible lines of advance through Kandaha Persian Guif was allowed to obscure the frontier to Quetta, and through Kabul to Peshawai importance of Seistan Yet It was for many there can be little doubt that Russian attention years a serious preoccupation with the Gavern tion was directed to a more iclsurely movemen Seistan lies midway north and through Seistan, if the day came when she the nount where the fronting

Whether with this purpose or not, Russisi intrigue was particularly active in Seistan in the carly years of the eentury Her agent; moved into Seistan and through the agent; of the Belgian Customs officials, "scientific missions" and an irritating plague corden sought to establish influence, and to still the British trade which was gradually being the British trade which was gradually being built up by way of Nushki These efforts died down before the presence of the Mahon mission, which in pursuance of Her agenti Mahon mission, which, in pursuance of Treaty rights, was demargating the boundary between Persia and Afghanistan, of

A New Chapter -- Ae the result of the Ighan War of 1919 Indian frontier policy was again thrown into the meltin There was much vagua discussion of the position la the course of the month which followed the Wa iri tan Afghan War and the troubles in Wa iri tan which succeeded it but this di cussion did not r lly come to a head until February M rol 19

the bound of the property of t

Hairs, or shall we revert to what was known Warlr militia either mutinied, as at Wana, or state olose border system, as modified by deserted The piliar of the Curzon system fell ord Curzon, of withdrawing our regular troops The Policy—The policy first adumbrated ord Curzon, of withdrawing our regular troops of strategic positions outside the tribal area, to meet these changed conditions was outlined by Lord Chelm-ford, the then Viceroy, in a cep the passes open, and punishing the tribes speech which he addressed to the Indian ien by expeditions when their raiding propen ties become unbearable

The Curzon Policy -The Curzon policy, 1897, was a compromise between the "occupa ion" and the "close border" policies It was ased on the withdrawal of the regular troops so ar as possible to eantonments in rear whilst the contier posts, such as those in the Tochi at Vana and in the Khyber and Kurram were held y militia, recruited from amongst the tribesnen themselves The cantonments for regular roops were linked so far as possible with the roops were threed so far as possible with the modian railway system, so as to permit of rapid einforcement. But it must be remembered hat like all Frontier students, Lord Curzon did not regard this as the final policy. Ho wrote a the Memorandum formulating his ideas. It is of course inevitable that in the passage of time the whole Waziri country up to the Our and line will come more and more under our control No policy in the world can resist or greatly retard that consummation My desire

ibermen but interfering little In their own [1919 The Khyber milltia faded away, the

He sald it had been decided to Legislature retain commanding posts in Waziristan, to open up the country by roads; to extend the main Indian railway system from its then ter dopted in 1899, to clear up the aftermeth or minus, Jamrud, through the Khyber to the serious and unsatisfactory Frontier rising frontier of Afghanistan and to take over the duties of the Militia by regular troops That immediate policy was soon modified so far as the polleling of these frontler lines by regular troops was concerned. Such dutles are unpopular in the regular army, which is not organised and equipped for work of this character Irregulars have always existed ou the frontier, and as they had disappeared with the Militia it was necessary to recreate them The new form of Irregular was what have been ealled Khassadars and Seouts The Khassadar is an irregular in the extreme He has no British officers and no uniform, except a distinguishing kind of pager. In contradistinction to the old Militia, he finds his own rife As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police daties, they draw their pay and no questions are asked. If they desert in the day of trouble, they are not pursued with the steadfastness he was not pursued with the steadfastness he would have followed if he had remained in control British and Indian officers. But the application tologous would have followed or rather it should he of this rolls. rol, gave us moderate or rather it should be laid bearable frontier conditions until the Afghan War. It then broke down, because the tribal militia, on which it was based, could not, when left without the support of egular troops in the day of need, withtand the wave of fanaticism and other onditions set up by the Afghan invasion of recruited, officered by British officers.

But the application of this policy produced an acute controversy for this policy produced an acute controversy in two one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commanding posts in Waziristan should be retained, it was one thing to say that commandi

V —WAZIRISTAN.

Geographically, Waziristan is a rough paral-elogram averaging 60 miles from East to West Indus vary from the highly cultivated and and 160 from North to South The western irrigated fand round Bannu to the sand desert naif consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand eet high, which forms the water shed between the Indus and the Heimund Rivers and corresponds with the Durand Line separating India from Afghanistan This is the western boundary On the east is the Indus North is the water shed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District South is Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus

The western half is a rugged and inhospitable

mediey of ridges and ravines straggled and con-fused in hopeless disarray The more inhabited portions lie well up the slope at heights of four to six thousand feet Here are our outposts of Wana and Razmak some 15 and 20 miles respect lively from the Durand Line, in the centre of the grazing district, the latter within factorial and the some of the six of the exception—in fact all traditionally are in some strile, a circumstance which, until some bright political comet like the Afghan War of grazing district, the latter within factorial and patanni, only the first two are true wazna, and patanni,

in the Marwat above Pezu

Where irrigation or river water is obtainable euitivation is attempted under conditions which can hardly be encouraging Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky reinfall lucky rainfall

Inhabitants -The inhabitants, nnable to support existence on their meagre soll, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race. Of the four main tribes. Degrees that Mahanda. Dawas. main tribes Darweshkhei, Mahsnds, Dawars and Batanni, only the first two are true wairs

Unlike other parts of India, however these wild people a knowledge little allegiance to malls or headm n No one except perhaps the Mulia Powind h (ii) his death in 1013 coold a real of a vertice of them a his following

In 193 during the r volutionary Red Shirt in 193 during the reductionary Red Dater impaign in connection with the Indian National Congress in the Fishawar Plain the Upper and the Congress in the Fishawar Plain the Upper and the Congress in the Adminds of the Congress of the Congr

force The Afridis twice endeavoured in raid the plain and the Upper Mohmands in 193 Pebhawar in force but by combined air and when apring and early summer once min is d action were both times driven beat to facilitated, their methods in campaignin when apring and early aummer once more facilitated their methods of campaigning commenced retributory raids upon the Hallmzai and other Assured claus. The attacked claus appealed to the political authorities for help

and that help they were obliged to give
About the same time as this trouble was Aurum ann endeavoured to attack garachin ?

About the ame time as the stribble was leliped by the machinations of Congress germinating the appeared in lajaur a country against they aucceeded in drawing two or tiree included the stribent across the border of attack they aucceed in drawing two or tiree into the first Combined air and ground into the first Combined air and ground stellar expectations. The Took of the Algahan throne He was accompanied action or much these efforts. The Took lipt two companions and storted a campiagn in Bajanr for a revolution or such other trouble
as might he po sible in Alih ni tan. This
c mpell d the British Indian anthorities to take mea ures in fulfilment of their obligations of good neighbourliness to Aigh nistan

Road construction from the Peshawar Shab hadr road north ards through Ghslanai into the Hallmrsi courty and towards the passes which I ad from that country into the paper extremities of the Bajaan Valley was maderis ken and two b feades of troops with other details were sent for vard up it to assit in desling with the Upper Blohmands At the same time a roplanes bombunded the village of Kotkal in Upper Bajaur which h d given the liter to the Pretender furth, a serial demonstrations were made end the Bajanris were given an nitimatam deroandl g the surrender of the Fretender by a given date

The Upper Mohmands continuing aggressive and the Bajauris obdurate there was good prospect of a campaign over the same country prospect of a campaign over the same country as that covered by the ampsign of 1897. It seemed likely that the Gbalanai Road would be continued into the upper extremity of Bajaur and that another road for troops would also and the same continued to the same continued to the two roads in Upper Baj ur there would become extohl led a circular road through tile part of the trib ! trit ry resembling that munified trough Nort! We instead partly in the end the Upper Biother and partly in the end the Upper Biother and partly in the end the Upper Biother and partly received in extraper the troops of the circular troops of the contract of the trib ! trit ry resembling that music the end the Upper Biother and partly in the end the Upper Biother and partly received in extraper with our troops

rec ived in certain encounters with our troops and p rtly probably bec use of influence brought to be r upon them from Kabul retired to their hills and after negotiations entered into bonds it keep the peac and the Bojanri whiis maintaining on grounds of tribal custom their refusal to urrender the Pretender nevertheless expelled that pe son from their territory probably into Afghanistan H re then the trouble ceased Tha nett result of it was the

construction of the road through Ghalanal and th rapid davelopment of hus services and other activities of civilization which speedily took place along it The Uppe Mohmands m de another descent in the a mm r of 1935 The Lower Mohmand quarrelled mong thems ly soy r th di tribu

Upper Mohman is decid d to fi h in the troubled Thise. The m am of the description is the Mastere III and the Master III are not compared to the British Indian stronger and the Upper Mahmands as ing for peace—and the Upper Mahmands and they care of the Upper III and the Upper Mahmands and they care of the Mand are bound by promises of soo deheadour The and the Upper Mahmands and down beyond it are the Market Tribes in 193 hard with the regramme of the Upper Mahmands for radding meets the Upper Mahmands dontry

Tori Khel Rebellion —The Wazirs and inaccessible country in and about the up Mahsude in 1930 showed signs of rebelling against | reaches of the Shaktu river were made Government in parallel with the Afridis Congress party agents endeavoured to persuade them to do so They were at the outset firmly dealt with and peace was thus assured almost without its having been broken All went peacefully until the autumn of 1936 and then frouble was produced in North Waziristan by the fagir of Ipi, a man who was formerly in subordinate Government service in the Settled Districts and afterwards settled at the place from which he took his best known name A Muslim lad was accused in 1936 of kidnapping a Hindu girl of Bannu Apparently, she cloped She was restored to her parents by order of the Civil Court, on the ground that she was a minor There was a good deal of communal excitement about the matter and the fagir started an agitation about it in the Tribal country, alleging that the return of the girl to her Hindu parents was an interference with Islam There was also, in 1936, a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque This was settled in the Lahore High Mosque This was settled in the Lahore High Court in favour of the Sikhs and the Punjab Muslims accepted the decision The figur of Ipi lumped together the Binnu Girl Case and the Lahore (Shahidgan) Mosque Case and upon them raised among the Waziristan Tribes the siogan, "Islam in Danger" His demand for a holy war was only taken up by a sub section of the Porl Khelsection of the Wazirson Northern Their elders heared Government. Their elders begged Government Waziristan to order a flag march of troops through their country so as to increase the credit of the loyalist element. This Government did The troops were heavily fired upon and had to fight their way out Efforts to round off the matter before it developed into a major affair falied and there followed a war in which the Tori Khei were the only tribal section avowedly at war with Government but all the other tribesmen of the country were hardly more than nominally friendly, some joined in gangs fighting the authorities and others connived at such acts Not until the fall of winter towards the end of 1937 were the Tori Khei and the bands of arreconcilables under during leaders whom the fagir inspired by his agitation, beaten by extensive military operations into asking for peace. The faqir has not been caught for peace. The fagir has not been of and continues a troublesome influence The summer campaign in 1937 involved the employment of 50,000 troops Before they were withdrawn in the following winter 106 miles have been attempted but for the pre occupations on new roads opening up some of the hitherto

fagir of Ipi, however, assisted by seven notorious outlaws continued to keep Wazirst particularly the North, in a disturbed condit throughout 1938 and on into 1939 It i therefore, found necessary to keep an ex brigade in the territory and spasmodic operati against recalcifrant gangs proceeded by is and air and have not vet succeeded in restor normal conditions. In the summer of 1 a temporary complication was provdled by appearance amongst the Mahsuds of a Syr caffed the Shami Pir who was only just preven from leading a tribai incursion to support rebellion against the Government of Kat The persistence and expense of the trouble Waziristan, constituting as it does a heabreaking set-back to the "policy" which I seemed for fifteen years to be achieving mater results, has provoked renewed discussion Frontier policy especially in regard to milita commitments which were examined by a Defei Committee under the chairmanship of Li Chatfield who visited India on behalf His Majesty's Government towards the e of 1938 Although hostile sections s persisted with mischief there was thought April 1939 & be sufficient justification for hope that the period of major military operati was over and Waziristan was in consequer returned to the charge of His Excellency to Governor of the NWFP, in his capacity AGG for the tribal areas Sporadic d turbances have continued into the period of the second world war and the Fakir remains disturbing influence. disturbing influence

1939 -During Waziristan Outrages Waziristan was in a state of continual unre The list of offences committed by the Ahmed tribesmen by the end of the year mounted over fifty cases of major outrage They cluded biasting of bridges and destruction communications, holding up and looting loring snipping, kidnapping and several cases of murd The situation became intolerable and necessiti ed military operations Two columns of troops were sent to the Ahmedzai salient and it took three months to subdue the hostile ciements and clear it of offenders and outlaws

A detailed investigation into the economic conditions in the tribai areas, as a preliminary step to the adoption of measures aimed at radical improvement of the tribesmen, was thereupon believed to be opportune and would probably

VI —AFGHANISTAN

The relations of Afghanistan with the Indian Empire were for iong dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India Aii other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great Britain toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan we should be in a position to move large forces to prevent Afghanistan from coming under the influence of Russia that the first Afghan was should be in a position to move large forces up, if necessary, to support the Afghanism in War of 1838 was fought—the most majorable.

that there were only two main fates and articles the condition of the cond

Relations with Indin—Between the again of poets an either side stands the sand poets an either side stands the side of the sid

struction But a fuller knowledge inhe belief that the Amir was in a position
ittle difficulty. He had to compromise
be fanatical and anti-British elements
it his own people, inflamed by the Turkish
ng of a jchad, or holy Islamie war. But
mitted no act of hostlitty, as soon as
safe to do so he turned the members
be missions out of the kingdom. At
i of the war his policy was completely
d, he had kept Afghanistan out of the
had adhered to the winning side, his
ty in the kingdom and in Central Asia
its zenith

der of the Amir—It is believed that ad lived Habibuliah Khan would have his authority for a progressive policy anistan, by opening up communications stending his engagements with India s courted by the representatives of Persia ae Central Asian States as the possible gentre of a Central Asian Islamie At this moment he was assassin-1 the 20th February 1919 The eircumsurrounding his murder have never been splained, but there is strong ground for elief that it was promoted by naries who had harassed him all his These realised that with his vindication war their time of reckoning had come, anticipated it by suborning one of his o murder him in his sleep. His brother, in Khan, the nominee of the fanatical t, was proclaimed Amir at Jelalabad in ad, but public opinion in Afghanistan d at the idea of the brother seizing power he corpse of the murdered man layat and Amanullah, were not disposed ive their heritage Amanullah was at controlling the treasury and the arsenal pported by the Army Nasruilah found it ible to make head against him and with The new Amir, Amannilah, at once intented his accession to the Government la and proclaimed his desire to adhere to aditional policy of friendship But his ties at once commenced, he had to deat the war party in Afghanistan, he was nted with the dissatisfaction arising from anner in which the mnrderers of Habiband been dealt with, the fanatical element rasperated by the imprisonment of Nasrui nd the Army was so incensed that it had removed from Kabui and given occupa divert its thoughts A further element of exity was introduced by the political on in India The agitation against the tt Aet was at its height The distarin the Punjab and Gujarat had taken

Afghan agents in India, of whom the prominent was Ghnlam Hyder Khan ighan postmaster at Peshawar, flooded alstau with exaggerated accounts of dian unrest. The result of all this was to use the Amir that the real solution of flication was to unite air the disturbing at a na war with India. On the 25th his troops were set in motion and simulative afterm of anti-British propaganda enced to flow from Kabui and open in

Speedy Defeat -The war eaught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad Nevertheless the regular Afghan Army was rapidly dealt with Strong British forces moved up the Khyber and seized Dakka Jelalabad was re peatedly bombed from the air and also Kobul Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelala bad Inten days the Afghans were severely defeated. On the 14th May they asked for an Armistice With the usual Afghan spirit of haggling, they tried to water down the condi tions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawaipinds on the 26th July On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp 196-197

Post-War Relations—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards During the hot weather of 1920 there were prolonged discussions at Mussoonie between Afghan Representatives and British officials under Sir Henry Dobbs—These were private, but it is believed that a complete agreement was reached Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabni to arrange a definite treaty of peace This Mission crossed the border in January 1921 and entered Kabul where a peace treaty was signed

The main points of the Treaty are set out in the Indian Year Book, 1923, pp 197, 198-199

Afghanistan after the Great War —Since the War the relations between Afghanistan and Great Britain have been good and improving There were painful episodes in 1923 when a murder gang from the tribal territory in the British side of the Prontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afghanistan In course of time this gang was broken up His Majesty the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had tropicle with the King of Afghanistan had the King of istan had tronbies within his own borders which made him glad of British heip The main object of his government was to strengthen the resources of the country and to bring it into closer relation with modern But Afghanistan methods of administration is an intensely conservative country and no changes are popular, especially violent was the opposition to a secular form of administration and education. The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was Whilst this assistance was appreciated, broken the whole business gave a serious set-back to the reforms initiated by His Majesty, he had to withdraw almost the whole of his adminis

Saviet Penetration—Taking a long view armed force with a view to injuring the other a much more notable development of the hudependence or otherwise such activities will policie of Afghenistan at the period to be heeted Similarly neither of the con which the fortgoing notes apply was the tracting parties will allow armed forces arms penetration of the Russians who had ammandation or other war material meant converted the former Trans Casplan States of to be used against the other contracting party Tests Russia hate Soviet Republics The tap sat hunough its dominions parts mass mo soviet repulsies and object of this policy was gradually to sweep into the Soviet system the outlying provinces of Perla, of China and of Afghani tan Iu Persia this policy was folied by the vigour of the Sipar Salah Reza Khan, In Chinese Turkestan it was a proper of the state Signt Saish accas area. In Online's anaccase it was pursued with qualified success. In Alghanistan it also made certain progress the first step of the Russian was to extend the Soviet Republics of Tajhk.Lan Ultekia and Tu kmautistan so as to absorb was to all Northern Afghanistan This was later appare tly abandoned for the moment for a more gentle penetration Large anbaides, mostly delivered in kind ere given to Afghasistan Telegraph lines were erocted all over the country roads wer constructed large quantiti s of arms and mmunition w ro supplied whilst an air force with Russian pilota and mechanics was created and was I rgely developed In return the Russians received important trading facilities

Russo Afglum Treoty -Outwardly the firm the control of the control

Clause 1 -In the event of war or hostlie action betwen one of the contracting parties and a third power or powers the other cou tracti 2 party will observe neutrality in respect of the first controcting party

Claus ... Both the contracting partie spree to abstain from mutual aggression the One against the other Within their nwo dominions also they will do nothing which may an a nearly the other. ean s potitical or military harm to the other party. The nontracting parties particularly agree and the contracting parties and parties are made allowed and industry of the contracting parties are made allowed and industry of the contracting parties are made allowed and industry of the contracting parties are made and industry of agree due to mare amaners or posteria ar-military agreements with any one or more other powers against each other Each will also abstain from joint gany boycott or financial or economic blockade organized ag in t the other party Bealdes this in case the attliede of a third

Clause 6-This treaty will take effect from the date of its ratidization which should take place within three months of its signature it will be valid for three years. After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time

On March 23rd there was also signed in Berila treaty between Germany and Aighanistan whi h mount d to no more than the establish ment of diplomatic relation

A British Minister is established in Kabul as well as the representatives of other European States The representatives of Alghanistan re established in India and in London and at some of the European capitals The various and sidiary agreements under the Treaty have been carried into effect

The King a Tour —In the closing months of 19 7 His hi jesty King Amanula accompanied by the Queen a d a staf ol officials commenced a longtour to India and Europe It is under slong tour to India and Europe. It is under stood at at this was one of the cherished audit those of his father. King Hisbbullsh who was as assisted in 1919. King Amasulia when he set out was wermly welcomed in India and received a great popping secting in Bombay bost from his to religionists and from numbers of other communities who longet the invasion of India in 1919. He then took ship to Intrope of the communities who longet the invasion of India in 1919. He then took ship to Intrope of the communities who longet the invasion of India in 1919. He made as the place of the com-lance of the communities who can be applied to the communities of the com-capitate. He made a State visit to Turkey and swinced to Althonistan by way of Soylett Russia returned to Alghanistan by way of Boviet Ruasia and P rela A series of treatles with the govern ments of the countries visited was approunced and the King returned to Kahnl in the late summer

Reforming Zeni - King Amanula returned to his realm full of reforming real. He was much impress d by the political and social institutions of the western lands he visited and over party Desides this in case the stitleded particular of the state measures which it dominons.

City 4 2.—The high contracting parties style of the region of the rice of and apportunity won holy some of the rice of an adoptive style style of the rice of rection of these changes, friends of His Males advised the King to moderate the pace ney reminded him that in 1924 far less drastic langes had brought serious trouble in their ain In May of that year the "Lame Muliah" used the standard of rebellion amongst the The lizai and Mangai ciansmen of Khost fuliairs were openly active against the King nd His Majesty was equally frank in his ostility to them Possibly also well-wishers aggested that what was possible in Turkey, ter centuries of close contact with the Vest, and where the ground had been prepared y missionary effort and a long struggle for hs emancipation of women, might be less easy Afghanistan, where there had been no contact ith the western world

A Change of Kings —Events moved rapidly 1929 A notorious north Afghan budmash, Bacha-i Saqqao, raised the standard of revoit nd inflicted severe losses on the Afghan Regular roops, discontented as they were by arrears of pay Day by day the Afghan representatives in various parts of the world issued nessages asserting that the rebels had been lestroyed, and a rapid series of pronouncements is clared the withdrawai of all the reforms and he establishment of a Council of Provincial Representatives Communications with the outer world were broken King Amanulia and his family fled from Kabul to Kandahar and then from Kandahar via Quetta to Bombay where they took ship to Europe King Amanulia on his arrival at Rome entered into possession of the Afghan Legation, where he remained Bacha-i Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabui Without money, administrative experience or a disciplined following his throne was a thorny one and he was harassed by constant attacks The Royal Air Force in India meanwhiis went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch The most formidable of the new king's adver sarles were led by General Nadir Khan, a scion saries were led by General Nadir Knan, a scion of the oid ruling house, with a wide knowledge of the world Heavy fighting tool place Fortunes varied Nadir Khan almost gave up his chances as finally lost But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabui in his name and interest Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, Bacha-i Sangao was executed with other shortly afterwards, at the wish of the Afghans, Bacha-i Saqqao was executed with other rebeis, and when the year closed Nadir Khan was to all sssming in firm possession of the Kingdom He despatched members of his family to the principal Afghan Legations in Furope A Shilmwarl rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour There followed a serious rebellion in Kohidaman, Bacha i-Saqqao s country This also was promptly quelied And thereafter This also was promptly quelled And thereafter of the present Afghan Government that Nadir Shah ruled without challenge He devoted himself to the reorganisation of his in the interest of their continued independent in the interest of their continued in the interest of their continued independent in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interest of their continued in the interes

With every appreciation of the spirit and ther maintain internal peace when she had restored it and this promise was fuilified by the provision of an interest free loan of £200,0% to King Nadir and by the supply of rifles and ammunition to him He gave evidence of his friendliness towards Britain and India He co operated effectively to prevent tribes on hi side of the Frontier joining those on the British side against the Government of India li response to the Congress agitation in the summer of 1930 The trade routes were recopened and the new King again took up Amanuilah's mantie of reform but in a states manlike manner which carried the Mullah along with him

Murder of Nadir Shah — This ordered mare of progress was tragically interrupted by the murder of His Majesty Nadir Shah on the alternoon of 8 November 1933 — His Majesty was attending a footbail tournament prize giving when a young man appears the gathering stanger. when a young man among the gathering steppe forward and fired several revolver shots into hir at close range, Lilling him instantly It late appeared that the assassin committed the crim in revenge for the execution of a promine Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of th The assassin's father was stated same kind have been this man's servant and his prominent officers of State stood loyal by his heir, his son, Muhammed Zahir T. iatter was duly placed on his father's throne ar his accession was in due course acknowledg and confirmed throughout the kingdom in t traditional manner The new King started i traditional manner The new King started in reign with a high reputation for courage as steadlness He early Issued assurances to its steadlness to its rolling of its region of its regio steadiness He early issued assurances to people that he would continue the policy of i peopie that he would continue the policy of in father in affairs of State. No untoward ever have occurred in the years that have sin past during which the young King has this sagacity and good government gradual strengthened his position on the throne are by the development of communications at trade, done much to encourage the establishment of settled conditions among his peop. A mutual desire for close relations and part ularly economic understanding ied in 1938 exploratory negotiations between India and Afghanlstan with a view to seeking some for Afghanistan with a view to seeking some for of trade agreement

The Chief Ministers of the Afghan State Muhmud Hashim Khan (Prime Minister) a Shah Mahmud Khan, two surviving broth of Nadir Shah and the King s uncles Wi their help the strbility of the Afghan Kingdi has been successfully maintained has remained not unfriendly to Britain a India, and they have adhered to the Saadab Ail the gre Pact with Turkey, Iran and Iraq Ail the gre European Powers and Japan maintain Emb sies or Legations in Kabul, and it must be record of the present Afghan Government that tune with the ideas of their predecessors a in the interest of their continued independent in the interest of their continued independer ions with the Powe

gris and Euphrates, after their junction, flow the head of the Persian Gulf The system in the head of the Persian Gulf The system in the head of the Persian Gulf The system in the sirieh, on the Euphrates, thence northards to Baghdad, the line passing a constrable distance westward to Kut-l-Amara, historie fame From Baghdad the line in the eastward approximately to the foot of the se through which the Persian road crosses in the neighbourhood of Kifri in the direction Mosul It has for some time been open as a Kirkuk, 200 miles northward of Baghdad in the neighbourhood of Viosul Similarly, at Taurus raliway has long been open eastered of Aleppo as far as Tel Kochek, on the trian frontier, a few hours' road motor run, in the west from Mosul Through passenger rivices between Iriq and Istanbul are run a ad motor service is linking the rallway termini Kirkuk and Tel Kochek. The gap in the alway has now been closed, and through mmunication was established at the end of 40 A line also runs westward from Baghdad Feluja, on the Euphrates

The Trans-Persian line to join the Russian succession system and the Indian railways at assumed proportions of practical importance in the winter of 1911. Both the Russian and the Indian railway systems were by them and the Indian railway systems were by them all developed up to the points likely to be the traini of a Trans-Persian line. The Russian attempt of a Trans-Persian line. The Russian attempt in the Caucasus During the war this line as carried thence southward into the region east ad south-east of Lake Uruma. The Indian rail and system, on the borderland of India and Persia, as similarly much extended and improved during the war. A new agreement which was negotiated at ween England and Persia specially provided for ritish assistance in the development of Persian attural resources and particularly for the transion and improvement of Persian roads itable for motor traffic, but the agreement one to naught

A railway connection between the India and the Russian systems has again assume considerable importance after the German attach of Russia along with other democracle like China and USA against the aggression of Germany and Japan With the whole of Germany and Japan With the whole of the European west coast under German control or domination and the eastern shores of Siberia rendered unapproachable by the Japanese the only route which British and Indian supplies to Soviet Russia can take is the Iran The Quetta-Nushki line which had been extended during the last Great War upto Duzdap (of Zahidan) in Persia had been put out of use afterwards beyond Nok-kundi. This is again being set in order but it is not known upto the time of writing whether through rail connections are being arranged to the Soviet from in Caucasia from either the Persian Gulf of British Baluchistan in India

There also remains the possibility of linking the Russian and Indian rallway system by way of Afghanistan The suggestion has often been made in recent years that the Russian line from Merv to Herat, on the northern frontler of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghanisorder on Chaman The completion of a broad gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan

The maln interests behind Iranian railway communications had hitherto been the replace ment of mule tracks by rail roads, providing convenient rail connections between the posts in Persian Gulf and the interior to develop import and export trade and to give thorough connections between the different countries all round Iran The Iranian railways have, however, assumed special importance of late on account of supplies from the allies to USSR through Iran

The Fighting Forces (Indian Army)

ries of the East India Company but sepoys were first enlisted and d sciplined by the French who appeared in India in 1665 Before this d tachments of soldiers were sent from England Bombey and as early as 1665 the first for tified position was occupied by the East India C mp ny at Armagon near Masuinpatam Madras was acquired in 1640 but in 1654 tha garrison of Fort St. George consisted of unit ten men in 1661 Romb y was occupied by 400 solds as and in 1668 the number was only 95 of whom 93 were English and the rest French Portuguese and Indiane

After the declaration of war with France in 1744 the forces wer considerably increased but this 4th not prevent the France capturing steeras in 1748 Following the Franch example the English raised considerable sepoy forces a d largely iner ased the military setablish me ta In 1745 Major Stringer Lawrence isuded at Fort St. David to command that roes and the forces of the Command that the control of the Command that the Command that the Command that the Command that the Command that the Command the Command that the Command the Command that the Command ef the Company The English foothold in I dia was then precariou and the French under I dis was then precariou and the strain burders burders were contemplating fresh states. It became necessary for the Loglish Company to form a 1 yeer military establishm at The new comma dant at once set about the organi sation and discipline of his small force and the sation and disriptine of bit small force, and the serroso was given a mapsy formation. This was the beginning of the regular Indian Army of which Lawronce subsequently became Commander in Chief. In 1 98 the Marquis Wellesley arrived ac Governor Gen ral firmly lmbn d with the neces solve and the many mind a want the needs of yor de troying the last vestiges of French Influence. In pursuance of this polley ha reduce d Mysore where Tipu was intriguing with the Fr nch and then turned his attention to the Mahratta States in witch Sindhis had established power over the Mughal Emperor. at Defhi by means of a large regular army off eered by Luropeans under the French adven turer lerron In campaigna against Sindhia in Hindostan by a Briti! Army under Gener I Jake, and in the Decean against that prince and tha E ja of Berar by on army and r General William of the British Bull William of the Britis Wellesley afterwards Duke of Wellington the power of these Chiefs was broken in the hattles of La wari and Assaye Fre chi fluence was finally destroyed and the M thal Fm peror was released from the domination of the Mahrattae Subsequently Holkar niac was raduced and British power established on n firm footing

Muting at Vellore -Th Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great catachysm of 18 7. The most serious of this enthreaks occurred at the fort of Vellore in 1806 whan the nativa troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort while the striped flag of the Bultan of Mysore whose some were confined there was rai ed upon the ramparts The mutiny was suppressed by Gofonel Gille pi who galloped over from Areot at the head of the 19th Light Dragoona hi w in the gate of the fort and destroyed the muti-neers. This retribution put a stop to any inriher outbreaks in the army

Overseus Expeditions -Saveral import ant overs an expeditions were undertaken in the early part of the blueteenth e ntury Bouloon was taken from the French Coylon

stout resistance

In 1817 bostilitles again broke out with the binuratias who rose against the British during the progre a of operations against the Pindaria Practically the whole army took the field and all India was turned into a vast camp The Mahratta Chiefe of Poona Nappur and Indore rasth accession and were besten respectively at hirke Stabaldi and Mehidpur This was the last w in South in Indi Tha tide of was rolled to tha north never to rainin in the Punjah to which our frontier now axtended our stmy came into touch with the great mili

battalions numbered necording to the The Bengai Army was hey were raised ed in three brigades of horse artillery, tailons of foot artillery, two regiments of an and 68 of Indian infantry, 8 regiments ilar and 5 of irregular eavairs. The and Bombay armies were constituted dar lines, though of lesser strength

Afghan War and Sikh Wars-), a British Army advanced into Afghan-ind occupied Cabul There followed rder of the British Envoys and the disretreat in which the army perished saster was in some measure retrieved sequent operations, but it had farg offects on British prestige The people Punjab had witnessed these unfortunate ons, they had seen the lost legions which ceturned, and although they saw also enging armies they no longer regarded rith their former awe Sikh aggression nostilities in 1845-46, when a large porthe Bengal Army took the fleid under gh Gough The Sikhs were defeated igh Gough ubhorn fights at Mudkl and Ferozeshahr, ening battles, but did not surrender hey had been overthrown at the battles ral and Sobraon Two years later an ik at Multan caused the Second Sikh War after an indecisive action at Chilianwaia, ave enemies were finally overcome at t, and the Punjab was annexed Other gns of this period were the conquest I by Sir Charles Napier, and the Second se War, the first having taken place in

conquest of the Punjab extended over intler to the country inhahited by those ent tribes which have given so much during the past sixty years while they turnished many soldiers to our army op order on this border the Punjab Fronrice was established, and was constantly d in small expeditions which, while they ed little bloodshed, kept the force em-and involved much arduous work

Indian Mutiny —On the eve of the in 1857 there were in the Bengal 21,000 British and 137,000 Indian troops, Madras Army 8,000 British and 49,000 troops, and in Bombay 9,000 British 15,000 Indian troops The proportion to British was therefore too large for ian to British was therefore too large for

The causes of the mutiny were finany arious Among these were the annexaolice of Lord Dalhousle, especially that dh from which the greater part of the 1 Army was drawn, interference with the ges of the sepoy with respect to certain aces, and lack of power on the part of anding officers either to purch. auding officers either to punish or reward nal spark which fired the revolt was the nction of a new eartridge The muskets ose days were supplied with a cartridge ich the powder was enclosed in a paper, which had to he hitten off to expose the er to ignition. In 1857 a new cartridge atroduced with paper of a glazed texture i it was currently reported was greased the fat of pigs and cows, and therefore 140,000 Indian troops

324, the armies were reorganised, the junciean ailke for Mahommedans and Hind battalion regiments being separated, This was interpreted as an attempt to destrict the separated of the separated the easte and the religion of the sepoys S ful agitators exploited this grievance, wh was not without foundation, and added repo that flour was mixed with bone dust and su refined with the blood of oxen

Disaffection cuiminated in mutiny at B hampur and in an outbreak at Barrackp where sepoy Mangal Pande attached a Europe The next most serious manifestat was the refusal of men of the 3rd Bengal Cava at Meerut to take the obnoxious cartrid These men wero tried and sentenced to ke terms of imprisonment, their fetters being riv cd on parade on the 9th May Next day troops in Meernt rose, and, aided by the m burned the houses of the Europeans s murdered many The troops then went to Delhi Unfortunately there was in Meet The troops then went no senior officer capable of dealing with i situation The European troops in the plaremained inactive, and the mutineers wi allowed to depart unmolested to spread i flames of rebellion

Delini is the historic capital of India time worn walls brood the prestige of a the sand years of Empire It contained a gre Yet Delhi R magazine of ammunition Yet Delhi keld only by a few Iudian battalions, who joined the mutineers. The Europeans who do not suceeed in escaping were massacred at the Delhi Emperor was proclaimed suprein India. The capital constituted a nucle to which the troops who mutined in maplaces flocked to the standard of the Might An army was assembled for the recovery Delhi but the city was not captured and it middle of September. In the meantime mutin magazine of ammunition The rehellion spread throughout Central Ind and the territory that now forms the Centre Provinces, which were not recovered until s. Hugh Rose's operations in 1858 ended in the defeat of the Paris of the P defeat of the Rani of Jhansi

Campaigns —Daring Minor Compaigns—Daring the permutil 1879, when the Second Afghan War began include there were many minor campaigns include the China War of 1880, the Ambeyla Campaign and the Abyssinian War Then followed it Afghan War in which the leading figure we Lord Roberts There were expeditions in Egypt and China, and Frontier Campaigns which the most important was the Trah Can which the most important was the Tirah Car paign of 1897 There were also the prolong operations which led up to or ensued upon the annexation of Burma, several campaigns is annexation of Burma, several campaigns is Africa, and the expeditions to Lhasa Bountil 1914 since the Afghan War, the army India, except that portion of the British full in the several campaigns in the several campaigns in the several campaigns at the several campaigns in the several campaigns at the several campaigns in the several campaigns at the several campaigns in the several campaigns in the several campaigns at the several campaigns in the se little severe fighting, although engaged in man ardnous enterprises

Reorganisation after the Mutiny of 1857 the East India Company ceased to and their arms. and their army was taken over by the Cross At this time the At this time the army was organised into the armies. armies, viz Bengal, Bombay and Madai, the total strength being 65,000 British and 140,000 Indian stroduction of the command system. ommands were formed viz Punjab Bengal ladras and Bombay

Lord Kitchener's Scheme -This arstem isted until 1904 when under Lord Kitchener a s-organisation the Madras Comm ad bolished and the Army divided into three Com sands—the Northern Eastern and Western orresponding to the Punjab Bombay and

lenga) Commands

in 1907 Lord Kitchener considered that con equent on the delegation of administrative owers to Divisional Commanders retantion of uch powers by Lieutenant Generals of uch powers by Lieutenant Generals of lommands led to delay in the dispatch of musicoss. The Commend system was there re abolished and India was divided into two imiles—the horthern and Southern—each inder a General Officer who was responsible or the command inspection and trailing of

hs troops but was given no admini trative e possibilities harly in the War both Army Commenders ook it's field and were not replaced until 1916 and 1917 when both had practically the same anctions as their prede essors. It was then nactions as their predecessors it was then railited that administration was being unduly restrained at Army Headq arters and the method was been unduly as the continuous conget with unnecessary detail. To ecure efficiency at A. Il Q. therefore a certain measure of decentralisation was carried out in 1918 With the alteration to Comm ad was carried on a first to Comm ad this time, a considerabl increase was made in the dmini traitve state of the two Comm ads and the General Gmeers Commanding wers gi c powers to deal with all administrative questi as other than those dealing with matters

of rolley and new principles of war The commands were increased to lour in 19 0 each ander a General Officer Comma ding in Chi i Gne of these namely Western Command, 1938 and

was ato ished on the 1st No ember fer aced by an Independent District

The Chatfield Committee -In September 1938 an anno neem at was made on behalf of His Hajesty's Government that the outcome of the discussion aree eding the sole of tand and air of fodia a d the Empire which had been uthor Army ised in M reh of that year had been considered afford by lile ht lesty & G ernment

Report Modernised Re equipment - The Committee reported th t in the interests of Indian defence the whale of the army force s in India should be

modernised with only such minor variations as would not affect the general lavel of efficiency The types of modernised units were to be as

follows -British and Indian Cavairy light tank regi

ments equipped with light tanke and armoured carriers for reconnaissance ladian eavilry armoured regiments equipped

with fight tanks and armoured cara Indian cavairy motor regiments-pravided

with mater transport for conveyance of the per sonu I who would be normally on foot British and Indian field artillery regiments-

all regiments w re to be m charf ed and in due course equipped with 5 pounder guns

Sappers and min is units—with mechanised first line transport and mechanic I power tools, British and Indien infa try hattailons—armed with rifles brens and in mortars and fully me-

chanised first line tr asport
Units on the North We t rn Frontler would

retain a ce t in proportion of pack m les It therefore recon mended a thorough a thorough going scheme for re equipment of all branches of the service. One of the most Important fe tures of the moderniasion proposals was the mechani tion of the bulk of the cavelry and of the first line transport of a large portion of the infantry with the object of greatly increasing the mobility of the

With this end in view the Chatfield Con mittee recommended that the balls of distribution of the Army in India should b (A) Frontier Defence (B) loternal Security (C) Coast Defence (D)

External Defence Troops

With the increased efficiency and mobility afforded by modernisation it becomes possible to provide equ I security with fewer troops though it has to be recomised that it e mai tenance costs of a modernized unit are higher Th mittee earefully ennsider d these factors in rela tion to the def nee requirem ats of India and to force in ladia in relation to the detence problems the need for keeping the maintens co costs if the of fodis a d the Empire which had been uther farmy within the compass of what India can

> of w r was crept d a d a sch me for re-organ

the extendance a capital grant up to for the resources available in India His Majesty's

Present System of Administration.

it have offered to provide it from the hequer. The sole condition attached mincent gift is that India should bring a forces up to the standard of equipsitated by modern warfare and adjustical plans to the conditions now obtainworld.

nated that a period of five years would if or the completion of the modernisaand the provision of the total eapital accordingly be spread over this period that amount three quarters would be a free gift while one quarter would be to wave of a loan. The interest on a, however, would be entirely remitted this evers, thereafter interest would spable together with instalments of

Defence Liabilities—In estimating enee requirements, the Committee had how far the prevailing conceptions as it is a stability for defence could be held light of modern conditions. Hitherto le has been accepted that India should lible for the "minor danger" of the ce of internal security and for the deer land frontiers, while Great Britain responsible for the "major danger" of by a great Power upon Iudia, or upon e through India

developments have, however, clearly vulnerable India is to attack in other tribuse that were envisaged when the task first laid down Such attacks, if dever mature, would so vitally affect n well-being that they would demand late co operation in effective measures sence In such cases India's desence rly be most effectively and economical by co operation in the desence of the India strategically essential to her

committee recommended as a general hat the forces maintained by India adequate not merely for the narrower fully local defence, but also to assist ning what they described as "India's curity," and further that India should ge that her responsibility could not in a terests be safely limited to the local her land frontiers and coasts

ally appreciated that the forces mainindia could only bear a small share in responsibilities, and that she could arily bear in full the cost of such forces taintained in India The committee led therefore that the contribution ald by the British Government should ed at the higher level of £2,000,000 a leth it has been provisionally raised by

basis it is estimated that it should be r India, without enlarging the annual for defence expenditure, to meet the atenance costs of the forces organised bed on the scale proposed. From this cuple it follows that if forces held in the purposes covered by the joint rey are used outside India in an emerching India s external security, their maintenance charges should continue by India.

The margin for exterral defence suggested is one tenth of the forces maintained in India in the case of the Army

Present System of Administration.

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1921 with the authority of the Government of India

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the Defence administration in India.

in India

The Secretary of State a principal adviser on Indian military affairs is the Secretary in the Military Dapartment of the India Office. The post is filled by a senior officer of the Indian Arms with recent Indian experience. The Military Secretary is assisted by one first grade staff officer, selected from the indian Army In order that he may leep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which had obtained for many years, a retired Indian Army officer of high rank used to have a scat upon the Secretary of State's Council, prior to its dissolution

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State The Viceroy's Executive Council exercise in respect of Defence administration the same authority and functions as they exercise in respect of other departments of the Government, in the first phase of the representative institutions conferred upon India by the Montagu-Chelmsford Reforms Scheme, Defence expenditure and the direction of Defence policy have been excluded from the control of the Indian Legislature

War and Defence Departments—As a result of a decision to expand HE the Vicerov's Executive Council, the Defence Department, which had previously been responsible under the Commander in-Chilef for the whole of the Defence Services administration, was divided on July 20, 1942, into two departments HE the Commander in Chief, then Field Marshai Sir Archibald Wavell, KOB, CMG, MC, relinquished his title as Defence Member in the Viceroy's Executive Council, and became War Member in the same Council, and head of the newly formed War Department Sir Feroz Khan Noon, KOBI, KOBE, at the same time became Defence Member on the Executive Council, and head of the re organised Defence Department

The Commander-in-Chief—The Commander-in Chief, besides being a member of the Viccroy's Executive Council is also member of the Council of State. As War Member of the Executive Council he is responsible for the whole of the control of the R I N, the Indian Army and the Air Forces while in India Command, as well as the control of the department which administers these services. Below him comes the Secretary to the Government of India in the War Department (War Secretary) who controls the department, and has constitutional right of access to the Governor General, and the

right to call for papers on any emblect assigned to his department (which includes all the subjects dealt with at Defence Headquarters other than those a si ned to the Defence Department)

The Delence Member -The head of the Defence Dep riment is the Defence Member of the Vicerye Ex cutive Council who ha under him a Secr tary to the Government of India (Defence Secretary) who has the same constitutional rights s his counterp rt in the War D p timent The Defence Department has taken over the functions of the former Defence Co-ordination Department and in add tion a number of subje to dealt with by the former Defence Department (now War Depart ment), These include such subjects as Ca t n ments Imperial Pri oners of war the Indi n Soldiers Board and certain military colleges and achools

The War Department deals with all army services proper and also the administration of the Royal Indian Yavy and tha Air Porces la India in so far as questions requir ing the orders of the Government of India are concerned. It deals also with il questi as con ected with the administration of Ecclesias tical aff its The W r Department Seere tan thas no direct relations with commanders ten that no direct relations with commanders of troops or the staffs of formatio s subor dinate to Army Headquarters. The Army summistration is represented in the Leal lature by the War Member in the Council of St to the War Member in the Council of St to the War Member in the Council of St to the War Member in the Staff in the Staff in the Council of St to the War Member in the Staff in the Council of St to the War Member in the Staff in the Leavenhile by the Delence Member and to the Assemble by the Delence Member and to the Assemble by the Delence Member and to the Assemble by the Delence Member and the Member and Memb r and in the Assembly by the Delence Sec etary

In 1941 when India In 1941 when India symmed considerably wider responsibility for the act lendant of the ws a Defe ce C sult tiv C multitee of both the C ntral Ind n lg l tures and the N tional Defens a Conserve or extensible. w materials In the first twelve months factories, together with a production of a rishe became a producer of a great range of factories, together with a production of a rish summulation more than double that of factories are summulation more than double that of first 15 months of the war. But probably

memes for the expansion of the remed forces to depend on the availability of supply from the United Kingdom and other oversources and from the development of a industries, but by November 1940 the modern was able to announce that the ry was engaged in producing as a first and in a comparatively short time an army use upon half a million men of all arms, rly trained, equipped and mechanized ling to modern standards.

rly trained, equipped and mechanized iling to modern standards ools for advanced training in all branches litary knowledge and in the use of new ons have been vastly increased. During and 1942 the infantry and artillery had increased their remarkable expansion of st 15 months of war, particularly the antifunits. The artillery as a whole expanded further 200 per cent from the beginning 11, the RIASC motor transport units 500 per cent and the Indian Engineers times their previous strength. Expansion training of Sapper and Miner and other call troops has been equally striking and in 1944 though the number of mening forward is now inevitably reduced the stream of the st

g forward is now inevitably reduced clinical recruitment the average monthly was 7,785 compared with 13,665 in 1943 itment of non technical personnel for the ee Services showed a considerable drop he previous year. The intake in September was 32,782 and 29,191 in July, 1944. The ge monthly intake was 27,833. Measures

to improve recruitment included proda and intensive advertisement, closest with educational institutions and icial educational authorities, improvement necessary in the terms of service of icians and enrolled trainees. A high intake naintained from the non pre-war classes, rticular from Madras Presidency

nen's Auxiliary Corps (India)—In March the first Women's Auxiliary Corps (India) ormed, and general recruitment began etober. The personnel are employed at aircraft technical work, in motor ort units as drivers and on staff in order to release men for the services ree branches of the Services—Navy, Armi ir Force now have their own wing of the (I) The Corps now numbers about 10,000

a's War Production.—The development dia's equipment position has been menally rapld, and her own war then expectly has been so far deve that she is now able to supply her armies large part of their weapons and equipas well as contingents overseas. In 1942 factories turned out more than six times tall number of transport vehicles possessed services in Indla before the war, and prowas made in the manufacture of armour Armoured fighting vehicles continued to tisfactorily produced, after the initial ties which attended their manufacture at ginning of the war had been overcome

arms ammunition more than double that of first 15 months of the war. But probably greatest advances were made in the supple clothing and equipment. Over two million of equipment and three and three qui million pairs of boots were manufactured which nearly half a million were sent over both to the middle east and other there of war. 159½ million yards of khaki drill million blankets, 18½ million pleees of hos and 106 million cotton slurts, vests and p were also produced. To day the produce of rifles in India is 10 times the preoutput, light machine guns, 12 times, bayon 17 times small arms ammunition, 4 times, ammunition, 27 times and guns and earns 9 times. Among other important items armament stores now being produced in quantin India are six-pounder guit carriages, triffer light machine guns, anti aircraft gun sig binoculars, stereoscopes, clinometers and the copes.

Indian Officers' Pay—A radical clin was made during 1945 in the pay of Inc Commissioned Officers — With effect fi November 1, 1944, I C O's became entitled receive, as a wartime measure, the basic of rank and lodging allowance admissible single British officers and a family allowapplicable to married British officers T the pay of I C O's when serving in Indian now the same as that of British officers of Indian Army less Indian Army allowar When I C O's serve overseas, they rece expatriation allowance at the rates of Ind Army allowance admissible to British offic of the Indian Army serving overseas

Army Reorganisation Committee—November, 1944, the Commander-in Chief India, Gen Sir Claude Anchinleck, set up committee known as the Army Reorganisat Committee to earry out a preliminary investion of India's defence requirements after twar and to make detailed recommendative regarding the size, composition and organisation the future army in India. The commit consists of a chairman, Lt. Gen. H. B. D. Willed and five members representing all three of tarmed services.

An important step towards supplying office material for the Services has been the open of the United Services Pre Cadet Colleg. Formerly known as the Inter-Services Precadet College and situated at Nowgong, to college has moved to Almora and will eventual be set up at Belgaum. The training given the college is for candidates for commission one or other of the Services who have apear before an officer selection board and have befound to require further development befound to require further development befound to require further development befound to require further development befound to require further development before a five month voluntary course candidationed more appear before a selection board of the 54 candidates attending the first cour at the United Services Pre Cadet College and the been recommended for commissions.

The Auxiliary Force

After the Great War, the question of universigning of the war had been overcome han a million rounds of various types of ammunition came from the Ordnance in India, as elsewhere in the Empire, the ador

tio of compulsory military service would be a sense of its seheme of org pleation sound it in undertable it was recognized however that itsulfing men by means of annual subodiment India needed some adequate anxill by four test for a short period in cance sive years. By this related to a fairly definite standard of men an analized period in the result and Act to co stitute an Auxiliary Forca for service in India was passed in 19 0 Under this Act memberaling is limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the limited to European British subjects and the distance of the limited to European British subjects and the subject to the limited to European British subjects and the subject to the subject of the limited to European British subject to the subject mnsketry conrae only It was faid down that military service should be purely locaf As the form of service th t would be most suitable varies largely according to localities the focal military authorities acting in consultation with the advisory committee of the Auxiliary Fo cee as were given the power of add the the form of tr ining the suit local conditions

To meet the emergency created by the present war a hill was introduc d in Parliament by the Secretary of State for Indi in June 1940 empowering the Governor General to conscript

European British subjects in India

ter are all Indians, apart from the officers of Gurkha battalions, and have d status and power of command, both are regulated by the Indian Army Act e rules made thereunder

s Commissioned officers for the Indian re obtained from two main sources in

ime from among the cadets who pass the Royal Military College, Sandhurst, the transfer to the Indian Army of officers ig to British units The former is the I channel of recruitment, the latter

ily resorted to when, owing to abnormal or for some other special reason, requireannot be completed by means of cadcts ndhurst A third source is from among candidates When a cadet i at Sandhurst and has received his sion, he becomes, in the first instance,

er of the Unattached List, and is posted eriod of one year to a British battalion nent in India, where he receives a preli-training in his military duties. At of the year, he is posted as a squadron pany officer to a regiment or battalion

Indian Army Administrative services partments of the army draw their officers ombatant units, as it has hitherto been

d as essential that every officer should. ist instance, receive a thorough grounding patant duties and acquired at first hand mate knowledge of the requirements of

ıbatant arms

promotion in rank of King's commissioners of the Indian Army is regulated by a ale up to the rank of Licutenant-Coionei subject also to certain professional ations and tests being successfully passed

nk of Lieutenant-Coionel is in normal attained at 26 years' service, promotion this rank is determined by selection

Officers -One of the tous decisions of the Great War, so far as lian Army is concerned, was that which d Indians eligible to hold the King's sion in the army King's commissions tainable by Indian gentlemen in peace to three ways (1) By qualifying as a through the Royal Military College, aret or the Royal Military Academy, leh Examinations used to be held

year in India for the selection of suitable ites for admission (2) By the selection lally capable and diserving Indian officers commissioned officers of Indian regiments ed from the ranks or those appointed as icmadar These receive their com is after training at the Royal Military

or Academy as Cadets and qualifying usual way (3) By the bestowal of ry King's commissions on Indian officers have rendered distinguished service,

lose age and lack of education preclude being granted the full King's com-The first two avenues of selection menafford full opportunity to the Indian of ing a military ambition and of enjoying ary career on terms of absointe equality

he British officer who, as a general rule, aters the army by qualifying at Sand-or Woolwich Until 1931, ten vacancies at

arst and three at Wooiwich were reserved ly for Indian cadets

A further measure adopted by the Government was the establishment of the Prince of Wales's Royal Indian Military College at Debra Dun a Government institution for the preli minary education of Indians who desire to qualify for commissions in the Army through the Indian Military Academy, Dehra Dun

Fraction, and recruitment of Indians for emergency war commissions in the Indian Arm; is proceeding apace

Indian Military Academy—In order to train officers for the Indian Army of the future, order to the Indian Military Academy at Dehra Dun was opened in October 1932 It provides officers for all arms cavalry, infantry, artillery and signals The first hatch of officers passing out of the Academy received their commissions on the 1st

February 1935 A few years ago, how to improve the quality of candidates for the Indian Military Academy at Dehra Dun, was under consideration A press note was issued by the Defence Department in October, 1936, in which the problem was examined in detail. It consisted of a memorandum which had been prepared on the subject by a Committee consisting of members of both Houses of the Central Legislature, and of a careful reply to this memorandum by the Commander in Chief, Sir Robert Cassels The Committee was constituted as a result of a debate which took place in the Council of State, during which the present difficulty in obtaining candidates of the right type for the Academy had been discussed

The members of the Committee prefaced their memorandum by stating in general terms that they did not agree with the policy being followed with regard to the Indianisation of the Army, since they thought that the process could be speeded up They then made observations and suggestions on various points—as, for example, that the provision under certain conditions for a refund by parents of part of the cost of training young officers was too extensive, that more scholarships should be granted to cadets of the Academy by Local Governments, that the fees charged by the Academy should be reduced, that passage of the final examination of the Prince of Wales' Royal Indian Military College by students who did not gain admission to the Academy should entitle them to admission to the Universities, that the activities of the University Training Corps should be expanded, that more Indians should be admitted to the Staff College, and that the problems created by the disparities in age between British and Indian officers of similar rank should be favour ably dealt with

The Commander-in-Chlef, in reply, expressed ratifude to the Committee for their work and for the studied moderation and reasonableness of their recommendations Some of these recommendations he accepted, and he undertook that others would be fully and sympathetically considered. He asked the Committee not to expect startling results. to expect startling results from the acceptance of certain of their recommendations, since the process of expanding the field of choice and improving the quality and quantity of the candidates for cadetships must inevitably be gradual, and depend largely on public opinion

entes co examination for the I M.A h a been abolished and all candidates for Limergency Commis ions were required to appear before the same Sel etion Boerds There have been Important modifications in the courses of tr i ing also At present the whole system has been revised and brought into line with the fete t methods of instruction e of ed in Britain

An i tere ting development with far reaching possibilities in the method of recruiting in Indi was the permanent adoption in the fourth year of the war of a new system of selecting officers

for all the services

í

The system requires candidates for commisalons to pass through a number of acientific test lasting three days desig ed to test their ment i bilities pow r of leadership and all the qualities demanded of leaders of men in action

A large number of Indian Officers and men were also granted Foreign decorations

Summary of India's Effort in the Great War-In a despatch by the Commander-in Chief published in July, 1919, the whole operations of the Indian Army during the war are reviewed His Excellency gives in it the following figures showing the extent of India's contribution in terms of men On the outbreak of the India's contribution in terms of men On the outbreak of bution in terms of men On the outbreak of war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks, enlistments during the war for all bran ches of the service amounted to 791,000, mak ing a total combatant contribution of 985,000 Of this number, 552,000 were sent overseas As regards non-combatants, the pre-war strength was 45,000, an additional 427,000 were enrolled during the war and 391,000 were sent over sens. The total contribution of Indian per sonnel has thus been 1,457,000, of whom 943,000 served overseas Casualties amounted to 106,594, which include 36,696 deaths from all eauses. The number of animals sent overseas was 175,000 *

Effort Present War -India's Effort in the Present War— India's magnificent contribution in the present und as magnificent contribution in the present war has been both substantial and valuable Units of the RIASC went to France in 1939 and gained particular praise for their courage and bravery in adversity Indian formations have been in action in Svria, Iraq, Iran, British and Italian Somaliland, the Sudan, Intrea, Hong Kong, Borneo, Malaya and Burma and Italy The total of her fighting forces is now over two million

Africa—Essential prelude to the conquest of Hitlerite Europe was the purging of Nazi influence from North Africa Here, in 1940, assembled an Alhed army of which the Fourth and Fifth Indian Divisions were destined to

play a leading role

Against Marshal Graziani's Libyan army of more than 300,000 men, this Allied force under the command of Gen (now Field-Marshal) Waveli marched into the Western Desert In the great clash at Nibelwa they captured the Italian camp, thousands of prisoners and vast quantities of stores Then came the Italian disaster at Sidi Barram where, in December 1940, 20,000 Italians capitalated and ber, 1940, 20,000 Italians eapitulated and Wavell's men swept on to Solium, Bardia, Tobruk, Derna and Benghazi

In the meanwhile the Fifth Indian Division was busy with the Italians in East Africa Eurly in 1941 this division drove the enemy from Gallabat, Gedaref and Butana Bridge and then, with the Fourth, continued the

pursuit deep into Eritrea

Victories at Barentu and Ad Teelesan paved the way for the triumph at Keren where, after two weeks of bitter fighting, the Italians hoisted the white flag The Fifth went on to Asmara, Massawa fell and in May, 1941, the Viceroy of Abyssinla surrendered at Amba Alagi
Back again to the Western Desert went the

Fourth and Fifth n June to meet a new menace—Rounder prinzers Under the command of Gen Sir Claude Auchinleek our forces fought hard but were slowly pushed back to Mcrsi Matruh Benghazi was cut off and Tobruk fell Many wary months of disconnentment

Many weary months of disappointment followed but at El Alamein in June, 1942, eame the turn of the tide. In this, the Fifth's

The Germans were rolled back from Ecvet then across Cyrenaica and to var is Trinolitani

then seross Cyrenaien and to var is Triponian into new year came and alill it o retreat con tinned at the Mareth Line the enemy a defences crumbled and he retreat d atill turther west. There followed the Fourth a brilliant action in the Wadi Akarit area and the pursuit went on

St x was by passed Sour wa occupied the same store and the passes of the same store and the passes of the same store and the sa o er from Bommei as commander of Axis torces in Africa was compelled to surrender to the famous Indian form tion

Italian Campaign—In the liberation of Europe, India troops played a worthy part By thi resploits in Italy they proved to the world that the valeur of India arms is second to no e Three framous Indian divisions were concerned, in the h d fought majars that ended in the capitulation of the Germans

The Eighth Indian Division came into the line in October 1043 Defore the end of that year it had crossed three rivers—the Different Trigno and Sangro—in the lace of severe opposition and single three king the Ceru n wint it It into and Sangro—in the face of severa opposi-tion and after breakler the Cerm in wint. It e got past the Moro river. The kourth Indian Division entered the arena in Dec mber 1913. and other equipment is being produced the first time India is planning to make number of special steels. Macline tools hav also been made and supplied in large quantities Her ancient silk industry is reviving and meetin the demands for parachutes Rubber production has increased and goes hand in hand wit developments in the use of substitutes an planting of new and novel rubber yieldin plants. In 1942 India made notable gain production of explosives had more than doubled Artillery equipment had advanced by ove 30 per eent, small arms ammunition by 2 per eent, gun ammunition by nearly 50 per cen and light machine guns by nearly 100 per eent

For the 2½ years of the North African war India was responsible for supplying the bull of stores for this theatre of operations troops in the Mid-East wore clothes made in Indla, to a considerable extent, and walked h boots supplied by Indian factories Nearly 90 per cent of the tents which protected the troops from the torrid heat, the canvas ground sheets which kept away the sands of the desert of the substantial nature of the Princes' help Other offers of assistance from Princes both sent over 1,500,000 tons of stores in a stead; sent over 1,500,000 tons of stores in a stead; stream Other vital supplies to the Mid Bas stream. included assault eraft, camouflage paints, net the economic sphere has been no less important and hemp, medical stores and equipment for ant. The utmost use is being made of India's the comfort of troops. Important supplies agricultural, industrial and mineral resources were also sent to Russia.

INDIAN SAILORS', SOLDIERS' AND AIRMEN'S BOARD.

What was formerly known as "The Indian Soldiers' Board" has been recently reconstituted under the new name, so as to cover welfare work connected with two persons and familles of personnel serving in all His Majesty's Forces

The Board is probably the most impor valuable institution tant and non official connected with the Indian Army It was constituted on 7 February 1919, in place of the Central Recruiting Board, the purpose of which was fulfilled with the end of the last War Its object was at the outset to deal with a number of post-war problems—the finding of employment for soldiers released from the colours, the grant of rewards to those who had rendered distin-guished service, the relief of the dependents of those who had lost their lives in the war and of those who were incapacitated for further the safeguarding of the general interests of soldiers and their dependents, all matters de manding immediate and close attention. As years passed, the Board had gradually to adjust itself to normal peace conditions and it was decided to maintain it permanently for a scries of duties which have from time to time expanded and days loved. and developed

The Board is composed of three members of H E the Viceroy's Executive Council nominated by H E the Viceroy, of whom one is President, H E the Governor of the Punjab, the Defence Sceretary, the Adjutant-General in India and the Financial Adviser, Military Finance An Under-Sceretary in the Defence Department normally acts as Secretary to the Board, in addition to his other dutics

The Board has its seat at New Delhi/Simla and co ordinates the activities of a large number of kindred organisations in the various areas from which the bulk of the Indian Army is Under the control of these Provin recruited cial Boards there exists throughout the country a network of subordinate organizations, including District Soldiers' Boards, Tehsil or Taluka Committees and other kindred bodies There are Provincial Soldiers' Boards in Berar (CP), Bombay, Delhi, Kashmir, North-West Frontier Province, Punjab, Rajputana and the United There Provinces

All District Soldiers' Boards were in 1931 put on a uniform footing, with the civil head of the District as President and a serving soldier as Military Vice-President The latter was either a Recruiting Officer or an Indian Army Officer

detailed by Army Headquarters-except in that North West Frontier Province where the President was a soldler and the Vice President a civilian Fi e years experience showed the organisation to need revision if it was to serva its purpose in the most efficient manner It was found for instance that Boerds in areas whera recruitment had kemporarily at any rate topped began to decline in value through lack of attention and that the Military Vice-Prosidents of Boards mostly drawn from active batta tions could not maintain continuity of policy because of their frequent changes of atation Beorganisation was therefore undertaken in 1938 This was achieved without interference in the internal constitution of the Boerds To preserve continuity and provide constant supervi-aton it was decided to make Indian Indianty Training Battallons and similar units which are not liable to changes of station responsible for providing the Military Vice-Presidents for the District Soldiers Boards in their neigh bourhood At the same time full advantage was taken of the experience and influence of Recruiting Officers who were appointed addi-tional Vice-Presidents of District Soldiera Boards in their Recruiting areas Funds were Double in their recruiting steal Funds were made available for the allowment of travelling showances to Milliary the Presidents of Roardein the Funjab UP Delhi Rombay and the Central Provinces to ton their districts or to stanction allowances to members touring on

The Board on 31 December 1922 had the

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be cligible for the Victoria Cross, gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following -

Subadar (then Sepoy) Khudadad Khan, 129th Baluchis—On 31st October 1914, at Hoiicbeke, Belgium, tho British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other fivo men of the gun detachment had been killed

Naik Darwan Sing Negi, 1-39th Garhwal Rifles—For great gallantry on the night of the 23rd-24th November, 1914 near Festubert-France, when the Regiment was engaged in re taking and clearing the enemy out of our tren ches and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range

Dast, Mir Jamadar) (then 55th Coke's Rifles —For most conspicuous bravery and great ability at Ypres on 26th Subadar April 1915, when ho led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regment (when no British Officers were left) and kept them under his command until the retirement was ordered Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire

Rifleman Kulbir Thapa, 23rd Gurkha Rifles — For most conspicuous bravery during operafor most conspicuous prayery during opera-tions against the German trenches south of Maugussart When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the Gerwounded Gurkhas one after the bollet went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy sire under the enemy s fire

(then Lance-Naik) Lala, Havildar Officer Dogras —Finding a British Officer of the communication regiment lying close to the enemy, another regiment lying close to the communication which is a supportant shelter which British he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was iying in the open severely wounded. The enemy were not more than one hundred yards distant, were not more than one hundred yates and it seemed certain death to go ont in that direction, but Lance Naiek Lala insisted on going out to his Adjutant, and offered to enawing the land of the land back with him on his back at once When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the chalter. After dark he carried he returned to the shelter After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant He set a magni fernt example of courage and devotion to his

Sepoy Chatta Singh, 9th Bhopal Infantry—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was iving wounded and helpiess in the open Sepoy Chatta Singh bound up the officer's wound and then dug oover for him with his entrenching tool, being exposed all the time his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into back for assistance and brought the officer into

Naik Shahamad Khan, 89th Punjabis—For most conspicuous bravery He was in charge of a machine gun section in an exposed position in front of and covering a constant. in front of and covering a gap in our new independent within 150 yards of the enemys entrenched position. He beat off three counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casual trees. For three hours he held the gap under very heavy fire while it was being made secure. heavy fire while it was being made secure When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw With weather, he brought him out through the German wire, and, leaving him in a place of comparative safety returned and brought in two wounded Gurkhas one after the other He then went back in broad daylight for the British soldier and brought him in also, carrying him of the en my He succeeded each time in dell vering his message althou h on each occasion his horse was shot and he was compelled to

finish the journey on foot Riflem n Karan Bah dur Rana Gurkha Riffes.—For conspicuous bravery and resource in action under adverse conditions and utter contempt of danger during an attack. with a few other men succeeded under intense fire in creeping forward with a Lewis gun in order to engage an enemy machine gun whi h had caused severe casualties to officers and other ranks who had attempted to put it out of action No 1 of the Lewis gnn party opened fire and was shot immediately Without a moment s hesi tation Laran Bahsdur pushed the dead man off th gun and in spite of bombs thrown at him ad heavy fire from both flanks he opened fire and knocked out the nemy machine gun crew The switching his fire on the ea my homb ra nd riflemen in front of him he slienced th ir

during the fighting in Burma in January, 1913 In an attack on Jap positions at Donbruk in the May u peninsula two of our breu carriers were put out of action and as the crows had run out of ammunition the cuemy rushed them Parkash Singh drove forward in lils earnes and resented these men and their weapons. A fortuight later in the same area three of our earriers were immobilised by the enemy on in With com open beach covered by Jap guns plete disregard for his safety Hav Parkash Singh again salled forth, resented two of the crews and retrieved their weapons

Subedar (now Subedar-Major) Lai Bahadur Thapa, 2nd Gurkha Rilles, won the V C for 'unsurpissed bravery' at Rass la Zondl, Tunisia, in April 1913 Ordered to secure the only passive by which a commanding feature could be selved by us, he led two sections, under a hall of automatic and mortar fire, aeross open ground and up a gully 1 lighting every meh of the way he killed two men with his knkri and two of more with his revolver With only a couple riflemen he reached the objective where two more of the enemy fell to his kirker. Having sceured the feature the three Gurkhas covered their company a approach up the defile

Havildar-Major Chhelu Rnm, our Kajputana Rilles, won the V. C. posthum ously at the Djebel Garel, Tunisia in April 1943 Dashing through internal Dashing through intense enemy fire he silenced an enemy post single handed. When his company commander was mortally wounded he tended him in the open and in doing so was lumself seriously wounded. Despite this he reorganised his company to nice a heavy counter attack and rushed from point to point shouting "Jats and Mohammedans, there must be no withdrawa! Advance!" His inspired men drove off the enemy with bayonets, Still urging on his men, stones and rocks Company Havildar Major Chilelu Ram died from his grievous wounds

Havildar (now Jemadar) Gaje Ghale, 5th Royal Gurkha Rifles won the V C during an assault against the Japs in the Chin Hills in May, 1943 Leading his men along a kulfe-edged ridge with precipitous sides, he was wounded in the arm, ehest and leg by a grenade Under very heavy fire and disregarding his serious injuries he led his men to close grips with the enemy and bitter hand to hand fighting ensued He was soon covered with blood from his neglected wounds but, shouting the Gurkha battle ery "Ayo Gurkhali!" he headed assault after assault Spurred on by his example his platoon stormed and earrled the hili position at very heavy cost to the Japs

Naik Nand Singh, 11th Sikh Regiment, was decorated with the supreme award for capturing despite being wounded six times, a Jap position single handed in March, 1944 Leading his men up a steep slope in the Kalapanzin Valley, in the Arakan, he dashed forward alone and captured a Jap trench Wounded in the thigh he then erawled forward under heavy fire and captured a second trench despite incurring wounds in the face and shoulder from a grenade which burst in front of him A few minutes later the whole of his section being killed or wounded, Nk Mand Singh charged a third Jap trench, captured Jemadar Abdul Hafiz, 9th Jat Regul won the V C posthumously near in C posthumously near in in April, 1914 Ordered to drive the from a prominent feature he led two sec up a bare hillside swept by enemy mac gun and mortar lire Wounded in the leg Abdul Hafiz nevertheless reached the eleposition, selzed one of their machine by the barrel while one of his mea dispositing gunner. He then took a bren gun one of his wounded men and advanced such ferocity that the Japs fled Mor wounded in the chest, his last words w 'Reorganise! I will give you covering f But he had not the strength to pull the tr of his gun and fell back dead on the battle

Sepoy Kamal Ram, 8th Punjab Regin la the Indian Army's youngest wlaner of V C, which he was awarded for gallanti his lirst action, just after crossing the I Garl in Italy, in May, 1944 Volunteerin deal with one of four German posts holdin his company sadvance, he erawled forward killed the occupants of the post and disposed of a German officer who confro him with his pistol levelled Still alone, Kannal Ram shot the German gunner la second post and hurled grenades into the ti The remaining Germans surrendered I he helped to capture a fourth post and then company advanced In the fighting a followed Sep Kamal Ram rushed a hi killed one of the enemy and captured two ot

Rifleman Ganju Lama, M M, 7th Gu Rilles, won the supreme award for knoc out two Jap tanks single handed and, the himself seriously wounded, killing their cultin hand grenades. On June 12th, 1 Jap tanks and infantry broke into our perin at Ningthoukhong, Impinal Plain U intense fire Rin Ganju Lama erawled for and got his PIAT (an anti tank weapon) action only 30 yards from the enemy Deta broken wrist and other wounds he destre two of the enemy tanks, advanced and engither erews. Not until he had wounded killed all the enemy did he allow himself to evacuated to have his wounds dressed nonth before he had won the M M destroying a Jap tank with his PIAT

Naik Agansing Rai, 5th Royal Gurkha Ri won the V C along the Bishenpur Sliehar to Assam, in June 1944 When his company, held up by withering Jap michlae gun fir led his section against an enemy position His company then swept up to silenced lt position and Nk Agansing Ral went on to with a 37 mm gun pounding the company f Rushing forward with a bren close range he killed three of the enemy, this section dea with the rest of the gun's erew tommy gun in one hand and a grenade in other, he advanced on a third enemy! position and killed all its four occupants

Subedar Netrabahadur Thapa, 5th Re Gurkha Rifles, was awarded the V C posth ously for his magnificent defense of an isola position near Bishenpur in June, 1944 Per tent Jap attacks broke down under the spul defence put up by this Viceroy's Commission Officer and his men on a feature known "Water Piquet" The Gurkhas refused it and killed all its occupants with his bayonet yield a foot of ground despite ruthless and

and very heavy artillery fire. At one time, With his is to eath he shouted to his bavildar Bub. Netrab hador. Tiapa and I is runner of dvanced of caused c siderable hove to these de is. When volunteers were called the control of the control of the control of the control of the control of the control of the control of the body of Subedar Ram S my rawal negree of tred this V Oa a head but slimble very man in the hero's commany stenses. rawal ne er ent red this VCOa head but it ra night of grim fighting he was killed by utllets and grenades Wien hi body was ound he was still holding his kukri by his ide lay a Jap with Pis skull cleft.

Naik Yeshwant Ghads 5th Mahratta ligit Infantry won the V C post um asly lurig the Allied drive along the Upper Tiber wards the Gothic Line Italy in July 1944 with all the m no file section killed or wounded With all the m of his section killed or wounded with a state of the st peat to death the two remaining tanemy shortly afterwards he was short in the clest and back by supers and died in the post which be had, captured single has ded. He performed these de ske hwing quite well to the could expect no assistance at that particular time

ROYAL INDIAN NAVY.

The Royal Indian Navy traces its origin so far back as 1612 when the East India Company stationed at Surat found that it was necessary to provide themselves with armed vessels to protect their commerce and settle ments from the Dutch or Portuguese and from the pirates who infested the Indian coasts The first two ships, the Dragon and Hoscander (or Osiander) were desputched from England in 1612 under Captain Best and since those days under slightly varying titles and of various strengths the Government in India have always maintained a sea service

The periods and titles have been as follows -Hon E I Co's Marine Bombay Indian Navy

1863-Bombay Marine H M Indian Marine Royal Indian Marine Royal Indian Navy

India's Naval Force has always been closely connected with Bombay, and in when the E India Co took over Bombay, Ci John of the Marine was appointed D Governor From then until 1877 the has under the Government of Bombay all although from that date Establishments were amalgamated into a perial Marine under the Government of Bombay has continued to be the principal 1612-1686 of Indian Naval training and to a large 1686—1830 of administration In the winter of 19 1830—1863 Naval Headquarters moved to New Delhi

Naval Training Expansion.

The expansion of Naval training facilities has In the past year two of the proceeded apace largest shore training establishments have been opened Respectively the 15th and 16th to be commissioned since 1939, HMIS ARBAR, at Bombay, provides initial training for all new entry ratings, while HMIS SHIVAJI, near Poona, has replaced the Mechanicai Training Lstablishment in Bombay, where engine room ratings had been trained during the preceding seven years Some of these artificers receive preliminary technical instruction in the Clynavai Centre at Pllani (Jaipur)

Men of the Communications Branch are trained in HMIS TALWAR, Bombay, winder ratings in the Seaman Branch quality for gunnery rates in H M I S HIMALAYA, Karachi, and for anti-submarine defence in H M I S In these three schools, Reserve MACHLIMAR Officers are also trained known as H M I S VALS A torpedo schooi, VALSURA, has been fune tloning in Jainnagar since December 1942

The growth in the number of the R I N 's ships has been remarkable On the outbreak of war a large programme of construction was initiated the result has been a striking stimulus to the Indian shipbuilding industry. A large number of slips and small eraft have already been completed, and many more are on the stocks In July 1941 was launched HMIS TRAVAN-OORD, the first vessel for the Royal Indian Navy to be built in Indian yards, followed in October by HMIS BARODA Ships of this class are admirably fitted for minesweeping and patrol duties Anyal construction for India is also in progress in the United Kingdom and Australia Many ships completed in the British Isles have already seen much service in the Buttle of the Atlantic as well as in Eastern The Indian sloops JUMNA and SUTLEJ were on convoy escort duty in the Atlantic during the chase of the BISMARCK Later they were in action against Japanese bombers while escorting convoys on the Singapore Batavia run, returning, to the Mediterranean in time to take part in the invasion of Sicily HMIS KONKAY and HMIS KATHIAWAR, while on passage from shippards in the United Klugdom, escorted convoys to the fighting-line in Tunisia II M I S Kisana was the imajor anti-direcaft escort of the first Allied convoy to be heavily attacked by German glider bombs and made seven separate contacts with German U boats in the course of a single convoy battle

During 1942 the number of warships of all classes lunched for the Royal Indian Navy was 21 times that recorded in 1940 and 1941 reckoned onether. At the present time ships built and launched for the Mo, at Indian Nays in India octumiler those built and inurched for it else where. In the former enterory are included of the Royal Indian Navy have received 131 honours and awards, as well as 41 commends there are i fast submarine of the Royal Indian Navy have received 131 honours and awards, as well as 41 commends the first are it fast submarine of the Royal Indian Navy have received 131 honours and awards, as well as 41 commends the first are it fast submarine of the Royal Indian Stopper Commendations for break against the ladder. octrumier those built and inneched for it else di ties and fast gubmartic el istes

are called, are, as in the past, trained in the reoccupation of Berbera and the capture of United Kingdom

Alassawa During the brief campaign that followed Nazl intrigues in Iran the Royal Indian Navy helped to convoy troops, support them or shore and selze German and Italian vessels Japan entered the war, RIN ship escorted convoys and fought hostile aircraft in Far Eastern waters and later during the Burms eampalgn

H. M. I. S. Bengal.

In November 1942 one of H M Indian ships Bengal, won world-wide renown by engaging it the Indian Ocean two Japanese raiders which were far more heavily armed and were ten time The Dutch tanker Ondina, which shi her size was escorting, gallantiy assisted her, and as i resuit of this engagement one of the raiders was sunk, the other made off, and HMIS Renga and Ondina reached port safely In the early months of 1943 vessels of the RIN's Coasts Forces did good work in support of our troop on the Arakan coast This included the inter ception of Japanese coastal craft conveying troops and supplies, participation in the raid of Myebon, and the bombardment of an enemy stronghold Since the war began, H M India ships have carried on their essential routing that the constitution of essential continuous and the content of the duties of escorting convoys, patrolling, and minesweeping

In 1944 ships of the Royal Indian Navy agair co operated with our land forces engaging the Support was enemy on the Arakan Front afforded by bombarding enemy shore position and by harassing the enemy's water borns supplies. In four months these ships steamed more than 30,000 operational miles on 40 separate missions in enemy waters

The Royal Indian Navy was well represented in the eight amphibous operations by which the 15th Indian Corps advanced down the Arakan Coast from the Indian frontier to Rangoon in the spring of 1945

Men of the RIN Landing Craft Wing, who had been training secretly for more that two years, established their reputation on the beaches of Akyab, Myebon, Kyankpyu, Kangaw Ru Ywa and Letpan They formed the spearhead of each of these six assaults, earrying troops to the berehes and keeping them supplied during critical phases of the ensuing battles Their endurance, courage, cheerfuine-s and efficiency won them high praise

The Indian sloops NAPBADA, JUNA, KISTA and CAUVIRY fired tens of thousands of shells in support of the Army s coastal advance in Arakan, penetrating as far as talety ralies from the open sea to increase the effective range of their bombardments

A floatilly of nine fleet minesweepers of the Royal Indian Navy cleared the approaches to the Rangoon River estuary before the arrival of the invasion convoy, whose escort included

tions for brave conduct. These awards include these awards include these per in widely a parated theatres of war IDS Ms and 10 Mentions in Despatches, at a representation of them assist the cruck for acts of gallantry at sea.

Agriculture

ouditions varies considerably to character There is scarcely any cultivated nd scope op of the temperate sub-temperate or tropical ones which cannot be grown in some part of his vast country from the warm humid coastnds to the perennially temperate sititudes i its mountain ranges

The total area of culturable land in India scluding Burma is about 358 million acres thich is exclusive of a forest area of approxi-actely 68 million acres The total gross cropped rea sown annually is roughly 248 million acres if this vast area 187 million acres are under ereal and pulse crops of all kluds which supply ood and fodder for India a human population of 00 million and her animal population of 380 uillion head of cattle sheep and goats

In Indian ag iculture the dominant climatoogical factor is the monsoon and in most parts the country the total annual rai f ii is n the country the total annual rail 12 is recipitated between the months of Jnne and October The winter and early summer months that generally dry and high temperatures prevail a the months of March to Juna prior to the pressor is naturally divided into two main sublivisions the Kharif season of the monsoon and he Rabi season of the cold weather Each of hese seasons has its own distinctive crops The greater part of the Indo-Gangetic plain and the northern tracts of the Peninsula are ser ed, by the main monsoon which fails between lines and October Dring these months are not seen to be se northern tracts of the Peninsula are ser ed February.

Solls—Four main soil groups can he recognised in India st. (1) the red solls derived from rocks of the Archanay tem which che activities M draw Mysors and the Sonth E st. (1) Mysors and the Sonth E st. (1) How yellow and strend through the East of Hyderabad and the Central Provinces to Circle Chest Western 1988. Oriss Chots Nagpur and the South of Beng I

(2) The black cotton or regu soils which over ile the Decean trap and cover the greater over the the Decon trap and over the greater part of Sembay Berns and the Western parts of Sembay Berns and the Western parts of the Semini Provinces and Hydersbad with extendion into Centr I I dis and Bund 1 March 1 and 1 Peulnsula and extend through East Beugal pint Ass m and Burms

The agriculture of the sub continent of India greater attention to the question of a more ithits widerange of physical and climstological effective I nd utilization A considerably the character immont of eclentics work is thus beth done on all these groups to a greater or lesser extent throughout the country both as regards their throughout the country out as regards their classification as well as their crop producing power Soil studies have been given a new orientation and have received fresh elimination to the concept of the soil profile or cruite vertical cut of the soil being taken as the unit of study instead of the soil profile. layer enpporting vegetation. A notable instance of such work is the recent classification of the black cotton soils of the Bombay Canals and the investigations regarding their suitability for sugarcane groviu The importance of soil for sugarcane growin The importance of soil aurvey and soil mapping is bein gradually recognized in different parts of the country. At the Imperial Agricultural Institute Delhi a soil map of India has been prepared on the basis of available dats while an Ail India Scheme of soil survey has recently been launched to collect and collat further data on Indian soils In Hyder bad and Madras large s ale soil surveys of Irri ation projects has been surveys of Irri ation projects has been completed whereas inten ive survey of the augsreane acids has been a special fe turn in the United Provinces and Bombay In the latter Province soil maps are now supplied by the Department of Agricul ture on p yment who cin all the nece sary Informationa required for the successful growing of sug came are indicated

of sign cance are makened.

In addition to the four main groups of India soils mentioned above the des rt soils of India occupy a large tract in Eastern Sind extending over the whole langth of that Province along the edge of the India all vium Rajputana and the South Punjah of which the Thar a Rajputana desert alone occupies an area of 40 000 agnare miles Alkali solls also form an important group of Indian colls which are known as reh or wear in the United Provinces Kalar in Bind rakkar and thur in the Punjab and chopan or karl in Bombay Province Such soils are characte ised by a high degree of impermes bility and stickiness together with high aikstinity and frequent presence of large excess of free salts. They are usually poor in nitrogen and humas and unsuitable for crop growing without prev ous reclaim tion Forest soils occi py sirge p rt of Indi Investigation on the nature of il p office of the hanbatta Hill in U.P. ad of the I ulu & est in the Punj b indicate th t these soils belong to the Brown Earth and Podsoi groups

AGRICULTURAL EQUIPMENT

Finance—I India I serried on the above the above the above the abdumm of explain and there is practically the abdumm of explain and there is practically another. The best in the abdumm of the most particular land beautiful another. The best is high of rate of interest on loans are heavy. During the past twenty years much progress he heave mid ab by the co-operative of the progress he heave mid ab by the co-operative such as the contract of the progress he mid mid the progress he mid mid the progress he mid mid the progress he mid mid the progress he mid mid the progress he mid mid the progress he mid the past twenty pears much progress he hear mid ab by the co-operative progress has been many Provinces. In recent eredit mo eme t in many Provinces. In recent years it h been found nece s ry to applement co-op ative credit by the d clopm nt of n n-credit activities g purchass and sale s retinents and extend through East Beggal and the state of the state for debt redemption, etc., will contribute largely [grain and good for fodder. In consequent to improvement in the economic condition of [gravelly of Inbour year a great problem d the agriculturists

Livestock —Practically all cultivation in India is done by bullocks and the efficiency and capacity of these in different districts varies considerably. The last types in common use are capable of handling what vould be considered as light single horse implements in Turope Bullock power is also used for raising water from wells for field Irrigation, for driving the chasseutter and the sugarcane crusher and for treading out the grain in the threshing yard. In general, the Indian cultivator cares well for his draught bullocks which, in most cases, constitute the most important part of his moveable property

Implements—In general, cultivating implements are few and simple and remarkably well suited for the tilinge operations for which they have been evolved. The ploughs are usually of wood, tipped with an iron or steel point, and stir rather than invert the soil from ploughs. fron ploughs are also extensively used in some districts. A heavy wooden beam is commonly districts employed to serve the combined purposes of roller, clod-crusher and soll compactor. In the black cotton soil areas, the bakhar, a simple type of broad bladed harrow, is in general use In many Provinces, seed drills or seed tubes are utilized for drilling the crops in rows to facilitate inter cultivation. In less advanced tracts the seed is merely broadcast and ploughed into the soil Practically no harvesting machinery is in use, the crops being cut or gathered by hand and threshed—In the case of grain crops—under the feet of bullocks Cercai crops are winnowed by the agency of the wind although cheap mechanical winnowing machines, designed by agricultural engineers, are receiving attention from the more advanced cultivators. With reference to the introduction of improved agricultural implements, this work is now being largely done by private businesses and agencies which are extending rapidly in the Work on mechanical cultivation is rural areas still largely in an experimental stage though tractor ploughing has proved very effective in the eradication of deep rooted weeds in the United Provinces, Bombay and certain Indlan States One notable development of recent years in connection with agricultural implements is the large extent to which improved types are now being manufactured and sold by village craftsmen

Land Development —Considerable attention has been paid in many areas of the country, notably in Bombay and the Punjab, to land development measures designed to check erosion from oxcessive rainfall and to the preservation of soil moisture A Land Develop ment Section of the Agricultural Department has been formed and in 1943-44, this section earried out contour bunding in the secrety areas of Bijapur and Sholapur districts over an acreage of more than 2 lakhs. The contour bunding of agricultural lands is combined with contour trenching and reafforestation of the upper uncultivated slopes of the watersheds Dry farming methods of cultivation have been introduced in the bunded areas with remarkable success. The rabi harvest of 1943 44 was good while that of 1944-45 was fair in terms of from year to year

1911 15 and out of a programme of 5 lak at is for hundling it was only possible to picte to o lai he

The Dry Larming section was expanded a large number of dry farming tools were chared and Is ned on lorn. This made po a large Increase in the area under Dry Far and the results in increased crop out turn

most entistactors

The amondment of the Bombay Land Imp ment Act are under discussion during the and it is expected that a simplified versit this exactly Act will be brought into force eliortly

Cultivation and Tillage.—The imp ment of the ordinary cultivation and the methods in common use in India and the field for increasing the yields field crops and, consequently, the profit the agriculturists. In many parts of Equitivation is good but, particularly in non-irrigated tracts and in areas in the fallure of religible there is much recommend. to failure of rainfall there is much room In this connection, the rese Improvement worl on dry farming methods, which is t conducted in Rombry, Madras and Hyders under the auspices of the Imperial Counc Agricultural Research, is of very E importance

Two economic factors which tend to ! down the standard of cultivation in m Provinces of India are the fragmentation sub division of holdings, resulting from In ians of inheritance, and certain system ind tenure whereby the cultivator, a tenant, has no interest in permanent impr ment of his holding. In addition, the agr turists rarely live on their lands but congre Lilorts in villages for mutual protection now being made in many Provinces to elimin these factors, which contribute to a low stant of cultivation

The main object of tillage methods for 1 cold-weather, crops is the conserva of soll moisture and the preparation of a f seed bed to ensure germination of seed achieve these objects, the land is given reper shallow ploughlings or harrowings, which duce a surface much over a moist sub soil kliarif, ac, hot-weather crops, the prelimit thorough as sowings must commence as a sthe rains break. The practice of drift the crops in rows is rapidly supplanting the method of breadersting in the range. method of brondersting in many tracts former method permits the intercultival of the crops by builock implements and grereduces the cost of weeding Harvesting generally done by hand implements The of tractor outfits for mechanical cultival is still largely limited to large estates a posterior tractor outfits. in certain tracts, to such specific purposes the cradication of deep rooted weeds

Irrigation —The Chief characteristics the Indian rainfall are its unequal distribut throughout the country, seasonal irregular of precipitation and hability to failure or par deficiency in many tracts. The average and deficiency in many tracts The average and rainfall for the whole country is about 45 inc and there is httle variation from this aver But, within individ

precipitation are not uncommon and in a si of extreme drought less than one quarter of avers exhalfall has been re med of precardons tracts. Such tracts, include practically the whole of the Puni b and North West Frontier Province the United Privinces, except the and montane region Sind a in go portinn of Bihar most of Madras and the Bombay Province omitting the coastal belts and portions of the Central Provincea The Indian canal system (excludin Durma) is by far the large t in the world Of the total cultivated area of 248 million acres about 56 million acres are irri g ted annually fram one source or another this huge area 30 million acres are irrigated by canals I in million acres by wells and 1 million acres from tanks and other sources. Protective irrigation was have made agriculture stable instead of precarious in many di tricts. The great peremial canals in the North of India. draw th ir supply from anow fed rivers the inundation canals run only when the ri ers riso with the melting of the snow in April May and must close when supplies fall at the end of the monsoon Other canals depend for their supply nonzon Other canals depend for their suprig during the dypart of the year on water stored behad great dans throws across sulfable gorges behad great dans throws across sulfable gorges from mitted so that Government bears part of the risk of failure of crops. Different r tea are charged for differ net crops, and vary a me-what is diff rent p r to of india. rates are also have remained the water has to be littled than when

flow irri ation is given
The Madras Bombay and Sind Pravinces The Madras Mombay and Slad Pravinces prove 5 some of the most speciacular iri! tion schemes in the world. Important as the direct trims fon.

tracts rems kably wide variation in total annual influence and Minnuring —The great raisful are found At many recordin stations bulk of Indian suits are deficient in organic annual rainful of less than half the avera e matter In other articultural countries of the world this want fansnally met by the return of farmyard manur to the land or by the use nf composts made from crop readues and similar waste o ganic materials In India however cattle dung is largely utill ed for village fuel but the practice of composting is not being apidly developed in many areas. The cultivation of green manur crops is making headway especially in the irrigated tracts and many Provincial Go eraments allow concersions to becourage their extend in The use of certain oil akes especially goundnut and casto cake is on the incre se and this method of manuring is nn common with many irr gated crops With regard to artificial fertilisers nitrogenous org nie manures eg ammonium s uphate and nitrate of soda are bein extended in uso through the efforts of departmental and private agences and the question of the manufacture of anch manures in India is now receivite close attention of the Government of India and Provincial and State administrations Rice - Rice is the most extensively grown

crop in India and on an average occupies shout _8 of the total enitivated area. It prepon derates in the wetter parts of the country riz in deraies in the wetter parts of the country fir in Pengat Bilar and Orissa and Madras Exclu-sive of Burma with his now politically reparat d from the Indian Empire the ac fluctuates sli hity around 7. million cres and the yield is about 7 million tons In 1910-14 total area under rice was 09 million acres with a total yield of approximately 7 million tons The crop requires for its proper maturing a moist climate with n.il assured rainf il The cuitivated varieties are namerous differl g greatly in varieties are numerous diner; greatly in quality and in suitability for vario is cond tions of soil and climate ill e is either broadcast dilled or transplanted in andeast rice is rown generally in low lying areas and is sown befure the mon.con

For transplanted rice the anti is generally prepared after the arrival of the monsoon and is worked into a puddle before the seedlings are transpl uted. The cedlings are planted either singly or in small bunches cant inlag from 4 to 6 plants each and are simply pu hed into the mid t distances of 9 to 1 linches apart The rice fields are bent more n less and I water airegir to early ewods gore out than area under impro ed vari ties of rice di tributed by the agricultural departments is now over million acres Varion a homes for the intensification of research no rice in all the principal rice growin pravinces financed by

are in Pro ress India (excluding Burma) consumes more rice than she produces the balance in the mat havin, been provided almost entirely by Barma Imports in 1939-10 were 000 tons mainly

belong to the species Trut cours rulgare Indian

them. The largest wheat acreage of recent years was that of 1933 34, namely, 36 million agres but the yield did not come up to the record harvest of 1939 10 which exceeded 104 million tons Recent crops have averaged about 9 million tons per annum which is only slightly, if anything, above internal requirements With the develop ment of Irrigation from the Lloyd Barrage Canai in Sind and In the newer Punjib Canal Coloniesa further merease in wheat production is certain The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soli moisture from the previous mousoon On Irrigated land 2 to 4 waterings are generally given. The crop is generally larvested in behruary to April and the threshing and winnowing go on up till the end of May The total area under improved varieties of wheat is now over 8 million acres The Imperial Council of Agricul tural Research has appointed two Standing Committees to advise on problems connected with rice and wheat

The Millets - These constitute one of the most important groups of crops in the country, supplying food for the poorer classes and fodder for the cattie The varieties vary greatly in quality, height and suitability to various chimatic and soli conditions Perhaps the two best known varieties are Jowar (Sorghum rulgare) the great millet, and Bajra the Bulrusii miliet (Pennisetum typhoideum) which, between them, occupy about 50 million acres annually In 1940 41, the total area under jowar and bajra in India was 51 million acres Generally speaking the jowars require better land than the bajras and the distribution of the two erops follows the quality of the soil Both the erops are generally sown in the beginning of the monsoon and so they require to be thoroughly weeded. It is often grown mixed with the several pulses especially Arhar (Cajanus cajonpigeon pea) and other crops, and is commonly rotated with cotton The subsidiary crops are harvested as they ripen either before the millet Is harvested or afterwards In some provinces rabi juar is also an important erop

Pulses—Pulses are commonly grown throughout India in great variety and form the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rota They are a primary necessity in the food of a vegetarian population. The yields on the whole are fairly good, mixed cropping is common. The principal pulses are Arhar (Cajanus cajon), gram (Cicer arietinum), various species of Phaseolus and Pisum

the most impor-ina The average area Cotton is one of the commercial crops in India under cotton in the quinquennium ending 1937-38 was 24' 6 million heres and the average yield 5 5 million bales of 400 lbs each DurIng the five-year period ending 1942-43, the average annual acreage and yield decreased to about 22 3 million acres and 5 4 million bales respect ively In 1943 44 the estimated area and yield were 20 4 million acres and 5 1 million

wheats are generally white, red and amber bliks respectively. The ascertained are under coloured and are mostly classed as soft from a improved virietles of cotton in 1943 44 was commercial point of view. Most of the Indian about 10 7 inillion acres. The consumption of wheats are soft weak wheats but there are some well-known Maccaroni wheats amongst 1,110,000 bales in 1943 44. The principal control of the principal c export is of short stapic eotton below 7/8" in st ipie but there is also in normal years an export of medlum and a long staple Indian cotton, of stuple length 7/8" to 1-1/16", such as Punjab American There is no Indian cotton belt, Bombay Province, the Punjab, the Central Provinces and Berar, Madras Province, Sind and United Provinces and the Indian States of Hyderabad and Baroda, all have Important cotton tracts producing distinct types and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter from October to May and June Yields vary greatly, in the best irrigated tracts the normal yield is about 200 lbs of ginned cotton per acre. and yields much above this have been recorded, whilst in the poorest unirrigated tracts 60 lbs per aere is a good erop Of recent years, as the results of the work of the Agricultural Departments and the Indian Central Cotton Committee, the quality and yield of staple cottons have improved and also the yield and cleanliness of the produce from the short staple tracts

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act, the Bombay Cotton Markets Act, the Central Provinces Cotton Markets Act and the Madras (Commercial Crops) Markets Act have all been passed at the instance of the Committee and are doing much to cheek adulteration and promote better marketing In certain provinces, legislation has been enacted, or is under consideration, with the aim of pre venting the growing of very inferior varieties and of stopping certain maipractices which affect the quality and reputation of Indian cotton Agricultural Departments have continued the production of the continued of the continu nued their campaign of cotton improvementapart from improvements in methods of cultivation

Exports—The figures for export by sea of Indian cotton from British India to foreign countries for the five fiscal years (ending 31st March) 1937-42 are shown in the table below -" (In thousand bales of 400 lbs each)

Countries $\begin{vmatrix} 1937 - | 1938 - | 1939 - | 1940 - | 1941 - | 41 \end{vmatrix}$ 547 291 United 395 472 411 Kingdom 76 23 23 27 43 Other parts of British Empire 1,056 385 1,359 705 Japan 1,211 151 Italy 92 52 France 95 229 126 169 754 141 China (ex-69 193 681 clusiveof Hong. kong) Belgium 196 68 5 142 Spain 15 $19\bar{2}$ Germany 166 52 289 239 Other 277 268 296 countries 2,731 2,703 2,948 2,168 1,488 Total

Oliseeds—The crops classified under the heading are chiefly groundnuts lineed, seamum and the excellerous cide ds (rape mustered etc.) Although cliseeds are ambject to great fluctuation in price and the crops themselves are more or less precarious by nature they cover an immerse area.

better quality charette tobacco both in Madras and in Bliner—The nrea under tobacco in British India in 1940 41 was 11,25,000 acres as an dust 11,80,000 acres in 1930 40. The total yield of dried leaf was 123,000 tons in 1040 41 as against 140,000 tons in the preceding year

Live-stock Census —The report on the 5th quinquennial Census of Live stock in India, taken in lamary 1930, shows that there were then in British India, excluding United Provinces Bibar and Orissa, 110 million heads of bothe citile, made up roughly of about 57 million heads of oxen and 22 million heads of buffalors

For draught purposes cattle are mainly used everywhere though mais buffaices are impor tant as draught nnimals in the rice tracts and dumper parts of the country I or dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat consider The bert known ably above that in cow's milk breeds are the Murra buffaloes of the Paujab. the Jasserabadl bustaloes of Kathlawnr, and the Surti and Pandiarpurl buffaloes of the Bombay Province The cittle and buffalo population in India is abnormally high amounting to over 60 per cent of the human population. The spread of cuitivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill fed and ineffi-Nevertheless the best Indian breeds Of the draught types, the havo many merits best known breeds are the Histor (Punjub), Hansl (Punjab), Bhaganari (Baluchistan), Nellore (Madras), Amrit Mahal (Mysore), Kankrej (Guiarat), Kangnyam (Madras), Kherigarh (UP), Molvi (CI), Khillar (Decenn), Nimar (East Khandesh), and Dangi (Konkan) Amongst the best milking breeds are tiio Sahlual (Punjab), the Gir (Kathiawar) and Seindi (Sind) Of the dual purpose (1 e draught and milk combined) the best known breeds are Hissar (Punjab), the Hariana (Punjab and U P), the Thar-Parkar (Sind), the Kankrej (Gujarat) and the Gir (Kathiawar) On the Government and the Procedure forms and the second forms and the second forms and the second forms and the second forms and the second forms and the second forms and the second forms and the second forms and the second forms and the second forms and the second forms are second forms and the second forms and the second forms and the second forms are second forms and the second forms are second forms and the second forms are second forms and second forms and second forms are second forms and second forms are second forms and second forms are second forms. cattle breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas to villages which undertake to evelude 'serub' bulls and where serious efforts to maintain a good strain of cow are made Once established such breeding areas rapidly produce a supply of superior buils for general distribution and in this way the valuable buils from Government herds are used to ndvantage The premium bull system is also working well in some

Catle Improvement —Indla possesses some very fine breeds of eattle, each breed being peculiarly sulted to the area to which it is indigenous To mention some, there is the heavy fast Kankrej breed in Gujurat, admirably suited to the sandy deep rutted roads found in this part Then we have the Dangi or Kala Kheri born and bred in the hilly, heavy rainfall area of the western ghats Raın and water logged conditions do not affect this breed, indeed, the more the rain, the better it thrives On the plateau of the Central Decean, we have the Khillar, a light fast draught animal which thrives on very meagre pastures and is essentially suited to the hard stony country in which it is reared

A good deal has been done for the improvement of cattle. The various Provinces have farms on which pedigree buils nro bred and reard. These are placed out in sultable villages on a premium system. In the Province of Bombay, Herd Registers are maintained for 8 of the breeds of the Province, shows are held annually and progress is to be noticed in those areas in which such work has been undertaken. In addition, the Bombay Live stock Improvement Act of 1933, known as the "Castration Act" which is intended to prevent promicuous breeding by undestrable male stock in the villages in the Province.

Sheep Improvement—It has been estimated that the number of sheep in India is in the neighbourhood of 4½ crores and that the total quantity of wool produce is 8½ crore poundamusit. The production of wool per sheep varies greatly in different parts of the country. In the North West Irontice Province, Balachistan, Sind, the Punjab, United Provinces. Ralputana and Western India States, the annual production per sheep is estimated at between 1 11bs to 11bz, while in the rest of the Provinces it does not exceed 1 lb. The average for the whole of India is in the neighbourhood of 1 91b per sheep per year. This would indicate the vast scope for increasing wool production.

The improvement of finer qualities of wool has been engaging the attention of the Imperial Conneil of Agricultural Research since 1933, and a systematic breeding on the five principal Indian breeds of sheep was undertaken in the Pumjab (Histor), Madras (Hosur) and Bombay (Poona), and promising results have been achieved Tite Wool Analysis Laboratory in Poona has systematiced the methods of valuation of fleeces for selective breeding and further research on wool fibre and its relation to sheep breeding is being carried out and successful results extended in the districts

Dairying—India is still far behind other countries in the matter of dairy farming and in the retail dairy business. This is mainly due to the climatic conditions of the country and the vast distances t, be covered in trans porting milk. The only solution seems to be Co operative dairy produce, handling and sale societies. Dairy farming in India is at present, a cottage industry, each household producing a few pounds of milk, nt present this milk is con verted by very wasteful methods into products that can be stored and transported long distances, such as ghee, (clarified butter), country butter, and Khawa, a desicented whole milk produced by boiling milk and evaporating the water contents until a solid mass is obtained

Each Province has its Agricultural College where Dairying in all its aspects is taught, and for higher training in this subject, there is the Imperial Institute of Animal Husbandry and Dairying A good deal of research is still necessary

The butter trade has improved considerably of late years In eities pasteurizing plants for the retail milk trade are gradually increasing Milk is now sold in sealed bottles, this trade, however, is small The Indian milk consumer Inlarge citles still demands his milk just prior to consumption Unlike the two deliveries of milk in other countries, the milk producer in our large

cities has to deliver milk about 5 times a day 1 mouth disease hamo-rhagie Septicamia black in the cities when dry

of Animal Husbandry and Dairying at Bangalors

Animal Husbandry -Details of the staps taken and progress made in the control of disease and improvement of stock are given in a hiennia! review of animal husbandry in India

The control of contegious diseases of live-stock in India is carried ont by the Civil Veterinary Departments in the Provinces and major Indian States The staffs of these departments are States The signs of these departments are for the most part recruited from among the graduates of Indian Veterinary Colleges of which there are five cir one each at Lahore Patina Calcutta Bombay and Madras The chief research centrs is the Imperial Veterinary Research Institute at Mukteswar in the United Provinces and its branch at liaturer near Barelly This institute is maintained by the Government of India and has recently been considerably expanded the latest additions being a poultry research station and a nutrition institute institute A certain amount of research is all o conducted at the Provincial Colleges

In addition to research the imperiar viscouries.

AGRICULTURAL PROGRESS

Arr ulural Progr = The historical appet fanc was appointed and in the same we ran of agricultural de elegence in loads as imperial Apriculent was added followed by an been fully dealt with in the report of the [function of the commission The I faulac Commission The I faulac Commission along ago as 1866 made the Grit proposal a tusece to the foresight in dentry of Lord life specimen Department of Agricult to but (Cornor whose famous departments of 1803 marked for a sparate Department of Agricult to but Courson whose famous despatch of 1003 marked title reminde except the collect in or agricult (de comme cament of the reorganisation which turn) statistics and other d ta with the object flook pic on 1895. That scheme provided to showed is light on famile problems. The a central research institute at Pass compiletary review commission of 1890 by the mastern and their statement of agriculture and their limits that the statement of agriculture most reviews the mastern and their limits that and am experimental farm in and silled subjects in the Government of India Agriculture the statement of the Course of the Co and to provide the part of the control of the contr

Parallel developments took place in the lown conditions provision made for matters connected with animal health The now world-famous Imperial Institute of Veterinary Research at Mukteswar started in 1893 as a modest hill laboratory for research on rinderpest It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 mililon doses are issued annually The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector-The departments were completely General provincialised in 1919, the Government of India continuing to finance and control the Mukteswar Research Institute and its branch station at Izatnagar (Barclily)

Recent Progress -As now constituted, the agricultural departments include a complete organisation for bringing the results of the ap plication of science to agriculture into the village At one end of the scale are the agricultural colleges and research Institutes-at the other thousands of village demonstration plots where the effect of improved seed, methods, implements the encerol improved seed, methods, implements in collaboration with the special marketing and manures is shown under the cultivators istaff appointed in the various provinces

Intermediate links in the chain are the experimental farms, where scientific research la translated into fleid practice, demon stration and seed farms and seed stores ascertained results of the work of the agricul tural department are striking enough The latest available figure regarding the area under improved varieties of crops in British India was 23 00 million aeres approximately figures by no means represent the whole extent to which improved strains have replaced old varieties as it is almost impossible to gauge the full extent of the "natural spread" of improved varieties Improved methods of cultivation and manuring are steadily spreading, work is in pro gress on most of the major crops and each year brings new triumphs

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce A contral marketing section has been established under the Imperial Council of Agricultural Research It works

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH

In Chapter III of their Report, the Royal Commission on Agriculture stated that the most Important problem with which they had been confronted was that of devising some method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial departments themselves cribing the way in which similar difficulties had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which the provincial agricultural departments and non-official interests would be represented, the Commission proposed the establishment of an Imperial an Imperial Council of Agricultural Research

The primary function of the Council would be to promote, guide and co ordinate agricultural, including veterinary, research in India and to iink it with agricultural research in other parts of the British Empire and in foreign countries It would make arrangements for the training of research workers, would act as a clearing house of information in regard not only to research but also to agricultural and veterinary research but also to agricultural and veterinary matters generally and would take over the publication work at present carried out by the Imperial Agricultural Department. The Commission proposed that the Council should be entrusted with the administration of a non-lapsing fund of Rs 50 lakes to which additions should be made from time to time as financial conditions permit. Its Chairman should be an experienced administrator with a knowledge if experienced administrator with a knowledge, if

possible, of Indian conditions and, in addition, there should be two other whole-time members of the Council for agriculture and animal hus bandry respectively The Commission suggest-ed that the Council should consist of thirty six members, in addition to the Chairman and the two whole-time members Of these, eight would be nominated by the Government of India, eighteen would represent the provincial, agricultural and veterinary departments, three would represent the Indian Universities, two would represent the Indian Central Cotton Committee and the planting community respect ively and five would be nominated by the Council for the approval of the Government of India The Council would largely work through a Standing Finance Committee and sub-committees A provincial committee should be established in each major province to work in close co operation with it The advisory duties of the Agricultural Adviser to the Government of Indla would be taken over by the Chairman and whoic time members of the Research Council, his adminis trative duties being taken over by a whole time Director of the Pasa Institute

Constitution of the Council—In a Resolution Issued on May 23, 1929, the Government of India stated that whist they were of opinion that the proposals of the Royal Commission were, on the whole, admirably designed to secure the objects for the attainment of which the next distance of the attainment of which the establishment of the organisation outlined above was recommended, they considered a Council of thirty-nine members would be too large to be really effective and that it was not decirable to be really effective and that it was not decirable to be really effective and that it was not decirable to the contract of t desirable that the Legislative Assembly should be deprived of its normal constitutional control over an activity which affects the stapie industry of India They had, therefore, decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to the limitation in regard to and control of funds winch is mentioned below

and an Advisory Board the functions of which 19 9 to consider the terms of a memorandum would be to ex mine all proposals in connection with the scientific objects of the Council which might be submitted to the Governi g Body to report on their feasibility and to edvise u any other questions referred to it by the Govern ing Body ing Body The Governing Body would consist of the Member of the Governor General a Council in charge of the portfolio of Agriculture who would be ex offic o Chairman the Principal Administrative Giffeer of the Council who would be ex-officio Vice-Chairman one representative of the Council of Stata two representatives of the Legi lative Assembly one representative of the European Business community elected from time to time appoint

The Advisory Board would con ist of all thess whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature end the representatives of the European and end the representatives of the European and Indian commercial communities who under the modified scheme would be member of the Governing Body In view of their exclusion from the Advisory Board the university re-presentation would be increased, from three to presentation would be increased, from three to presentation and the second of the additional three properties of the Indian Institute addition of Science, Beautical to the Indian Institute of Science, Beautical to the Indian Institute of Science, Beautical to the Indian Recently International Contract of the Indian Recently representative elected by the Indian Research Fund Association A representative of the Co-operative Movement would allo he added The Princip I Administrative Gauer to the Council would be ex-efficio Chairman of the Advisory Board.

The Government of India further announced that for the iump grant of Rs 50 lakhs recommended by the Royal Commission they had decided to substitute an Initi I lump grant of Rs 25 lakhs of which Rs 15 lakhs would be lis 25 lakes of which his 16 lakes would be paid in 19 9-30 supplemented by a fixed minimum grant annually The annual grant would be Rs 7 25 lakes of which Rs 6 lakes would be devoted to the furtherance of the scientific objet too the Councilund therem 1 1 g.Rs 2 25 lakhs to the cost of its staff and secretariat. The Council would have an entirely free head in regard to the expenditure of the grants made to for scientific purposes anbject to the condition has no liability in respect of such matters as 1378 or pension contributions siter the research or which the grant bad been given would be

The Government of India also stated their ecision that the Council should not he consti

of association and the Rules and Regulations At that meeting it was announced that His Exalted Highness the Nizam a Government had offered a donation of Rs. Lakis to the funds of the Council This offer was gratefully accepted and the Revenue Member of the Nizsm's Government has been added to the Governing Body the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board Since then donations of one lake each payable in 20 equal annual instalments have been made by the Mysors Baroda Cochin Travancoro and K hm! States and each community elected by the Federation of Indian Dunines of the Advisory Board The Bhopai State Throughout the Council and two technical members of Commerce and Industry the Provincial indisters of Agriculture two repairs and the Council on payment of a donation of Frontied Indisters of Agriculture two repairs and the Council on payment of a donation of Resource of the Advisory Board the Council on payment of a donation of Resource of the Advisory Board the Council on payment of a donation of Resource of the Advisory Board the Council and States of the Council on the States of the Council on the States of the Council on the States of the Council on the States of the Council on the States of the Council on the States of the Council on the Council of the Council of the Council on the Council of nominates one representative to the Governing the Financial Adviser I CA R and such other a constituent member of the Council on payment persons sthe Governor General in Council might of a donation of Rs one lakh in not more than 5 annual instalments and has been allowed the usual representation

IMPROVEMENT OF AGRICULTURAL MARKETING IN INDIA.

In view of the importance of agricultural strength of the general economic of the country, the Government of Officers, four Marketing Officers, one Supervising Officer (Grading Stations) and fifteen Assistant marketing as an aid to the general economic recovery of the country, the Government of India decided to give effect to the recommendations made by the Royal Commission on Agriculture and generally endorsed by the Central Enquiry Banking Committee regarding marketing surveys After consultation with Provincial Governments, it was decided that the first step should be the appointment of a highly qualified and experienced marketing expert with practical knowledge of agricultural marketing in other countries

Central Agricultural Marketing In accordance with this decision, the office of the Agricultural Marketing Advisor to the Govt of India, which has since been redesignated as the Central Agricultural Marketing Department, was constituted with effect from 1st January 1935, at Delhi with Mr A M Livingstone as the first Agricultural Marketing Adviser After more than six years of useful activities in India, during which period he was the guiding spirit of the marketing organisation all over India he relinquished charge of his office, on the 17th March, 1941 The present incubment of the post of Agricultural Marketing Adviser is Mr D R Sethi, CIE, IAS, who also holds in addition the post of Agricultural Production Adviser to the Government of India

The post of Deputy Agricultural Marketing Adviser to the Government of India which had been added on to the Department in July 1940 but was held in abeyance since March 1941, was also revived about the same time and Khan Mas also revived about the same time and Kana Bahadur A R Mailk, MA, B sc (Edin), Senior Marketing Officer, Bengal (now redesignated as Director of Agricultural Marketing, Bengal) was appointed to it Since about the middle of March 1945, Khan Bahadur A R Mallk is carrying on the current duties of the post of Agricultural Marketing Adviser race Mr D R Sothi, who has proceeded on leave Who staff Sethi who has proceeded on leave The staff now consists of a Deputy Agricultural Marketing Adviser who carries on the dutics of the Agricul-

Marketing Officers The commencement of the scar 1943 also saw the Department bifurcated at two stations, etc., Delhi and Ajmer, a major part being shifted to the latter place to release accommodation for war Offices in Delhi

With the help of suitable subsidies from the Imperial Council of Agricultural Research, the Provincial Governments established similar organisations in their respective areas and have, in some cases, further added to their staffs to meet the growing demand for developmental work of a practical nature Certain leading Indian States have also co operated by appoint ing fuli time officers in their States and over 200 States have nominated officers to deal with marketing questions In Provinces and States which have no Senior Marketing Officers the Director of Agriculture supervises the work of the marketing section The Central Marketing Staff are responsible for the survey work in a large number of States which do not have staffs of their own They also have to advise and assist the local marketing staffs in earrying out their work

Marketing Marketing Scheme -The Scheme was originally sanctioned for a period of five years and the new organisation was given the two fold task of (1) carrying out marketing surveys and publishing reports describing in detail the present system of marketing of the present system of the present sy marketing of some of the more important agricultural and animal husbandry products with recommendations regarding the lines of future improvement and (ii) drawing up suitable grade approximately and the provinced of the product of grade specifications after examining the chemical and physical characteristics of market samples of such commodities and testing their working under practical conditions

Apart from the Report on the Cold Storage and Transport of Perishable Produce in Delhi which was issued in 1937, all India Markett Survey Reports in respect of wheat, linsee

sannhemp ghee and other milk products sesamum and niger seeds fibres meat and poultry are in different stages of preparation and some of these are very nearly complete A Handbook on the Quality of Indian Wool which is intended to serve as a guide to wool merchants and persons interested in wool and a Preliminary Guide to Indian Fish Fisheries and Methods of Fishing and Curing have also been published 1t is also proposed to take up ment

About the begi i - of 1943 a rapid survey was also undertaken in respect of certain, vegetables (peas beans cabbage cauliflower vegetables (peas beans cabbage cauliflower holding Certificate of Authorisation i tomatoes and carrots) and certain important by the Agricultural M rketing Adviser including in particular grhar The punes incincing in particular grant and vegetable survey was completed and the report thereon submitted to Government. The draft ing of the report on pulses will be taken up shortly Under Instructions from the dowt of India rapid surveys were also conducted about distribution the same period in regord to (s) bones and bone

Caid Storage Transport —With a vi w to studying the commercial possibilities of coid storage transport of perl hable products like fruits etc certain refrigerated tr asport tri is were conducted duri g 1940 41 on two N W R cold storage wagons All India survey work on cold storage was also carried out in part during that period In view however of the recent fransport difficulties and the consequent shortage of w gons the experim nt and survey on cold storage has had to be po tyoned for the

Gr ding and M rks g-ln discussing steps which might be taken to improve th gener i level of quality the Royal Commission thought the organised true association in and could also as a series in problem Indi could gi e gre t assi tence in pplying effective pressur to accure improved quality from the produce. This view was fully borned out by the preliminary marketing surveys and two ge eral lines of tion were decided upon first the physi I greding and packl go fe m modities uch as fruit eggs ete on the base of at throw at market and secondly the modities uch as fruit eggs etc on the waits of at tutory at hadraf and eccoundly the stand ridisation of countre the trust stapes such as cert as and ollescends. The form statement that the grading set me has held involved legisl tion and the Agricultural life own satisfactority in spite of abnormal Produce (Gradi g and Marici g) A t 1937 was in unstance created by the war such as pas ed in F bruary 1937 for defining standards security transport and movement restrictions of quality and methods of marking in respect etc. To some extent a substantial military

eggs tobacco grapes coffee potatoes milk of prescribed grade designations applied to groundnuts rice hides sugar citrus fruits schedule products. As a result of consultation markets and fairs co-operative marketing lac with provincial governments and repre entative skins coconuts and cashewants have already trade and manufacturing interests further been published while the reports on bananas commodities were added to the schedule to the seen pumping union reports on gamanas commonstries were sauded to the Sententie to make pand goals fish cattle baries and gram are Act which now inclinites fruits vectables eggs on some other commodities rur rape-cel fruit, produce tobecco coffee hidea and skins on some other commodities rur rape-cel fruit, produces are oliseeds vepetable oils mail fruits make had millett scavor seed and the contract of the common terms of sug reame gur (Jeggery) myrobalens and bura The grading and marking rules in respect of most of these commodities h ve been duly prepared and notified Tentative grade speci fications and rules for several varieties of rice and fruits have al o been drawn up Sev ral Indien States have adopted similer legislation and are applying the AGMARK to the com modities graded in their arees

The development of trading on the basis of shortly the dratting of a survey report on the wheat the stand of methods of gr ding is definitely intangroes and to bring the data in the wheat eat hang on In the early stages experi report up-to date by issuing a suitable supple mental grading actions are operated on the mental grading stetions are operated on the basis of provi lonsi standards subsequently the process of grading and marking is done commercially on a voluntary basis by packers Certificate of Authorisation Issued authori ed packer may be the primary producer or co operative society or an association of primary producers village collectors and processors or the indi 'dual I reer packer or mann facturer holding a key position in the process of

the same period in report to (4) Domes and nouncing mass and (11) Indian requirements of agricultural implements and machinery and the implements and machinery and the production of the many commodities gradually and marking of the many commodities of the many commodities of the production of the pr By the close of the year 1944 the standardised

demand was responsible for keeping up the the Agricultural Produce (Grading and Marking) progress in the grading of commodities like Act, 1937. In order to ensure that grading is ghee, butter and eggs—Grading of ghee recorded done correctly and in accordance with the Act a sharp expansion in the United Provinces in and the Ruies, a special inspectorate staff 1944 mainly because of a decision of the consisting of one Chief Inspector and 7 Inspector shee, butter and eggs—Grading of glice recorded a sharp expansion in the United Provinces in 1944 mainly because of a decision of the Provincial Government to ban all exports of ghee out of the Provinces except for a Chentta. inmited quantity of Agmark graded glice for major portion of the cost of this staff is recovered civilian consumption in areas normally catered for by the United Provinces The United Provinces Government have also fixed higher prices for Agmark graded mustard oil as against the ungraded oil. The grading output of this commodity is therefore on the increase. It It is noteworthy that this principle of standardising the qualities of commodities subject to substantrai inter and intra provincial inovements is becoming increasingly becoming increasingly popular The Bihar Govt are now following the example of the United Provinces Government and are exploring the possibilities of adopting similar arrangements in respect of the marketable and exportable surplus of gliee and mustard oil in that province The egg grading scheme is also progressing satisfactorily and a proposal to reduce the number of grades for hen and duck eggs to three only so is to facilitate rapid marketing has been engaging attention recently An interesting experiment for marking the date of grading on the shell of graded eggs was initiated at Delhi and was attended with a fair amount It is proposed to adopt the principle on a wider scale as soon as circumstances permit

Staples like rice and ata being in short supply due to war conditions have, however, recently gone down in the grading scale Towards the close of 1943 an experiment was initiated in Madras Province to grade rice according to ad hoc war quality specifications and to link up such grading with the activities of the local Civil Supplies Department The scheme expanded considerably but had to be closed down towards the close of 1944 due to low arrivals in the market of good quality rice. The Department also decided recently to abandon the ata grading scheme as it was not considered to be of direct benefit to the pro-The view has generally been adopted that as far as possible the grading of commod-ities, the quality of which could not be verified by definite chemical tests, should not be allowed on any considerable scale An to commodities like fruits and vegetables, sugarcane gur and bura, when graded by producers' organisations only

The task of assisting The task of assisting the formation of such organisations is also being pursued vigorously

Special mention should be made here of the scheme for the grading and murking of sannhemp introduced towards the close of 1942 sannhemp introduced towards the coost of the scheme was drawn up as a result of compluints received from the Hemp Controller in the United Kingdom regarding the low of exports of hemp from India. The unlity of exports of hemp from India The scheme follows the general lines of all other grading schemes under the Agmark in that grading is done by authorised process holding certificates of authorisation issued by the Agricultural Marketing Adviser to the Govt of India The Govt of India have, by a notification under the Sea Customs Act, prolification to the Caport of sannhemp not graded under Agricultural Chemist to the Government of

tors has been appointed at stations at Benarcs, Vizlanagrani and Bombry from the trade by means of a charge of six annas per bale. The Vice President of the London Hemp Association visited India towards the close of 1944 and discussed the scheme with the Agricultural Marketing Adviser and the Inspectorate staff. As a result of these discus sions, certain modifications in the scheme will shortly be carried out so as to ensure harmonious working

In the beginning of 1944 a conference of tobacco interests convened at Guntur decided that the quality of exports of all types of tobacco from India should be controlled and that no tobacco should be exported on consignment account uniess it conformed to Agmark specifica tions In pursuance of these recommendations an inspectorate staff consisting of one Chief Inspector and 8 Inspectors has recently been created for cheeking the quality of the exportable Agmark graded tobacco but the extent of application of compuisory quality control is still under consideration. The Inspectorate is expected to start functioning very shortly. It will be set up at Guntur, an important Virginia, tobacco centre, and its entire cost will be met from the grant of Rs 10 lakhs per annum made to the Imperial Conneil of Agricultural Research by the Government of India out Similar proposals of the excise duty on tobacco for compulsory grading of the several kinds of fruit juices and products, sponsored in con sultation with a representative conference held in May 1941, are also expected to take shape shortly It is proposed to work the scheme in pusuance of the powers conferred by the Defence of India Rules by means of a suitable order.

Inspection of Graded Produce -In order to ensure adequate control of quality and proper grading, several persons in the provinces and States were authorised by the Agricultural Marketing Adviser to inspect graded produce and grading centres. The co-operation of agricultural, veterinary and allied departments in all provinces was sought for in this connection and several of their officers were provided with the necessary authority to inspect grading stations and graded produce Arrangements have also been made for controlling the quality of graded produce by systematically analysing samples collected by the inspecting staff both from the packers' premises as well as from the markets Nearly 10,000 samples of ghee and quite a large number of edible oil samples were applying at the Control Collection Technology. analysed at the Central Control Laboratory, Cawnpore, during the calendar year 1944 Several samples of graded gur, bura, butter and fruit products are being periodically analysed at the Imperial Agricultural Research Institute and these Agricultural Research

work on rice samples was made over to him For the purpose of keeping a vigilant watch on the quality of Agmark eggs put in Delhi market an Egg Grading Demonstrator has also been appointed and the number of stale egg put on the market has decreased considerably

The exercise of quality control by examination of samples at these laboratories naturally involves a certain amount of unavoidable expenditure This is partly offset by the sale of AGMARK labels to authorised packers. It was however observed that the Ag lcultural Produce (Grading and Marking) Act 1937, under which such recoveries were being made did not permit the levy of any further charges th n what the labele etc were costing to the Department therefore that a portion if not the whole of the faspection cost could be recovered from the packers who were the chief beneficiaries from the packers who were the chief beneficiaries from the grading sel fem the Act was amended in about the middle of 1913 to as to pe mit recoveries on the middle of 1913 to as to pe mit recoveries on the middle of the part of the self of the part of the produced? rexport eg annhemp or commodities like the preduced? rexport eg annhemp or commodities like the practice of the prac has also been extended to the commodities edible oils fruit products rice built r (and tanaspati which is not how wer being graded). The f irly rapid expansion in the grading of

plet from year to year has also co unlitted ti Department to ensure ti at proper arrangements ar instituted or existi g ones still ned in order to provide for an unfailing check on the quality of the graded products Certain new measur have accordingly been in tituted to gu. rd. gain t

the Central Provinces. In 1943 an Ata Analyst on this basis unanimous support was not was appointed to assist the Certailist at Lyalipuur forthcoming owing partly to the existence of an in this work. A Rice Analyst was also added excessive number of smill futures trading to the beadquarters staff and the entire analystical associations as tetered all over the country and partly to the opposition of one or two important trading institutions and certain infinential exporting and importing interests

With a view to bringing about uniformity in the different contract terms for wheat and linseed (including the Standard Contract) adopted by the trade an informal Conference of the representatives of 3 important trade associations of Dombay was convened in Fel runry 1941 Desides suggesting certain changes in the tolerances and limits of rejection for damaged slightly damaged and shrivelled grains the Conference made important recom mend tions esz that (1) 5 tons should be adopted as an alternative to 500 maunds as the minimum unit of transaction and () that the Cwt should be adopt das an alternative to the maund as the unit of quotation in the case of linseed the Co ference further suggested that the cleaning charge under Refraction should be lowered These latter suggestions were cir culated to the trade interests concerned and they have been accepted

In the case of wheat it has been decided to amend the Standard Contract for wheat as finally agreed to in 1938 and thereby implement the above mentioned recommendations

The Standard Groundnut Contrict was examined at the Bombay Conference 1941 and These everal minor changes were suggested. These were afterwards circuit ed to the 4r de interests concerned As reg of Hand Picked Sel eted Groundnuts (kernels and nuts in shell) the Contract terms agreed to at a Conf renee h 1d in 1940 were further revi ed and accepted by leading trade associations of Bombay Three leading exporters of groundnuts in M dras adopted the Si dard Groundnut Contract from the begin ig of 194 and they bave repoiled in the Contract terms has been teadily accepted both by the sellers a d pur half gare is and that thy wo ked very well during the pe iod of adoption. with boxes of standard patterns for use in transit! Unfortunately, due mainly to lack of funds, the of eggs and fruits Careful records were kept of the results for comparing the standard and land to rest content with a skeleton service of the ordinary containers

In the Travancore experiment conducted during 1939 and 1940 covering about 3,00,000 eggs, the loss by damaged and broken eggs in the standard boxes was only 0 52 per cent as compared with damage and loss through pilfer age of 1 77 per cent in the ordinary baskets As a result of the experiments, almost the entire exports of eggs from the State to other markets like Madras were packed in the improved con-tainers in 1941. This was facilitated by the grant of suitable concessions in freight rates by the raliway companies In the Bengai trials the total wastage in the standard boxes was 0 5 per cent as compared with 2 5 per cent in the case of baskets. The experiments conducted by the Rampur State revealed that in 3 out of 4 containers of cggs consigned to Nainital in August 1941, the contents were absolutely undamaged, while in the case of the fourth, the damage was only about 1 per cent Such reductions in the physical loss of produce are of small magnitude, but even a saving of 1 per cent on this score alone would represent an economy of something like Rs 51 lakhs in the cost of distribution of the eggs put on the market These experiments, however, received a set back during 1942 owing to transport difficulties created by the War

Legislation Regulating Markets—The draft model bill for the regulation of markets circulated by the Agricultural Marketing Adviser in the year 1938 formed the basis for necessary legislation in provinces and States Agricultural Produce Markets Acts are now in force in the Punjab, North West Frontler Province, Sind, Madras, Bombay, Central Provinces, Mysore and Hyderabad and the question is under consideration in other pro vinces and States where no legislation aiready exists It is, however, observed that due to abnormal conditions, legislation relating to regulated markets is not making the desirable progress It is, however, gratifying to note that the necessity for organising regulated markets has recently been stressed by the Central Food Advisory Council and attention of the Provinces and States has been drawn to the draft bill proposed by the Central Agricultural Marketing Department in 1938 in this connection

The attempts at regulating the markets were fittingly strengthened and supplemented by the passage on the 28th March 1939, by the Central Government of the Standards of Weight Act, 1939 The Act came into force with effect from the 1st July 1942 and the Standards of Weights Rules, 1942 have also been prepared Rules will be enforced as soon as sets of standard weights are ready for distribution to the Pro-vincial and State Governments

Broadcasting Market Quotations The dissemination of reliable and accurate market intelligence is an essential function of the marketing department. The solution of the problems of food administration and price control would have been facilitated if a properly coordinated. All India Market News Scrvice had been in existence from the beginning.

Central Agricultural Marketing Department Similarly, except in the United limited value Provinces, where a fairly comprehensive market intelligence service is being run under a special marketing staff, the arrangements in this behalf in the various provinces and States are totally inadequate

The Central Agricultural Marketing Department at present broadcasts (1) the daily market rates of a number of commodities at Hapur market, (2) the daily quotation for a few com modities like rice, gur, pistaches, raisins and aimonds at Peshawar and wheat, rice, cotton and wool at Karachi and sugar at Bombas, (3) the daily market rates for cattle at Rhotak and Bahadurgarh and (4) a weekly market report dealing with the fluctuations in prices of commodities like wheat, rice, oliseeds, pulses and several graded articles at various centres. in India In order to ensure accuracy in regard to cattle prices, three recorders have been appointed at Rohtal., Bahadurgarh and Bombay from Central funds During the year 1943, at the instance of the Food Department arrange ments were made to broadcast daily the market rates for coarse grains at a number of selected centres all over india, but this broadcast was discontinued after a short time The Department is also issuing a monthly review of prices and stocks relating to various commodities

necessity for Agricultural Publicity—The publicity for any scheme of agricultural improve ment should be obvious Efforts are accordingly being made to keep the public informed of the activities of the Department through the media of newspapers, exhibitions of special posters at railway stations and other suitable public places, and by putting up demonstrations stalls at the various agricultural and industrial exhibitions in the provinces and States In these exhibitions of the tions, public demonstrations are given of the tions, public demonstrations are given of the technique of grading by exhibiting iliustrative maps, diagrams and charts relating to the production supplies and prices and by saie of the actual graded commodities. A brief pamphlet on the "Story of Agmark" has also been prepared for distribution to the public. In the recent period, publicity of the above sort has however been modest as it was not considered desirable to increase the demand for Agmark products when it might not be possible to meet products when it might not be possible to meet At the same time it due to scarcity conditions it was found necessary to arrange for special publicity if any section of the trade in a particular commodity wanted it and was prepared to contribute to a co The Agricultural contribute towards the cost The Agricultural Produce (Grading and Marking) Act, 1937, has therefore been suitably amended to recover such

The question of setting up departmental AGMARK stalls was examined recently and it was considered necesary that their establishment and efficient running would be best facilitated only if the Agricultural Produce (Grading and Marking) Act, 1987 was suitably amended Proposals for the same have accordingly been

sioners abroad have pointed out repeatedly that ito the trade interests in India in order to find the main obstacle in the way of attempts at out whether such dressing could be done as a such a such asuch as a such a problem. A scheme for the grading and marking of eedlac exported out of India was initiated in 1941 and during the period from July 1941 to The sample was under preparation towerds it a January 1942 consignments of graded seedisc close of 1944 filmultaneou by the question January 1942 consignments of graves actively weight g about '919 mannds were sent to the United States of America. Though the report on the first consignment was favourable the experim nt had to be abandoned due to the abn rmal conditions consequent on the War A reference has already been made to the scheme for the grading and marking of sann hemp exported from India This scheme is still in caporing from 19dia This section is stull in Manufacturers Association N whork Future metallic through the section of the sect has been carried on on the basis of Agmark The Indian Government Trade Com grade grade The Indian Government Trade Com-ing the Control of the danger of export of the control of the Control of the Control exporting the Control of the Control of the exporting the attention of Government The receiving the attention of Government The extending the attention of Government The extending the attention of Government The extending the control of a qualified inspectors est if for checking the quality of the exports is also the Control of the Control of the Control of the things the Control of the Control of the Control of the things the Control of the Control of the Control of the things the Control of the Control of the Control of the Control of the things the Control of the e ging attention no large scale cerespinsaria the export of tobacco to the United Lángdom and the Middle East markets is however pos ble during the War became of the increased

In the recent past contact was made with the Australian Importers of goat skins through the Indian Government Trade Commissioner in Anntain and information was obtained and butter were purchased by the Supply Departresults their requirements of quility in Indian butter were purchased by the Supply Departgoal shins Similar enquirtes have also been

Jodhpur - Kishen Puri, B A , III B Bikaner -The Director of Industr Commerce

The Indian Sugar Committee of 1920 recommended inter alia the establishment of a Central Research Institute as necessary for the proper development of the Sugar Industry in this

The recommendation of the Sugar Committee was accepted and the Imperial Institute of Sugar Technology was started at Campore by the Government of India on 1st October, 1936, to carry out research in the different branches of Sugar Technology and to help the Indian Sugar Industry in various ways by rendering technical assistance to Sugar Factories, by training students in all branches of Sugar Tochnology, by providing short term courses to technical men aiready engaged in the Industry, etc From the 1st March 1945 the control of the Institute has passed over to the Indian Central Sugarcane Committee, formed by resolution of the Governor General in Council and registered under the Registration of Societies Act XXI of 1860 The Committee is constituted by members from every section of the industry, viz cane growers, sugar manufacturers, sugar merchants and Sugar Technologista

The Institute is financed by grants from the Sugar Excise Fund

ļ,

The work of the Institute has been organized under two broad heads, (a) office work including general administration and, (b) research and teaching. The former includes the technical, the statistical and general sections, the latter logy, Sugar Engineering and Sugar Chemistry, promoters of new factories, (b) advice relative to the control of

the last comprising of Sugar Chemistry, Chemistry, Physical Chemistry and B mistry The laboratories are well equipp instruments required for research on sug afficed products Attached to the Institute Experimental Sugar Factory, we Sugar Engineering and Chemical Engiaboratorics, Sugar Research and Testing & Billon's Free, Sugar Research and Testing & State Chemical Engiance of the Company of the Compa Bilari, Burcau of Sugar standards and r schemes for the manufacture of sugar co India, prevention of deterioration of sugar

The functions of the Research and Station at Brian are (1) testing of existing and processes in use in the open pan In (11) undertaking research work for Intro improvements in the pints and process giving demonstration of new machines a proved process and (12) The Indian (Sugarcane Committee have recentive cons a gur and khandsarı sub committee for a on the imes of work of the Research Sta

Apart from the technical work und Sugar Production Rules (1935) technical ance and advice on various aspects of the industry are given by the Institute to sug tories, central and provincial governmen dian States and others The Institute yours to meet all technical requirements tories so far as its staff and equipment 1 The more important types of work whi Institute undertakes for rendering te assistance to sugar factories are (a) ad-

Temporarliy diverted to the Sann Hemp Grading Scheme

(c) advice relating to improvements in working | For most courses a period of factory training la of plant (d) advice relating to improvements in an essential condition for the grant of diploma or vestigations into special problems and (h) analy tical work

The Sugar Trade Information Service under the control of the Director is run to meet the re agui ements of the angar trade and industry in India

The acope of the work of the Institute was brought to the notice of all persons interested in the sugar industry through a booklet entitled Functions and Activities In order to estab iish and maintain contact with the sugar facto ries and enable them to be in touch with research work carried out at the Institute and develop ments elsewhere arrengements have been made for issuing brief aummaries on matters of t chni cai interest under the title of Sugar Notes Bescription and results of various experimental and research work carried out in the Institute are being published annually in the publication en Scientific Reports of the Imperial Insti tute of Suga Technology

The institute trains a limited number of men nd xp ri nce of the seekin smployment in every year and gives them the lighest and most tie sug r i dustry and makes it available free complete training in their respective subjects of charge to factoric on receipt of eng iri

manufacturing process (c) technic I control of certificate. There are six regular courses of manufacturing operations (f) advice regarding training for students desiring to quality fo working expenses and cost of production (g) in I technical posts in sugar factories viz Fellowship and Associateship courses in Sugar Technology and in Sugar Engineering and the Sug r Engineering Certificate Course the Sugar Boilera Certificates Course Besides facilities are provided for men already engaged in the industry to have the necessary technical training during the off acason provided they have the regulaite edu cational qualifications. The off season courses extincted dualifications: Inc on season consists are—(a) Chemical Control (b) Bacteriology (c) Pan Bolling (d) Fuel and Boller Control (s) Statistical Methods (for research students) (f) St tistica (for sugar students) (g) Dutch language (h) G rman Language () Milling Plant uperation and control and (1) Sugar storage

> In order to afford adequate facilities to the Sugar Factories in India for selecting properly on lifted staff and at the same time to reduce nnemployment amongst the educated technical workers in the near industry the Institute maintains an Employment Buren a wilch collect uthentic information bout the qualification

[Iriz] tion work of the strongs of g. [Iriz] tion work as a strong work of the str

Th expedient of storing water in the monsoon for utili.ation I ring the sabsequent dry weather has been practi ed in India from timo imme mori i In their simplest form, such storaga works co sist of n e rihen emb nament constructed across a valley or depression behild od tho e which the wat r collects od the e der Cu erome t control range from small tanks irrigating o ly a few acres each to the buge regrang of a lew acres cach to the one re-rections recently completed in the Deccan which are capatle of storing over 0.000 million cubic feet of water By gradually releasin water from a work of the letter type a supply c n be maintal ed long after the ri er on which the reser oir is situated would other wise be dry and nacless

The Three Cinsses—Previously all irriga-tion works were divided into three classes Productl e Protective and Minor but during the tric nam 19 1 4 the method of deter mini g the source from whi h the funds for the mining the source from with the funds for the constriction of Government works we a pro-vided was changed and now all works who ther m jor or micor for which expital accounts are Lept b we been re-classified under two heads Froductive and Unp odnetive with a third class embraciog are a trilg ted by non capital w rks. The main criterion to be satis fied before a work can be classed as productiva is that it sh Il within ten year of the com pletion of construction produce sufficient re une to rover its w rking rpenses and the int re t charg s on its espital cost Most of the larg at irrig tion sy t ms in India belong to the p oducti e class

if separate tricks are estadered extraordin ry virtigins from the trick and the separate tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks and tricks Unproductive works are const ucted primarily

The main increase has been in the class of Rs 3-4-0 to Rs 5-4-0 per acre for wheat, from productive works, which irrigated 41 million acres in 1878-79 and rose to 20,756,209 acres in 1926-27 During the year 1941 42 the arcas irrigated by productive and unproductive works amounted to 25 43 and 3 87 million acres respectively

The area irrigated in 1941-42 was the largest in the Punjab in which province 12 78 million acres were irrigated during the year, excluding area irrigated through channels which he in the Indian states The Madras presidency came next, with an area of 7 71 million acres, followed by the United Provinces with an area of 5 89 million acres

Capital and Revenue — The total capital out lay, direct and indirect on irrigation and navigation works, including works construction, amounted at the end of the year 1941-42 to Rs 15,206 lakhs The gross revenue for the year was Rs 1,636 lakhs and the working expenses 481 lakhs, the net return on the capital being, therefore, 10 34 per cent

The return on capital invested in productive rrigation works was highest in N-WFP where the yield was 12 29 per cent The return was 11 15 per cent in the Punjab, 8 97 per cent in Bombay, 7 94 per cent in UP and 2 67 per cent in Madras

Charges for Water -The charges for water are levied in different ways in the various provinces In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals In others, as in parts of Madris and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water These methods max, the charge for writer These methods may, however, be regarded as exceptional Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown Lower rates are often levied in cases where irrigation is by "lift", that is to say where the land is too high for the water to flow on to it by gravity and consequently the cuitivator has to lift it on to his field

Various other methods of assessment have been tried such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful The cultivator fully under-stands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop

Rs 3 to Rs 4-4-0 per acre for cotton and from Rs 2 to Rs 3-4-0 per acre for millets and pulses Charge is made for additional waterings Practically speaking, Government guarantees sufficient water for the crop and gives it as available If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces, under which the cultivators pay a small rate for a term of years whether they take water or not In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply By paying a reduced rate every year for a term of years they become entitled to water when required; consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives

Central Board of Irrigation and Bureat of Information—Set up in 1927 with the main object of providing sub-committees to advise on technical questions, the Central Board of Irrigation, consisting of the Chiel Engineers for Irrigation of the Provinces expanded its activities in 1931 to co-ordinate research and maintain a Bureau of Information

The Research Committee and the Board meet every year, and the technical papers contributed and the discussion thereon are published A comprehensive library is main tained before the contribution of the second papers. tained, literature on irrigation, hydro electric eng neering, r ver control and allied subjects being collected from all parts of the world and indexed in detail for the supply of information to the irrigation departments. Provincial Governments and Indexed to the irrigation of the supply of information to the irrigation of the supply of information to the irrigation of the irrigati Governments and Indian States contribute to the cost of the Bureau in return for the Informa tion service offered

A new departure, instituted in 1942, was the inclusion of a limited number of Chief Engineers of Indian States by invitation as Board Members. The first two States to be represented are Bahawalpur and Mysore

Hydro-dynamic Research—In the year 1937-38, the Government of India, at the instance of the Central Board of Irrigation, took over from the Government of Bombay their Irrigation and Hydro dynamic Research Station at Khadakvasia near Poona This Station deals largely with hydro dynamic problems of The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single province. Thus in the Punjab they vary from Rs 7-8-0 to Rs 12 per acre for sugarcane, from Rs 4 to Rs 7-8-0 per acre for rice, from the Government of Bombay their over from the Government of Bombay their are for the Unital Board of Highest their cover from the Government of Bombay their over from the Governm The authorities mainty interested in hydro-They therefore saked it of Corroment of India dynamic research are the Corroments of India to t be it over with effect from Arril 1937 who administer small irrigation schemes in when off crevise it by proposed to close it down Balachistan and Italyustan and have large The Governm nt of India decided to maintain railway interests and the Provincial Govern ments with large irrigation projects in operation [193] 38 and 1933 39 and in the meantime to

The Station was originally being maintained by the Government of Bombay from Provincial recent successful to the Government of Bombay from Provincial recents and in 1931 35 the cost of running Hamily in 1944 the Go ernment of India it was roughly 10° lakes With it esparation of Stad from Bombay the lirralect area in the hanged 3th name in prominent basis and the hanged 3th name in 1941 1941 the Station of the Government of Stad from Bombay the lirralect area in the hanged 3th name in 1941 Indian W terraya vs. curus nous noussay, une surracta steen is sue;

practically unknown in the Punjab and in Sind, but it is found in some form or other in all other provinces, including Burma, and finds its infgliest development in Madras In the rootwarf tracts of Bombay and Madras all but the small est tanks are controlled by Government In the zemindari tracts only the large tanks are the zemindari tracts only the large tanks are State works. According to the latest figures the area irrigated from tanks is about eight the area irrigated from tanks is about eight Rs 28,68,305 and Rs 20,48,530 respective million ages, but in many cases the supply is during the previous year. million acres, but in many cases the supply is during the previous year extremely precarious So far from tanks being a refuge in famino they are often quite useless inasmuch as the rainfall does not suffice to fill them and they remain dry throughout the Reason

Irrigation in Bombay —The irrigation works in the Bombay Province fall into two categories -storage tanks and capals for which capital and revenue accounts are kept and small tanks bandharas and drainage channels for which neither capital nor revenue accounts are kept The most important of the works in the first category are situated in the Deccan They have been successful in banishing the famine which formerly devastated that portion of the Province. The works in the second category are scattered all over the Province and consist of nearly 12,000 small tanks, mostly in the southern part of the Province and in Gujarat and about bandharas in 400 Nasik and Khandesh Districts

The total capital outlay on works in the first category to the end of 1941-42 amounted to Rs 10,80,68,371 The expenditure incurred during 1941-42 amounted to Rs 16,54,727 as against Rs 15,56,633 in the previous year

An area of 328,194 aeres was irrigated inclusive of 12,167 acres on which a consolidated tribution and regulation of the supply water and assessment is levied in 1941 42, electricity. The Bombay Government would against 309,960 acres in the previous year also have a similar legislation for the province

The area under irrigation by non capit works during the year was 207,534 aeres, again 105,817 acres in the previous year, and trevenue derived therefrom amounted Rs 7,66 809 as compared with Rs 7,62,7 in the previous year

Cheap Power for Irrigation in Bembay.

The Government of Bombay, early in 194 decided to undertal e a scheme for the develo ment of electricity to ensure cheap supply power for irrigation, industries and lighting the rural areas in the Province during the poswar period Mr P B Advant was appointe Officer on special duty in the Public Worl Department to examine the project Il scheme when fully ported out will expende scheme when fully worked out will operate the lines of the grid system in England It proposed to have a network of generating station built in centrally situated areas in each divisic in the province to ensure the generating power and its distribution at a very cherp rat In England the grid system is administered to the Central Electricity Board which is responsible. for the creetion of generating stations and di

been established over North west India, in the aqueous vapours last week of May or Arst week of June, India has become the sent of low barometric pressures relatively to the adjacent seas and the whole at the commencement of June and in the course at the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the commencement of June and in the course the course the commencement of June and in the course the commencement of June and in the course the c character of the weather changes During the hot weather period, discussed above the winds and weather are main't determined by local conditions Between the Lignator and Lat 30° or 35° South, the wind circulation is that of the south tast trades, that is to ray from about Lat 80°-30° South a wind from south-east blows over the surface of the sea up to about the equator. Here the air rise into the upper strata to tiow back again at a considerable elevation to the Southern Tropie To the north of this circulation, ve, between the Lquator and Int 200 to 250 North, there exists a light unsteady circula tion the remains of the north east trades, that is to say about I at 20° North there is a northeast wind which blows southward till it reaches the thermal equator where side by side with the south-east Irades mentioned above, the air rises into the upper strata of the atmosphere Still further to the northward and in the im mediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea It is now necessary to trace the changes which occur and lead up to the establi-innent of the south west monsoon period. The sun at this time is progressing slowly northward towards the northern Trople Hence the thermal equator is also progressing northward and with it the area of ascent of the south east trades circulation Ilius the south east trade winds cross the equator and advance further and further northward as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the tempe rature over India increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas. Thus we have the southern Trades eleculation extending northward and the local land and sea circulation extending southward about the beginning of June the light unsteady interfering circulation over the Arabian Ser finally breaks up, the immense circulation of the South east frades with its cool, moisture circulation laden winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by occame conditionsthe south-west monsoon proper This is the most important season of the year as upon it depends the prosperity of at least five sixths of the people of India

When this current is fully established a continuous an movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat 300 8 to 1 at 300 N the southern half being the south-east trades and the north ern half the south west monsoon The most Important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanie area where steady evaporation is constantly in progress so that where the current enters the Indian seas and flows Bay current and to the north of the wester!

By the time the area of greatest licat has lover the Indian land it is highly charged with

of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea entrent blows on to the west coast and sweet ing over the Western Gioris prevalls more of less exclusively over the Penhaula, Central India, Rajputana and north Bombay The Bay of Bengal current blows directly up the Bay One portion is directed towards Burms. I get Pengal and Assam while another portion sweeps over Bengal and after meeting the Himalayas gets deflected and blows as a south ensteris and ensteris current right up the Gangetic plain The south west monsoon continues for three and a half to four months, uz, from the beginning of Tune to the middle or end of Septem ber During its prevalence more or less general though far from continuous rath preadle throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Ambian Sca current, the total volume of which is probably three time as great is that of the Bengal current, blows on to the west coast districts directly Here it meets an almost continuous hill range, is forced into ascent and gives heavy rain alike to the coast districts and to the billy range, the total averaging about 100 inches, mo-The current of whileh falls in four months after parting with most of its monture advances aeroes the Peninsula giving occasional uncer tain rain to the Decean and preses out into the Bay where it coalesees with the local current The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Arauli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Lastern Punjab Eastern Rajputana and the North-wist Himalayas In this region the current meets and mixes with the mensoon current from the Bay

The monsoon current over the southern half of the Bay of Bengal blows from south west and is thus directed towards the lengserim inits and up the valley of the Irrawidy to which it gives very heavy rain That portion of this current which advance sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low lving districts of heast Bengal and immediately thereafter coming under the influence of the Assam Hille is forced upwards and gives ex casus rims is forced apwards and gives each erain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advances from the southward over Bengal, is then directed westward by the barrier of the Himalayas and gives general rain over the Gangetic plain and fairly frequent rain over the Gangetic plain and fairly frequent rain over the lower ranges of the Himalayas from Sikhim to Kashmir

wind of the Arabian Sea current there exists Barma it is near 100 in the north Assam a deb table area runnin roughly from Ill say Valley and diminishes steadily wedward and in the Panjah through Arr Allaintada and is naily 5 thoches in the Indias Valley has obtained to the contrast of the many or prevails in the other current of the many or prevails in the other current of the many or prevails in the other current of the many or prevails in the other current of the many or prevails in the other current of the many of the whole of India factuating Burma is provided by the committee of the current of the many of the current of the many of the current of the many of the current of the many of the current a marked tendency in advance along thit track and to give it heavy fails of occasional

INDIA METEOROLOGICAL DEPARTMENT

Functions f the Department.—The India it teorological Departm at we in tituted in 1875 to combine and extend it work of variou provincial meleorological services witch had sprung up before that date The arious dulies which were imposed on the Department at the which were imposed on the Department at time of its formation were from time to time a pplemented by new duties Some of the prace of the prace in the historical lime functions more or less in the historical order in which they were a sumed may be being summarised as follows —

(a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms

(b) The issue of storm warnings by wireless to ships in the Indian seas and the collection of meteorological data from al lp

(e) The maintenance of systematic records of m teorological data and the publication of clima tological statistics These were o iginally under taken in order to furni h data for the investigation of the relation between weather and discuss.

(d) The issue to the public of up to-d te weather reports and of rainfall to ecasts Ti ese d ties were windnessing recomme deck by a Committee of Enquiry into the causes of famine fn India

() Meteorological researches of a general character but particul rly regarding the feaf storms and the forecasting of mousoon and winter

(f) The tudy of agricultural meteorology, U) The tody of agricultural meteoromy, et al. the ir lay is near the ground with p rilcular ref rece t the growth of plants and crop prod ction

(c) The issue of sea onal rainfall forecasts

- (A) The is ue of fierraphic warnings of leavy rainfall and frost (coll wave) mainly to Gov rament officials (e.g. canal and railway e gineers Collectors Directors of Agriculture etc) and through il e newspapers to the public in general
- (i) Supply of m teorological astronomical and geopi yelcal information in response to enquiries from officials commercial firms of pri te individuals
- (f) Technical supervision of rainfail regis tration carried out under the control of provincial Government authorities
- (i) The findy of femperature and moisture conditi as in the upper air by means of instru-ment-carrying balloons and of upper winds pilot balloons and regular compilation of satisfits of upper air data

In addition to these meteorological duties the India Meteo ological Department was from time to time made responsible for or undertonk various other important duties such as-

(f) Determination of time in India and file issue of time signals also the determin tion of e rors of chronometers for the Roy I Indian havy

(m) Observations and researches on terrestrial m gnetism at Bombay and atmospheric electricity at Bombay and Poons

(a) Regular study (mainly by spectro copic examination) of tile sun at the Solar Physics Observatory at Kodalkanal

(e) Maintenance of seismological instrements at various centres

MONSOON OF 1944

mon oon arrived! F tures -The app eximately in its u_ual time and gave good rain even exce is rain in some place in the months of July and At on t but the e were no lo ish breaks A notew rthy festure were no lo ish breaks A notew rthy feeture of the year was th unu nully heavy rain in Sind 6 prat we t R jout na und w st Central India from the middle of July to the middle of August which caused lo. s of rops and property due to floods in the Indus and the T pt I revers

A feeble advance of the southwest mon oon which occurred tow rds the end of May aused widespread rain ir M labor the south Konkan and Mysor dal oin Assam and the dioining districts of Be at on the first four days of June Thereafter the monagon wakened and withdrew but widespread thundershowers occu d in the tract of country from the Punnb and east Rainutana to Bibar and Orl sa in and east Rajputana to Bihar and Orl as is a oution with low pressure are in nortifera-loid. The Arabi a New branch of the monsoon reference to the single retunded northward at the contract of the single returned to the single return to the single return to the single return to the single return to single return the I th. The Eay branch of the in usoon also strengthened and go rise to a depes in while he moved inland causi g widespread r in i Ass m and east E ngal between the 15th and 20th. During the rest of the month both and 20th. During the rest of the month observables of the mone on emained wask librarches of the mone on emained wask librarches are though wid spread thundersbot a occurr of in the sat of th Peninsula nd local shot ers in the contain parts of the country Wid spread I in fill i the best of country form the Punjab to Assam between the 5th and and a low p essure w ve f om the east

Both branches of the monsoon strengthened at the b ginning of July and remained of rely st the b ginning of July an I remail of 1 my to g through out the month During the first we'k th Arabi n Sea br not caused widespread rain in the Pento ula and partlen 1 my h vy falls in the Konkam and M hb r and the state of

The rainf II du ing the rest of the month was mainly controll d by two d p es lon and tw ycloni storms from the north B y f B u al The first dep easion travelled from the Orisa In first dep easion travelled from the Orasa-coast northw tward and me sed into the stands low over n rhwest I did emains the control of the coast of the coast of the track by twe thought the track by the track by twe thought the track of the dispersion from the head of th Bay caused dispersion from the head of th Bay caused dispersion from the head of the Bay caused ladia, the United Provinces and the central ladia, the United Provinces and the emits and the coast of the course of the second of the thing of the course of the c

and distincted over Sind on the Sth causin widespread and locally heavy rain n th tract from Oil 3 and B hr to Si d By the end of the month the econd cyclonic storm from the B w move 1 from the Orls a co st to the e utr I part of the Country as a deep depression can ing widespread and loc lly heavy f lls loar it track. This caused widespread and locally heavy rain in the belt of country from the west Central Provinces to Sind on the first three days of Angust

P i f ll in An st w s mainly determined by two land d p essions and a evelonic storm from the Bay of Bengal A trough of low pressure the Bry of Bengal A trough of low pressure fount h north B y e used widespre d and locally b avy r in in the central parts of the country Gnja at an I south Rajputana between the 8th and 13th A land depres ion ove west Central India move I to the southwest Puni b letween the 11th and 15th causin unusually heavy ain in west Cent al Indi and the west tentr l Province and widesp ead rain generally tentr I Province and widesp ead rain generally in northwest Indi with locally h vy rain in Sind and Rajputana Another land depression apper red over the ast Central Provinces on the 15th mo ed westw rd over the north Bombay Deccan nd emerged into the Arabba Sea off L thiawar as a cyclonic atorm on the set ou h thiswir as a cyclonic atorm on the 19th. This again caused widespread rain and very heavy folls in the central parts of the country and G rat Due to pb nomenally hea y rain in Guigrat Lap tans Si d and west Cent al India high floods we caused in the Indus and the T pil rivers causing on the muss ha the 1 ps mirror considerable damage to crops and property
A large numbe of p ople were rande ed homeless
in Sin and south Gujarat particularly in the Surat Di tr ct.

Th Bay monsoon was strengthened by a exclose st m whi h e ossed th O iss coast cycionic st m with a cossed th O iss coast on the 10th and travelled up to the Punjab as a deep depression causing bundant r in along its t ack between the 10th and 4th. The I t depression of the month caused wide spre d rain in northeast India and the ast Unit d P ovines from the 20th to the end of the month.

The monsoon was gene ally wak durin September In associ tion with the d pression of the 1st month and a we tern disturbance widespre d recipitation o curred in Ka hmir th North West F ontier P owlnee the Punjah and the Unit d Fro i ces durin the first four and the Unit d Fro i ces durin the first four days of the month Lo al thundershowers occurred in the south P a nsul o a few d ys in the first week and b tween the 10th and 13th Thundersh wers in occurred in the Decan and the central parts of it country between the 14th and 19th A land depression over the mother of the state of the land o Thundersh wers in occurred in the Deccan central parts of the country as a deep depression of the mon oon in the Bay of Bengal,

Taking the season as a whole, rainfall was in large excess in northwest India outside the east and north Punjab, the North-West Frontier Province and east Rajputana, and in moderate excess in west Central India, the west Central of the different sub divisions Provinces and southeast Madras

Famine.

I amines may be said to arise when large groups of people fail to produce enough food for their ovn needs and incl the meins of obtaining it from other sources. Such conditions may be prompted of ther by successive failures of the ballsm mon oons on which four fifths of India's nariculture depinds even today, by natural distances such as floods or earthquakes, or by her as careirs such as war and grain market appealation. It is, ho ever rare for a famine to be directly true able to only one cause I say, so eral part their part.

Farly Famines.

corr in the situation has been proved by the family and the situation of t

defect, being cleven inches below the mean In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be immune, were iffected The people ching to their villages, in the hope of saving their eattle, and came within the scope of the relief works when it was too late A very large area in the Indian to save ille States was affected, and the Marwarls swept States was affected, and from their impoverished land right through from their impoverished land right through most consuming tentres in the famine When desolation in their train. For these reasons contributors causes of the famine When relief had to be given on an unprecedented choringes obecame apparent in Bengal their seale. At the end of July 4,500,000 persons were supported by the State, Bs 10 crores were spent on relief and the total cost was were spent on relief and the total cost was pore, were short of food from natural cause stimated at Rs 15 crores. The famine was estimated at Rs 15 crores. The famine was entired because rice prices were far become stiffered because rice prices were far become the reach of the people, because the available of because the available of the people, because the available of the people, because the available of the people, because the available of the people of the people of the available of the available of the people of the available of the available of the available of the available of the available of the people of the available of th by the Government of India alone—the supreme responsibility of saving human life Aided by loans to the extent of Rs 3½ erores, the Indian States did a great deal to bring their administration into line with that in British India Although actual deaths from starva tion were insignificant, the extensive outbreaks of cholers, and the devastating epidemic of malaria which followed the advent of the rairs induced a famine mortality of approximately a million

The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy Pointing out that if the people were assisted at the start they would help themselves, while if their condition were the immediate erisis allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the necessity of 'putting heart into the people' The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of ievenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non official help. The wage scale was revised the minimum wage was abolished in the case of able bodled workers, payments by results were recommended, and proposals were made for saving cattle

1943 Bengal Famine

Localised fimine conditions have recurred fairly frequently since 1901 but until 1943 it seemed that the procedure had down by the Famine Codes was espable of dealing with all eventualities. Unfortunately, conditions in which the difficulty of obtaining relief supplies would be so great that the Codes' provisions could not be filled, were not envisaged. This state of affairs, however, arose in Bengal early.

rainfall over the whole of India was in extreme in 1913. The province is estimated to be 83 per cent self sufficient for food and before 1942 imported most of the balance of its needs from Burma. The cutting off of this supply was followed by a series of natural disasters includ ing the Midnipore intricane which late in 1942 devastated a wide area and is estimated to have destroyed 1,500,000 tons of rice. During the monsoon of 1943, when famine was already present in Bengal, floods in the Damodar river held up relief supplies from the UP and Punjab at a critical period. Public nervousness over the full of Burma, the demal poller, by which houts and the larger stocks of rice were removed from I ist Bengul to prevent their use by the drained the area of stocks or because the avail able gram was hourded by its ewners

> According to the l'amine Codes, assistance should have been provided from ontside. In 1943 the problem was twofold Very large supplies were not readfly available elsewhere Very large owing to the general dislocation of Indian grain markets, the movement of supplies into Bengal was difficult owing to the congested state of the rullways A fairly steady stream of grain did, however, reach Calcutta from July onwards but it does not appear that the Bengal Government evolved a satisfactory plan of distribution Many famine areas in the province were virtually without relief until the army assisted the civil authority to organise food distribution and medical relief in November 1943. This relief, coupled with a record rice crop, which became available in January February, 1944, overcame

Famine conditions were recompanied by epidemics of cholers, malaria and dysenters which probably caused as many deaths as start vation itself. In March 1944 Mr. L. S. Amery, the Secretary of State for Indian appared in the Secretary of State for Indra, announced in the House of Commons that the 1943 famine deathroll was 689,000 This figure, however, must be regarded as provisional, owing to the state of vital statisties in Bengal and the large number of people who were missing in the large scale migration caused by the famine A Com mission of Inquiry to investigate Indian food shortages in 1943, with special reference to Bengul, was announced by the Government of India in June 1944 Sir John Woodlead was the Charge of the Course of the Charge of the Course of the Charge of the Course of the Charge of the Course of the Course of the Charge of the Course of the Charge of the Course of the Course of the Charge of the Cours the Churman of the Commission and it began work the following month

During 1943 famine broke out in the Bijaput district of Bombay and in the Ceded Districts of Madras. There were also acute food short ages in Orissa, in Tray ancore and Cochin and the Madras district of Maiabar In none of these

Hydro-Electric Development.

Cheap motive power is one of the secrets of brought into operation by Tata Sons, Lid, and successful industrial development and favourable mitial conditions clusted by the war, the entimenem for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific ntilleation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years Indeed, the process, for which sound foundations had been iaid before the war, is now rapidly under way India is severely handie-pped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil These commodities are all difficult to obtain, and costly in India except in a few favoured areas Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy Water power and its transmission by electricity offer, on the other hand, good possibilities, both as regards the quantity available and the cheapness at which the power can be supplied, in certain parts of India

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfail is only during a small portion of the year Perennial rivors with sufficient water throughout the vear Water. are practically non-cristent in India therefore, must be stored for use during the dry Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfails occur, and the progress already made in utilising such op portunities by the electrical transmission of power affords encouragement for the future Further, hydro electric schemes can sometimes be associated with important irrigation projects, the water being used for both electricity genera-

tion and irrigation

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India On this recommendation the Government of India in 1918 appointed the late Mr G T On this Government Barlow, C I E, then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr J W Mearcs M I C E, Electrical Advisor to the Government of India Mr Barlow died, but Mr Mearcs, lesued a preliminary report in September, 1919, and a Triconnal Report in 1921, indicating that a minimum continuous water power of nearly 6 million kilowatta with a maximum of 18 million kilowatta pould be developed. of 13 million kilowitts could be developed in This excluded practically all the great which were then uninvestigated. The India rivers, which were then uninvestigated The Government of India has since formed a Central Technical Power Board for developing hy dro electric resources of India and for carrying out a systematic hydro electric survey in India The present stage of progress and some of the plans under consideration for development of hydro electric power in the post-war period in some of the major provinces and states are indicated in the following paragraphs

Bombay Hydro-Electric Works

The greatest Hydro Electric undertakings in

continued under their management until 1929, when they were transferred to the management of the 1sts Hydro Licetric Agencies, Ltd, in which Mesers Lats Sons retained a substantial interest These undertakings are

(a) The Tata Hydro-Tlee tric Power Supply Company, Itd Supply started in 1915

Andlira Valley Power. Supply Company, Ltd.

The Tata Power Com-,, 1927 pany, Ltd

,, 1922

These Mydro-licetric schemes have a com blined normal capacity of 231,000 KW and provide electrical energy for the City of Bombay, Boinbry suburbs, Thana, Kaiyan and Greater Poons

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India Its population in chilling suburbant the 1941 census was 1,489,693 with a total population of approximately 2,000,000 in all of the areas served by these companies. Its cotton mills and other factories eonsumed about 150,000 HP, which until these Hydro Electric schemes came into operation, was entirely produced by thermal stations using fuel coming from great distances

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above ser-level within a few miles of Bombs City, siturated on the shores of the Arabian Sea with their heavy rainfalls was taken full advan-tage of for providing Bombay City and vicinity with an adequate and economical power supply

The hydraulic works of the Tata Hydro Electric Power Supply Company are situated near Lonavla at the top of the Bhor Ghats The mongoon rainfall is stored in three lakes, namely, Lonavla, Walwan and Shrawta, from which it is conveved in open masonry canals to the Forebry at Khandala and thence through steel pipes to the Power House at Khopoll at the foot of the Ghats, where the head at turbine nozzles is 1,725 feet or approximately 750 lbs. here as 1,725 feet or approximately The normal capacity 750 lbs per sq inch of the Power Station at Khopoli is 60 000 LW This scheme was formally opened by HE The Governor of Bombay on the 8th of February

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro Electric Supply Company's lakes, where additional power could be developed These investigations resulted in the formation of the Andhra Valley Power Supply Co and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, acrost the Andhra River and a tunnel 8 700 feet long driven through solid trap rock to the scarp of the Ghais, from which the water is taken in of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the The head of generating station at Bhivpnrı The head of water at turbine nozzles is 1,740 feet or approvi The clectrical The greatest Hydro Electric undertakings in mately 750 lbs per sq inch. The electrical India are the three schemes developed and energy is transmitted to Bombay over a trans

mission line 56 miles long for au menting the pply from Khopoli The present installed apacity at this station is

The Tata Power Company scheme on the Nil Mula River to the South East of Bombas w a investigated and developed along line imilar t the Andl ra Valley scheme and b a a oormal installed p city of 99 000 kW The power is transmitted to Bombay over a trans mission line 6 miles long and is used to augment th s pply of the two earlier companies to mills factories and railways

The Tata Hyd o-Fl ctric Power Supply Co d th Tata Power Company operating a a unit under one management amply the whole of the electrical energy required by the Bombay Electric Rupply & Tramwaye Co Ltd the m jorit of the mill end indu tries in Romb y City the B B & C I Rallway for their suburban lectrification the whole of the energy required by the G I P Railw y lo Bombay City and for their m in line trection up to Poons and Igatpuri th whole of the electrical energy required by the Poona Electric Supply Company and the distributing ile users in Thana kellon and the Bombay auburbs

The c three schemes operating as a unit under one in namement provide an adequate and economical power supply in the acess mentioned abo a for all purpos of The rate for energy call end to the billic Factories and Railways and one werest years shown a steady decrease and now everal years shown a steady decrease and now everal years shown a steady decrease and now everal years shown a steady decrease and now everal years shown a steady decrease and now everal years shown a steady decrease and now everal years shown a steady decrease and now everal years shown a steady decrease and now everal years shown as the steady of the s de p nd individu i consumprime in ites o This power supply greatly enhance the natural adv ntages Bomb y has as a great manufactur log trading and shipping centre

For the development of industries and agri for the development in incurrence and again editure in the northern portion of Rombay Presidency the Bombay Gycernment has emaled on the provision of an eletrical grid ach me zomewhat on the lines of the Pritish Grid Besides taking pow from the Pritish Grid Besides taking pow from the Tatas Hyd o Electric System and from e me of the selected St m St tion it is elso proposed to c astruct initially tw new hydr electric stati as t Bhandardena end Bhatgar for anymyning power to this grid

Mysore Hydro Electric Works

The first Hydro-Electric Scheme of my magni tnd undertaken in Indi nr indeed in the E t was that on the Canvery Ri er in Myso e State which with it generating station t and mis on line end distributing system was in augurated to 190

The Canvery Riv r lises in the dist ict of Coorg in the W stera Chats and flows acros a Mysore State The prin ip i object of this scheme was the empily f powr to the mining companies on the Kolar Gold Fields about 92 miles f om Sivasamudram the site of the greatest at the contract of t

The initial undertaking has constantly been expanded so that its total norm I capacity no v etands at 4 000 l % This gre t increase h s been made possible by the construc tion of the Krishn rajasagar reservoir near Missore City which has a copacity of 44 000 million cubic feet of storage above the mi imum draw off

The number of the consumers of eli classes continue to increase rapidly every ye r with greatly incr used power demands. The Govern ment of Mysore has e encouraged the use of el triest energy and hav mads a survey of Hydro Power r ource of the State and prepared plans for the con truction of a number of generating station at the most economic sit a as and when nece sary

The number of lighting and power consumers of all classes in about 00 towns and villages within the My sore Stete has increased to more than 60 000 Demands for very large additional blocks of power made it necessary for Government in continuing its policies for the industrial development of the State to cauction the c nstru tion of a Power Station at the Shimsha Fells for the production of 17 200 KW and the construction of a Power Stetion at the Jog Fells for the production at the first instance of abo t 48 000 kW Th power station at Shimsha F ils wes empleted in June 1040 thus brinking th tot I installed capacity of Siva amndram and Shimsha Stations in about N 4 00 04

The trauvmission system consists of 866 route-miles of 78 000 and 37 500 volt lines with a total of 1 100 miles of circuits. The transmission system is now being extended into every District within the St t which together with the ap-propriate distribution systems will supply hydra electric powr t to more than 250 thwas and villages within the next _ to 2 years

El inicity in Trava cor Si t Electric a pply undertakings are ni recent growth in Trav nco e Although the first power atation w s to existence in the High Ranges as early as 1005 it was only towards the latter part of 10 7 that Government created a separate organisation to carry nut a programme of electric I development in the State Electric supply was first introduced in Trivandrum in M no 19 2 The named a nutlay on this undert king till 1941 42 was Rs 11 5 labbs The Scheme h a heen paying a satisfactory return on its investme t ever since it eta ted working The gross revenue during 1941 4
was Rs. 75 Ishbs and the tot 1 gen tion
1 59 million units T1 en unaber of consumers
at pre ent is about 800 The o ere 66 miles
of 1, T ov rheed dist |butlon lin s besides 16
miles of 3 3 kV underground cables

With the lead gin by Government in the supply of electric power to the capital two other under taking swo hed by p lyate agencies one in Kottayam and the other in N gercoli we o she by fletwords inaugurated Th. we e sho tly fterwerds inaugurated The former came i to exitence e ly in 1932 white about 92 miles on Sivasamudram the site of 10 mer causes to the correction station. This transmit to him the latter was put into operation towards the method of the control of the contro

A scheme to supply Quilon was inaugurated towards the middle of 1934. The capital expenditure on this undertaking is about Rs 3½ laking Very rapid progress has been applied to the control of the contro made in its operation during the last four years, the generation having reached over 2 million units per annum, bringing in a gross revenue of about Rs 1½ lakhs The supply covered about 20 miles of 11 kV lines, 45 miles of L T Distribution and 2½ miles of 3 3 kV underground cables and caters for about 850 con-Power was supplied from a thermal station of about 630 kW capacity till the supply was changed over to the Pallivasal Hydro Electric System in May 1940.

Quilon is an important industrial town and the power requirements have not been able to be met from this small thermal station to any appreciable extent The total capacity of installed power plants in Quilon is well over 2,000 HP but as many of them are in a very unsatisfactory condition on account of their old age it should be possible to secure all these loads, now that the Hydro Electric Supply is verified from the Pollyrocal system the bullavailable from the Pallivasal system, the bulk of which is utilised by the Illmenite Mining Industry, the Cotton Mills and the Ceramic factory at Kundara

Pallivasal System

A preliminary survey of the hydro electric possibilities of the State was carried out as early as 1919 by Mr F J Jacob, the then Chief Engineer of the Public Works Department But as a result of the subsequent investigations conducted in 1925 by Mr K P P Menon, the present Electrical Engineer, Government came to the conclusion that the development of a nover scheme utilising the falls of the Mudira A preliminary survey, of the hydro electric power scheme utilising the falls of the Mudira puzha river possessed great economic possibilities. Accordingly, detailed investigations were taken up and completed by 1933. The work was started in 1934.

The first stage of development of the Pallivasal Hydro-Electric Project was nearly completed by the beginning of 1940 and it was inaugurated in March when the supply was switched on by Sir C P Ramaswamy Aiyar from the Pallivasal Generating Station The scheme as now com pleted comprises of a temporary diversion dam, a pressure tunnel of 10,200 ft in length and 8 ft dlameter section and two penstocks each 7,800 ft in length, the generating station and transmission lines extending up to Alwayc on the west and up to Kundara in the south The power station has three 11,000 volts, 3 phase, 50 cycle alternator sets each of 4,500 kW capacity directly coupled to the pelton wheels operating at a head of 1,980 ft The total effective capacity of the station is 9,000 kW The third generating set will be used as a standby Power is transmitted to the plains at 66,000 volts The third genc-The transmission system consists of 134 miles of 66 kV double circuit lines connecting the generating station with 5 major sub stations at Kothamangalam, Alwaye, Pallom, Mavelikara and Kundara besides 26 miles of 33 kV single circuit line connecting Alleppcy with Maychkara requirements within the next ten year and 3 miles of double circuit of 66 kV lines Schemes have been worked out for the construction Always to the aluminium factory now tion of two new hydro electric stations at nearing completion.

The mains distribution comprises of miles of 11 kV single circuit and 101 miles of double circuit lines and about 92 miles of LT distribution net work Almost all the Municipal Towns coming within the network of the Pallivasal Hydro Electric Supply have been provided with low tension distribution. Thus the first stage of the scheme covers a large portion of the north and central Travancore, and it has been so designed that extensions to the transmission system can be added easily to distribute power to other areas such as Peermade in the cast and Trivandrum in the

The availability of electric power in most places in Travancore and the very low rates of tariff now offered are expected to open up great possibilities in the industrial and agricul tural development in the State By the end of 1941-42 the system had a connected load of over 6,000 kW and 2,375 consumers distributed over 19 distribution centres The peak load of the generating station had reached 2,500 kW and the generation 11 2 million units

The Department has been keenly alive to the needs of the agriculturists for electric power, the chief uses of which are for dewatering the punja fields, the crushing of sugarcane and lifting water for irrigation. All reasonable aid is rendered to prospective consumers. Proposels for the supply of electrical machiners. posals for the supply of electrical machinery on hire purchase system were sanctioned by Government in September 1940 and the response from consumers has been very considerable

A satisfactory agreement was reached between. Government and the Aluminium Production Company of India Ltd, towards July 1940 whereby Government agreed to supply 4,500 kW of power from the middle of 1941 and 7,500 kW by the middle of 1944 for an Aluminium smelter plant to be installed near Alwaye. The Company will be requiring another The Company will be requiring another Alwaye block of power aggregating to a total of 14,000 kW for bringing their factory to its fullest output Government have agreed to make this block of power also available as soon as agreement was circumstances permit An agreement was recently reached with the Cochin Government for the supply of power for the entire require ments of that State The demand from this source exceeds 3,500 kW

The agreement with the Aluminum Production Co and the Cochin State has necessitated the full development of the Pallivasal Hydro Electric Scheme so as to bring the generation nd transmission capacity to cope with their large demand. This development will consist of the installation of 3 further generating sets of 7,500 kW each, 2 more penstocks and the provision of adequate storages, in the upper reaches of the Mudirapuzba river. Two more 66 kV transmission lines from Pallivasal to Alwaye are also proposed to be constructed. Alwaye are also proposed to be constructed

The total capital expenditure on the Project till the end of the financial year 1941 42 was 148 79 lakhs To meet the anticipated power requirements. next ten year-Neriamangalam and Sengulam

Works in Madras

The Pykara Hydro Electric Scheme an andertaking of the Madras Government was commenced at the end of 1929 the first stage of the project being completed at the end of 193 The waters utilised for the development of the scheme are taken from the Pykara river which drains from the Nilgiri Plateau having a catchment area of nearly 38 sq miles

The Scheme utilizes a fail of about 3 100 feet available in the p saage of the Pykara river in the Nilgiri District The flow though perennial is very irregular and often drops to vaines around 0 cus es during the dry season. The topography how ver mbraces a number of feasibl storage sites which could be develop d seconding to the growth of power demand. The e-timated potential capacity of the full develop ment is sround 40 000 kW continueu. The initial development utili ed the regulated flow of the river with small storages of 58 million cul e feet fu the forebay and 6 million cubic feet in the Glen Morgan Reservoir which is the first storage ite

C'vil Werks - Water from the intake of the riverisled by a flume to the forebay from whence it is led through a sin le 78 diam ten steel pipe 1000 f et jong to a surge tank at the he do of the penstock consi ting of two pipes each in three sections of 27 inches. 4 inch and 1 inches in diameter and a total of about 0 300 fet in length

Power Station —The initially installed plant comprises of three 7 810 kVA 3 phase 600 pm altern tora coupi d to 10 000 H P pelton wheels Power is generated at 11 000 volts 60 cycles and stepped upto 110 000 volts by means of three 7 810 kVA 3 phase 11 kV/65 110 kV tr nsformers

Trau muss on & D stribut u—Powe is fran mitted to Colmb tore which is the main receiving station as also the chief io d ent e by mean of a 60 mile doubte circuit 110 kV line. The line is the n ext nied at 66 kW to Profe Tel bloom to Market when the strip is the strip in the line is the next nied at 66 kW to Profe Tel bloom to Market when the line is the next nied at 66 kW to Profe Tel bloom to Market when the line is the next nied at 66 kW to Profe Tel bloom to Market when the line is the nied at 66 kW to Profest Tel bloom to Market when the line is the nied to the nied to the line is the nied to the nied to the line is the nied to th Frode Tri hinopoly and Negapat m a di tance of nearly 00 mil s from Colmbatore But the loads at the latter places have rec utly been transferred to the M ttur Scheme which came Into operation in June 1937. Also the 66 kV system has system has been extended to Udumalnet Sembatti Madura Virudhungar ete a distance of about 145 miles A 66 kV lime from the complete a los Kollpatti has also be n into operation in June 1937 completed

In addition to the above m in transmis.ion lines, considerable lengths of fl _2 and S3 kV distribution ii have been on tru ted farifullarily in have been on tru ted particularly in the Commariore Madura and Ram d Districts At all loads c utresstep-down substatifys has e been countrust d with the necessary transformers a d switcher. At Madara whi 1 is an important station two 3 000 k) A synchronou condeners are in tailed for ensu i g proper v liag regulation

"Pikars Scheme Extensions -- To provide problem Extensions -- To provide provide problem Extensions -- To provide provide provide provide provide problem Extensions -- To provide

over to 110 kV aperation to suit the increased load demand The installation of . further additional sets of the same capacity and one additional pipe line is under consideration

The rapid growth of the Pykara load in 1934 necessitated the e-rly construction of the Mukurti D m which i the first large storage contemplated in the original scheme This was sanctioned in January 1935 The work was commenced in January 1935 and completed in The Dam as compl ted with open June 1938 pill way stores 1 400 million cubic feet of water but the c pacity is being increased to 1800 m llion cubi feet by installing automatic gat nv r the Spillways A furtier increase of 000 million cubi f et stor ge will be ebtained with the construction of a dam across the Pykara rl er a a final stage exten on

The financial position of the Pykara System is most satisf ctory. The third year revenue was more than that expected in the tenth year of the forecast and the system has proved a so the forecast and the system has proved a spl adid investment to the State. The peak load on the system is 30 600 kW. The gross revenue was approxim tely Rs. 49 l kbs. 1 1941 4. The indust ial development at Colmbators accounts for more than 50 per cent of the total load and also the high load c ctor of the station

The Mellur liydro Electric Scheme --Electric Scheme provide n interesting contrast to the Pykara Hydro Electric Scheme Tra Mettor Stanley D m one of the largest structur s nd Its kind in the world is 176 feet hi h and can impound a total of 03 500 million cubic feet of water This storage is primarily for irrig tion purposes but p rt of the wate let down for irrigation is utilised to the best advantage for the generation. f hydro electric power

During the construction of the dam four castlron pipes 8 6 In diameter were built int the structure and equipped with the nece sary val e gates sereen and other fittings Each pipe is designed to discharge a m lmnm of lmnm of 50 ca ecs for power purposes

The fi st stage of de elopment providing 3 units of 10 000 kW each was sanctioned in 103 and the pow r station construction commenced in the latt r part of 1935. The station commenced aperation in June 1937.

The appraising head vari s from 160 feet at full re erv is I v I to a mi imam of 60 feet. The average head is 135 feet.

As the potential nutput of the Mettur station very variable d to the wide variations in head and discharge three clas es of load are adopted. These a

 Primary power available at all times
 Second y power subject to restricted in dry ment's but which can be made luto rumary pow e by the assistance of the xisting Pylara t tion a d by the int rlinkin of th Madra Steam 5t tion

(3) T rtlary power generally available for left menth in the year. The scheme applies power to the di tricts of Sai m Tri him poly T fore voril Arcot S uth Arcot Chittoor and Clingteput.

and two 1986; MA 11 kV/110 LV tran furners were added 1 1933 and tl lyking immediately below the Mettur Damand in It are to matatore transmission in has been claimed in we installed there 1,200 kVA 50 rpm.

generators coupled to overlining type twin horizontal Irancis Turbines one on each side The turbines operate under a variable head from 60 to 160 feet developing a maximum of 16,000 HP caeli. Power is generated at 11,000 volts, 50 cycles, 3 place and stepped upto \$6,000 volts (110,000 volts later) for transmission to various load centres

Transmission and Distribution System -Power is transmitted to Singarappet in the north and Lrode lu the south by means of two 66/110 trunk lines (a total mlience of 100 mlies) At Prode tine taking off from the power station Mettur System is linied with Pykara network and both stations can work in parallel as and when operating conditions demand 66 kV lines have also been extended to Vellore, Thu vannamalai and Viliupuram, a distance of about 140 miles

Considerable lengths of 11, 22 and 33 kV lines have also been constructed or are under construction for extending power to various places

At all important load centres out-door trans former stations are provided for stepping down the voltage to 11, 22 or 33 kV as required. At Trichlnopoly which is an important station in

the southern area, two_2,000 kVA synchronous eondensers are lustalled for ensuring proper voltage regulation

Mettur Scheme Extensions — The peak load at the Mettur power house has already risen to about 14,000 kW

A 4th generating unit is being installed for increasing the capacity of the station to meet the load demands successfully even during periods of low heads in the reservoir and to afford greater relief to Pykara in emergencies

Hydro-Electric Scheme -This is the third hydro electric scheme to be under-taken by the Madras Government. The scheme was sanctioned in 1938 and has just commenced operation by the end of 1943

The scheme utilizes the fall of about 330 feet in the passage of the Tambraparnl river in the Tinnevelly District A reservoir of 5,500 million cubic feet capacity has been created by the construction of a masonry dam across the Tambraparni river in the foot hills of the Western Ghats above Papanasam in the Tinne veliy District

The following are the main features of the seheme

- 176 feet lugh masonry dam eonstructed on the Tambraparni river just below where it is joined by Kariar The reservoir so formed provides a storage of 5,500 million cubic feet and water will be drawn therefrom by means of two 8½ feet pipes embedded in the dam and fitted with valves to control the flow
- (b) A diversion weir located lower down the river near the head of the Papanasan Falls, which provides a small storage of 28 million cubic feet for daily regulation
- Two 9 feet diameter steel pipes leading water from the diversion weir to the headworks about 3,500 feet long Only one pipe has been installed in the first stage.

- (d) I our 69 inches penstock pipes, each (0) feet long leading the water down the hill slove from the headworks to the power station below Only three penstocks have been erected in the Arst etage
- The power house is situated near the Agastra temile at the foot of the Papanam I alla. The gross head developed is 300 feet The keneraling plant will comprise four on gr p m , 7,250 ky 1, 11 by, 50 cycle, 3 phase vertical generating sets each coupled to a vertical type I rancis reaction turbine of 9,850 BHP Only three units have been installed initially
- extends system transmi--ion This system Tutfeorin, Kollpatti and Madura is linked with the Pykara-I lectricity at Madura Construction work on the second singe is expected to be taken up shortly including the erection of the 4th generating unit

Machkund Hydro-Electric Scheme-The Madras Government has under consideration the development of the Machkund hydro electric project on the borders of the Madras and Orlsen Provinces with an installed capacity of 51 750 kW initially, increasing to 103,500 for meeting the future power requirements of the Andhra districts of Madras and Orissa

Works in Kashmir

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which its current supply airead; plays in the life of the countryside, is one installed thirts six years ago by the Kashmir Durbar utilising the river Jhelum, near Buniyar about fourteen miles from Baramula. The head fourteen miles from Baramulia The head works of the Jhelium power installation is situated six and a haif miles from the power house, at Mohora and the ninh connection between the two is a timber flume. The books and the forehear at the deliver and of works and the forebay at the delivery end of the flume have a expacity for carrying water sufficient for the generation of 20,000 electrical horse power. Four pipes 792 feet long lead from the forebay to the power house and from forebay to waterwheels there is an effective head of 305 feet. There are four horizontal water-wheels engineering on the same shaft to a water-wheels each coupled on the same shaft to a 1,000 kVA 3-phase, 2,300 volt, 25 cycle gene rator running at 500 r pm The power house is of sufficient agreedy to allow of 15000 kW of sufficient capacity to allow of 15,000 kW reperenting plant being installed within it transmission lines run side by side as far as Baramulia, 21 miles from Mohora at which point one terminates The other continues to Srinagar, further 34 miles The installation at Baramulla was originally utilised for three floating dredgers and two floating derieks, for dredging the river and draining the swampy countryside and rendering it suitable for cultivation. The lighting of Baramulla has been taken in hand with satisfactory results and the power food is with satisfactory results and the power ioad building up At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but also for heating. The whole of Srinagar city is now electrically lighted and there are a num ber of power loads. ber of power iords

Besides the Jhelum power installation, there are two other schemes, the Muzafferabad hydro electric installation utilising a tributary of the er Kishen Ganga and the Jammu hydro ctrle inst llation. The Muzzaferabad power use has one 330 H IP pelton wheel directly upled to a 110 kVA 3300 vol. 50 cycle errator. This serves Muz feerbaal town d Domel on J v. Road. Tho Jammu power use upploys five generating sets. Of these we employe five generating sets. Of these e 26 kW set is driven by a Dies I oil engine d the remailing four generating amon mselves 1 65 kW are driven by water

In addition to the above schemes new sources In addition to the above schemes new sources power capable of feeding I rge cale man 1 or re re be ng e plored in view of th bestaning large scale indust les in Jammu and Asshmir at being explored The State has Iready ovided funds from cap lad expendit in and rged to revenue for the impro-ment of 8 States lectrical system. The ne e skty ra gm nting the power supply in the Jamman being ma y a steam turbin driven generat g plant of 1500 kW capacity is being installed beig located at Miran Sahib nd en neet d ith Jammu by a \$ 600 volt line This will able accessary upply of power being made ilable f r Jammu Jammu Cntonm it Miran Sahlb ind strial sation. The cost of scheme in the cost ie schem is e timated at Rs 8 41 00

A hydro-election scheme with an ultim te-pacity for gener inte 1000 kW by h rnesstin slind filter in G nderb is als und ry and as mile sch me for rat while other minimum is now in pror at while other minimum is now in pror at while other and the state of the scheme is a second of the deline state if in The utilization of the Cle ballver for developing a hydro-elect is echeme is gescale is also under confidention.

total c Unit d Provinces W rk to m station at Hardu gunj with an installed apacity of 20 000 kW is ne rung comple on. Besides e pplyin some 93 towns the current for light and fans and min r the current or field and faus and min riduties the grid povidee energy for it has been used to be seen that the seen of the se n the urb n centres

In estimati as into the elect leal and financi l

decided to proceed with the reconstruction of the power station at Badrabad on the Ganges canal in reasing its capacity to 7500 kW and the de elopment of the Sarda Can I Hydro-Electric 3 heme with an installed cap city of 55 00 kW. This station will be nitimately linked up with the large steam station at Cawnpore

Pum ba Hydro-Electric Project

Situated on a spur of the Dauladhar Range at elevations anging between 6 000 and 4 000 feet above sea level and connected ly means of a tunnel over 15 000 ft long are the works of what was origin lly known as the Uhl River Hydro Fle tric or M ndl Scheme which is now oper ted by the Phinab P W D Electricity Branch with its Headqu tere at Lahore

This project owes its origin to the need which began to be felt in the Punj b during the War of 1914 18 for making energy available for industrial and gricultural purposes at tates cheaper ti an were then prevailing

The alte was discovered in the year 192 A detailed project was prepared by 19 3 Work on the co struction of the first tage of this hemo was tarted in 19 6. The total capital outly on the scheme to the end of the year 1939 40 has be n Rs 6 8 6 lacs

Due to the extens! a nature of the construc the works it was found necessary to build two smil temp rary Hydro ele trlo power stations one at Dheiu near Sh nan and the other t Thui near the headw k at Brot which we e link d to ether nd the combined installed capacity was 1440 kW

Water is withdrawn from the Uhl and the Lamba D g Riv at B ot and conveyed by a 9 ft 1 ternal diameter con rete lined iroular pressure tunnel which is one of th longest tunnel in 1 di d is the fir t steel m the tunnel in 1 di d is the fir t steel m tle tun el to be built l Asia The tunnel is ab ut 3 miles long and is de igned f r a rm l full 3 miles long and is de igned if a mission dicha go of 600 cus es (but it can carry up to 800 II from 1 f ds st el penstocke which run down the lope to the Si an Fowe St tion near Jo i darn ar (V) dl St te) so as to utilise 1800 ft of the total fall thus n erting the snow f d water of the Uhl and its t ibuta y into ele trical e ergy

The ittial last fled a pacity of Shanan Powr Station i 48 000 kW. The plant con elsts of four 17 000 kW. The plant con running t 48 5 rpm each dri en by a sigle jet of wite and connected to a 1 000 kW 11 000 voit 3 ph e 50 cycle alteroat r

From the Shan n Power Station energy gen r ted at 11 000 volt is stepped up to 13 000 oits which is the highest voltage ad pted for this purpos in Indi The tr and picet for time purpose in finding mission system c mpriles a d ubla circuit 13 kV trunk t a nt. lon ii e cupport d n teel towers 80 ft hi h no mally et 1 000 ft aprit but with apan extend g even upto 3 360 ft in the hii. This ii e supplies subst tions at Kangra Path nkot Dhariwal Amritsar and Labo e

and the first and the field leat and maner!

A ungle of ull as xy time assorting the first and the f A single cir uit 13 kV line also runs from while a similar line from Lahore serves substitutions at Shahdara, Shelkhupura, Chuharkana, Moldan, Jaranwala and Lyallpur respectively

From these various substations 11,000 volt lines radiate to supply between them about sixty towns and villages In addition to serving 25,000 consumers directly from its own mains, the Branch also furnishes bulk supplies to the NWR for its own workshops and to the PWD Central Workshops, to two licensees (the Amritsar Municipality and the Jullandur Electric Supply Co) and also to the Kapurthain State at two points. The connected load at the end of March, 1941 was 41,820 kW, the total number of units generated being 82,290,232 and the revenue assessed 32 05 laes for the vear 1940 41

Investigations are on hand in regard to the development of a number of hydro electric schemes in the province. The construction of a hydro electric station at Rasul with an installed expects of 22,000 kW has already commenced. This scheme, though intended primarily for development of hirgation will be linked in with existing hydro electric system. be linked up with existing hydro electric system to Improve the operating conditions of both systems

Schemes are in hand for the extension of the 66 LV transmission system to serve new substations at Sialkot, Daska, Wazirabad, Gujranwala, Kamoke, Sangla and Clink Jliumra, respectively In addition, these schemes also provide for the reconstruction or alteration and expansion of the existing substations at Juliundur, Goraya, Ludhiana, Ferozepur, Chiharkana, Lyallpur and Lahoro, respectively, to enable them to cater for the rapidly growing demand for

electricity The possibility of introducing tube wells irrigation in certain parts of the Punjab adds to the interest of hydro electric projects in this province This would enable thousands of acres of uncommanded land to be brought under cultivation thereby greatly increasing the food supply of the Province

Nizamsagar Project —The Hyderabad State has deelded to proceed with the Nizamsagar Hydro Electric Project as an ammediate postwar measure for bringing hydro electric power to Hyderabad City The scheme is intended to the water stored in the Nizamsagar day utilise the water stored in the Nizamsagar dam and it is expected that electric power varying from about 1,500 kW as the minimum to about 11,500 kW as maximum could be generated. It is proposed to instal 2—4,000 kW hydro electric generating sets and to construct 80 miles of 66 kV transmission lines for supply to Hyderabad City

Tungabhadra Project -An agreement has recently been reached on the apportionment of the waters of the Tungabhadra river between the Governments of Madras, Mysore and Hyderabad For the share of the waters, will be possible for Hyderabad State to utilise three drops in the irrigation canal for generation of hydro electric power, giving an initial output of about 15—25,000 kW

Future Hydro-Electric Projects—There are a number of hydro electric power sites on the Manjeera, Kaddam and Purna tributaries of the Godavarı and on river Dindi, a branch

and supplies substations at Kasur and Terozepur of Kistua river as well as on the upper and while a similar line from Lahore serves sub- lower reaches of the Kistna The actual power potentialities of these sites need detailed investigation

KOLHAPUR STATE

The Kollinpur State has embarked on the generation of electric power from the water stored in the Radhanaguri dam which has recently been rused to the height of 85 feet. The power house will be slituated at the foot of the dam and the Installation will comprie 4—1,200 kW Kapin sets operating on 65/125 feet head The power will be transmitted by means of 32 miles of 33 kV double circuit lines and the state of 32 kV double circuit lines water. to Kollivpur City for augmenting the water supply to the city and take over the load from the existing oll engine station. The scheme is also intended for the extension of the Irrigation aystem in the State by the installation of about 240 electric pump sets in the area served by the transmission lines

HYDRO-ELECTRIC DEVELOPMENT IN N.-W F P.

Malakand -The possibility of generating electricity at Malakand was first recognised some 25 years ago. The waters of the Swat river to the north of Malakand are utilised for fertlising the north eastern part of the Peshawar valley by driving a tunuel known as Benton tunnel under the Malakand pass and constructing a can'll it is recognised that by extending it by another half a mile upto a point above the upper Swit earnly, advantage could be taken of a natural fall of some 250 feet for the production of electricity This scheme was sanctioned in 1934 and a new tunnel known as Burktt tunnel, 12 feet in diameter, was constructed From the tall of the Benton tunnel, water is discharged over a regulating weir into the new power tunnel from which it emerges through an power tunnel from which it emerges through an open channel with waste weir into the forchas At the remote end of the foreby, a spilling syphon is provided to allow evacuation of exects water automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system automatically and a system and a system automatically automatically automa water automatically in the event of sudden changes of load From the forebay the water flows the mater and the sudden flows the mater and the sudden flows the s flows through penstock pipes 515 feet long with external diameter varying from 61 inch at the top to 55 inch at the bottom into the power house situated below at Malakand

The available discharge is 200 cusees with a tal head of 250 feet. The generating plant total head of 250 feet. The generating plant consists of three reaction turbine sets each generating 3,200 kW at 11 kV, 3 phase 50 cycles. The pressure is stepped up by trans formers to 66 kV and power transmitted by a 30 mile double circuit line to Mardan and thence by 74 miles of single circuit ring mail to Peshavar Contennant to Peshawar Cantonment, one line passing through Charsadda and the other through Risalpur and Nowshera Thirty Seven mile of 11 kV branch lines are also provided for the province the provi serving important towns in the province.

The scheme came into operation in 1938

The hydraulic works and the power hous have been designed for the installation of the more generating sets at a future date, but one set is proposed to be installed as an immediate post were more set in the set in t diate post war measure with the extension of 66 kV lines from Nowshera to Wah for supplying the eement works

Local Self Government

A field of the administration of India profoundly affected by the Reforms of 1919 revenue. He apress to the primitive headship and synin by the India Act of 193 was of the trible or clan by which the village was that of local government. Ill masons of the originally settled subject tr a i rred to Intian mini ters and und rihelr leadership considerable d velopments have been essayed On the whole the progress of local govern ment in I dia for the past quarter of a c tury h been encouragio but nneven As the annual repo is of provinci I governments as we annual repo is or province is governments show, there are some towns which I are shown a real sens of responsibility in civic affairs and I was admini tered them efficiently. In a mino-rity of cases however the local eity fath is have si nally falled to discharge their dutie to the public be cfit with the result that they have been supersed d a d the conduct of municipal affairs has reverted to offici I cont of The greate tsuece ses ! e been won in th P esiden cytowns and particularly by the Municipality of Bointa; The difficulties in the way of progr s Doubla) The dimenties in the way of program we manife t Local government I ad to b a cratio—ihede little of authority from the Cov ment to the local body and that to a manife that was not been as a constrained. pror! who for centuries had he n accustomed to autocratic administration Again the powers entra led to local hodies were i i nificant and the financi is pport wesem if Ther are low ver me yencouragin sings of improvement

Throughout the greater part of Indie the of divident organisation and from the vide as are hullt up the larger administrative litter-labels sub-divi lone and districts

The typi al Indian village has its central readenti I site with an open space for a pond and a cutil tand Stret hing round this success lie the villa c la da consisti g of a sacress he the villa c is ds consist to n are that d area and (very oit) grounds for failing and wood-cutting. I ided tog the rise little community with its own organisations de em mert will h differ in h ract in the various typ of vill get its body of d tall de stomary and trail rs It should be noted how a r th t in certain portions of India s g in the greater Part of Asiam in Lastern Bengal and on the west-verted Asiam in Lastern Bengal and on the west-coast of the Madras Pr ide cy the village Mb radestribed does not texist the people in in a mill collections of houses or in a parat tomerteads -{Gazetteer of Ind a }

The will get also described (of which there are 00 000 in Indi) I il under two main tlasers etc -

Types of Villages.—"(1) The switch or raity or raity watt village which I the prevail at form in cashe Northern India H re the revenu is a serie on Indi III cold alone There is to hot respondibility and S the vill was L and want land may be broug to d th tion the | will the permission of the | come | A could be described as described on the | come | Public From wet western a headth in he d

() The joint or landlord village the type prevalent in the United Provinces the Punjab and the Frontier Province Here the revenue was forme ly assessed on the villag as a whole its incidence bel g disiributed by the body of uporfor prop ictors and a certain amount of collective responsibility still sa rule rem ins The village site is own d by the p opri tary body who allow resid nees to the tenantry prilsans trad re ao l oth rs The waste land is allotled to the villag and Il wanted for cultivation is partitioned among the shart holders The village government was originally by the punchayet or group t h ads of superior families I later times one or more headm n have been added to the org nisation to represent the villag in its dealings with the local authorities but the artific lai character of this appointment as compared with that which obtai sin a ralyatward villago while the which obtal sin a rajyatwari villago be evidenced by the titl of its holder, which is g erally lambardar a verna ular o rivative i om the Eagli is word number. It is this type of vill ge to which the well kyown of serlption in Sir H. Maine a Village Communit, is alone applicable and her the coproprietors are in general a local eligarchy with the hulk of the village population as tenants or labourers under them

Village Autonomy -The Indian villages formerly pos cas d s i rge d gre of local an tone ly since the ruling dynasties and their local representatives did not as a rul toncern them I es with the ladivid al cultivators but them I es with the individ al entitystors up regarded it willage as a whole or a me large isadholder at respon libe for the proposal of oil boosl out. This autono y has now dis appear d owing to the et bil h e t of local el il and crimin I cout at the present revenue adpolice ora; lasto the development of com-munication. The growth of individualism and the peration of the individualy systems system which is at ading even 1 to north of Indi he erthels the villag remains the first unit of dmi tr ton the pri cipal villag func-tion ries—the hear in the accountant and the viling watchman-ar largely ntillsed and paid by Government a d th re to still a large degree of common village feeling and interests

Punchayels -- Pr some years there was an active propaganda in favour of reviving the Dece tralisation Commi ion of 1908 made th f flowing special recommendation -

While therefore we desire the d velopm at cl p arkayet syst m and consid r that the objectio med thereto are far from in ur m table w record that such a system can only be risdually a d to tatively sind d that it is impossible to a great any unif year and d first method of procedure. We think the form and vests in a h redit sy he d and d frite method of procedure. We think han a own ty an old remacular name a . In that a commencement, ho il he made by five. pr bott on it apo t testomist, at its and e train loads to simited I suchtake for these villages in which circumstances are most favour- private citizen as chairman able by reason of homogeneity, natural intelligonce and freedom from internal fends powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the eircumstances of dillerent villages. and there is a considerable conscusus of opinion that this new departure should be made under the special guidance of sympathetic officers

These recommendations, however, were never implemented and the nunchanet system, while it still exists in non official form, is tend-There is still the possibility that ing to decline it may be revived. For present purposes it is unnecessary to refer at greater length to the subject of village self-government Various measures made been purchase The is too early to say what life they have The passed a Village Various meisures have been passed, but it Punjab Government has passed a Village Punchayet Act, whileh enables Government to establish in a village, a system of connelliors to whom certain local matters, including judicial power, both civil and criminal of a minor In Biliar a Village character, may be assigned Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases Other Governments have taken steps in the same direction

Municipalities - The Presidency towns had some form of Municipal administration, first under Royal Charters and later statute, from comparatively carly times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces The Acts provided for the appointment of commissioners to manage mull cipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated and from the point of view of self-government, these Acts dld not proceed It was not until after 1870 that much prowas made Lord Mayos Government, gress was made in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the manage ment of funds devoted to education, sanitation, medical, charity, and local public works New municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of muni-cipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a!

Arrangemen were made also to increase municipal resource and financial responsibility, some items of provincial revenue sulted to and capable of devi lopment under local management being tranforred, with a proportionate amount of previnc expenditure, for local objects The general principles thus laid down have continued to gover the administration of municipalities down t the present day As the population of mot Indian towns rises, so does the number (municipalities increase For the most par they display a lively interest in civic affairs an are actively engaged in improving the cond tions under which their fellow citizens live

District Boards -The duties and function assigned to the municipalities in urban areas at in rural areas entrusted to district and loca In almostevery district of British Indi s we in the province of Assam, there is a boar subordinate to which are two or more sub-ditrict boards, while in Bengal, Madras and Bha and Orissa, there are also Union Committee

As in the ease of municipalities the tendence has been throughout India to increase the cleeted members at the expense of the neminated and the official members. Boards are practically manned by Indians most important item of revenue is provincia The principal objects of expenditure an education which has come remarkably to the front in recent years and envil works such a roads and bridges Modical relief is also sharing with education, though in a less degree, the lion's sharo of the available revenue

The annual audit reports on the working o local self-government institutions in the variou provinces reverl on the whole a disappointing record There is a general reluctance to increasi local taxation and several municipalities and eonspleuous for their negligenee in recovering arrears. There are, of course, some honourable exceptions, in Bombay Presidency, Ahmedabri and Sholapur furnish encouraging example In 1939 a Local Self Government Committee was appointed by the Bombly Government under the chairmanship of Professor V G Kale The Committee made several recommendations To overcome the general reluctance to impose additional taxation the Committee suggested that taxition by local authorities was likely to be better appreciated if it were associated with specific services rendered to the people, the idea was to carmark yields of certain taxes for definite purposes. The Committee also laid for definite purposes The Committee us down the principle that citizens generally should down the principle that citizens generally should only understand that amenities can be provided only if they are paid for, thus a compulsory education cess was suggested to finance ambitious educational schemes.

In August 1940 the Bombay Government convened a conference of Presidents of all important local bodies at Poona to consider the Committee's report Committee's report under the presidentship of J A Madan, 105, then Adviser to the Bombay Governor The conference was opened by Sir Roger Targets by Sir Roger Lumley who paid a tribute to the Committee for the careful manner in which their investigation was carried out and for the balanced judgment which had been brought to bear on the complicated problems of municipal administration. The conference discussed the recommendations of the Committee and there was analmity of opinion on m large number of the tion of eocial improvements In Bombay Committee s propos is Theo propos is how Calcutta Lucknow Allahatad Isho e and ever dill remain to be implemented by the Caw pore the Improvement Truets develop Bombay Government

of the district local heard

In September 194 the Government of Bombey made new rules pre-cribin to powers of the Emptoy made new rules pre-cribin to powers of the Emptoy made new rules pre-cribin to powers of the Emptoy made new rules pre-cribin to powers of the Emptoy made provided the control of the Emptoy made provided to the requirement every recentary with how the care the samety bond for R Owith one sturtly of the amount the horst tab is task. ed important activities which are described in a execute a surety bond for H 60 with one to lum clearance in old Delhi City and to the surety of like amount the bond to b in fav ur to lum clearance in old Delhi City and to the of the district local heard body h slat ly undertaken an mr bitious scheme Improvement Trusts —A notable feature cost g many lakes of rupees for the abolition in the recent sanitary history of India is the lot sluma and the re-honeling of disposeessed activity played by the great cities in the direct workers

Calcutta Improvement Trust

d by the Loc i Go ernment During the 31 Years th t it h s now been at work the furth has carried through m ny improvement schemes both in the city proper and the suburb n areas which have changed the face of Calcutts wholly and beyond your iton. It has con tructed over 67 miles of m w road 37 public p ris co erin, n area of about 504 8 arr s and a large lake with 80 _ actes of britantial. el water are

Calcutta Improvement Trust

The Calcutta Improvement Trust origin tell from a medical enguly into the sanity of the continuous and the continuous B zar o e of the still existing dirtles' spots in the he rt of the city to Circular Road near S and h Skithon T illu second section S and h Skithon T illu second section Road in a quisition of 1 and is complete—cost of acquisition to January 104 1 about a croc of a thirty thinh Lagines ing Works fo this few which in 1 q istillion I complete cannot be proceeded with for van of material These are in th immediat on truction procramme of the transition of the state of the transition of the state of tle s pern it

In the north of the City two large and In the Born of the city we large and In Central Calculta m my highly insanitary in the born on the city we large and in Central Calculta m my highly insanitary in the most of the most of an impured type laid of the most like other Costsport-Chitpore open space important of which is the Chittaranjan Arenne memming 53 bighasand 150 ity. respectively The Cossiporo Chitporo Park has a small arti- to the town in been widened to 150 ft for a ficial take and football grounds four for schools and clubs of North Calcutta Few tennis courts are also provided The Desirabandin Park has also been provided with play-grounds Several wido roads have been laid through this highly congested area. The approaches to the City have also been adequately widened

Good progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the ones A 84 ft existing road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been constructed, which provides a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right aeross Calcutta from Strand Road on the west to Circular the Road on erst interesting small work is the extension of a storm water sewer from Jagannath Ghat Road to Strand Bank Road carrying with it the construc tion of a 60 ft roadway Another important scheme is the new 60 ft road between Darpanarayan Tagore Street and Patimraghat Street which, with the side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east and-west diagonal road through Ahiritoilah. The widening of Kalakar Street represents the most important effort yet made to penetrate the inner recesses of Bara bazar and provides a new 60 feet road from Harrison Road to Toggangath Charles and the control of the Po Jagannath Ghat Road with short lengths of widening of cross roads in accordance with existing alignments Running, as it does, through an area with a population of over 200 to the acre and closely built up with four or five storeved houses, the gross cost of acquisition Demohtion was of land was exceptionally high of greater difficulty than usual owing to the height of the buildings and the narrowness of the lanes

It has been made financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazaar and other costiy and thicklypopulated commercial areas by the passing of
the Calcutta Improvement (Amendment) Act,
1931, which empowers the Board of Trustees
in certain cases to levy betterment fees on
properties which abut on to a new or widened
street prefered of acquiring the proporties street instead of acquiring the properties

The Government in Notification No 592M, of the 24th April, 1939 intended the powers of the Trust to an arca in the Howiah Munici pality for the purpose of constructing the Approach road from the west to the New How rah Bridge The Main Approach Road running from East to West was constructed at 84 feet in width with a 54 feet earningency and from the Bridge Approach to Deben Road or new the Bridge Approach to Dobson Road a new 70 road with a 50 feet carriageway with two low level roads had been constructed

The Suburban Areas to the south and southeast of Calcutta required greater attention and extensive development schemes were under Several open spaces and squares have been laid out in various parts A large number

length of one mile and 100 ft for a length of another mile It now gives a most pleasant drive from Chowringhee to Tollygunge A 100 ft wide East to West road, from Ballygunge Railway Station to Cheth Bridge, and for recreation an artifleral lake of 167 bighas with adequate grounds have been constructed. The "Lake trea," as it is now commonly known, consisting of 1 and originally acquired for the provision of earth and partly for a statutors open space for one of the Trust schemes, assumes more and more the nature of a Model Park, and comprises well laid out football grounds in addition to its The Trust pursued the amenities policy of planting and embellishing it as a place of public recreation for south Chieutta and found scope hero for various experiments in Park technique, of which the most interesting was a Children's Pool properly designed for the purpose and helieved to be the first of its kind in the Indian city But all its activities have now come to a stop and must await the return of better times, as whole of this area has been requisitioned by the Government for Military requirements

The Southern Avenue Scheme was approaching completion but came to a stop on the outbreak of war with Japan Increasing difficulties due to control of materials and to the demand for road rollers for military purposes meant a restric tion of road construction which was accentuated by the exodus of labour from Calcutta area with the large lake and its amenties has already proved very attractive for residential houses and almost a new city is springing up, relies in a considerable the constant of the main reinering considerably the congestion in the main From the junction of Southern Avenue and Gariahat Road, the work of widening Gariahat Road and Old Baily gunge Road upto Sved Ameer All Avenue has also been held up for the same difficulties

The central section of the eastern part of Calcutta has already been developed by the Trust into a heautiful residential area with the amenity of a large park near Park Circus known as Eastern Park, measuring 65 bighas, with large playing fields for football, tennis, etc The Gorachand Road Scheme providing for the completion of the postbare providing for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally has been completed and the Schemes providing the wide Avenue on its north was taken up but had to be temporarily suspended

The Trust pursues a liberal policy in the development of open spaces and recreation grounds The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres In 1912, Bompus, the first Chalrman of the Trent related out that In the Chairman of the Trust, pointed out that in the ratio, viz, about 9 per cent of its public open spaces which measured about 1,250 acres (in cluding the Maldan, the Horticultural and the Zoological Gardens) to its total acreage, Caicntta was almost on a par at that time with London was almost on a par at that time with London possessing 6,675 acres of public parks or gardens, while the possessing the parks of gardens, while the possessing the parks of gardens, while the possessing the parks of gardens, while the possessing the parks of gardens, while the possessing the parks of gardens, while the possessing the parks of gardens, and the parks of gardens are gardens. while its percentage exceeded that of New York, Berlin and Birmingham But it must be pointed out that about 1,000 acres of Calcutt's 1,200 Russa Road which forms the southern approach spaces in other parts of Calcutta were an urgent

on a spaces Of this the Dhak ris L le supries the most import at as will a tiest popular feature. The Last rn Lark at ost popular feature. The Last rn Lark at orachand area the Deshbandhu P rk and resipur Chitpur Open Spaces at 110 n rth of ie city ar the I reer of the parks I 11 nut eddes a large number of parks se tt re i th les ent troughout the elty ! Amon sicuous but very u eful acil liles in It is recer ! the adaptation of land acquired on all m nte I future street. whi h will not be required for he purpose for several years as a mporary cereation grounds. Thes play ground will of the most part individually small in an a see ery popular with hildren

For the hon in of ih displaced popul ion the Trust 1 s undertaken on a 1 rg scale he followin ael emea ---

In the early stages three blocks of three toreyed tenement buildings containin 5 ttable rooms were built in Wards Institution itreet for the poorer classes it was ound however that the persons displaced ref red to take their compensation and mirrate a some place where they could erect bastis of helr own the class of structures they were iccustomed to live in These chawls were hen filled with persons of limit d means
10 school masters poor judents elerks and
persons of the artisan class 18 many as 1 00 some of the action case is many as a series of the build are including land cost Hs "44 368 and are 41 86 very low rents—ground floor rooms at Rs 4 per mensem and top floor rooms at Rs 5 per measem each room measuring 1 ×1 with a 4 fl verandah in front and openin on lo a central possage 7 11 wide

As Ih s ch wis failed to attract the people As in a co wis railed to averace the propose for whom they were meant the Board next lifted on experient in providing sites lor batters. Two sites with all tall cares of 16 blabs we acquired with the area of 16 mittola Municipality but they falled in attract because they were out of the way and were expensi e

Ka bala T nk La e Re h u mg Sch me -In this cheme 4 det hed nd 35 emi-detacl ed houses were b lit. The detached houses were sold as this acheme never became popul r with the cass of tenants for will om they were originally inte ded Owi g to Ihis unpop larity the Bo rd f rther decided to thr w open to t na is of all classes 18 out of the rem I ing 35 semi det ched h ases. This change of policy howe er produced no effect on the le ti x

Owing to wa tof sultable ten to the entire dwellings in Kerb in Tank Re housing Scheme w sold by pri ate le in 19

Bw Str t R h g S h m — Seven blocks of buildings conts | ing n e roomed twn room d not three roomed uite has been can stru ted to re house Anglo-Indiana displaced by the oper tions of the Trust. Ti is scheme has proved a stikin oncerss

KETI BANDAR AND SIRGANDA wo other inlinor ports in Slnd Tiley are under he jurisdiction of the Principal Collector of Justoms, Sind Neither of them, however, is of importance to deserve sufficient mention

situated south of MANDVI which is Sirganda is the chlcf port of Cutch

NAVLAKHI is the Chief Port of the State of Morvi and has a fine situation on the coast of Kathiawar Ships anchor two miles from the pier Navlaklin is the terminus on the metre gauge line of the Moral Railway and is thus directly connected with Delhl, Rajputana, Gnjarat and Kathiawar The port is open throughout the year and has been greatly developed in the last decade

Bedi Bandar is the principal port in the State of Nawaiiagar, sltuated a few miles from the city of Jamnagar, at the head of a tldal creek some eight miles long, near the mouth of which is the roadstead called Rozi, in whileh occan going vessels he at anchor

There is at the head of the creek a spacious basin equipped with warehousing accommodation and railway connections offering facilities to merchants for the effective conduct of exten Goods are transhipped between sive trade the basin and steamers which he in the Gulf of Cutch by means of lighters which are towed up and down the creek by tugs as the state of the tide permits

The consistent encouragement of the Ruler and the number and importance of the merchant class in Jamingar with their trade connections at other places in Kathiawar and beyond, live all assisted in developing a large and important traffic

No merchandise is handled at Rozi landing stage, connected by road and rail to Jamingar, is used exclusively for mails and passenger traffic to and from Cutch

Port Okha, situated in a detached portion of Baroda State for distint from the Gackwar's main territories in Gujarat is dissi milar from other Kathiawar ports. It is an entirely modern conception, begun and completed with enterprise for the express purpose of It is an dealing with ocean going traffic and commodities

It has in a strategic position at the extreme north east point of the Kathiawar Peninsula, readily accessible to all steamers trading along The Harbour scheme has been well that coast designed, there is an excellent ferro concrete jetty, served by railway lines and trains, alongside which large vessels can lie at all states of the tide, and there are also swinging moorings for other vessels in a protective position. The wirehouse accommodation and rulway connec The tions are good Okha is far removed from the large centres of population, being 231 miles from Wadhwan Junction through which railway centre its traffic must pass

PORBANDAR The foreign trade of Porbandar was at one time prosperous, but it is now chiefly constwide

BHAVNAGAR, the capital of Bhavnagar State, hes half way up the Gulf of Cambay on its western side. The Gulf is defined by a very great rango of tide, attaining as much as 40 feet detailed it Bhavnagar, which is situated on a creek several miles from the open waters of the Gulf The port facilities comprise an anchorage 8 miles or more from the port proper, between which and large vessels at the anchorage goods are moved in lighters while the port Itself can accommodate small coasting steamers which lie on the mud it low tide There is ample ware house accommodation and good direct railway communication with the whole of India

> PRESIDENCY BOMBAY Apart from Bombay, which is the most impor tant Port in the Presidency, there are no other Major Ports, though there are a number of Mmor Ports at which trade is carried on in fair weather Among these may be mentioned Dhollers, Brosch, Surat and Bulsar on the Gujarat Coast and numerous small ports on the Konkan coast, the more important among these from the point of view of trade, being Ratnagin, Dabhol, Malwan, Vengurla and Honavar

> The Dhollera port is connected by road to the Railway Station at Dhandhuka at a distance of It possesses natural advantages and 18 miles is situated within convenient distance from the chief ecutres of trade and industry in Kathiawar Broach and Surat are well and North Gujarat known old ports

> The safest harbours on the Konkan coast are lagad and Vijazdurg in the Ratnagiri district and Karwar in the North Kanara district Details regarding the value of import and export trade in 1937 at these various minor ports are given below -

GROWTH AND ORGANISATION OF ENGLISH EDUCATION

An epoch in Indian educational history is university chairs for dynamic study. They were arked by Sir Charles, Wood's despatch in a sure of the dangers of a too literary course of Perhaps its most notable feature. In instruction, they hoped that the system of the emphasis v high it fall on the importance of primary education. The old lifes that the aducation imported to the higher classes of other would filter down to the lower classes was discreted. The new policy was boldly to combat the knorance of the people which may be considered the greatest curse of the country. For this purpose Departments of Public Instruction were errored on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1875, whereby most of the available public funds had been expected the available public funds had been expected the exception. ic funds had been expended upon a few Government relicols and colleger and instituted a policy of grants in aid to private institutions. It couplied the importance of encouraging the study of the vernaculars as the only possible media for mass education

Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affillating type of university then became the plyot of the Indian education system. It has Endoubtedly been of value in several wave it embled Government to select recruits for its service on an impartial basis it did much, through the agency of its Colleges to develop backward places, it necessarily deconversion of Indians to a zeal for western education, and it cost little at a time when money was scarce. On the other hand, they new universities were not corporations of schol ars, but corporations of administrators they did not deal disposition. dld not deal directly with the training of men, but with the examination of enndidnes, they were not concerned with learning, except in so far as learning can be tested by examination The colleges were fettered by examination requirements and by uniform courses, their teachers were denied that freedom which teachers should enjoy and their students were encouraged not to value training for its own snke but as a means for obtaining marketable qualifications. In certain important respects qualifications in certain important respects the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts, they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions, they recommended the establishment of

instruction they hoped that the system of education would rouse the people of India to develop the vast reso trees of their country

The incouragement of the grant-in ald system ras ediporated to an even greater extent by the I duration Commission of 1882, which favoured the policy of ulthdrawing higher education from the control of Government within certain limitand of atlaulating private effort. In theorethe decision was correct, but in practice it was irretrievably a rong. In its fatal desire to save money, Government deliberately necepted the inlitation bellef that schools and colleges could be maintained on the low fees which the Indun parent could be expected to pay And, ir the course of time, an unworkable system of dual control grew up whereby the Universities with no funds at their disposal vere entrusted with he data. with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to east a blind eve on the pri vate institutions and to be content with the development of a few favoured Government institutions institutions

The Reforms of 1902-4

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Go vernment over the universities, and on the part of the universities over the schools and colleges The Government retnined the power of cancelling nnv appointment and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sametion. The universities were given the responsibility of graphical recognition to schools. responsibility of granting recognition to scheels and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the bridges. by the officers of the Department of Public Permission was also given to the Instruction universities to undertake direct teaching func universities to undertake direct teaching line tions and to make appointments, subject to Government sanction, for these objects, but their scope was in practice limited to post graduate work and research. The territorial limits of onch university were defined, so that universities were precluded from any connect ion with institutions is ing outside those boun daries. Neither the Commission nor the Govern daries Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system

The items lati g to the Committee's Reports are mention d below

Hem & II -Report of Joint Committee of the Cen rat 1dt ry Boart I Ed rate a and Health o the p even on of hi nines in Ind 1

The Committee's recommendations covered

(f) The blind alouid be given a simple el nentary education to fit them to be skilled eraftsm n in a workshop for the adult blind The exi tin a hools re t animous that day ttendance to un ti factory

(a) Mintally defective and balkward blind lifter n have a special claim for conideratio as soon a the normal I lind have been firs ly est bil.hed 31 ny then respon t in tity The d finitely f ebl mind d shoul i not be place a slongeld normal children Some blind childre who may appear to be m tal retard tion they louid not be place tamong the definitely mentally difficient

(a) The trainin of d af mute blind children 1 highly apeci ii d and costly nd should not be mb rk q upon in India untit after faciliti s for the education and employment of the normal blind have been w il st bil bed

(ie) The Committee consider that for preciseal and economical considerations is to desirable to put trimary and middle bogs and cirks alould be pro ited witerest sumbers permit at the primary state however, a in the e of norm I children mix d classes may have to be rettle differenced in the control reasons. In any case it is considered directly desirable has from the middle stape onwards there should be separsto schools for boys and girls

The period of computory education of hind childr a when this pri ciple is applied should begin to the age of six and hould continue for two he as heyond, the lints prescribed for seeing child in a to the view to making up th of atxteen with probable educational deficiency due to ti eir handleap

(v) The general standard of edu tion in chools for the blind must be raised so ti t it fits in with the n tional scheme of ed cation and as the ducation and the welfar of the hlind is as much a function of the state as the education of other childre the re ponsibility must r st primarily with Government

(e) The teachers for ach ols for the blind should rec ive the same course of tr ining as the ordinary teachers together with some as he ordinary teachers together with some applies tary training to fit their pecially for their vocation. They should be on the me seat of pay but possibly with a his hattit is try to the dicretion of the appropriate authoritle

(vs.) Modern workshops in India should have section for the training of young adults

(1411) There should always be close co in University or College post. It would be operation between schools and employment de trable that those who will be required to services.

Recommendation of the Central Addition I wird of I ducation

The Board expressed their general agreement with the recommendations of the Committee and decided that as soon a the views of the Central Advisory Board of Health on the re port become available, the report, along with the views of the two Boards, should inforwarded to the Government of India the Provincial and State Governments and the other authorities concerned for necessary action Item IX—Report of the Committee on Training Recruitment and conditions of Service of Leachers in Universities and other institutions of higher

education The Commiltee made the following main recommendations

- The best method of selecting univer-ity terehers is through a properly constituted Selection Committee, an honest and independent Committee winten should be above suspictou
- (2) Selection Committee should consist of members between five and seven, with Viec Chancellor of the University is Charman The members should always, where possible, be persons with high aerdemic qualifications or acadomic experience and of high character, the lay almost should be reduced to a members. the lay element should be reduced to a minimum, and that appointments by University bodies should be of persons from outside the University if there is the slightest reason to suspect that persons otherwise appointed may be open to influence or pressure
- (3) Appointments for posts in technical colleges should also be made by a Sciection Committee This Committee should contain more members with the necessary technical knowledge or experience, and indeed with some appointments of a technical character it may well be that the choice should be left Vice-Chancellor or the person who holds the must also be a man of high enareter and position corresponding to the Vice Chancellor, in a University as the case may be should personally, possessed of those qualities which in a University is the ease may be, should always be present
- (4) The Governing Body of every aded college receiving a grant ought to contain a representative element, rg not less than two persons appointed by the University and this should in all cases be a condition of the grant The Committee of the Governing Body selecting teachers for appointment should include one of these members. There ought also be some machinery whereby the University itself inelude ean review all appointments made
- (5) A representative of the University having special knowledge of the subject concerned should be associated with the Public Service Commission selecting teachers for appointment in Govt institutes

take po t anniunte classes some teaching experience

(7) In the teachers training Departments lecturers must have at least a second class Master's decree and inidergone a teacher Training course

- (8) In colleges or Departments of Lucine 1 lng and Technology, Techners in theoretical subjects as Mathematics Physics etc., should ordinarily possess first class MA degree Lecturer- in all applied sciences should have a first (la sengineering degree or its equivalent ozether with a reasonable amount of practical experience in industry
- (9) In Medical Schools lecturers in the precilineal subjects of physiology and Bio chemistry may be pure scientists without mecastrily postering a medical degree at all but they should ordinarily possess, like other lecturers a first class M Se degree or it equivalent. Medical graduates teaching pre clinical subjects should possess at least: BSc degree and Lecturers in clinical subject such as medicine, surgery, etc. should have a least a first or second class MBBS
- (10) Lecturers in Agriculture should ordinari possess a first class Master's degree in the busic sciences, and Lecturers in the applied sciences should possess a first class post gradual degree in Agricuiture
- (11) Only first class graduates in law prefer ably possessing an LLM Degree should be appointed as Lecturers in a law fieulty of college
- (12) Professors and Readers in University Departments, and Readers in constituent colleges should be men of more than average ability and should ordinarily have had from five to ten vears teaching experience, re-early and original work being regarded as additions qualifications
- (13) The Principal of a college must po ses personality, possessed of those qualities which are generally recognised as essential in an administrator
- The following minimum scales for different grades of teachers are recommended

University Departments

Junior Lecturers Lecturers Readers Professors 1000 to 1250 500 25-800 300 20 500 210 15 300

Affiliated and Constituent Colleges

Juntor Lecturers Lecturers ReadersPrincipals 800 to 1,000 500 25 800 300 20 500 150 15 300

(250 25 500 for Intermediate Colleges) (Rs 100) 15 300 for Lecturer)

M.A degree of an Indian University, or foreign degree equivalent to it, each foreign degree being considered on its merits, should be regarded than Rs 2000 a month and Rodger unto being considered on its merits, should be regarded than Rs 2,000 a month and Readers upto as qualified for appointment as a teacher in Rs 1,200 according to their qualifications

- not be put on probation
- (16) Ex ept where teach rs are entitl d to a pension on retirement there hould be a Provident Fund for teachers in recognised colleges the mil imum co tribution by the institution bein 64 per cent
- (1) Provision should be made to give a tacket study le ve of at le t one year in ori ally a b anch of Technical Education set years provise or six mantls for every bit, in ori ally a b anch of Technical Education in the study is a superior or six mantls for every bit, in it, y, of the speed; direcurstance of

- (10) Where necessary a maximum of 18 hours teaching work fo colleges should be prescribed that is to say work witch will thin the teache into direct contact with his pulls, where returned hours for Profes ors and Readers to measurement to the contact with the contact with the pulls, where the teachers returned hours for Profes ors and Readers to measurement. nd Readers be prescribed
- The state of the s establish a claim to them.
- (90) Lecture cl ses in theatre lecture rooms should not exceed 150 student at a time terms around not be the common and the common and the common that the common than 75 students at a time for my ctical work in labor for every 0 students To be the second of the second
- (.3) The ratio between the number of students in a college and the number of teach ra in the service of that college should be 9 1 as a general rule but for post-graduate and honours classes the ratio should be 1 1 or even 10 1 for the former nd perhap 15 1 for the latter

Recommendation of the Central Advisory Board f Educat

The Board d pted the report subject to a few mino modifications and it wa decided that the report should be forwarded to the provincial and State Governments and Unit r sities for neces ary action. It was also decided

(15) The period of production which should be fived by the the control of the tender as engagement and it should not be permissible to extend it there. The first professor is adopted by the Board abo his permissible to extend it there. The soft is about the control of the con

Hem 1-Pp t of the An celtu al Ed rat n

The Committee made the following recom-

- se ca years service or six manths for every but in vir of the special circumstance so of years service.

 (18) The acc of retirement for all teachers should be not less than fifty five and not more than stry save in the case of Professors where the segs should be not less than stry save in the case of Professors where free ene may needly be made to the general conclusions should be not less than stry.

 (19) Permission to carry on private practice

 (20) Permission to carry on private practice.
- the sge should be nos trees team of professions of the size of professions colors a should be of teachers of professional colors a should be of eachers of professional colors a should be of teachers of ciliud al subjects have attended patients outside the hospital any fe s received training suited to the needs of future I runers plants outside the hospital any fe s received instruction for these who will be call d upon the suited to the needs of future I runers a maximum of 18
 - 3 The existly f clittles for Agricultural Education r holly in degute to neet the probabl requireme ts of the country in th near f ture and it is necess ry to bring into e istence as early as po sible a omprei en l e and planned system of Agricultural Education
 - 4 It is unn essary to in lude Agricultural Education as not in the rriculum of any Junor Ba to (Primary) School All that is equired at that st g is to make po islon for y ture Study and practical eleme tary kard n ing
 - B youd the Junior B to sta a ricul tur I instruct on and trainin should b arranged in the followin type of institutions -
 - () Senior Ba le (Middle) Schools where Agriculture is adopted as the basic craft
 - () Ag icuitural H h Sch l which combin Gen r l Fduc tion with a strong agricultural bias Th c ne d not n cessarily h loc ted in rural reas only
 - (i) Farm In titutes (on Mod l Farm) wher trains will b proposed () and Stockmen
 - (a) Agri ultural Schools Imparti special education in Agriculture Agricultural Colleges and Agriculture Department (r Faculti 3) of Uni rsities which will p epare stud nts for the B chelor degre in Agricultur cos n' a per d of at least the cyclin the se of stud ts passing out f Agricultural High Schol a d for ye rs in the manne se os and is passing out it agricultural High School do not be as of those pas g out fandemic High Schools Colle and f utile of Universities High or prepare students for post-graduate degr sof varyl duration
 - () Central institutes of advanced research.

In addition to regular full time courses teachers must possess at least a Vaster's degree (111), (121) and (21) will also provide short term in the subject which they are to teach, and extension or refresher courses in particular it is desirable that they should also receive branches of Agriculture and Annual Husbandry, pedagogical training meluding Veterinary Science, Dairying, Poultry Farming, Listate Management, etc

- Agriculture Departments (or 1 iculties) of Universitles, is distinguished from indepen-Agricultural Coileges, have several idvantages arising from the close issociation of the students and teachers with those engaged maintenance allowances and hostel accommoda in other studies
- (7) Provision should be made for the training of the personnel of the Agricultural and Veterinary Departments as follows:

Agriculture Departments

- (a)Field Assistants -One year's course at a Farm Institute
- Non gradu ite Assistants -2 years course at an Agricultural School or the normal course at an Agricultural High School
- Griduate Assistants —4 vers' course at in Agricultural College or University
- (d)Gazetted Officers —Post graduate courses of varying standards

Veterinary Department

- (a) Stockmen —One year s course
- Compounders (or (b)Pharmicists) -One year s course
- (c) Veterinary Assistant Surgeons -3 to 5 Je irs' course at a Veterinary College
- (d)Gazetted Officers —Post graduate courses of varying standards
- All examinations in the school stage will be conducted by the appropriate educational authorities Examinations for the Bichelor's and higher degrees should be conducted by Diplomas and certificates Universities for short courses of advanced research will, however, be awarded by the institutions concerned There should be two external examinations in a four-year course one at the end of the first two years and the other at the end of the eourse. In the ease of a three year course, however, there should be only one external examination at the end of the course. All other tests should be conducted internally
- In order to ensure that proper standards of instruction and training are maintained, the Imperial Council of Agricultural Research should set up a Council of Agricultural (including Animal Husbandry and Dairying), Education, with power to endorse diplomas and certificates awarded by agricultural institutions and also to make recommendations to the appropriate authorities in regard to the standards of agricul tural examinations in Universities The The Education Department should be represented on the Council
- (10) Similar qualifications are required for Schools or Agricultural High Schools as for teachers of other subjects, except that they must have undergone a course of practical whose efficiency can be depended upon or to training in Agriculture University or College ad hoc bodies that may be set up for this purpose

- (11) Teachers of agricultural subjects should receive sularles similar to those of teachers of other technical subjects
- (12) The same standards of fees and the same facilities for free concessions, scholarship, tion should obtain in respect of Agricultural Lducation as in regard to other branches of cducation
- (13) While there are strong arguments in favour of Education Departments being admini stratively responsible for Agricultural Educa tion, as for other branches of education, it is not practicable in the existing circumstances to effect this change at present and all agricultural institutions except Senior Basic Schools Agricultural agricultura tural High Schools, Agriculture Departments of Arts and Science Colleges and Agricultural Departments (or Faculties) of Universities should continue to be in the Administrative charge of Agriculture Departments
- (11) Every endeavour should be made to promote associations of agriculturists including organisations of young farmers who should be enrolled while they are still at school Agricul tural cambitions, fairs and similar meetings should also be encouraged

Recommendation of the Central Advisory Board of Education

The Board adopted the report with certain amendments and directed that the report as approved should be communicated to the authorities concerned for necessary action

Item XI —Report of the Religious Education Committee

The Committee submitted an interim report which has not been published. The Board noted that the Committee had not been able to arrive at any agreed decisions on some of the most important issues and felt that in view of the importance of the subject the Committee should be asked to pursue the matter further It was therefore decided that the Committee, with such additions to the committee, with such additions to the membership as the Churran might think it desirable to make should continue their investigation and present a report to the next meeting which should indicate clearly these points on which there was general agreement, as well as those, if any, about which agreement could not be reached

Administration XII ---Report of the Committee

The Committee made the following recom mendations

- (1) Provincial Governments should assume full administrative and financial responsibility for all school education
- (2) Powers resumed by Provincial Governments may be redelegated by them either at provincial content of the con once or at an early date to those local bodies whose efficiency can be depended upon or to

- - (t) A Provincial Advisory Board of Fdnca tion which hould take cognisance of th whole field of Provinc al education
 - (11) Regional Ad 150ry Board of Education These Boards will be concerned with adult Education and Youth Service also in addition to all education upto the High School stage
 - i) Mana ers or Managing bodies for indi (i) Mana ers or managing source to vidual school or groups of achools exercising such powers as may be prescribed as and whethe best persons are available when uitable local persons are available
- In order to link up voluntary institution with the gener 1 system volunts y educational orga isations should be adequat ly represent d on Provincial and Regional Advi ory Boards
- (5) In o der to secure co-ordination between the lower stages of education and education in the Univer ity sta e Provinci I Advisory Boards sho ld be represented on the principal executive and academic bodies of the University
- () There should be an fficient organisation of 8 hool Attendance Officers in each Provinc The need for Women School Attendance Officers requires pecial consideration
- should be set up to decide locally wh t case should be sent for prosecution
- rots of Magistrates who will be available to sit
- (10) No substantial developments in the Board in 1943 rap each the mi imum comps ducational field are possibl without a very fulle with the ucces of a nation I system conside all strengthening of the administrative these should be adopted and enforced everywhere stall of Education Dep rements both qualitativ ly and quantitati ely. It is also n cessary that the sal ry and status of ducational officers should n t be appreciably lo ver than tho e of comparable Co ernment s rvants in other e vices
- (11) In the event of the Central Government givin, a grant to a Pr vincial Governm at for an approved scheme of developm at th former may requir some of the condition to be attach d to the grant that Provincial a counts should be audited on behalf of the trai Gov rament as well a the Provincial da mm it though in single audit In addition to this in o d r to ensure a tisfactory co-oper tion it is suggested that a Committe of the Central Advicey Board of Education should visit. Province once in five ye rs should visit Province once in ave ye is of the rif a cessa y to discuss the progress of the elopment schim and other matters of

(3) In order to enlist public interest in [1] Suitable means should be devised ducational administration each Provincial to ensure th fullest co-ordination and cooperments should appoint—

[2] Suitable means should be devised covernment should be devised covernment should appoint—

[3] Suitable means should be devised covernment should be devised covernment should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the full state of the should be devised to ensure the shou cial barriers eg 1 regard to admission to Teaclers Traini g Colleges and other educational institutions should not be allowed to impede the workin of the Educational system in any province

Pecommendat on of the Central Advisory Bo rd of Education

The Board adopted the report with a few podifications and decided that it should be forwarded to the Oovernments concern d for necessary action

- t War Educat nal Developm at m India : The most important recommendations mad by the Central Advisory Board of Educ tion in their Report on Post War Educational Bevelopment in India were given in the last is no of the Year Book. As opinion is yet fined with reg rd to these recommendations they are repeated in this I sue as well
- Boards abe ld be represented on the principal recruity and anademic bodies of the University of the Christopher of the Christop
 - (2) The ch racter of the instruction to be provided about follow the general lines I id down in the reports of the Central Ad lacry Board's two Committe's on B sie Education
- (3) When and wher possible School (3) The Schor Ba io (Middle) School Attendance Committees consistin of member being the n thin school for the gre t majority of Local Ross da or other influential persons of future cilizens is of fund mental import ne and abould be generously staffed and equipped
- anouad no sent for prosecution

 (i) It is ess utias that a hool attendance the present stains and remume attoo of teachers cases should be disposed of as speedily as possible and steps ho id he tak an if incressary of plorable. The standards in regard to the castless speed about days for them, with a tribing rere liment and conditions of service. of tea hers prescribed in the report of the Committee approved by the Central Advisory Board in 1943 rep esent the mi Imum comps tible with the ucces of a nation I system
 - (5) A vast increa e in the number of trained women teachers will he required
 - (6) The total estimated annual cost f tle p oposals contal ed in this ch pter when in full operation is Rs 00 crore approximately
 - Pr Primary Educat on.—(1) An adequate provision of pre primary in tru tion in the f rm of Nursery Schools or clas es is an essential adjunct to my national sy tem of educ tion The provision in this re pect at present is n gilgible
 - () In a ban are where afficient children av liable within a reasonable radius ar par te Nursery Schools or departments may be provided el ewhere Nurs ry classes hould be attach d to Junior Basic (Primary) chools
 - (3) Nurs 17 Schools nd lasses should invariably be staffed with women teachers who have received special training for this work

- (4) Pie Primary education should in all course cases be free While it may not be feasible to make attendance compulsory, no efforts should be spared to persuado parents to send their children to school voluntarily, particularly in areas where housing conditions are unsatisfac tory and/or mothers are accustomed to go out to work
- (5) The main object of education at this stage is to give young children social experience rather than formal instruction
- On the basis of a normal age range of three to six years provision has been made for 10,00,000 places in Nursery Schools and classes
- (7) The total estimated net cost of the proposals set out in this chapter when in full operation is Rs 3,18,40,000

High School Education — (1) The high school course should cover six years and the normal age of admission should be about eleven

- Entry to high schools should be on a scicetive basis, only those pupils should be admitted who show promise of taking full advantage of the education provided Additional places may be provided for those not selected provided that no cost falls on public funds
- In accordance with the general principle (3)set out in (2) above, places in high schools should be provided for at least one child in every five of the appropriate age group
- In order to seeure the right children, the methods of selection to be employed will require the most careful consideration. Special arrange ments will have to be made for the transfer from Senior Basic (Middle) Schools to High Schools of suitable children and particularly of those who show signs of late development
- High Schools should be of two main types (a) Academic, (b) Technical The objective of both should be to provide a good all-round education combined with some preparation in the later stage for the career which puplis will enter on leaving school

(6) The curriculum in all cases should be as varied as circumstances permit and should not be unduly restricted by the requirements of Universities or examining bodies

(7) In order that no poor child of ability may be excluded, liberal assistance in the form

of free places, scholarships and stipends should be available throughout the course

In order to secure teachers of the right type, the salarles paid in all recognised schools, whether maintained by State or by private bodles, should not be less than those prescribed by the Central Advisory Board of Education

(9) The estimated minimum net annual cost of the High School system outlined in this chapter when in full operation is Rs 50 crores

University Education.—(1) Indian Universities, as they exist today, despite many admirable features, do not fully satisfy the requirements of a national system of education

(2) In order to raise standards all round, the conditions for admission must be revised with the object of ensuring that all students are capable of taking full advantage of a University as illiteracy disappears

- The proposed reorganisation of a school system will facilitate the high system Adequate financial assistance must be providfor poor students
- (3) The present Intermediate course show be abolished Ultimately the whole of the course should be covered in the high school but, as an immediate step, the first year of t course should be transferred to high schoand the second to Universitles

(1) The minimum length of a Univerdegree course should be three years

(5) The tutorial system should be wide extended and closer personal coatacts establi...h between teachers and students

(6) The importance of establishing a hi standard in post graduate studies and part ularly in pure and applied research should cmphasiscd

Steps should be taken to improve t conditions of service, including remunerati of University and College teachers where the now in operation are not attracting mea a women of the requisite calibre

(8) An Indian University Grants Commits should be constituted for the purposes and with the constituted for the purpose and with the constituted for the purpose and with the constituted for the purpose and with the constituted for the purpose and with the constituted for the purpose and with the constituted for the const the terms of reference set out in this chapter

(9) To provide for the increased number able and well prepared students which national system of high schools may be expect to produce, approximately 2,40,000 plants to produce, approximately 2,40,000 plan or double the cylsting number, should available in Universities

(10) The estimated total net annual of the scheme for University Education set (in this chapter when in full operation Rs 6,72 lakhs

Technical, Commercial and Art Education (1) In view of the prospective net of post-war industry and commerce for skill teclinleians, and in order to cater for the ar tudes of those who will derive greater bent from a practical course, the establishment of Mclent system of technical education at stages, on the lines set out in the report of t Technical Education Committee, is a mat of great urgency

(2) Due regard should be had to the recomendations of the Abbott Wood Report respect of the scope and content of Technique transfer of the scope and content of Technique transfer of the scope and content of the scope and

instruction

(3) The estimated gross annual cost of t proposals contained in this chapter will approximately Rs 10 crores and the net contained in this chapter will approximately Rs 10 crores and the net contained in this chapter will approximately Rs 10 crores and the net contained in this chapter will approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this chapter will be approximately Rs 10 crores and the net contained in this contained in the net Rs 8 crores

Comprehensive Adult Education.—(1) rangements on the general lines set out in tandult Education Committee's report shot form an integral part of any national system education. These are particularly imports in India today in view of the very high permanent of the content of t centage of illiterates

(2) Literacy is a means, and not an ead itself Although the main emphasis in the property of the company of the beginning may be placed on the liquidation liliteracy, adult education in the full sel must be provided for those already litera. The amount of this chariff amo The amount of this should progressively increase i) It is estimated that even with the Health of the School Chuld—(1) Provided clien of a universal system of basic ison for ensuring the physic I welfare of election there will be over 9 crores of filterates pupils and students should be made on the group 10-00 to be dealt with. It was should likes et out in the report to the Joint Committee. made to sol e this problem by a campaign ad over twenty years. Before this cam a opens de year should be devoted to the

In this as in all branches of education quality of the teacher is of suprem Impor c The difficulty of obtaining a sufficient nher of teachers of the right type particularly men must on no account he und r estimated

5) The respon ibility for adult education street with the State but every effort should made to enlist the aid of suitable voluntary anisations where er available

5) The estimated total annual cost of the possis contained in this chapter is Rs 3 res. At the hight of the literacy e mpaign i may be exce ded by Rs 5 30 lakhs b t avera annual cost for the twenty year be all tile less than Rs 3 crores

raining of Teachers — (1) The proposal the recruitment and training (t acher set out in the Report approved by the Central clayr Board in Teacher visory Board in January 1943 should be setally followed

The exist g training institution ely sufficient to meet wastage among ext tin chers and to tr in those hitherto untrai ed 3) New Training Schools and Colleges duding Univ mity Education Departments)

st be provided to supply the add tion i se will amount to over 0.00 000 noe dastes for chools of all type and 1.80 000 duates for high schools

(6) It is impossible to estimate the ultimate of the type of officer who will be capable of cost of the provision contemplated in this carrying a scheme of the kind contemplated chapter. Rs 1 crore may be included in the into successful operation estimate

Employment Bureaur —(1) Employment Bureaux form an essential part of educational administration they are especially necessary in India in view of the restricted openings at the moment for progres-lie employment

- Employment Bureaux, if they are to fulfil successfully the functions set out in this chapter, must be staffed by trained experts with practical experience of teaching and of industrial conditions
- While contact should be maintained Unemployment Lychanges, Labour Tribunals, etc., established by other Departments, Employment Bureaux, which deal with with the output of educational institutions, should be under the control of the Education Depart ment
- (4) It is estimated that the gross annual eost of running Employment Bureaux (apart from those separately established by institutions of University rank) will amount to its 64,00,000 This should be regarded ultimately as a normal part of administrative expenditure

Administration—(1) The Provinces should remain the main units for educational administration except in regard to university and higher technical education, the activities of which should be co ordinated on an All India basis

- (2) In the event of the Indian States taking part in educational development on an all India seale, it may be necessary, in order to form economic educational units, to group the smaller ones or attach them to larger States or contiguous provinces
- (3) A national system of education will require much closer co operation, financial and otherwise, between the Central and Provincial Governments
- (4) Provincial Governments should be left to make such changes in their administrative arrangements as the carrying out of education developments on the scale contemplated may require Experience, however, suggests that they would be well advised to resume all educational powers from local bodies, except where these are functioning efficiently
- In order to enlist local interest in educa-(5) In order to enlist local interest in educa-tion, School Managing Bodies, School Boards and District Education Committees may be constituted, if and when sufficient people of the right type are available to serve on them An Education Advisory Board for the whole Province may be desirable
- (6) A strong Education Department will be required at the Centre and in this connection the scope and functions of the Central Advisory Board should be enlarged
- Steps should be taken in accordance with the recommendations of the Board's Committee on the Recruitment of Education Officers (1943) service and to enable it to secure the services. The present Bureau has not so far been able

- Arrangements should be made for the exchange of officers between the Centre and the Provinces and between one Province and another The desirability of establishing a senior educa tional administrative service on an All Indu basis should receive consideration
- Director of Public Instruction (9) The Director of Public Instruction should be directly responsible for the general administration of aducation other than university and higher technical education, throughout the Province He should also be Secretary for Education should it be thought necessary to keep in existence a separate positional states. of this kind
- (10) Provision has been made under each separate branch of education for the cost of administration which may be estimated at 5 per eent of the gross annual expenditure

In their report, the Central Advisory Board of Education have foreshadowed the brie outlines of future developments when ther say, that 'while it is impracticable, at so tark a star and before plant of the property base. a stage and before plans on a provincial basinate been prepared, to indicate the present steps necessary to implement a scheme of this magnitude, it was be suggested that the first magnitude, it may be suggested that the first five years should be devoted to planning propaganda and particularly to the provision of the first the first provision of the first the first provision of the first the first provision of the first the first provision of the firs the institutions necessary for training teacher and that thereafter the actual carrying out of the scheme should be divided into seven five year programmes, during each of which are or areas—there is no reason why the should be contiguous provided that each of adequate size—should be fully dealt with of adequate size—should be fully dealt with The size of these areas in the case of each Province will be determined during each programme period by various factors, of which the state of the state the supply of tereiters available will be the most important."

In accordance with the general wishes (the Board expressed above, the various Privineral Governments have been busy framit their post-war development plans. Province planning is jet in a state of flux and in arease any definite developments must awa the action taken by the Vicerov's Executive Council. It may however be affirmed that the provinces is generally in five opinion in the provinces is generally in favo of the Board's report and there is no dou that when the provincial plans assume concreshapes, they will be patterned according the Board's frame work. In the end it can affirmed that the report has now truly become a historic landmark and whatever developme historic landmark and whatever developme the future of Indian education may take, the report will stand as a high beacon light

Bureau of Education—The old Bureau Education was abolished in 1923, but on a daylee of the resuscitated Central Advise Board of Education, the Government of Interview the Bureau in 1937 under the control the Educational Advisor to the Government the Educational Adviser to the Governm of India for dealing specifically with the colling and descending specifically with the colling. tion and dissemination of literature relating

do any much useful wo k though at least two committees of the Central Advisory Board of Liucation have made specific recommendations with a lew to expanding its activities. For example the Adult Education Committee of the C atral Advisory Bo rd of Education 1939 recommended that in each Province there should be established a Bureau to colle t and di tribute information with regard to the adult ed cation movement. There should also be a Central Burean to collect collate and publish at re ul r intervals information as to the proviess of the movements in all parts of the provies of the movements in an parts of the courty. The Bureau of the Central Ad isory! Board of Education should be equipped to undertake this lister function. The Central Advisory Board of Education who conside ed the Committee of Alexandra week consists on where the restrict of demand is not likely to with the general policy outlined that thought it make it are commit proposition for a provincial advisable to wait for action by I evincial Covernments before expanding their own lue a them. This re commendation was accepted for this purpose. The Txt Books Committee 183 recommended that the Central Advisory The Governm et of India however propose whose function it will be

() to girenlate to the pro inces stand rd text books produced in different parts of the country

(:) to lesue a periodical containing good reviews of recent books

(in) to maintain a staff competent to produce as required in Indian languag s either original books or compilations suitable to Indian needs from m terials available in stand rd text books produced in oth r con tries

The But au should be in a position to give general guidance to Education Authorities in regard to text books and other literature especially in scientific and techni al subjects and should also be prepared to produce books where the restrict d demand is not likely to

1943 recommended that the Central Advisory The Governm nt of Indis however propose Board of Education should maintain a Bureau to take up shortly the questin of expanding the activities of the Bureau of Education

Statistical Progress

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India

NB —The number of scholars in Universities represents the research students in the affilial Universities or the number of students under the direct control of teaching or unit Universities

regard to Primary Education.—The position with regard to Primary Education Acts has been stated in the previous issues. Here it will suffice to say that in Assam, Bombay, Centrai Provinces, N-WF Province, Punjab, Sind, United Provinces, Bangalore, Coorg and Delhi, more than half the primary schools are managed by Local Bodies, while in Bengal, Bihar, and Orissa over 80 per cent of the primary schools their post war educational development sche. by Local Bodies, while in Bengal, Bihar, and Orissa over 80 per cent of the primary schools are under private managements, in Madras, 46 per cent by Local Bodies and 49 per cent by private managements, in Baluchistan, almost all the primary schools are Government managed, and in Ajmer Merwara about 60 per cent Government managed For British India as a whole, the percentage of schools, under Local Bodies management is 46 per cent, and that under private management 53 per cent and that under private management 53 per cent

their post war educational development sche They were of opinion that the success operation of their pians for post-war developm would involve important administrative chan and a re-adjustment would be necessary amon the various bodies now concerned with primary and secondary stages of educations are condingly appointed a Committee examine and report on the issue. This Committee submitted a report to the Board at the meeting held in January 1945. The Committee recommendations are given under the head With regard to the central of primary education, the Central Advisory Board of Education have recommended that Government should assume full responsibility for the administration of primary education wherever practicable

responsibility for all school education. The total number of children also fell series it is rections of the Province I Go e mm at to the control of the con

Compulsory Primary Education —The followin table shows the number of urban and rural areas in which compulsion had been introduced by the year 1943 44 —

920 regular schools and 814 literacy classes for jeducation combined with some prep men, and 131 regular schools and 122 literary classes for women In the Central Provinces, the number of adult schools was only 18 with 793 men and 304 women under instruction Madras had only 8 schools with 202 men and 43 women on roll In the North West Frontier Province the number of adult Classes has been dwindling since 1939, and at the end of the year 1942 43, only 61 classes were left with 634 under instruction Orissa had altogether 15 schools and classes with 381 adults enrolled therein. The Punjab had 148 regular adult schools for men, and 2 for women In them, the enrolment of men was 4,809 and of women 37 In addition, there were temporary classes started by the Government, where 97,083 adults were receiving instruction on the 31st March 1943 In Sind only 16 permanent night schools were left on the 31st March 1943, others having hear closed 422 march 1943, " 438 men were enrolled in heen closed them The United Provinces had 1,343 regular schools and 3,356 temporary classes for men, and 100 regular schools for women In all, 46,699 men and 1,590 women were enrolled Among the Centrally Administered Areas, Amer-Merwara had one adult school and Delhi 29 with 640 adults under instruction

Secondary and High School Education -The total number of high schools in British India according to the latest available statisties for the year 1942 43 was 3,632 for boys and 532 for girls 1,169,265 boys and 170,581 girls were enrolled in them These figures include boys and girls reading in the primary classes attached to these schools. The total number of boys who appeared for the Matricunumber of boys with appeared for the Artificial Indian and European High School, and Cambridge school Certificate Examination was 139,717 of whom 94436 were declared sneecesful. The corresponding to the corresponding to ponding figures for girls were 16,898 and 11,336

The recommendations of the Central Advisory Board of Education with regard to high school education contained in their report on Post War Educational Development in India were the following

- (1) The high school course should cover years and the normal age of admission should be about eleven
- Entry to high schools should be on a selective basis only those pupils should be admitted who show promise of taking full advantage of the education provided Addition al places may be provided for those not selected provided that no cost falls on public funds Places in high schools should be provided for at least one child in every five of the appropriate age group
- In order to seeure the right children, the methods of selection to be employed will require the most careful consideration Special arrangements will have to be made for the transfer from Senior Basic (Middle) Schools to High schools of suitable children and partie ularly of those who show signs of late develop ment
- (4) High schools should be of two main types (a) Academic, (b) Technical The objective of both should be to provide a good all round

- in the later stages for the careers which will enter on leaving school
- (5) In order that no poor child of may be excluded liberal assistance in th of free places, scholarships and stipends be available throughout the course
- In order to seeme teachers of the type, the salaries paid in all recognised s whether maintained by the State or by I bodies should not be less than those preby the Central Advisory Board of I'dneat

With regard to the question of curre the Board had recommended that "the culum in all cases should be as varied cumstances permit and should not be i restricted by the requirements of University or examining bodies. The Board sugther following list of sultable subjects, is not necessary that all pupils should be a supple of the subject of the supple of the sup ill of them up to the school leaving cert standard though some are obviously si only for the senior stage

of the All Indian and Domlclied Luropean, A B—The Committee have suggested a Association for decision, (11) a pin should be curriculum for Muslim Elementary schools devised, with ways and means, whereby pupils in Anglo-Indian schools may make use of the facilities for vocational training provided in technical and industrial institutions—thus the Board felt is not possible out of the present Government grants for Angio Indlan education

Muslims -During the year 1942 43, number of Muslim male students decreased by 135,681 to 3,414,660 and that of female students by 51,577 to 894,798 The Muslim male students formed 29 0 per cent of the total male students, while the Muslim female students formed 24 7 per cent of the total female scholars

The appointment of a special Committee by the Ali-India Muslim Educational Conference Board of Education on Post-War Educational Development in India was referred to in the last year s issue of this Book The Committee completed their deliberations towards the close of the year 1944 and published a report on the subject, whose main recommendations

Basic (Primary and Middle) Education

- (1) Agree to the desirability of compulsory school life of eight years but suggest that seven years period in a largely rural country like India is enough In view of early maturity of Indian children, ignorant homes, and absence of pre school education, age of compulsion should commence from 5
- 'Westage should be stopped at all cost all boys and girls even though they join school on voluntary basis, should be enjoined to stav on till the completion of the prescribed course
- (3) Basic education as sponsored by the Board being yet in an experimental stage should not be made obligatory
- (4) Religions and not "some handicraft or industry" should form the basis of education
- Denominational schools should continue but they should be reorganised The question of financial assistance to such schools should receive serious and sympathetic consideration
- (6) There should be separate schools for Musiim boys and girls as a matter of principle except in areas where the number of pupils is so small as not to justify a separate school or where women teachers are not available In co educational schools, girls must be separated at the age of 10
- (7) In Urdu speaking areas the medium of instruction should be Urdu in the Urdu script, but in non-Urdu speaking areas Urdu should be taught to Muslims in the Urdu script as an additional language
- with the teaching of religion
- (9) Provision should be made for the teaching of English as an optional subject in the last two years of the elementary stage, wherever there is a demand for it

 Advisory Committee should be appointed to inquire into and report on the Nautical and wherever there is a demand for it

Pre-primary Education

(10) Regard the provision of preschool education so urgent that a start should be mado even with specially trained men teachers In the event of the non availability of women teachers

High School Education

- (11) The principle of selection for high schools will be harmful to the interests of backward communities especially of the Muslims In view of the reasons stated in the memoran dum it is urged that the selective system should The interests not be applied to Muslims of the poor but promising Muslim pupils should be safeguarded, and they should be given preference over their fortunate brethren in the aliotment of places, which will necessarily be limited in High Schools
- (12) Places should be reserved for Muslim pupils not by their percentage in population but in proportion to their historical status and political importance in consultation with iccal Muslim Advisory Committees
- (13) Do not agree to the division of light schools into "Academie" and "Technical," but suggest Multilateral type of schools, commended by the Spens Committee If this suggestion is not accepted the Committee request that Multilateral Schools for selected urban areas only may be accepted as a third urban areas only may be accepted as a third
- (14) In the courses of study, (2) Religion, and, (21) Islamic History and Culture should be added for the sake of Muslims, and music and dancing should not be made obligatory for Muslims
- (15) Special provision should be made for Muslim girls

University Education

- (16) The functions of the proposed Univer slty Grants Committee, besides the aliocation of funds, should be purely advisory
- (17) The proposed number of places at the universities should be more than doubled and liberal grants given for expansion and research It is imperative that seats should be reserved for Manhare be reserved for Mushms

Technical, Commercial and Art Education

- (18) That technical institutions should be established in industrially developed areas should not be too rigidly followed
- (19) The functions of the proposed Council for technical Education should be purely advisory
- (20) In all kinds of technical institutions, Arabic should be taught in connection places and scholarships should be reserved for Muslims in consultation with the Muslim Provision should be made for the

Adult Educ t n.

() Attempts should be made to make the age group 10 30 literate while the remainin should be educated mainly through visual instruction talks and lectures concentration

(23) The five years period of preparation should be cut down by three years

(4) A Committee should be appointed to enquire end report on the sp ediest and effective measures for the Adult Educ tion of Muslim women

Training of Teachers

(2) Approve generally the proposals con t ined in this chapt r but have made the following observations -

- profession technicai qual fications (success in Government examinations) should he waived in the ease of persons of good social position who heve had private education
- (b) Due regard should be paid to the recruit ment of Muslim men and women teachers and their number should he fixed
- (e) The teaching of Religion and Muslim History and Culture should be entrusted to Muslim tes chers
- A ped gopical justitute should be established in each administr tive areas

H alth of the Sche I Child, Ed e tion f th Handi pped, Recre t v a d So ial Activit e

(6) Appreciate the propos is made und rethese chapters but it is suggested that in Hotels reservation of seats should be made for Muslims

Emp ym nt Bur su

(7) A Vocetional Guidence Bureeu should he etablished in e en admini trative are and a Central Voc tion I Guidanc Burean for India at a suitable place for advanc d work and research

Administre to a

(28) Education should be admittlered by individ al autonomous units A stron C utral Education Department or a Central Education 1 Servi r any hang i th purely dvi ory functional the Cc traid A isory Bo rd would be deprec ted by Muslims

Depressed Classes—The education of the uppressed classes do s not now pre et the same dimentir probl in sait did pre lou ly leave the same dimentir probl in sait did pre lou ly execution of the latter of the latt f II by 136 537 to 1 339 651

It is encouragin to record that recently the Government of Indla sanctioned schol rships to the value of Rs. 3 lakhs for the education of achednied astes

Instruction talks and lectures concentration on the literecy of those who show a desire for it rega d to the use of the mother to rules a medium of in the concentration in the h h school at e was explai ed in the i st years same The i as not hen much chan e ver the du ing the year At their ne thing feid in De ember 1943 the Inte Unitedity Bo rd consid ed the g estion of the adoption of th mother tonque as the medium of instruct on in the Uni ers ties and a re ommendation of the E amin t on Committee of the Central Advi o y Board of Lduc tion th t in v ew of th fact that In the ligher at ges of education stud nts re not only ex mined in forel n l ngua e onstitute a furth hat is strai (a) To ettract Muslim women to the teaching the quest on wheth examinces should not be given the opt on of answerin e amin tion questions in their moth r tongus merits forther onsideration. The Bon i reassirm d the following re of tion of the Fourti Conference of the India Universities and expressed the

> might be gi en in the mothe t ngue but th t it is p ematur to mak the mother tongue the medium of instruction in the degree copy es "Resolv d that in the opi ion of this Co f renes the nedmm of intuetion at d fie entata es of educ tin up to and i lud ing the d gres ours should as far as circumst no s permit be the mother ton ue of the students

> or n on that in truet on in the high schools

But in view of the pre ent condition not in view of the pre-ent condition in Indi the mn dum of instruction in the H1 h Sehools hold o di arily be the mothe to gue of the pupil but where own g to the exit tence nf pupils wild different mother tongue in the me chool or for other epecial re ons it is not possible to do o the medium f instruction should h En lish or any other modern Indian language

That with a view to attainin this end the Universitis of India are r quested to take ateps for enriching the liter ture of the respective Indian i nguages

That Engli h should be compul ory subject of study in the High School Cours a

Th t made n Indi n langua e and lastern An timber a and n rangua v and a section of Classical I and a should be recognled as optional subject f rst dy in the Hi h school and Internedit e and B A cours s d they houd a far as posible be taught through he medl m of the moth tongue o of any modern Indian language of an allied n ture

That modern Indi n innguages my i recognised grad liy ni as far a possible alternativily with En lish as medi m of in tri ti n for the Inferm di te and P gree Courses exceptin fo En ii h, and if n ces ary fo 8 ience subjects

That inst cti n and work in all res rch instit tinns bould be through the medi m of Engil h except in such places wher it is after dy b ing don through ny of th modern Indian langues for special reason

The Central Advisory Board of Lducation considered these observations of the Inter-Board University and recommended that greater stress should be laid on instruction in the higher stages of education being given through the medium of the mother tongue and that It may often be very useful for instruction to be given in part through the medium of the mother tongue and in part through the medium of English

At their meeting held in December 1944, the Inter-University Board reiterated their previous recommendation (quoted above) with regard to the question, but the Central Advisory Board of Education at their meeting in January 1945, decided to request the Inter-University Board to suggest ways and meens for attaining the goal

From all this it is clear that the question of making mother tongue' is the medium or instruction in high, Intermediate and degree classes is at present confined to the passing instruction should be determined in consultation of resolutions only. No educational authority with employers and according to the needs of of resolutions only No educational authority has been bold enough to start the experiment, which is bound to achieve fruitful results

Professional and Technical Education -Technical education is assuming great import-The Committee of the Central Advisory Board of Education appointed to explore the mode of developing the facilities for technical education in the country as a whole, met at Dehra Dun in October 1943 under the Chairmanship of Mr John Sargent, CIE, MA, Educational Adviser to the Government of India The Committee's report was adopted by the Board at their meeting held in January 1944. This report has since been published and copies are available for sale. The Committee's main conclusions and recommendations as adopted by the Board are the following

- (1) In view of the recent expansion of industry and the likelibood of further development after the war it is necessary to plan immediately a comprehensive system of technical education at all stages
- (2) The function of technical education may be described as two-fold, (a) to meet the needs of industry and commerce for properly trained workers of all grades and (b) to provide a sultable form of education for those boys and girls whose natural abilities can best be develop ed by instruction on practical lines
- Technical education should be regarded as an integral part of any educational system and is in no way inferior to education of the academic type
- Education from the earliest should be given a more practical character, and the curriculum should aim at making boys and girls familiar with practical as well as academic subjects
- Technical education must include com mercial education and art in relation to industry
- (6) Agricultural education should be regarded as an essential branch of technical education and should be closely linked up with the other branches Scnior Bisie or Middle as well as High Schools in rural areas should have an agricultural blas

- (7) In view of the great importance of agricultural education for this country a special committee of educational and agricultural experts should be set up to consider the subject fully
- (8) In order to provide suitable instruction and training for the different types of workers required there should be the following main types of technical institutions -
 - Junior Technical or Industrial or Trade Schools,
 - (b) Teelinical High Schools,
 - (c) Senior Technical Institutions
- (a) and (b) will normally provide full time instruction preparatory to employment, while (c) will also provide part time instruction for those already in employment
- The type and duration of part-time with employers and according to the needs of the locality It is desirable that part-time classes should be held during the day rather than in the evening
- (10) Wherever eircumstances permit polv technics are to be preferred to monotechnics
- (11) The following courses of studies should be provided in technical institutions
 - (t) a two year full-time course in Junior Technical or Industrial or Trade Schools to which pupils should be admitted on leaving the Senior Basic (or Middle) schools at the age of about 14,
 - (11) a six year full time course in Technical High Schools to which selected pupils will be admitted on completing the Primiry Junior Basic stage at about the age of 11 The first three years of the course will be mainly devoted to general subjects,
 - (111) three year full time Diploma course in Senior Technical Institutions to which students will be admitted after passing the final examination of a Technical High School or an equivalent examination,
 - (1v) a two year full time Advanced Diploma course in Senior Technical Institutions for those who have passed the above examination,
 - (v) a three year part-time Certificate course in Senior Technical Institutions for students already in employment, and who possess the Technical High School Leaving Certificate or an equivalent certificate,
 - (vi) a two year part time Advanced Certificate course for those who have passed the above examination and
- (vii) classes in individual arts, crafts and other subjects related to Industry and Commerce for which there may be a sufficient demand
- (12) There should be only one external examination at the end of a course Other examinations should be conducted internally

- branch of industry or commerce
- (14)(a) Teach is of general subjects in Techni al High Schools should receive the ame for des of nay as teach is in ordinary High Schools They may be granted up to five increments for appropriate industrial or com mercial experience after the ag of 0
 - (b) Teachers of technical subjects should receive the following scales of salaries -
 - Workshop or Laboratory As istants— Rs 50-1 75 The i itial salary should be fixed according to experience
 - (ii) Teachers Class III-Rs 75 5 150
- (111) Teache a Class II-Rs 175 10-3 5
 - (tv) Teachers Class I-Rs 400 5 1 000
 - (r) Principals-Salary according to n ture and size of the institution

- be encouraged to keep in touch with the appro be encouraged to the provided with the appropriate to the plate by the to ndertak consulti practice or commiss io s s bject to approved conditious desig ed to p e ent such p ivate wo k inte f ing with the Micient di charg of their duties as te chers
- (16) Th re should be an adequate system of schoi tships and maintenance allow n e designed to ensure that no one b vi g the neces
- la or ne i dust i i nd comme ci l sreas but students f om other a e should h ve n quai opportunity of adml sion to those institution To as re this it i necess ry that te h ic i basis
- (18) Technical High Schools and Junior Technical Trad or Industrial S hoods at hid be admind t red by Provi 1 Gov rum nis but a fine the standard of the stand
- o trolling body

- (13) All teachers in technical institutions, (0) It is essential that the admit tration should have some first-hand xperience of some of all technical education should be under the Education Department of the Central or Pro vi cial Government or State as the case may be There should be a separate inspectorial staff for this purpose The Education Department should maintain close contact with the other Departments concerned with Industry and Commerce
 - As a corollary to technical education in its higher stages being administered by a central body to financial responsibility wil have to be accepted by the Central Government,
 - In purs ne of the rec mm ndations of the Central Ad isory Board of Education the Governm at of India int at los set up an all india Coun if for Technical I do ation to survey the n ds of the country for higher technical educ tio with specil if the ence the prospective pot wr needs and to active the prospective pot wr needs and to active the country of the country Teachers in Classes II and III my i

F Principal Delhi Polytechnic, Delhi

(1) Teelinleal Higher School affiliated to the Board of Higher Sceondary I ducation, Dellil, provides general and basic technical education with workshop practice to the Higher Secondary Technical Certificate Standard

Sensor Department

- (11) Commerce—trains persons who have passed the Higher School or an equivalent examination in commercial subjects in theoretical wall as practical manner
- (111) Art—stress the intilitarian aspect, in addition to the esthetic, in the teaching of Art
- (1v) Architectur provides instruction in the selence and practice of architecture to enable men to take up carcers as architects enable men and builders
- (v) Engineering—Electrical (including Radio Service) and Mechanical -are taught in varying standards
- (11) Applied Seignee—gives training in Chemical Engineering and the technology of many chemical products in scientific and semi-commercial manner
- (111) Textiles—trains persons engaged or interested in the Textile industry, ehicify in Weaving, Dyeing, Bleaching and Printin^g
- Prc Courses—Comprise Prc Engineering, Preliminary, (viii)

In all departments industrial practice is given importance and the aim is to train persons to take up positions in responsible and supervisory grades

The Technical Eigh School is the first in India to implement the technical section of the scheme of the Central Advisory Board of Education and is a part of the education reorganisation undertaken at De of the Education in the lower department (5th to are introduced to elementary wood and metal workshop practice. Otherwise it is similar to the high school A boy can thus change school at any stage. at any stage

In the upper department (9th to 11th class) the scheme of stidies differs from that of an ordinary higher school Along with a sound ordinary higher school Along with a sound general education, an all round basic technical training is given. After completing the course training is given, an all round basic technical from the Office—Cash As 4, by Post As 6 training is given. After completing the course the boys take the Secondary Education, Delhi Board of Higher Secondary Education, Delhi For the Higher Secondary Technical Certificate Passed pupils may enter industrial employment as apprentices (a may rise to responsible positions attached) and may rise to responsible positions after a few years. The institution gives all assistance in placing students in industry

Delhi Polytechnic—The Polytechnic, To enable these students to acquire further founded by the givernment of India in 1941, scientific and technical knowledge in their comprises the following Departments—

| Delta | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic | Polytechnic Polytechnic offer evening courses in Engineering Applied Science, etc., lending to rextiles, All-Indla Alternatively, they may continue with higher technical education (a) in the University of Delhil—B Sc. course (b) in Engineering and Icchinical Colleges all over India after putting in another year at the Polyteehnle for the Pre Luglneering Examination of the Government of India (c) In the Senior Departments of the Polytechnic in Ingineering, Textiles, etc., for All India and Polytechnic Senior and Advanced Diploma Courses

Summary of Courses of Study for Senior Departments (11) to (viii)

- All India Certificate Part Time day and/ or evening course—Semor and Advanced grades—8 to 10 hours in 3 evenings per week
- All India Diploma -Full Time day cour e -Senior and Advanced grades-30 hours per week
- Polytechnie Certificates and Dipiomas will be awarded for shorter courses in certain Lyaminations will be internal
- 4 Pre Engineering—Equivalent to I Se of a recognised university The Pre Engineering Board of the Government of India control these courses and the final examination
- Short period courses -of varying grades in different trades

All India courses and final examinations are controlled by the All-Indla Bonrds of Studies in different subjects on which the Central and Provincial Governments, Association of Principals of Technical Institutions (India), Professional Bodies, c g, Institution of Engineers, Institution of Indian Architects, etc., and Industrial employers and employees, etc, are represented. The Educational Advisor to the Got ernment of India will endorse the Certificates and Diplomas, on behalf of the Government of India

Industrial or Commercial apprenticeship is a special feature helping students acquire practical training in industry or commerce, concurrently with theoretical and inboratory training at the Polyteelinic Arrangements are made for such apprenticeships for all students students

Tre followin table shows in summary form the number of such institutions and the students

The Doon School—This school which is established in the Chand Bagh and Skinner's functions within their walls. Estates at Dehra Dun owes its origin to the initiative and enthusiasm of the late S R Das. The aim of the school is to develop in an atmosphere of Indian culture and social privileges and discuss matters of common interset. They have for example, given considerable thought that the Contract of the Contract Transfer of the contract of the Contract Transfer of and discuss matters of common interset. They are to the Cambridge Certificate Examinations in September 1935 with 70 boys; there are now four houses with accommodation for 278 boys in all, and a house in which 15 additional and have helped the Syndicate with their advice. They have inaugurated schemes for exchange of masters among themselves. boys in all, and a house in which 15 additional new boys stay until there are vacancies in the large houses. A E Foot continues to be the Headmaster. He is assisted by twenty masters of them found in the same of the same o of whom four have been appointed from England The school prepares candidates for the Senior Cambridge Examination (Cambridge Certificate) and thereafter for the Provinces Intermediate Examination, School United subsequently for entrance to the Indian Military Academy, and Medical and Engineering colleges or for English Universities. Some boys take the Cambridge Higher School Certificate. The school is open to all boys in India without distinction of caste, ereed or social position and the school will aim at providing a thorough general education for boys between 11 or 12. general education for box's between 11 or 12 and 18 The maximum age for admission is 13 The animal inclusive fee is Rs 1,525 plus a dear food charge of Rs 100 per annum Places are allotted according to the priority of application. At present names are likely to be at least four years on the waiting list. The Board of Governors of the Society, which maintains the school, includes the Hon'ble Sir A Ramaswami Mudahar (Chairman), Sir B L Mitter (Vice Chairman), Sir Evan Jenkins, Mr John Sargeant, Sir Akbar Hydari, Sir Maurice Gwyer, Rai Bahadur Amarnati Atal, Rai Bahadur Chiliuttan Lal and A C Turner (Honorary Treasurer). His Excellency the Viceroy is the President.

Conference It The Indian Public Schools' ne conference was founded The conference was founded in 1939 It is composed of the heads of certain institutions which set out to give an all-round training of the character, emotions and body as well as of the mind, under conditions somewhat similar to those of the best Public Schools in England All of the present member schools are mainly boarding schools, though several of them admit day-bovs also, but there is nothing in the rules of the Conference to exclude Day School Many of the schools started life as Chiefs' Colleges, but they have now bound themselvos to abolish social exclusiveness as a qualification. ln 1939

Members of the Conference meet yearly in rotation normally at one another's schools in india and nave helped the Syndleate with their advice. They have inaughrated schemes for exchange of masters along themselves and for possible exchanges with English schools after the war, some of them hope to offer after the war a two-year post matric course of Administrative Training to those training to manage landed property efficiently, and they have now offered their services provided their liave now offered their services provided their standards are in no way prejudiced, for experi-ment and for other help in the National System of Education envisaged by the Central Advisory

The general views of the Conference on education can be found in their Pamphlet "The Indian Public School" (OUP) Member ship is at present confined to the following schools -

The Aitchison College, Lahore, The Doon School, Dehra Dun, The Daly College, Indore, The Selndin School, Gwalior the Rajkumar College, Rajkumar The Rajkumar College, Rajkot, The Shivaji Military School, Poona

It is expected that a number of other schools will soon fulfil the necessary conditions and will wish to join Copies of the Objects, Rules, and Conditions of membership of the Conference can be obtained from the Hon Secretary, at present the Principal, Rajkumar College, Rupur This year's Chairman is Mr C H MA, Principal, Aitelison College, Barry, Lahore

Indigenous Education—Of the 15,373,727 scholars under instruction in British India during 1912 43, 464,693 (552,010 during 1941 42)

ROY SCOUTS

The Boy Scouts movement initiated in England by the late Lord Raden Powell (the Chief Scout) has appread widely in Indix both manney E ropeans and Indians. The Vicetor is and States are Clief Scouts in their own areas and States are Clief Scouts in their own areas The aim of the Association is to develop good citizenship among boys by forming their characteristic of the Court of

GRAND SUMMARY.

The Co operative Movement

Rural Poverty-The outstanding feature | progress in agriculture is well nigh impossible of all orunal economy that is hound to arrest the atte tion of any observer is the appalling po erty of the rural population. The various estimetes official and non-officies that have been made of the locome per head of popul tion in India at various times is ve tie m tter abs intely in no doubt fine Central Banking Enquiry Committee estimates that tie aver income of on gricult it in Fritish India do a not work out at a higher figure thon Rs 4 a year The vast magnitude of this evil will be better realised when we tak into account the predominence of the a ricultural population in India In 1891 01 percent of the total popula India In 1891 di per cent of tie total por ula tion of the count y lived on agracultare this percenta, e rose to 66 in 1901 and to 73 per cent in 19 1 in 1931 the per ni per felt to 67 and in 191 a little further low r. The por ty of the agric luttist may be du to a v. letty of ce. se but it would appe r that agricul und in a large measure con the ultimater and the second of th slatence. The extent of an "ray hold a which no ke out at about oacres for an agricultural," mily of a persons a too invides also to trade a state of the state o i ast have outlered fargely from or been wiped out by the competition of m chi e m dearticles. He is now being drown steadily I to the sphere of influence of markets both notion I and inter of indicence of markets both sellon I and interplation 1 and he has n it h y the organisation 1 a d he has n it h y the organisation 1 and the history of the history of the little of t

without the backgro nd of general education Afl the o factors lead to the most outstanding feature of Indian rural economy-th chronic and almost hop less INDEBTEDNESS of the eultfyator

Rural Indebtedness -Tle Central Banking Rural Indectioness—He central Panking Daquiry Committee has a timated that the total rural ind btodnes in India is about 18500 erores Though lodebt dness of the artentural popul tion has contin d from oldtimes it is acknowledged that it is rien considerably during the last of ntury and more especially during the last of the root protiem with has got to he feed in any attempt to wards the economic reg as at on f th m sees A pe ullar fc ture of this indebtedoess is that the debt will h remains unpild duri that the debt with remains unpid duri if effection of the citic tr wi out ct d it pases on a furden to his heirs so that many riculturits start thir cre r vith a leavy burden of ance trail debt, which they a teary burden of ance trail delt which they fin their turn pass on with rome of the if ore se to their successes. I gnorance and improvide contravant ne n d concer delian here if riler been held forth as the reasons for the ontinued growth of this heavy load. A marriage feetival in the I mily tempts him to I who out into costly all these if considered the contravant of rural eco omy

Genesis of the Movement —It is no wonder under the crumstaness detailed above to find that the Indien grindlutist has constant the finding production of the constant of the constant that the constant is described by the constant in the co about the first state of the time of the we so them h in how while project a v y accommodating person has ex relaced as exthe on him from which it h is been found almot I may a libe to xtricete him. The business relaced in the total project of the ward is declarated of loter t and the nume ons ser vi e which the sowear pe forms as a retail must be considered to the control of th the agriculturist to the position of a f toiling for general a after generation without v r brig for a r i se from his cinche getting b aubsistence as a reward for oil the tro hi

on the possibility of including land has littled and first banks and the discussion thus littled? Province and Assam show distincts smaller by him was continued by Mr Dispersex of the figures. The Punjab with 26,810 societies U.P. in his "Peoples Banks for Northern stands first in the number of societies India". The easte system of the Hindus and (924) per one lakh inhabitants, while Bengal the ideas of common brotherhood among the which has a larger number of societies than the Moslems were evidences of the peoples' natural Punjab stands second in that respect with 675 aptitude for co operation and the midhie of The progress in smaller areas, like Coorg and Southern India famished a practical proof of Ajmer-Merwara, must be regarded as very this aptitude. The Government of India in satisfactors in view of their small population, 1901 appointed a committee to consider the since the number of societies per one lake linkable question of the establishment of agricultural tants works out in their case at 160 0 and 127 6 banks in India and the report of this committee respectively. It is a disfactory to note that resulted in the passing of the Co operative Credit the co operative movement has a resulted in the passing of the Co operative Credit the co operative movement has a pread not only Societies' Act of 1901. The co operative move ment was thus launched in Table. ment was thus lannehed in India on the 25th March, 1001 The Act almed at encouraging thrift, self-help and eo operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies for small and simple folks with simple needs and requiring small sams only Knowledge or and confidence in their reliow members which ate the keynote of success were ensured by providing that a society should consist of persons residing in the same town or village or group of villages and should be members of the same table also are state. The order to provide facility tribe, class or caste. In order to provide facilities in urban areas for the small man, urban societies were also permitted. The Act introduced the principle of unlimited liability for rural societies. The local Governments were empowered to appoint special officers called Registrars of Co operative Societies, whose duty It would be to register societies, whose they it would be to register societies formed under this Act, to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked will the seed thus sown has grown to day in the course of 40 years into a fine tree with twigs and branches spread out in many directions. and branches, spread out la many directions In apite of several weaknesses in the co operative movement in India to day, it is beyond dispute that the movement has been a powerful Instrument towards the awakening of the country aide ment towards the avakening of the country aide and has led to a steady improvement in various directions of the life of the Indian cultivator Moreover, the use of the vote, the elective system, self-help, self-relinee, compromises gives and takes, work on an organised plan, rounding of angulatities are great items in the training up of a citizen and the co-operative societies have been great schools for political and evice education. Since the launching of and civic education. Since the lunching of the movement in 1904, there have been amendments of the co operative law and committees and commissions of enquiry to remedy defects and to suggest further lines of action

Growth of Co-operation -In the first few years of the movement the number of societies grew up very slowly but the growth was considerably accelerated from 1910 and the average number of societies from 1910 to 1915 was about 12,000 The pace of growth still further quick-ened and now there are 1,26,305 agricultural societies and 18,819 non-agricultural ones Table 1 shows the distribution of these distribution of these

on the possibility of introducing land and agri | major pro-inces like Bombay, Biliar, the Central Indian States and compared to the total population, Kadhmir, Gwallor and Indore lead in this matter though the premier States of Mysore, Baroda and Hyderabad have also made consi derable progress Even more instructive are the figures in Table 2. The total number of members of primary societies stands on the 30th of June 1943 at 69 lakks Taking the normal family at a little under 5, it is clear, therefore, that about 31 erores of the people of India are being served by this more ment. There is no single movement in the country franchit, with such tremendous nossicountry fraught with such tremendous possibilities for the uplift of masses as the co operathe movement and there is no single movement with such a large percentage of the population affected by it Though the Punjab leads in the number of members of societies, 37 0 per one thousand inhabitants, Bombay comes next with 33 8, while Moders Rengal and Sind rank with 33 8, while Madris, Bengal and Sind rank thereafter This shows that the size of societies varies in different Provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society re-compared with the other provinces of British India Of the smaller areas, Coorg takes a leading place with 128 4 members per one thousand-inhabitants, while Travaneere has an average of 28 8. Membership is a much better test, in many respects of progress than the test in many respects of progress than the number of societies and from this point of view, the proress in the Punjab, Bombay, Coorg, Travancore and Ajmer-Morwara must be regarded as distinctly satisfactory There is, however, a third aspect also of the growth of the movement Morely the number of acceptage, or the member Merely the number of societies, or the member ship in the societies is not an index of the work that is being done and of the benefits which are being conferred by the movement on the pepula tion affected. The societies are predominantly credit organisations or rather small banking institutions and the part that they play can be better appreciated from their working capital than from merely the number of members in this direction the marvellous progress so far achieved by the movement should also be noted From about Rs 68 lakhs, which was the average up to 1910, the working capital has advanced very rapidly and stands to day at mere than Rs 1,21 erores It is pleasing to note from Table 3 that this large sum has been derived mostly from that this large sum has been derived mostly from The share capital non Government sonrees from reserve fund and deposits from members together contribute about Rs 48 crore and this is really owned capital or the members own money. The provincial or central bank and other societies contribute a little less—3. societies by provinces It will appear from the and this is really owned capital or the members of table that progress in different parts of India own money. The provincial or central bank has not been uniform. Bengal, the Punjab, the United Provinces, and Madras have the largest Number of Societies—while the other public centribute about 34 erores. This latter

and the control of the first of the state of with 90 and 5 respectively. Among the smaller meany from 1 towns and make them will be areas Coorg comes out first with 196 and as to the trimmary rural societies Following Per Rend of popul tion while Among thermaller meany from 1 towns and make them wait be areas Coorg comes out first with 196 and a side that the Among thermaller meany from 1 towns are side to the trimmary rural societies Following The Coorg and the movement there started comp ratively later The agricultural societies predominate i all the Pro inces and States while non agricultural

such as his current agricultural needs, land lie figures show that these tiny agricultural improvement, purchase of stock and imple societies in India work with about Rs 16 erors ments, manures and seeds as also for unproduce of their own capital (including members' deposits) tive purposes, such as repayment of old debts, in this head) as against their outside borrowed weddings and funerals. He thus requires capital of about Rs 13 erores. The owned credit not only as a producer but also as a capital was thus about 55 2 per cent of their consumer—a producer who hardly makes profits total working capital, and this proportion is from his industry and a consumer who has no rising steadily as years pass by past savings to enable lilm to tide over a bad period, but who is a perpetual borrower lead; to live for to day and letting to morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly anako to the need or scope for improvements in his circumstances, methods In such Imperative for the management of the rural co operative society very carefully to scrutinise the loan applications and examine the purpose for which loaus have been asked and to sec carefully that the loan when sanctioned is used for the specific purpose And vet, it is in this respect that there is considerable scope for Improvement

The funds of an agricultural credit society are raised from entrance fees, share capital deposits or loans from non-members, loans from the central or provincial banks, ioans from Government and the reserve fund. The lncome from entrance fees and share capital is small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. The volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inspired and the soundness and the stability of its financial these banks as distinguished from borrowed nosition The ideal placed before these societies is the development of members' deposits to the extent of making the society fluorenally self-sufficient. These deposits by members further serve the purpose of stimulating thrift and saving liabit among them, and are, therefore, eminently desirable Attempts are every-Attempts are where made to eucourage them, but the response has been small, except in the province of Bombay, where they form one fifth of the total working Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present

Low dividends and voluntary services resulting in low cost of management have made it possible to divert a substantial proportion of banks are mainly of two kinds, viz, savings and the profits of these societies to reserve funds, and thereby provide against unforescen losses, confined only to selected central banks in selected bad debts and losses on the realisation of certain areas. The principle usually observed by these pages and by the selected selected central banks in selected by these bad debts and losses on the realisation of certain areas. assets such as by investment depreciation. The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working capital

The funds collected by the agricultural societies in India at present are by no means negligible. They aggregate to about 31 crores Their financial position as on the of rupees 30th of June 1943 stood thus

In thousands of rupees 4,45,24 8,82,36 Share eapital Reserve and other Funds Deposits 2,84,89 Lonns 12,95,98 Total Working Capital 29,08,47

Central Financing Agencies -The forma tion of banks in urban areas on eo operative principles, with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sound basis, the Co operative Act of 1904 was amended in 1912 and the Co operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies thereafter the number of central financing agencies grew rapidly all over the country, especially in the Punjab, Bengal and the United Provinces The function of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from a deficiency of funds and to provide proper guidance and inspection over them. On the 30th June 1943 the number of ecntral banks was 589

There are four main sources from which a thich control bank derives its working capital which the stood in 1942 43 at 32 8 erores (a) Share it to capital, (b) Reserve, (c) Deposits, (d) Loans

The paid up share capital and reserves of central banks constitute the owned resources of resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans It is usual to prescribe a sultable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8 Deposits from members and neh members constitute the bulk of the borrowed capital of central banks. The total amount of deposits held by central banks in the year 1942 43 from individuals and other sources amounted to Rs 16 7 crores and from primary societies to Rs 5 crores Deposits in central Deposits in central Current deposits are not universal but fixed areas The principle usually observed by these banks is not to grant loans to societies for periods longer than those for which deposits are available and where loans for long periods are advanced, the periods of deposits are also comparatively long. In addition to funds obtained by deposits, central banks ralse loans either from outside banks, from other central banks, from the local provincial bank or from Government The total amount of loans held by the central banks in 1942-43 from outside banks, from other co operative banks and from the provincial banks was Rs 3 1 crores and from Government Rs 66 lakhs Central Banks do not directly borrow loans from Government, the central banks of Indian States, excepting Mysore and Baroda and Cochin do to a greater or less extent hold loans from Government, while in Gwallor, loans from

Government constitute the most important, it is therefore thought ne essary to in ist item of the total working capit ! Dorrnwings in the control of the commodation obtained from the Impe is lank of India againet Government Scentile of Promisory Notes executed by societies of Promisory Notes executed by societies of Promisory Notes executed by societies that of the province has prescribed of the province of the imperial Bank or any other joint atock bank or with one another This rule is however not or with one another This rule is however not rigidly observed in the Punjah and Madras riginy observed in the runjan and antales be eral centrel bunks in the country due to their long atending now possess enficient resources t be independ ut of any outside financial assistance but they all continue credit arran ements melnly with the provincial bank on which they rely for emergencies

In the initied stages several centrel banks developed from a dinery nrban societies which gr nted advences to indi idnal sh reholders A few of such central hanks have contin ed the a two of such central makes nave contain of the practice and the amount advanced by entr I banks to indi idual members during the year 1942 43 wa. Rs 3 rore chi dy in Bon bay the Puni b nd Madras This practice ho ever is gr dually being abandoned as th h f function of a central bank is to fin nee ocieties and to serve as their balan ing entre Tle total ad ances made by centr I banks to societies at the end of the year 194 43 amounted to over Ra 18 O crores

After meeting management expenses the profits of central banks ar distributed as alloca-tions to reserve and divid nds to shareholders The combined net profits of the 80 central banks of the country during the year 194 13 amounted to Rs 45 i kbs on the total * rid g capitel of Ra 33 crores the rate of di idend paid varied from 3 to 6 per cent in different part of the country but the most usu Trate paid was a pere nt per annum

The position since June 1933 has grown more scrious, since the fall of prices of agricultural produce and the world crisis and trade depression reduced the repaying capacity of the agricultural borrower considerably and increased the terrible load of overdue loans in rural credit societies. This continued growth of overdue loans is an ominous portent and reflects very badly on the soundness of the co-

towns in not basing the loans sanctioned on the life. But it cannot leave any a leginate imagine reparing early of the berraving member of saving which could be embryed to reads in in sanctioning ions for unp oducil e thou I is stiflies or instortion. Of these the most import inture the marketing succeeds to the property of his ancestor and societies particularly for the sile of cotton in which is in force in some European countries Bombay, and the consolidation holdings and does not obtain in India. Lich heir is given a better living societies in the Punith proportionate charge of each item of the inherited

rapld multiplication of sale scaletics and their of cultivation in common efficient vorking. It is really in the develop-ment of this form of co operative effort that ultimate success must be sought for in India, for credit alone could never bring comfort Where it has been tried with eneces, the results have been extremely entire eters to the members The tremendous headwar made in European countries like Denmark and in the United States of America in co operative morketing organisa tion and the successful examples of the cotton sale societies in Bombay should arrest attention and invite concentration on the co operative organisation of aericultural marketing jute and paddy sale societies of Bengal have not met with success, it is true, but the cotton grower in Gujarat and the Bombay Karnatak has reaped considerable benefit from the cotton sale societies. Absence of fraud in welghment, adequate and high prices, insurance of the produce against risks of fire, prompt payment of sale proceeds, financial accommodation till the of sale proceeds, financial accommodation till the produce is sold, information of dally price fluctuations in the Bombay market, supply of gunnles and genuine and certifled seed, bonus and a dividend are no small gains to the agricul turist, who was otherwise at the morey of the adatya or worse still of his village sowear The cotton sale societies of Sura recently combined in a federation Surat havo whileh has taken over the co operative ginning factory already started by the members A few societies for the sale of other articles have also been organised in Bombay, such as jaggery, tobacco, chillies, paddy, onlons and arecanut Bengal has several jute sale societies with a Jute Whole Bengal sale at Calcutta and several paddy sale societies with a sale depot in Calcutta. The Punjab has several commission shops which provide for better prices, but which sell to local merchants yet, rather than to the merchants at the port. Madras has a number of sale societies, not yet made much progress Recently pro consolidation has been achieved in the Chattle yineial co operative marketing societies have garh Division where scattered holdings at been started with government encouragement and assistance in Madras and Bombry, the results of the working of which will be writtened. but their transactions are small and they have

property and not a share of the vhole, equivalent to his portion. The result is that successive Marketing Societies —Maileting of Agricul property and not a share of the vhole, equivalent tural produce is the real cru, of the whole to his portion. The result is that successive question of rural prosperity and betterment and generations descending from a common ancestor. as group marketing is always more effects of than inherit not only amalier and smaller shares of individual marketing especially in India where this land but inherit that land broken up into the individual producer is illiterate and constitutes a smaller plots. Fills continues the small unit, co operative marketing has been accepted now as one of the most desirable iraginentation, which is accentiated by the ideals to work for It is only the complexity of the working of co operative sale solicities, the purchase and sales, by the extinction the difficulty of providing for marketing finance of familles in default of direct heirs and the latest area to t the lack of expert knowledge on the part of division of their property amongst e large cooperative officials and the lack of fodown number of distant relatives, end by the brea and storage facilities that have prevented the up of the foint family system and the custom The disadvantages of fragmentation ar

obvious A part of land is nasted owing t fragmentation being so excessive as to preven any as ricultural operations, and another pailis lost in boundaries. I regmentation involve endies waste of time, money and effort, it restrains the cultivator from attempting improvement. It prevents him from adopting selectification. It describes him from mothods of cultivation, it discourages him from earrying ont intensive cultivation, it enforce uniformity of cropping, and especially restrict the growing of fodder crops in the period during the control of the control which cattle are usually sent out to graze on the fields. The economic loss due to this senter can be easily imagined, and the only solution This most difficul consolidation of holdinga important and interesting experiment originate in the Punjab in the year 1920 The procedur adopted In establishing a Co operative Consolide whereby a majority in a general meeting might approve a method of repartition, and then carr out actual adjustment of fields and holdings ! such a manuer that no single individual migh have any grievance As the result of patier work which has now oxtended over 20 year some very strlking results have been achieve and the movement for consolidation in the Punjub has assumed the dimensions of a It is steadil important agricultural reform gaining in popularity, and, as more staff is traine and the people become better educated to the advantages of the system, the figures for the are consolidated are mounting up year by year This work began in 1920 21 and in 10 year since then, 203,462 acres were consolidated b the end of July 1930, ont of the whole cultivable area of about 30 millions, at a average cost of Rs 2 5 per acre

In the Central Provinces some success ! been started with government encouragement rand assistance in Madras and Bombry, the results of the working of which will be watched with great interest by co operators all over the country. Both these Societies have been rendering useful service to the country by undertaking on behalf of Government work in connection with food distribution and rationing.

Consolidation of Holdings—The law of primogeniture, by which the eldest son alone. the one built of the perman at right holders | Collectors the work being co ordinated by Divi holding not less than two thirds of the occupied area in a village to agree to the preparation of a scheme of coi solidatio which a heme when confirm d becom a binding on all the permanent right holders in the village and their auccessors In Interest

In Bombay a Bill was introduced in the Legislative Council in 19 3 to deal with certain features of the problem. When this Bill was introduced a good deal of opp. Ition was ereated and it had to be ultimately dropped.

There are 11 so lettles for consolidation of heldings in the United Provinces and 11 in the Baroda State based on the Paulab model

Rural Reconstruction -One of the main reasons why the achievements of the co operativs movement fall e short of the expectations of the promot rs and workers lies in the artrem backwardness of the rur I population and it I not too much to state that th ultimata's seces or otherwise of the ce operative movement lies bound up with gen ral rural de elopment and progress So long na agriculturiate remain atterped in lilitarcey and ignorance re heavily and almost hopelessly indebted have a istall tie and listles outlook ou life and I ave an extremel low standard of living carrying on agriculture with simple tools and implements in more o with simple tools and implements in more test approach to the ideals and the goal of the co-operative and all other rural we ement is possible The co-operative movement itself is I deed a great experiment in roral reconstruction siming to pr teet the agriculturist from exploitation of the unrer the middl man-dai lend them r chant but con entration on the credit side of the movement with but half he red attempts

of the movement with but helf he rad extensite to the co-perative organisation of supply and m feeting a growing m itsplicity of in the neglect of the subsection is a little registre of the subsection in a little registre of the subsection is a little registre of the subsection in a little registre of the subsection and moved by enthaniasm to nume their oppor-tunities to the best advantage by contributing to the welfa of the humble village folk. The best known of such centre is t durgace in the Punjab Thow kd neth recovers education, as lation medical r fiel improvement of arriculture female education and maternity w liste

sional officers The Punjab has appeinted Brayne of Gargaon fam as Commissioner for Rutal Recon troction and Bengal has made a similar appointment and it appears that all Provincial Gov rements are devoting con. der able ti onght to this very import ut work

Betler Living Societies -- The Punjab 1 s been responsible for introducing thi very desir shie type of ce operati e soci ty to promote better living among its membere. Ther e e mo e than 300 such oct it e i that province and they have been doing quite imperiant work in their own way The soleties do not collect any fewy from their members except the small

any tety from their members except to small ntrance fee and they lay down a pregremme of work and make rule for carrying it out from year to year violation of which is punishable with fine under the hylaws. Though these societies in the first lust noe have for their object the curt liment of rulnous expenditure. on marris s and other secial occ si ns tiey h e also helped in various oth r matters so that ep t from sa ing to their members thon and of tupe each year th y ro contributing to the gen rol villags uplift in some mea ure Some of the societies have levelled and peved anden pt the villag lands some have promoted sanitation some have indue d the villegers sanliston some have induced the vinegers to imp ove ventilation in their hous come have repaired and roofed the village drinking. If some have arranged the tall in nure should be pitted some he discouraged expenditure on javell my and some have stopped was to on forms fewen ry and some naves to produce to on; I may flus a variety of ways these so of the generally have been great f ctors in the impro ement of conditions to the life of the vill g it fean tly hoped that such bett living societies ean my noped the taken but in a sorter as will be sterted to large numbers in it everious pr inces of Iodia or bott still that the cooperatic eredit sociaties would take opon themselve the function performed by these sociaties nod it is the term better living be given as wide e connection as possible or that the co-oper lite no ement would be doing good to itself a the nation by carrying on the seneral wo k of village i pilit as well as its own sconomic objective of strengthenin the position f the agriculturi t

Urban Credit Societies --Whil the chi f objective of the cooper tive mevem at w from the fir t to do a rvice to the rural popula tion it must be remembered th t the Ac of 1904 permitted two clas es of eocieties -rurel nd a ban recognising thus th enitability of

nd has recognizing thus the entablity of the enoperative method is obtained by the pre-blems of mb population also At pre- at there are in all 380 mon agicultur leed the with memberal p of 35 83 of the 7943 are of the social sides re to be g seefelie for other purposes

the stimulation of trade and lude tries in and around district and talula towns. The principal business of these bands is chort-term credit and in this respect they recomble the ordinary commercial banks. In the abone of any industrial co-operative bank, it is also for the peoples' bank to finance small industrialist peoples' bank to finance small industrialist which still play a very considerable part in the industrial economy of India. Another very important function which fails to peoples' banks is the financing of the marleting of the produce of the land from the field to the port or to the principal market centres and thus asolate in the land works on a neutual bass. It has no share explicted and works on a neutual bass. It has and the same of the same and th principal market centres and thus assist in the capital and works on a mutual bisis. It has desciopment of the Internal trade of the country now, bowever, widened its scope and has been now, bowever, with the Bombay and Bongal Presidences that we meet with some good ordinary branch. It has by now written a institutions functioning as peoples banks. In Madras there are 1,170 non agricultural endit society has had to seed am digmention with a societies but most of these are not real peoples. Madras there are 1,170 non agricultural endit societies but most of these are not real peoples banks. The Punjah has 1,000 unlimited liability societies and only 227 with limited Even here we hardly find any develop llability ment of real peoples banks. In Bengal the limited liability urban credit societies number 582 and though these societies seem to have you public confidence the more important of them public confidence the more important of them are salary carners eredit societies. Some of the divisions especially the Chittagong divisions have several big concerns, however, working on sound thes. The question of starting Peoples' Banks in Bihar and Orl's has not yet been seriously taken in hand. In the Bombay Presidency, institutions with a working capital of Rs 20,000 and more are classed as urban banks. Since 1922 co operators in this Presidency inaye been yery keen on having a full dency linve been very keen on liaving a full fledged peoples bank in every taluka town, for it has been realised that with the proper development of urban co operative banking, there is no doubt that the various units will come into touch with one another and that mutical settlement of terms and co ordinated and harmonious work will greatly assist the development of inland trading agencies, Peoples' banks are a repository of peoples sayings, a nucleus for co operative activity and an institution giving facilities for internal remit tance and it is quite necessary therefore that their share capital must be pretty large. In the Bombay Province on the 30th June 1940 there were 181 urban banks most of which are fairly successful. The total membership was 210,460, the working capital was Rs. 5,07,51,125 and the reserve fund amounted to Rs. 59,25,040. It can be said without evaggeration that the mutual settlement of terms and coordinated It can be said without exaggeration that the development of urban banking has been a distinct contribution of Bombay to the co operative movement in India and other provinces jeet and the local Governments were left free to might well follow Bombay a example in this adapt the 1912 Act to their own requirements direction

An important variant of the urban co operative society is the Thrift Society The system adopted is to collect regular savings every month for a continuous period of two to four years, invest the collected amount to the best advantage and pay back to the subscriber his amount at the

Joint sice! insurance company, while the Madras societs -the South India Co operative Insurance Society-started vigorously as a full fledged life insurance society with share capital and compartitively low rates of premia, and has already written a large business of over Rs 32 crores

Review - The Co operative Societies Act of 1901 had limitations which were soon recognised and at a conference of the Registrars, a bill was drawn up which became the Co operative Societies Act of 1912 This Act remedied the defects of its predecessor, anthorized the regis tration of societies for purposes other than prodit substituted activities and traditional societies based oredit, substituted a selentific classification based on the nature of the liability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks

In 1911 the Government of Indla reviewed the altintion in a comprehensive resolution and recommended a change in the policy regarding the grant of loans to members, so that they might lend mone; for domestic purposes as well as for agricultural ones in order that the members wildly confine their desired and the confine their desired. might confine their dealings with the Co opera tive Societies and be weared from the sowears In 1914, the Maclagan Committee on Co operation was appointed and its report in 1915 led to the reorganisation and overhanling of the whole administration of co operation Punctual repayment of loans was insisted upon, and all those societies that falled to live up to the ideal of eo operation were sought to be climinated From this time onwards the share of non officials In the movement assumed increasing importance and it came to be realized that for the success of the movement, deofficializing of the same was necessary The Government of India Act of 1919 made co operation a provincial transferred sub ject and the local Governments were left free to

The steady growth of the Central Financing Agencies relieved the Registrars partly of the need for attending to this very important matter in the development of co operation, but propagradastill remained the function of the Registrar and his staff, paid or honorary, and it was perceived that non official institutions should be established to take over this function from official hands. Accordingly Co operative Institutes were started in various Provinces. be established to take over this function from the first over the function from the first over the function from the first over the function from the first over the function from the first over the function from the first over the function from the first over the function from the first over the function from the first over the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function from the function fr

It may also be mentioned that the Indian States were not slow in introducing flie co operative movement within their limits, and the and by promoting secondary occupations for the movement in some of the more important of the agriculturists on a co operative basis, change the States, such as Hyderabad (Decean), Mysore, whole emphasis of the movement from merely Baroda, Gwalior and Indore in a made co isider able progress, more or less on the same lines as Active mass soile efforts at rural reconstruction those followed in the neighbouring British and at increasing the earnings of agriculturists Indian Provinces

The landmarks in the history of the co operative movement in India are the Co operative Credit Societies Act of 1904, the Co-operative Societies Act of 1912, the Maelagan Committee Report, 1915, the provincialisation of co operatica, 1919, the establishment of institutes,

The movement has thus developed rapidly and the stages of its evolution may be briefly as-agricultural credit, oredit, central credit organisations, aper cooperative banks, propaganda by non officials, non credit agricultural co-operation, urban co-operative banking, long-term loans and debt redemption schemes, land mortgage banks,

the interests of the agriculturists Money-decades

The growing difficulties of the Cooperative lenders' bills have been passed to restrict the Movement throughout India in times of earlie of usury and debt legislation has been or is unprecedented depression led the Government being passed in Madras, Central Provinces, of India to hold an Ali India Cooperative Bombay and a few other provincers as to reduce Conference at New Delhi on the 20th January 1934. In December 1936 and 1939, other Conferences of Registrars net mt Delhi and to be structured and reorientation of the cooperative discussed this situation further. movement has also been taken carnestly in hand, which would by the conversion of the credit primaries into multi purpose societies, by or ganising co operative sale of agricultural produce credit to the entire needs of the rural population represent the keynote of the present day trend of the Co operative Movement

The titanic struggle in which the forces of barbarism have drawn the Empire has led to concentration on war effort increasingly in this country on the part both of officials and nontien, 1919, the establishment of institutes, union; and federations for propaganda, the Committees of Enquiry into the cooperative movement in several provinces, provincial in hand a few years back towards the alliage and its problems and towards a reorientation movement in several provinces, provincial and expansion of the Cooperative movement on Agriculture, 1928. Reports of the Indian Central and Provincial Banking Enquiry Committees, 1931, and marketing surveys, debt concilation schemes, land mortgage banking with the end of the War in Lurope, the Governments and organisation of provincial marketing marketing societies officials, and the drive that was taken earnestly are increasingly busy with formulating plans and policies of post war reconstruction and it is of interest to note that Co operation looms large in these plans and policies. Developments in coperative marketing and rural industries can be expected at an early date and co operation, though more controlled by Communication. though more controlled by Government than ever before, will be the accepted organisation An important for schemes of rural betterment co operative education, rectification and consoli dation of the credit movement, organisation of supervision over primary societies and rural reconstruction, and co operative marketing and the report of this Committee is expected to In recent years, the Provincial Governments lay down the lines and principles of Co opera have been seriously undertaking programmes in the development in India for the next few

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA.

The Association of British University Women Its objects in India was established in 1913 are .

(1) To facilitate intercommunication and co operation between women of any nationality who are members of the universities of the United Kingdom, resident in India

To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federa-tion of University Women, and otherwise as may seem expedient

(8) To act as an organisation which shall afford opportunity for the expression of united oplnion and for concerted action by university

women Membership is open only to those women who hold degrees in any university in the United Kingdom, or hold Oxford or Cambridge Honours Certificates but Associate Membership is open to women who have studied at a British University for two years and each Members Branch may admit as Honorary women who have advanced the higher education and interests of women

The Association of British University Women has had several branches The address of the Honorary Secretary, Bombay is as follows

Miss F Sulivan, MA, 19, Gowaha Tank Road, Bombay 7

The Delhland Punjab Branches came into existence in 1918 The Calcutta and Bombay Branches have been influential and have repeatedly inter sened with good effect to educate public opinion with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc, and have supplied, through the International Federation of University Women, information on Secondary Education in India carried through an important exhibition of Food Products This branch, however, has not functioned for a number of years

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub committee, organised public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted

A valuable part of the work of the Association was the establishment of Women's Employment Bureaus in Calcutta and Bombay They were remarkably successful The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council

As a means of promoting friendships between women from various parts of the United Klac dom, with widely differing tastes and interest and spheres of life in India, and as an instrument for affording opportunitles for asseniness to educated women, the Association of University Women has a useful function to perform

This Association is Federated to the "Fed eration of University Women in India, and thus forms one of the Units of the India. Federation

Federation of University Women in Indi

The Federation of University Women in Ind unites various Associations of University Wom throughout the country, its object being to ment friendship and understanding among University Women of all races resident in India at the further throughout throughout the further throughout throughout through the further throughout thr to further their common interests It is affillat to the International Federation of University Women which has a membership of over 60,01 representing thirty-three nations and whi seeks by scholarships, exchange of teache group discussions and conferences to unite common action and understanding the Univ sity women of the world

The Federation in India is controlled by Central Committee at present located Bombay It has branches in Bombay, Kod

provided chaplains for its servants lains of the present establishment are maintained for ministration to the Government's British born servants, eivii and military They are chosen by the Indian Chaptaineres Board sitting in London, are appointed by the Secretary of State, are posted to Dioceses by the Governor-General in consultation with the Metropolitan, and within their Dioceses are posted to stations by the Provincial Governor on the recommendation of the diocesan bishop. Their pay and allowances are wholly met by Government. In spiritual matters tiley are subject to the supervision and jurisdiction of their bishop, and while Government servants, eivil and military are their ling schools for boys and girls, many of them in hill primary charge, they are the parish priests of the stations. The provincial Governments assist chaplalneses to which they are appointed and these schools with grants in aid both for building chaplaineres to which they are appointed and are responsible for the eare of all members of the church in their parish except in so far as Indian Members of the Church are eared for by missionaries or Indian elergy Besides providing chaplains the Government of India, again following the practice of the East India Company, has provided or assisted in the provision of churches and their maintenance, and also of cemeteries Where numbers do not warrant the provision of an Establishment chapiam Government liag assisted in the provision of elergy by grants-in-ald, and when from time to time the number of Establishment chaplains has been reduced special grants-in aid have been granted Lstablishment and all grants-in aid are subject to revision and are in fact rovised from time to time The latest retrenehment, carried out in 1940, reduced the number of chaplans by twelve, and savings effected, along with those under other heads, amounted to Rs 187,276

The great influx of British troops caused by thio war in necessitated the provision of additional religious ministrations. This need was met by the organisation in 1942 of an Indian Army Chapiains Service. It provides mir strations for Indian Christian as well as British

Christian troops

(The Leeleslastleai establishment includes besides Anglican chaplains, Church of Scotland, 1 ree Church, and Roman Catholic chaplains, for ministrations to members of those communions, and churches and grants in ald are provided or given on the same principles as for Auglierns)

The special interests of those parisidoners whose domicile is England in the continued use, should they so desire, of the services of the Inglish Prayer Book which the Church of India is now free to alter at its discretion, are safeguarded by certain of the canons, and these interests together with other matters concerning the undertakings and relation of the Government of India to its chaplains and the Church In the Church their numbers still in some Christian faith in India. The Portuguese may receive executing those of Indian members, and therefore by regarded as the first missionaries of indian in the Church as a vhole the number. Translate and from their arrival at Gos the first in the church as a vhole the number of indian and from their arrival at Gos the Franciscans and Dominicans who accompanied their ficts in large numbers threw themselves in the facts in large numbers threw themselves in the first many and Indian elegy 716. I want later their ficts in large numbers threw themselves in 1904, and Indian elegy 716. I want later their ficts in large numbers threw themselves in 1904, and Indian elegy 716. I want later their ficts in large numbers threw themselves in 1904, and Indian elegy 716. I want later their ficts first members, the famous St. Francis

The chap- distinctions whatever in the Church Indian elergy frequently preach or celebrate for European congregations, and in a few instances are in permanent charge of European parishes. The Indian lalty though usually preferring services in their own languages are everywhere free to attend English churches and to be enrolled, if they wish, as parisitioners

> The education of European children, and more particularly the children of the Domiciled and Angio-Indian community, has from early days been a concern of the Church In addition to day schools it has established over 70 board and current expenditure, just as they do all other schools, according to the rules of the education codes. The schools are inspected by Government inspectors. Indian boys and girls are admitted to these schools, but the number that may be taken is limited to a percentage fixed by the local Government An appeal issued by the Archbishop of Canterbury in 1938 for the endowment of these schools had produced by June, 1939, just under £30,700 The fund is known as The Anglo Indian Schools Fund and is still open for the receipt of donations Indianisation of Government services, especially of the railways, customs and post and telegraph departments has severely hit the Domielied and Angio-Indian community, and the ability of parents to pay fees is steadily decreasing Hence the urgent need for increased endowments The existing endowments of ail the schools yield an income of less than £1 per child per annum

(The Church of India is not the only com munity responsible for European education in India The Roman Catholies, the Church of Scotland and the various free churches provide schools for their children, and receive similar assistance from Government)

The Government of India Act of 1935, section 83, provides for the continuance of government grants to European schools at a total figure in each province not less than the average figure for tho ten years preceding 1933, unless the whole grant of a government to education is reduced, when the grant to European education may be reduced in proportion And, as a result of the recommendations of a sub-committee of the Round Table Conference, provincial boards for Angio-Indian and European Education liavo been set up, and aiso an Inter-Provincial Board, to consider and advise Governments on matters accorded with the control of the matters connected with the schools

Missions

In Maiabar, on the south west coast of India, resident in India, full members of the Church of Irelia, and are a most important part of the connection with the Church in India, full members still in some Chiristian faith in India. The possibly from the 1st century AD They are called "Syrian" Christians owing to their connection with the Church in Syria They it Irelia, and are a most important part of the do not appear to have attempted to spread the India, there is a connection with the Church in Syria They is executing those of Indian members, and therefore be regarded as the Portuguese may some stations being still exclusively I propern, in Testing In The India The Portuguese may be it die in the name of it die in the name of the connection with the repeat of the connection with the church in Syria They is the connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the Church in Syria They is a connection with the control of the connection with the church in Syria They is a connection with the church in Syria They is a connection with the control of the connection with the church in Syria They is a connection with the control of the connection with the control of the connection with the control of the connection with the connection with the control of the connection with the connection with the connection with the connection w

Tavl r being sent to Go in 1991 Unuer his leaderenip the pre ching of Christianity was arried on with great earnest-hess. The missionary work of the Rom n I tholic Church thus begun has been continue i D thelic Church thus begun has been continue | Sanatoria and 15 homes for the Silia of Dc I and at the present day the number of Indian | Sanatoria and 15 homes for the Silia of Dc I and at the present day the number of Indian | Sanatoria and 15 homes for the Silia of Dc I are the state of the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Silia of Dc I are the state of Sanatoria and 15 homes for the Sanatoria and 1 (Censu 1931) to which may be dded 654 939 Syrian Christians attached to the R man Chnrch The number of independent Syrian Christians

(C nsus 1931) is given es 525 607 Protestant missions did not begin till the 18th Century, and as missionaries were not allowed to establish themselves in the Comp nye territories they worked from Danish t rritory and in Indian States These missionaries were I therans but as stated above were in the itter part of the 18th Century assisted with unds from England Famous men among th m were Ziegenbaig Kiernander Schultze and Christian Friedrich Schwarz By the end of the 18th Century it is believed that there were in lost century it is believed that believed the South India about 30 000 Lutheran converts in 1800 the famous Baptist trio Carey Marsh man and Ward establi hed it mestives t Seram pore in Bengal (Carey had come to India in 1 93) Men of humble origin and education one was a cobbler one a ragged account while is and no a printer they display d great abil \$3 and no a printer trey unputy u access and to a printer trey unputy u access and threw themselves not only into eta gellem but into the accentule study of I dia lai ngu ges and uture and its flora and fauna Books and translat ons poured from their printing press Carey was made professor of Sanserte in Lord Wellesley a College for the training of all the Wellesley and Control of the American Control of the Con for the training of ci il and military officers

The 19th Century saw a great increase in The 19th Century awa agreat increase missionary effort of every sort. This was due to the opening f the Company's trito les to mission ries by the Gov remeent of India Act of 1813 a d it was nly after that d to that Angilean (Church of Engl ad) missionery Societies took up work in India namely the Church Mis ionary Society and the Society fo the Propag tion of the Gospel by sending as mission ries ordained elergy of the Church of Engl nd those bither to sub idised o a nt by the SPCk (see above) being Lutherans first mission ries to rrive after the passing of the Act were American Congreg tionalists London Mis ionary Society were also early in the field and Presbyterians from America and Scotl nd soon followed In the course of the e ntury India became cove ed by a network of missi as engaged not only in ev ngelism but in education I work in a hools and colleges i medical work a d in ind at les Among famon names of missionary education lists ar those of Dr Duff of Calcutta and Dr Wilson in Bomb y in the education of women mis lons m y fairly claim to hav taken the lead. The total numbe of mi lo ary societies from Enrope and America working in India is now o er 150 For con uits tion and common ct in there is a N tional tion and common ct in there is a N tional Christi a Connell with headquarters at Nagpur first org abed i 1914 and in co net in with this there are 10 Provi clai Christian Councils

wh re he arri ed training institutions 217 indu trial schools the t tal number of Protestant Chr stl ns lu India making the total number of Chri tians including Poman Catholics Romo Syrians and Syrians (see above) 6 95 763 included in this tot. I are 16 771 E ropeans and 138 58 Ag Indiana. Indiana B liable figures of a latter date are not veilable Reum n

Sine the Great Wartt er has been widespread interest in India in the subject of the reunlo of the separated Christian bodies In South india the movement for union was started in 1919 by a gro p of Indian elergy This has led to the preparation of an eleborate s beme of und a the parties to which are Anglicans Methodists a d the already nited South Indian United Chur h which e n it so I Fresbyterian and C agr gatlonalists Much time in thou it have be a given to the preparation of thes heme the problem presented by the task of reconciling Anglican P byterian W slovan ad Congrego

tionalist p in lpies being of extreme difficulty II the s hemo is accepted the four southern dioceses of the Chur h of India Marras Dornakai Tinnevelly and Travancore will be sep rated from the rest of the province and form pa t of the united Ch rch which is pledged to m int in epi copal g ernm at Th present m int in epi copal g ernm at Th present po ituno of the a heme is the tit has hee accepted by the Chur h of Indi Bu m and accepted by the Chur h of Indi Bu m and Copion at n meetin of its Geu ral Council in Jenuary 1945. It la al o been accepted by the Methodsts. The deel into of the Schol I dt United Church will be made the United and whether it decides to power the In 194 and whether it decides to power ted in 194 happed to the Church of Contractional of Decadure

The exitence of united chi ch in South Indi consistin of Conregational and Presby trian elements has been mentioned as preceding paragraph in north the Chur had been in a tree of the child the child in the child i

In addition to the two pri cipal mission ry soci ties of the Church of r gland the S I G (Society for the church of r grand the 8.1 G (Society for the Propagati of the Gospel in F eig Parts)a d the C M S (Ci ur h Mix for ry Societ) leady mentioned whose mis lo ari in Indi Burma nd Ceylon numbered accordin to the l te t av Hable figures —

THE ROMAN CATHOLIC CHURCH.

The Catholic community is composed of the following clementa -

- (1) The 'Syrian' Christians of the Melabar stands as follows —
 Coast, traditionally said to have been under the Sacrel Congregation of Extraordi
 converted by the Apostle St. Thomas | nary Feelesinstical Affairs They were brought under alless unce to the Pope by the Portugue o in 1590 and pinced first under Jesuit bishops and then under Carmelite Vierr-Apostolice They are at present ruled by an Archblidge and three suffragan Bishops of their own Syrine rite
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west const, Ccylon, Bengal, etc.
- (3) European immigrants at all times, in cluding British troops
- (4) Modern converts from Hiadulam and Anlmism in recent miscion contres
- (5) Recent converts from the Jacobite com munity in Malabar, of which 3 Bishops, 71 priests and some 28,000 laits have been received into the Catholic Church

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline to meet this decline fresh misslonaries were sent out by the Congregation de propaganda side, till by the middle of the 19th century the whole country was divided out among them except such portlons as were occupied by the Goa Hence arose a conflict of jurisdiction cicrgy in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the propaganda (lergy This conflict was set at rest by the Concordat of 1886 (amended by the Agreement of 1928, abolishing "double jurisdiction') At the same time the whole

countr, was placed under a regular hierarchy s lil h after sutrequent adjustments now stands as follows -

The archbishopric of Gos and Damaun thasit g ome extension into British t ri tory) with suffragan bishopries at Cochin and Mylapore (both in British territors)

Luder the Shered Congregation of Oriental Churches -

The archibishopric of Frnakulam, with suffragan bishopries of Changanacherry, Kottayam and Trichur

The archbishopric of Trivandrum, with suffra gin bi hopric of Tiruvelin

Under the Stered Congregation of Propaganda Tide -

The archibishoptic of Arra with suffragan bishoptics of All thabad, Ajmer and Lucknow and the Presectures Apostone of Indore and

The archbishopric of Bombas with suffragen bishouries of Poons, Manualore, Callent Tuticorin Trichluopoly, Missions of Karachi and Ahmedabad

The archbishopric of Calcutta, with suffragan bishopries of Runchi, Dacea, Chittagong Krishinagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkin

The archbishopric of Madras, with suffragan bishopries of Nellore, Hyderahad, Vizara Nagpur, Bezwada Cuttack and Guntur, the Prefecture Apostolic of Jubbul pore, and the Mission of Bellary

The archbishopric of Pondictor's (French), with suffragan bishoprics of Combitore Kumbakonam, Salem, Malicca and Bangalore

The archbishopric of Delhi and Simi with suffrsgan by hoprics of Lahore and Mul t the Prefecture Apostoli of I a hmir

The archbishopric of Verapoly with suff bishoprics of Q 1 ion Kottar Triva id T and Vijayapuram

The archbishopri of Colombo (Ceylon) with suffrag bishoprics tk ndy Galle Jaff Tri com ice and Cl I w
